ACRONYMS AND ABBREVIATIONS

Acronym	Description
Applicant	DECH bn, LLC
ASC	Application for Site Certificate
CFR	Code of Federal Regulations
CWNWMP	Compensatory Wetland and Non-Wetland Mitigation Plan
DSL	Oregon Department of State Lands
EFSC	Energy Facility Siting Council
EPA	United States Environmental Protection Agency
ERM	Environmental Resources Management, Inc.
Facility	Solar photovoltaic power generation facility and related or supporting facilities in Wasco County, Oregon
JPA	Joint Permit Application
OAR	Oregon Administrative Rule
ORS	Oregon Revised Statutes
PEM/PEM1	Palustrine, Emergent, Persistent
PUB/PUBF	Palustrine, Unconsolidated Bottom, Semipermanently Flooded (converted cattle pond)
PUSC	Palustrine, Unconsolidated Shore, Seasonally Flooded
R4SBC	Riverine, Intermittent, Streambed, Seasonally Flooded
USACE	United States Army Corps of Engineers
USFWS	United States Fish and Wildlife Service
USGS	United States Geological Survey
WOS	Waters of this State [of Oregon]
WOTUS	Waters of the United States

1. INTRODUCTION

DECH bn, LLC (Applicant) plans to construct a solar photovoltaic power generation facility and related or supporting facilities in Wasco County, Oregon (Facility). The Facility will include up to 1,000 megawatts of solar capacity and a battery energy storage system with up to 4,000 megawatt hours storage capacity. This Wetlands Volume of the State and Local Laws and Regulations Exhibit has been prepared to meet the standard in OAR 345-022-0160(1).

This Wetlands Volume of this exhibit provides information regarding wetlands and other waters of the state (WOS) within the Facility site boundary. This Volume also presents a preliminary analysis of the requirements that must be satisfied to receive an Oregon Department of State Lands (DSL) Removal-Fill Permit for impacts to WOS.

2. WETLANDS AND OTHER JURISDICTIONAL WATERS

OAR 345-022-0160(1)(a) Information based on literature and field study, as appropriate, about waters of this state, as defined under ORS 196.800, including:
(A) A description of all areas within the site boundary that might be waters of this state and a map showing the location of these features.

2.1 JURISDICTIONAL DEFINITIONS

The United States Environmental Protection Agency (EPA), United States Army Corps of Engineers (USACE), and DSL jointly and individually administer wetland and water regulatory programs in Oregon. EPA and USACE jurisdiction are limited to Waters of the United States (WOTUS), as defined in 40 Code of Federal Regulations (CFR) 120.2(a)¹ and 33 CFR 238.3(a)²:

- (1) *Waters which are:*
 - (i) *Currently used, or were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide;*
 - (ii) *The territorial seas; or*
 - (iii) *Interstate waters;*
- (2) *Impoundments of waters otherwise defined as waters of the United States under this definition, other than impoundments of waters identified under paragraph (a)(5) of this section;*
- (3) *Tributaries of waters identified in paragraph (a)(1) or (2) of this section that are relatively permanent, standing or continuously flowing bodies of water;*
- (4) *Wetlands³ adjacent⁴ to the following waters:*
 - (i) *Waters identified in paragraph (a)(1) of this section; or*

¹ 40 CFR 120.2

² 33 CFR 238.3(a)

³ **Wetlands** means those areas that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions. Wetlands generally include swamps, marshes, bogs, and similar areas. 40 CFR 120.2(c)(1) and 33 CFR 238.3(c)(1)

⁴ **Adjacent** means having a continuous surface connection. 40 CFR 120.2(c)(2) and 33 CFR 238.3(c)(2)

- (ii) *Relatively permanent, standing or continuously flowing bodies of water identified in paragraph (a)(2) or (a)(3) of this section and with a continuous surface connection to those waters;*
- (5) *Intrastate lakes and ponds not identified in paragraphs (a)(1) through (4) of this section that are relatively permanent, standing or continuously flowing bodies of water with a continuous surface connection to the waters identified in paragraph (a)(1) or (a)(3) of this section.*

DSL jurisdiction is limited to WOS as defined in OAR 141-085-0510(107):

[A]ll natural waterways, tidal and non-tidal bays, intermittent streams, constantly flowing streams, lakes, wetlands, that portion of the Pacific Ocean that is in the boundaries of this state, all other navigable and non-navigable bodies of water in this state and those portions of the ocean shore, as defined in ORS 390.605, where removal or fill activities are regulated under a state-assumed permit program as provided in 33 U.S.C. 1344(g) of the Federal Water Pollution Control Act, as amended.

2.2 METHODS

2.2.1 DESKTOP STUDY

Environmental Resources Management, Inc. (ERM), on behalf of the Applicant, reviewed data sources for information on vegetation patterns, topography, drainage, and known or potential wetland and water areas in the survey area⁵ to establish an initial understanding of potential WOS across the Facility prior to field investigations. Data sources used in the desktop study included:

- United States Geological Survey (USGS) topographical contours;
- USDA, NRCS Soil Survey Geographic Database;
- United States Fish and Wildlife Service (USFWS) NWI maps;
- USGS National Hydrography Database maps;
- Oregon DSL Statewide Wetlands Inventory maps;
- Oregon Department of Fish and Wildlife Fish Habitat Distribution and Barriers maps;
- Oregon DSL Essential Salmonid Habitat Map; and,
- Current and historical aerial imagery (Google Earth and Esri Topographic Web Mapping).

The desktop analysis data and associated maps are provided in Appendix A of the attached Wetland and Waters Delineation Report (Attachment 2).

2.2.2 FIELD METHODS

Following the desktop study, ERM conducted a field survey to verify any potential wetland or waterbody features identified during the desktop study and to further survey for other potential features not identified through desktop analysis.

⁵ The survey area for wetlands and waters completely overlaps the micrositing corridor defined in the Background Information Exhibit.

Field survey data were collected with a Global Positioning System unit with sub-meter accuracy. Potentially regulated features were evaluated using indicators of wetland or waterbody characteristics, or the lack thereof. Potential wetland and waterbody features identified during the desktop assessment were assessed by pedestrian survey, and, if appropriate, delineated.

ERM identified wetland and upland conditions within the survey area and classified them in accordance with the following standard protocols:

- Routine Determination Method described in the USACE *Wetland Delineation Manual* (USACE 1987) and the *Regional Supplement to the Corps of Engineers Wetland Delineation Manual: Arid West Region (Version 2.0)* (USACE 2008);
- USFWS Classification System (Cowardin et al. 1979); and
- Guidebook for Hydrogeomorphic-based Assessment of Oregon Wetland and Riparian Sites: Statewide Classification and Profiles (Adamus 2001).

Due to the scale of the survey area (greater than 12,000 acres), the number of features identified (greater than 2,000), and the similarity of wetland ecosystems observed, data collection was designed to minimize the duplication and redundancy of data and to incorporate guidance from DSL's *Linear and Large Project Delineation Guidance* (2017). For example, many of the wetlands observed were isolated, palustrine, emergent, with identical hydrologic indicators, hydric soil indicators, and vegetative communities. In cases where several similar wetlands were observed in proximity, one series of paired data points was used as reference for the boundary determination of multiple wetlands. A map showing the location of each WOS and non-WOS water body identified during field surveys is provided in Attachment 1. More detailed figures, and the referenced upland and wetland data points for each wetland delineated are included in Appendix D of the Wetland and Waters Delineation Report (Attachment 2). Data point locations are also illustrated in Appendix A, Figure 6 of the Wetland and Waters Delineation Report (Attachment 2).

2.3 RESULTS

The field surveys identified a total of 1,891 wetlands and 333 stream segments within the survey area. The delineated wetlands were categorized based on likeness of hydrogeomorphic class, hydrologic connection and influence, ecological community, and relative altered state. The wetland categories are vernal pools, isolated palustrine emergent wetlands, riverine adjacent wetlands, and converted cattle ponds; some features fall under multiple categories, such as Palustrine, Emergent, Persistent (PEM1) wetlands. The delineated streams were identified based on their flow regime and categorized as perennial, intermittent, and ephemeral. Following categorization, each wetland or stream was assigned a preliminary jurisdictional status based on the definitions of WOTUS and WOS included in Section 2.1.

Table 1 summarizes all WOS and non-WOS waterbodies identified by water type classification and likely jurisdictional status.

TABLE 1 DELINEATED WETLAND AND WATER FEATURES BY CATEGORY

Feature	Feature Count¹	National Wetlands Inventory	National Hydrography Database	Jurisdiction
Vernal Pools	313	Mapped PEM1/ Palustrine, Scrub-Shrub, Broad-Leaved Deciduous, Seasonally Flooded	N/A	Likely state jurisdiction only.
PEMs	1429	Mapped PEM1/PUSC/ Palustrine, Scrub-Shrub, Broad-Leaved Deciduous, Seasonally Flooded /PUBF	N/A	Likely state jurisdictional only except where connected to a perennial or intermittent stream system.
Isolated PEM Wetlands	1216	Mapped PEM1/PUBF	N/A	Likely state jurisdiction only.
Riparian Connected Wetlands	91	Mapped PEM1/PUSC	N/A	Likely under both state and federal jurisdictional waterbody given connections to jurisdictional streams.
PUB	38	Mapped Palustrine, Aquatic Bed, Semipermanently Flooded/PUSC/PUBF	N/A	Excavated cattle pond. Likely state jurisdiction only.
Perennial Streams	15	Mapped R4SBC/ Riverine, Intermittent, Streambed, Temporarily Flooded	Mapped Canal Ditch/Perennial	Likely both state and federal jurisdictional given its flow duration.
Intermittent Streams	105	Mapped R4SBC/ Riverine, Intermittent, Streambed, Temporarily Flooded / PEM1/ Riverine, Intermittent, Unconsolidated Bottom, Semipermanently Flooded	Mapped Intermittent	Likely not federally jurisdictional, but likely state jurisdictional given intermittent status.
Ephemeral streams	129	Mapped PEM1/R4SBC OR Not Mapped	Not Mapped	Likely non-jurisdictional under federal or state rules given ephemeral status.

Notes:

PEM/PEM1 = Palustrine, Emergent, Persistent; PUSC = Palustrine, Unconsolidated Shore, Seasonally Flooded; PUB/PUBF = Palustrine, Unconsolidated Bottom, Semipermanently Flooded (converted cattle pond); R4SBC = Riverine, Intermittent, Streambed, Seasonally Flooded

¹ The total feature counts are greater than the number of features identified within the survey area because some features have multiple categories.

Attachment 3, Wetlands and Other Waters Characteristics Tables, provides these preliminary jurisdictional determinations plus additional details for each identified WOS and non-WOS water body.

3. IMPACTS TO WETLANDS AND OTHER JURISDICTIONAL WATERS

(B) An analysis of whether construction or operation of the proposed facility would adversely affect any waters of this state.

(C) A description of the significance of potential adverse impacts to each feature identified in (A), including the nature and amount of material the applicant would remove from or place in the waters analyzed in (B).

The Applicant has prioritized avoiding impacts to WOS throughout the Facility design process. As the wetland and waters delineation effort was completed, the primary features of the site layout (solar panel arrays, inverters, substation, and gen-tie route) were iteratively revised to avoid features as they were identified. Rather than developing the Facility with one large solar array area, it is anticipated that the solar modules will be developed in 46 blocks ranging in size from approximately 25 acres to 440 acres and the blocks will be separated by avoidance areas to avoid impacts to wetlands and waters and to create corridors for wildlife movement. Specific avoidance measures adopted throughout the design process include the following:

- Avoid all new impacts to high-functioning wetlands and waters, such as forested wetlands, floodplain, vernal pools, and streams with essential fish habitat.
- Avoid all impacts along the Wild and Scenic White River.
- Prioritize the use of existing stream crossings for access road routes. Where new stream crossings or improvements to existing stream crossings are required, use bridges or spans instead of culverts.
- Use horizontal directional drilling or similar techniques to place collection and utility lines below wetlands and waters in a manner that avoids temporary or permanent impacts to the features.
- Avoid grading or other alterations to existing drainage patterns across the landscape to the greatest extent feasible.

Through these measures, the Applicant has avoided all wetlands and most water features identified within the micrositing corridor. However, despite the Applicant's efforts to avoid impacts to WOS, the Facility may require impacts to WOS for construction of the road network and installation of collection lines due to the widespread extent of WOS in the site boundary. The Applicant has identified approximately 13 road crossings that may require impacts to WOS and is in the process of evaluating these road crossings and the associated road design for further avoidance and minimization opportunities. No impacts to wetlands are anticipated. The extent and significance of unavoidable impacts will be described further in a Joint Permit Application (JPA).

4. REMOVAL-FILL AUTHORIZATION

(D) If the proposed facility would not need a removal-fill authorization, an explanation of why no such authorization is required for the construction and operation of the proposed facility.

(E) If the proposed facility would need a removal-fill authorization, information to support a determination by the Council that the Oregon Department of State Lands should issue a removal-fill permit, including information in the form required by the Department of State Lands under OAR Chapter 141 Division 85.

The Facility's impacts to WOTUS and WOS are likely to require removal-fill authorization from both agencies due to the placement of new or improvement of existing stream crossings. Accordingly, the Applicant will use a JPA to request authorization for the activities through each agency's permit review process.

As an initial step for DSL review, the Applicant submitted the Facility's Wetland and Waters Delineation Report to DSL on 15 September 2025 (Attachment 4). The Applicant will work with DSL to obtain their concurrence on the Wetland and Waters Delineation Report.

The Applicant working towards providing a complete JPA satisfying the requirements of OAR 141-085 for Oregon Energy Facility Siting Council (EFSC) review and anticipates providing all required information prior to EFSC acceptance of the Application for Site Certificate (ASC) as complete. Accordingly, the Applicant expects that the Removal-Fill permit will be included in and governed by the Facility's site certificate. The status of each element required for a complete JPA submittal is described in Table 2 below.

TABLE 2 JPA REQUIRED INFORMATION AND STATUS

JPA Required Information	Status
(a) The applicant and property owner information	Applicant and landowner information is provided in the Background Information Exhibit; identification of mitigation site landowners is outstanding pending completion of the draft JPA.
(b) Location information including Township, Range, Quarter/Quarter Section and Tax Lot(s), latitude and longitude, street location if any, and location maps with site location indicated.	Location information is provided in the Background Information Exhibit; mitigation site information is outstanding pending completion of the impact analysis, although is expected to be within the site boundary.
(c) The location of any off-site disposal or borrow sites, if these sites contain waters of this state.	Not applicable ; no off-site disposal or borrow sites proposed.
d) Project information including:	
(A) Description of all removal-fill activities associated with the project;	Outstanding pending completion of the draft JPA.
(B) Demonstration of independent utility to include all phases, projects or elements of the proposed project which will require	Outstanding pending completion of the draft JPA.

JPA Required Information	Status
removal-fill activities;	
(C) Volumes of fill and removal within jurisdictional areas expressed in cubic yards;	Outstanding pending completion of the draft JPA.
(D) Area of removal and fill within jurisdictional areas expressed in acres to the nearest 0.01-acre for impacts greater than 0.01 of an acre or expressed in acres to the nearest 0.001-acre for impacts less than 0.01 of an acre; and	Outstanding pending completion of the draft JPA.
(E) Description of how the project will be accomplished including construction methods, site access and staging areas	Outstanding pending completion of the draft JPA.
(e) A description of the purpose and need for the project.	Outstanding pending completion of the draft JPA.
(f) Project plan views and cross-sectional views	Outstanding pending completion of the draft JPA.
(g) A written analysis of potential changes that the project may make to the hydrologic characteristics of the waters of this state	Outstanding pending completion of the draft JPA.
(h) A description of the existing biological and physical characteristics of the water resources,	Outstanding pending completion of the draft JPA.
(i) A description of the navigation, fishing and public recreation uses,	Outstanding pending completion of the draft JPA.
(j) a wetland delineation report	Provided ; awaiting DSL concurrence.
(k) A functions and values assessment	Outstanding pending completion of the draft JPA.
(l) Information concerning the presence of any federal or state listed species.	Outstanding pending completion of the draft JPA.
(m) Information concerning historical, cultural and archeological resources.	Outstanding pending completion of the draft JPA.
(n) An analysis of alternatives to derive the practicable alternative that has the least reasonably expected adverse impacts on waters of this state.	Outstanding pending completion of the draft JPA.
(o) A complete compensatory mitigation plan	Outstanding pending completion of the draft JPA.
(p) For each proposed removal-fill impact site and physical mitigation site, a list of the names and addresses of the adjacent property owners	Outstanding pending completion of the draft JPA.
(q) Mailing labels, when there are more than five names and addresses of adjacent	Outstanding pending completion of the draft JPA.

JPA Required Information	Status
property owners	
(r) A signed local government land use affidavit.	Not applicable; EFSC site certificate will determine land use compatibility.
s) A signed Coastal Zone Certification statement, if the project is in the coastal zone.	Not applicable; Facility is not located in the coastal zone.

Notes:

DSL = Oregon Department of State Lands; EFSC = Energy Facility Siting Council; JPA= Joint Permit Application

Table 3 below summarizes the Applicant's approach and timeline to finalizing the JPA for inclusion in the site certificate.

TABLE 3 PATH FORWARD TO FULFILL REMOVAL-FILL PERMIT REQUIREMENTS

Task Description	Compliance Strategy
<i>OAR 345-022-0160(1)(A): A description of all areas within the Project Site Boundary that might be waters of this state and a map showing the location of these features.</i>	
WOS Field Delineations	Completed in 2025
Wetland and Waters Delineation Report	Submitted to DSL in September 2025; concurrence review in progress.
DSL Concurrence	Anticipated to be issued prior to EFSC acceptance of the ASC as complete
<i>OAR 345-022-0160(1)(B): An analysis of whether construction or operation of the proposed facility would adversely affect any waters of this state.</i>	
Analysis of Potential Impacts	Estimated area of impact will be provided prior to EFSC acceptance of the ASC as complete.
<i>OAR 345-022-0160(1) (C): A description of the significance of potential adverse impacts to each feature identified in (A), including the nature and amount of material the applicant would remove from or place in the waters analyzed in (B).</i>	
Removal-Fill Quantities	Estimated quantities of removal-fill material will be provided prior to EFSC acceptance of the ASC as complete.
<i>OAR 345-022-0160(1)(D): If the proposed facility would not need a removal-fill authorization, an explanation of why no such authorization is required for the construction and operation of the proposed facility.</i>	
Not applicable; a Removal-Fill authorization is required for the Facility.	
<i>OAR 345-022-0160(1) (E): If the proposed facility would need a removal-fill authorization, information to support a determination by the Council that the Oregon Department of State Lands should issue a removal-fill permit, including information in the form required by the Department of State Lands under OAR Chapter 141 Division 85.</i>	
Joint Permit Application	A draft JPA will be provided prior to EFSC acceptance of the ASC as complete.

Task Description	Compliance Strategy
Project Drawings	Existing conditions drawings included in the preliminary Application for Site Certificate submittal. Complete impact analysis, associated construction plans, and mitigation plans will be provided as part of the draft JPA submittal.
Wetland Characteristics and Impact Tables	Existing conditions wetland characteristics included in the preliminary Application for Site Certificate submittal. Impact information will be provided as part of the draft JPA submittal.
Mailing Labels for Project Site, Mitigation Site, and Adjacent Landowners	Mailing labels will be provided upon request by DSL and Oregon Department of Energy.
Incumbency Certificate	Incumbency certificate will be provided as part of the draft JPA submittal.
Site Rehabilitation Plan	A site rehabilitation plan is provided as part of the comprehensive soils management plan included in the Soil Protection Exhibit.
CWNWMP	Draft CWNWMP will be provided as part of the draft JPA submittal.
Wetland/Stream Functional Assessments	Wetland/Stream functional assessments for features impacted by Facility development will be provided within the CWNWMP.
Compensatory Mitigation Eligibility and Accounting Worksheet	Compensatory Mitigation eligibility and accounting worksheet will be provided within the CWNWMP.
Alternatives Analysis	Alternatives analysis will be provided as part of the draft JPA submittal.
Biological Assessment	A biological assessment is only required for USACE review. As it is not required for DSL review of the Removal-Fill Permit, it is not included in this Exhibit and will be provided to USACE directly as part of the federal permit review process.
Erosion and Pollution Control Plan	An erosion and pollution control plan will be provided as part of the draft JPA submittal.
Stormwater Management Plan	A stormwater management plan will be provided as part of the draft JPA submittal.
<i>OAR 345-022-0160(1) (F): A description of proposed actions to mitigate adverse impacts to the features identified in (A) and the applicant's proposed monitoring program, if any, for such impacts.</i>	
Proposed Mitigation	Proposed mitigation actions will be provided as part of the draft JPA submittal.
Proposed Monitoring Program	A proposed monitoring program will be included in the CWNWMP submitted as part of the draft JPA submittal.

Notes:

ASC= Application for Site Certificate; CWNWMP= Compensatory Wetland and Non-Wetland Mitigation Plan; DSL = Oregon Department of State Lands; EFSC = Energy Facility Siting Council; JPA = Joint Permit Application; USACE = United States Army Corps of Engineers; WOS = Waters of State

5. PROPOSED MITIGATION ACTIONS

(F) A description of proposed actions to mitigate adverse impacts to the features identified in (A) and the applicant's proposed monitoring program, if any, for such impacts.

Where impacts to WOS are unavoidable, the Applicant is required to provide compensatory mitigation under federal and state requirements. The Applicant has prepared a list of possible mitigation options based on feature type and impact type, presented in Table 4. These mitigation options are consistent with federal requirements, described in the 2008 Final Compensatory Mitigation Rule (33 CFR 332⁶), and state requirements, described in OAR 141-085-0680 through 141-085-0710.

The mitigation and monitoring program will be described further in the JPA and Compensatory Wetland and Non-Wetland Mitigation Plan (CWNWMP) to be provided prior to EFSC acceptance of the ASC as complete.

TABLE 4 IMPACT MITIGATION MATRIX

Feature Category	Feature Type	Impact Type	Mitigation Options
Wetland	PEM, PSS, & PUB	Complete functional loss	• In-kind replacement • Restoration or enhancement of comparable existing features • For WOS only: payment in lieu of mitigation
		Partial functional loss	• Restoration or enhancement of comparable existing features • Preservation of existing high-functioning wetlands and/or other riparian habitat corridors • For WOS only: payment in lieu of mitigation
		Indirect	• Restoration or enhancement of comparable existing features • Preservation of existing high-functioning wetlands and/or other riparian habitat corridors • For WOS only: payment in lieu of mitigation
	PFO	None – avoid all impacts	None required
	Vernal Pool	None – avoid all impacts	None required
Stream	Perennial & Intermittent	Partial functional loss	• Restoration or enhancement of comparable existing features • Preservation of existing high-functioning wetlands and/or other riparian habitat corridors • For WOS only: payment in lieu of mitigation
		Indirect	• Restoration or enhancement of comparable existing features • Preservation of existing high-functioning wetlands and/or other riparian habitat corridors • For WOS only: payment in lieu of mitigation

⁶ 33 CFR Part 332 -- Compensatory Mitigation for Losses of Aquatic Resources

Feature Category	Feature Type	Impact Type	Mitigation Options
	Ephemeral	Any	None proposed – not subject to wetland/waters mitigation requirements.

6. CONCLUSIONS

This Volume 1 of the State and Local Laws and Regulations Exhibit provides the information required for submittal in OAR 345-022-0160(1). The Applicant expects that a Removal-Fill Permit will be required and intends for this Removal-Fill Permit to be included in the site certificate. The Applicant will provide a JPA demonstrating compliance with DSL Removal-Fill Permit requirements described in OAR 141-085-0550 and OAR 141-085-0565(3-5) prior to EFSC acceptance of the ASC as complete.

7. APPROVAL STANDARDS

The Applicant has satisfied the standards for State and Local Laws and Regulations regarding Water outlined in OAR 345-022-0160(1). Approval standards are summarized in Table 5.

TABLE 5 APPROVAL STANDARDS MATRIX

Requirement	Handling
<i>OAR 345-022-0160(1)(a) Information based on literature and field study, as appropriate, about waters of this state, as defined under ORS 196.800 including:</i>

ATTACHMENT 1

FIGURE

CLIENT: DECH bn, LLC

PROJECT NO: Oregon Energy Facility Siting Council

DATE: December 2025

VERSION: 01

Legend

- Site Boundary
- Micrositing Corridor
- Highway
- Local Roads
- Field Delineated Wetlands
 - PUB
 - PEM
 - PSS
 - PFO
- Other waters
 - Perennial
 - Intermittent
 - Ephemeral

NOTE:
PUB – Palustrine Unconsolidated Bottom
PEM – Palustrine Emergent
PSS – Palustrine Scrub-Shrub
PFO – Palustrine Forested

ERM Disclaimer: Not For Construction
Features outside of the Survey Area are estimated for connectivity based on aerial imagery

ATTACHMENT 2 REPORT

WETLAND AND WATERS DELINEATION

Due to file size, the Wetlands and Waters Delineation Report is being provided as a stand alone file.

ATTACHMENT 3 WETLANDS AND OTHER WATERS CHARACTERISTICS TABLES

Table 3a Wetland Delineation Data
Table 3b Stream Delineation Data

TABLE 3A – WETLAND CHARACTERISTICS DATA

Wetland Number	Cowardin Class	HGM Class	Isolated	Vernal Pool	Potentially Fish Bearing	Mapped By NHD or NWI	Extends Off-Site	Acres	Associated Wetland DP	Associated Upland DP	Figure Grid Location

Subject: WD2025-0508, Deschutes Solar and Battery Energy Storage System Report Assignment

Some people who received this message don't often get email from velen.mcdonald-names@dsl.oregon.gov. [Learn why this is important](#)

EXTERNAL MESSAGE

We received the electronically submitted 32-page wetland delineation report on 09/15/2025 for the Deschutes Solar and Battery Energy Storage System in Wasco County that was submitted to the Department for review and approval. The report has been assigned to Jessica Salgado (541-408-1892 jessica.salgado@dsl.oregon.gov) for review. The DSL file number is **WD2025-0508**.

The review fee for **2025 is \$575**. If it has not already been paid, please note that the fee must be received before the report submittal is considered complete and the agency review process begins. We are experiencing unusually high volume, and response times may be delayed. Our staff will contact you as soon as possible. We appreciate your patience. In the interim, you can access the Department of State Lands: Statewide Wetlands Inventory: Waterways & Wetlands: State of Oregon here <https://www.oregon.gov/dsl/WW/Pages/SWI.aspx>. The SWI is a screening tool to help identify approximate locations of wetlands and waterways.

If payment is not received within 60 days of the report received date, DSL may withdraw the report. Please send check payments to: Oregon Department of State Lands, 775 Summer St. NE #100, Salem, OR 97301, along with a copy of the report cover form and note the file number above. Or, you may pay the fee online by credit card by clicking the following link,

<https://appengine.egov.com/apps/or/wetlands/payment>. The file number is required in order to process your payment.

You may check the review status of a delineation report at the following web site: <https://lands.dsl.state.or.us/index.cfm?fuseaction=Wetlands.SelectCounty>

Oregon's Removal-Fill Law ([ORS 196.795-990](#)) requires people who plan to remove or fill material in wetlands or waterways to obtain a permit from the Department of State Lands (DSL). A federal permit from the US Army Corps of Engineers (COE) may also be required. Further information can be obtained at:

DSL <http://www.oregon.gov/dsl/WW/Pages/Permits.aspx>

COE <http://www.nwp.usace.army.mil/Missions/Regulatory/>

Thank you,

Subject: FW: Deschutes Solar - Wetlands and Waters Report

Hi Support,

See below, there are zip files of a new WD submission in the Dropbox. It is another huge report, so I said it didn't have to be in one PDF (similar to B2H).

Let me know if you need help extracting the files for uploading to Laserfiche.

Thanks,

Jessica Salgado, PWS (*she/her*)

Subject: Deschutes Solar - Wetlands and Waters Report

Morning Jessica,

I uploaded the Deschutes Wetlands and Waters Report and the appendixes to the DSL drop box this morning. I included my email and "Attn: Jessica Salgado" in the submittal. Due to the file size, the appendixes are included as zipped files. Please let me know if you are unable to open any of the files. I'm also happy to answer any questions you have throughout your review or provide additional information. Our GIS expert is preparing the shape files and will have those for you shortly.

Thank you again for your help and I look forward to your feedback.
