

Oregon Department of Energy

Complete ASC Public
Information Meeting –
Wagon Trail Solar Project

Via WebEx/Teleconference

January 17, 2024

Due to inclement weather the Oregon Department of Energy Siting Division Staff and the Applicant team are not able to participate in person. Therefore the 5:00PM Meet and Greet and 1:1 conversations with ODOE and Applicant will not occur.

The presentations on the process and the project will occur at the regularly scheduled time of 5:30PM.

Oregon Department of Energy

Complete ASC Public
Information Meeting –
Wagon Trail Solar Project

Via WebEx/Teleconference

January 17, 2024

5:30 PM - Presentation/Webinar by
ODOE and applicant followed by Q & A

AGENDA

Oregon Department of Energy (ODOE)

- Overview of the state siting process
- Upcoming milestones
- Opportunities for Public Comment

Applicant (Wagon Trail Energy Center, LLC)

- Overview of proposed Wagon Trail Solar Project

Q&A with Audience

**This informational meeting is NOT a public hearing and will NOT include public testimony.*

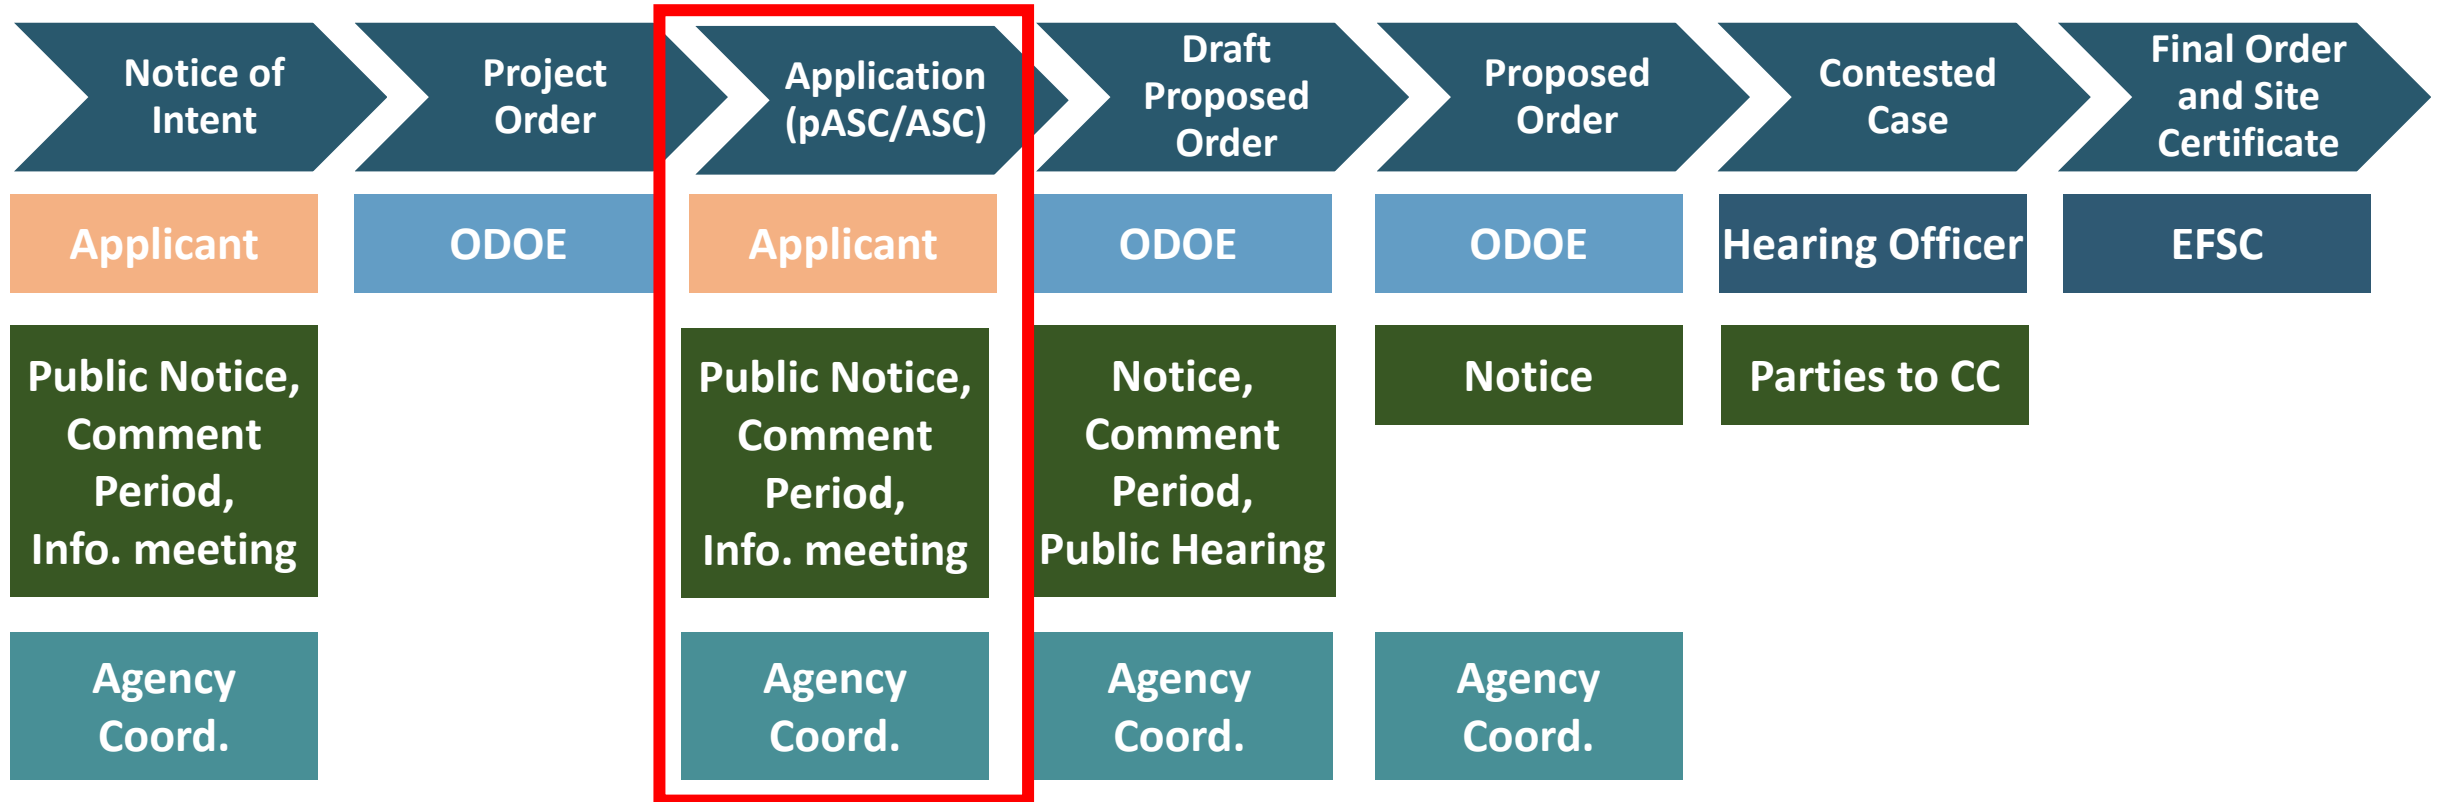

Energy Facility Siting Council (EFSC) Review

- Consolidated review and oversight of most large-scale energy facilities and infrastructure in Oregon
- 7 Members of EFSC: Governor-appointed, Senate confirmed – Volunteers from around the State
- ODOE's Siting Division is staff to EFSC

ENERGY FACILITY SITING PROCESS

Application for Site Certificate Process

WE ARE HERE

Energy Facility Siting Council (EFSC) Review

Milestone	Responsible Party	Date
Notice of Intent (NOI)	Applicant	November 3, 2020
Project Order	ODOE	March 23, 2021
Amended NOI	Applicant	June 11, 2021
First Amended Project Order	ODOE	August 17, 2021
Preliminary Application for Site Certificate (pASC)	Applicant	August 31, 2022
Second Amended Project Order	ODOE	November 2, 2022
Application for Site Certificate (ASC)	Applicant	January 3, 2024
Draft Proposed Order (DPO) Issuance	ODOE	TBD (February)

Energy Facility Siting Council (EFSC) Review

Milestone	Responsible Party	Date
DPO Hearing	ODOE/EFSC/Public/Applicant	TBD (March)
EFSC Review of DPO	EFSC	TBD (April)
Proposed Order Issued	Department	TBD (April)
Contested Case	Hearing Officer	TBD (April-May)
EFSC Review of Proposed Order	EFSC	TBD (May)

Complete Application

An Application is 'Complete' when:

- "...the applicant has submitted information adequate for the Council to make findings or impose conditions on all applicable Council standards." [OAR 345-015-0190(5)]

The complete Application is used to draft findings and recommendations for EFSC review in the draft proposed order.

Complete Application ≠ Approval

Application Requirements and Council Standards

Contents of an Application – Oregon Administrative Rule 345-021-0010(1) (a-dd)	Council Standards and Applicable Rules
Exhibit O - Water Use	OAR 345-022-0000 - General Standard of Review
	ORS 537.505 - Ground Water Act of 1955
	OAR 690-310-0000 - 0380 - Water Resources Department Permitting Requirements
	OAR 690-380-0010 - 9000 - Water Right Transfers
Exhibit P - Fish and Wildlife Habitat	OAR 345-022-0060 - Fish and Wildlife Habitat
	OAR 635-415-0025 - Fish and Wildlife Habitat Mitigation Policy
Exhibit Q - Threatened and Endangered Plant and Animal Species	OAR 345-022-0070 - Threatened and Endangered Species
Exhibit R - Scenic Resources	OAR 345-022-0080 - Scenic Resources
	OAR 345-022-0100 - Recreation
	OAR 345-022-0040 - Protected Areas
Exhibit S - Historic Cultural and Archaeological Resources	OAR 345-022-0090 - Historic, Cultural and Archaeological Resources
Exhibit T - Recreation Opportunities	OAR 345-022-0100 - Recreation
	OAR 345-022-0040 - Protected Areas
	OAR 345-022-0080 - Scenic Resources
Exhibit U - Public Services	OAR 345-022-0110 - Public Services
Exhibit V – Wildfire Risk	OAR 345-022-0115 – Wildfire Prevention and Risk Mitigation
Exhibit W - Waste Minimization	OAR 345-022-0120 - Waste Minimization
	OAR 345-022-0110 - Public Services
Exhibit X - Site Restoration	OAR 345-022-0050 - Retirement and Financial Assurance

Draft Proposed Order (DPO)

IV.E.3 Conclusions of Law.....	131

ODOE recommended findings of fact, conclusions of law and conditions to EFSC on each Council Standard

Incorporates/evaluates agency comments/recommendations/conditions

Notice of Issuance of DPO

- Notice to Reviewing Agencies
- Public Notice

Public Participation at DPO Phase

The DPO notice will initiate the opportunity for public comment on the proposed facility

Notice opens comment period and provides details on public hearings

The public may submit comments by:

- Online comment portal, Mail, email, hand-delivery, or fax during the comment period
- Providing written or oral comments at the DPO public hearing

Public Participation at DPO Phase (cont'd)

- Persons commenting on DPO during that time are eligible to be considered for party status in the contested case proceeding.
 - The Council will not accept comments on the application or on the DPO after the close of the record at the conclusion of the DPO public hearing.
- For consideration in the contested case, issues raised must be raised with *sufficient specificity* so that the Council, the Department, and the applicant understand the issue raised and are afforded an opportunity to respond to the issue.
- To raise an issue with *sufficient specificity*, a person must present facts that support the person's position on the issue.

Public Participation at DPO Phase (cont'd)

Effective Comments

- Referencing specific siting standards & providing specific information supporting whether or not a standard has been met
- Stating supporting facts in comments & attaching reference materials
- Referencing specific pages or sections of the application or DPO

Less Effective

- Stating support or opposition to a facility
- Only providing a copy of a report without presenting any analysis or facts related to compliance with a standard
- Raising issues outside of EFSC's jurisdiction
- Making unsubstantiated statements

FACILITY SITING IN OREGON

Site Description: The Wagon Trail Solar Project is a proposed solar photovoltaic energy generation facility with a generating capacity of approximately 500 megawatts. The facility would be located within an approximately 7,450-acre (11.64 sq. miles) site boundary. Other proposed components include a battery energy storage system (lithium-ion batteries); power collection system; up to two substations; operation and maintenance building; Generator Step Up (GSU) transformer; 0.6 mile overhead 230 kV transmission line; perimeter fencing, access roads and staging areas.

Status:

Proposed. Wagon Trail Energy Center, LLC (applicant), a wholly owned subsidiary of NextEra Energy Resources, LLC filed a complete Application for Site Certificate (ASC) on January 3, 2024; the ASC exhibits are available in the Timeline below or in hard copy at the Oregon Department of Energy Salem office. A public notice of the complete ASC and public information meeting, to be held both in person and virtually on January 17, 2024 starting at 5:00 p.m. PT, was issued on January 4, 2024 and is also available in the Timeline below.

In Person and Remote Public Informational Meeting:

The Department will hold a public informational meeting with the applicant to provide information about the proposed facility and the Energy Facility Siting Council's (EFSC) siting process. The public information meeting is not a public hearing and will not include public testimony or on the record public comments. Opportunity for written or oral testimony will be provided at a later date – during the draft proposed order (DPO) public comment period and public hearing. The meeting will provide an opportunity for in-person and remote participation. Additional details are provided below.

Meeting Details:

Date: Wednesday, January 17, 2024

Time: (Start) 5:00 PM PT

Location: Lexington Town Hall

425 F Street

Lexington, OR 97839

You may also participate in the informational meeting via Webinar or Teleconference:

Wagon Trail Solar Project

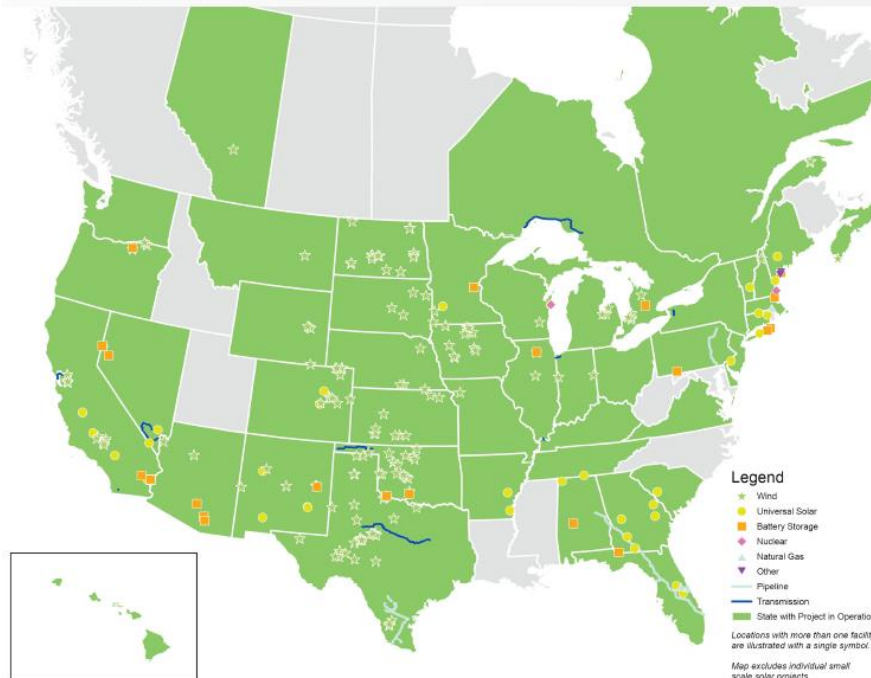

January 17, 2024

Ryan Hill

Applicant Background

- **Wagon Trail Energy Center, LLC a wholly owned subsidiary of NextEra Energy Resources, LLC (NEER). NEER is the world's largest generator of renewable energy from the wind and sun, a world leader in battery storage and is driving the development of the green hydrogen economy. Nearly all of our electricity comes from clean or renewable resources, including wind, solar, natural gas and nuclear energy facilities that are located in 40 states and Canada.**

NextEra Energy Resources Generation Facilities
(As of 12/31/22)

A diversified portfolio at NextEra Energy Resources

Total Net MW¹: 27,400² | As of Dec. 31, 2022

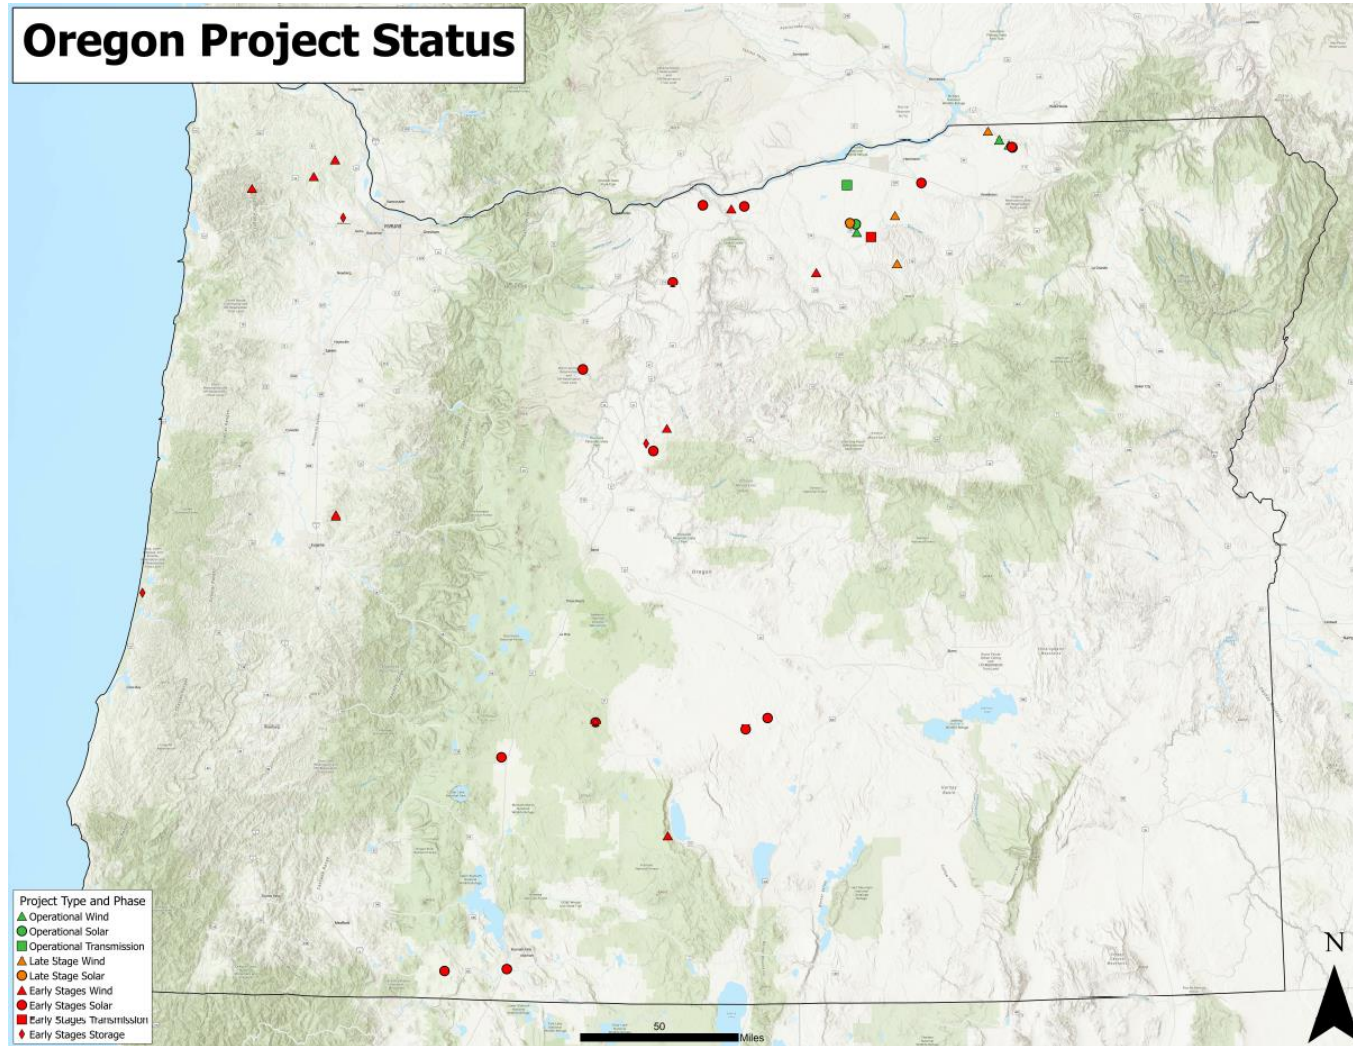

1) Includes MW associated with noncontrolling interests related to NextEra Energy Partners, LP.

2) This figure reflects MW associated with long-term contracted generation.

3) Primarily natural gas.

Legend: ● Wind ● Utility-Scale Solar ■ Distributed Energy Resources ■ Battery Energy Storage

Benefits of our energy investments in Oregon

- Approximately **\$750 million** total capital investment
- Approximately **\$4.2 million** annual payroll
- \$3.2 million** annual land payments
- \$3.5 million** in property taxes, 2022*

Wind energy is cost competitive*
Since 2009, the cost of wind energy has decreased nearly **70%**

Wagon Trail Solar Project Overview

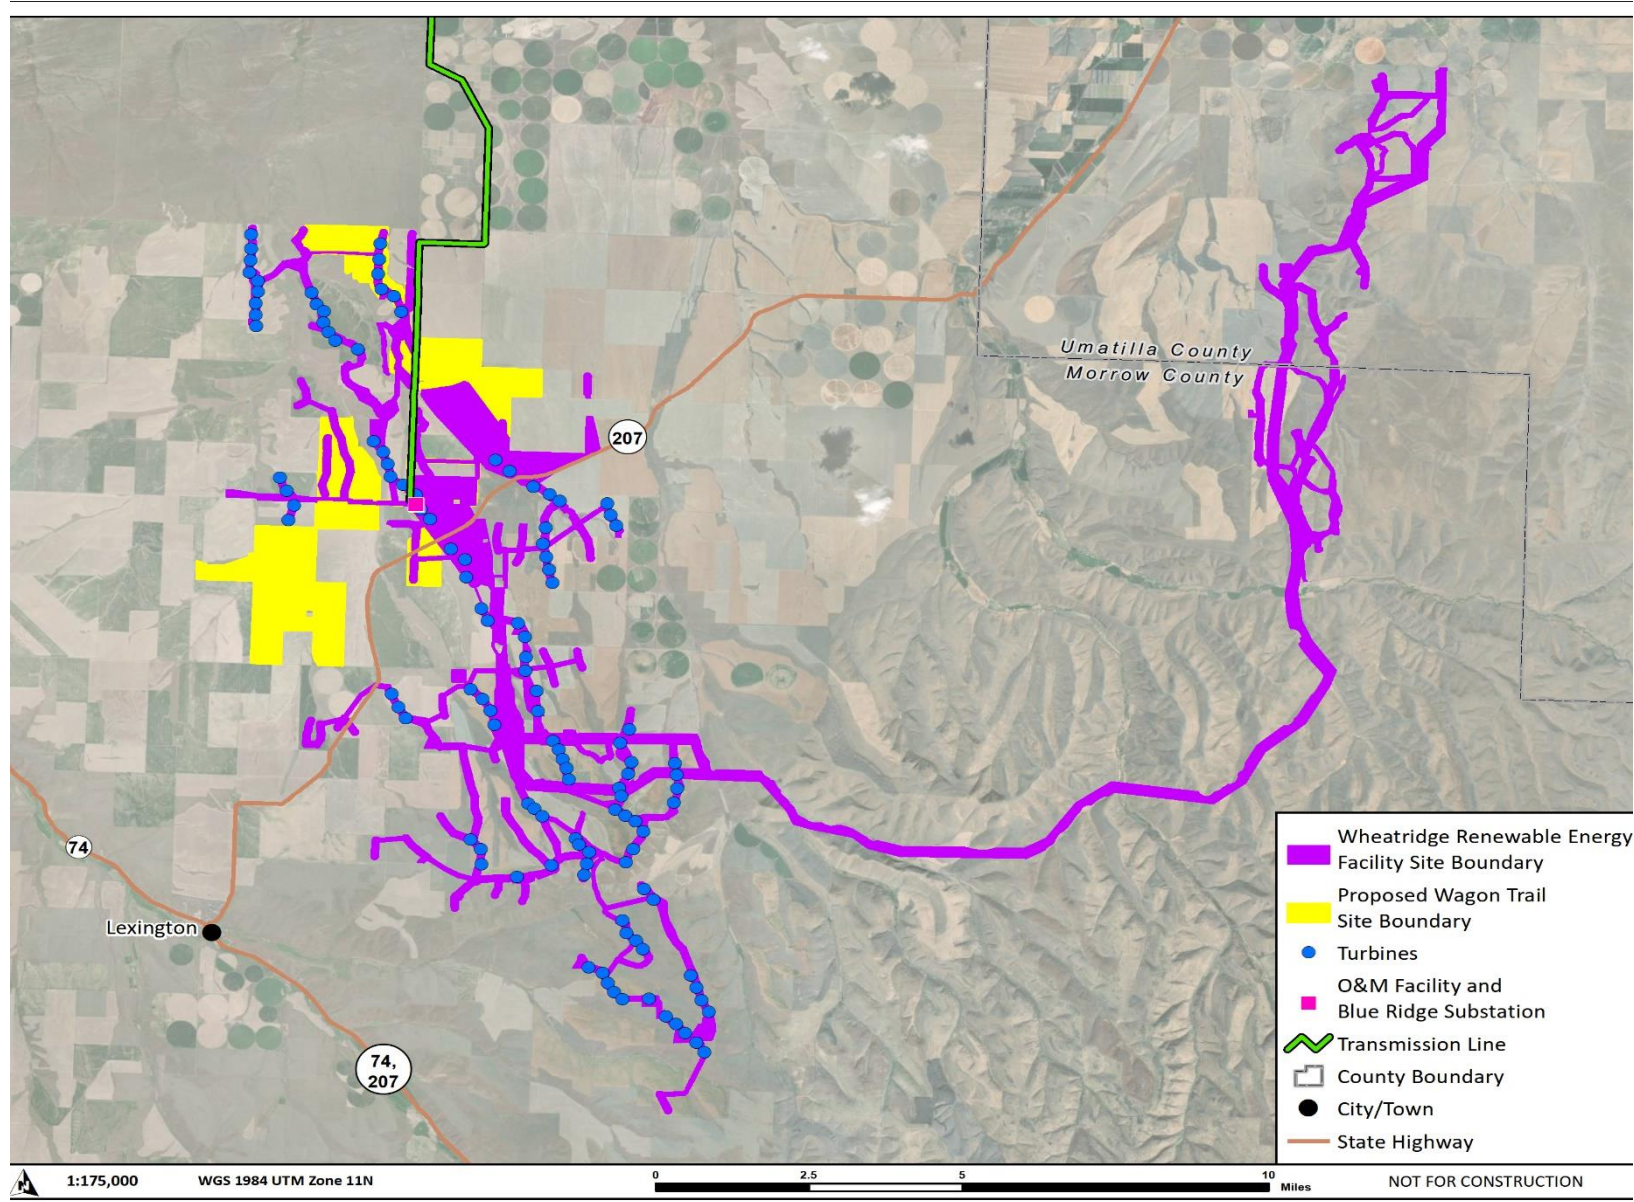

- **Up to 500 megawatts (MW) of solar, battery storage system capable of storing up to 500 MW**
- **Approximately 7,450 acres located in Morrow County, Oregon. Solar array footprint is approximately 3,641 acres within the boundary**
- **Interconnects to the existing Blue Ridge Substation**
- **Existing capacity on Blue Ridge to Morrow Flat Transmission Line**
- **Employs on average 150 people during construction**

Year	Activity
Summer 2024	Issuance of Wagon Trail Solar Project Site Certificate
Phase 1, 2025/2026	Phase 1 Begin and Complete Construction - 240-MW Development
Phase 2, 2026/2027	Phase 2 Begin and Complete Construction - 260-MW Development
Winter 2030	Construction Completion Deadline for All Phases

Area Map

Area Map

(Amended Wheatridge East Boundary)

Benefits of Solar Energy

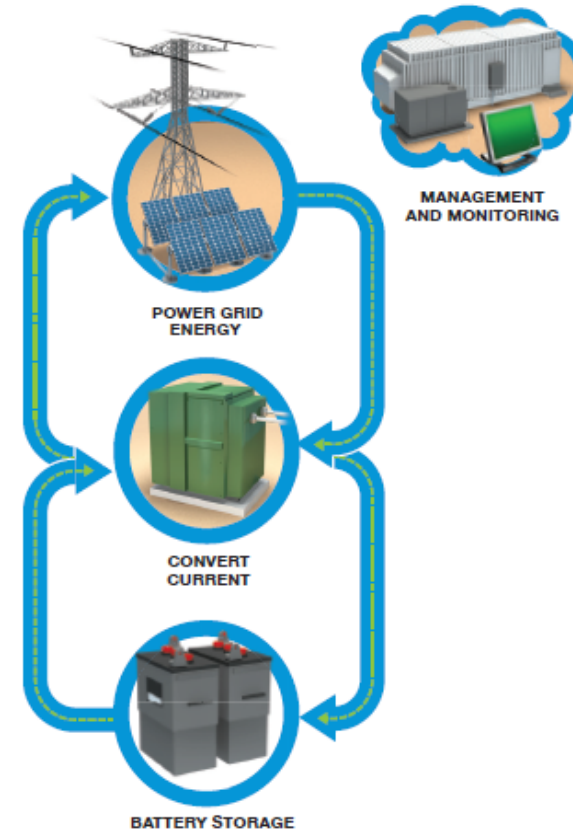

- **Up to 95k households could be provided clean, renewable energy by the Wagon Trail Solar Project**
- **Creates jobs**
- **Diversifies income stream for landowners**
- **Has minimal visual and sound impacts**
- **Does not consume or discharge water for energy production**
- **Does not produce airborne toxins, acid rain or global warming emissions**

Wagon Trail Energy Center Public Information Meeting

BESS

How energy storage systems work

- » A battery management system monitors the individual cells and controls the voltage, temperature and current for safe, reliable transfer of energy. The system automatically shuts off if the batteries are operating outside of predefined parameters.
- » A computerized monitoring system provides up-to-date weather forecasts, power prices, historical electrical use, the amount of charge remaining in the batteries and when to use the energy storage system.
- » Energy from the power grid or from renewable energy sources is delivered via a bidirectional inverter, which converts the energy from alternating current (AC) into direct current (DC). Today's batteries can only store DC. This energy goes into an array of batteries that is typically housed within a battery container or a building structure.
- » When the energy is needed on the power system, the inverters are then used again, but this time to convert the DC from the batteries into AC. Once the power has been transformed, it is stepped up in voltage and subsequently sent to an on-site substation or directly to a distribution or transmission line.
- » The electricity is then distributed to homes, schools, businesses and other consumers.
