Oregon Renewable Portfolio Standard Eligibility

Multi-fuel Eligibility Attestation

Pursuant to Oregon Administrative Rule 330-160-0060 (1), "multiple-fuel facilities are subject every three years to a review of the percentage of the facility's electricity generation that is allocated to RPS-eligible fuels." OAR 330-160-0060 (4)(a) states that a form may be submitted to the Oregon Department of Energy attesting that the physical equipment and operation of a facility has not changed in a manner that would affect the facility's RPS-eligible fuel allocation. If no changes have been made to the facility prior to the certification expiration date, the generator representative may complete the following attestation and submit to the Oregon Department of Energy:

Facility Name: _____

Generator Representative: _____

Facility Owner (if different from Generator Representative): _____

WREGIS GU ID: _____

Oregon Certification Number: _____

I, _____, the generator representative for _____, hereby
(Name) (Facility Name)

attest that there have been no changes to the physical equipment and/or operation of the facility that affect the facility's Oregon RPS-eligible fuel allocation that was established when the facility was originally certified by the Oregon Department of Energy. I declare that the information entered above is true and correct and understand that if any changes are made to the facility that affect the eligibility for Oregon's RPS, the Oregon Department of Energy must be notified immediately.
