

EXHIBIT AA ELECTRIC TRANSMISSION LINE

OAR 345-021-0010(1)(aa)

OAR 345-024-0090(1),(2)

Exhibit AA requires information about a proposed energy facility if it is a transmission line or has, as a related or supporting facility, a transmission line of any size. Exhibit AA is not required for this application because Madras PV1, LLC (Applicant) is not proposing to construct a transmission line of any size. The Madras Solar Energy Facility (Facility) will interconnect with the existing Portland General Electric Pelton Dam to Round Butte 230-kilovolt transmission line via a point-of-interconnection switching station within the Facility site boundary.
