Tetra Tech, Inc.

This page intentionally left blank

Oregon Administrative Rule (OAR) 345-021-0010(1)(y) requires proponents to provide information demonstrating that any proposed facilities that emit carbon dioxide (CO₂), such as a base load gas plant or a fossil fuel-burning power plant, will comply with applicable carbon dioxide emissions standards.

The Nolin Hills Wind Power Project (Project) does not include any proposal to construct any CO₂ emitting facilities, therefore the Project is exempt from the requirements of OAR 345-021-0010(1)(y).
