Wildfire Programs Advisory Council  
Mark Bennett, Chair  
RE SB 762

Dear Chair Bennett and Council Members,

I am sending copies of comment cards that were provided to residents in Josephine and Jackson Counties that attended an informational meeting about SB 762 to explain to attendees in plain English, the contents of the Wildfire bill and how it would impact them. We conducted six meetings with three in each county.

We asked each person to fill out a card or multiple cards in order to send the cards to the Wildfire Program Advisory Council and to the Senator and Representative that represents the district that they live in. We have separated the cards into batches so that the Council receives a card from each person submitting a comment. If additional cards were submitted the additional cards will be sent directly to the Senator or Representative of the district.

We have arranged the cards so that the cards with specific comments are at the beginning of each batch and cards that people just checked a box for their concern is at the end of the batch. For the cards we focused on the parts of the bill that would affect them personally.

The comments on the cards speak to the sentiment of the residents and not “stakeholders” that have a specific concern that was pre-identified in the development of the bill. We are of the opinion that the Council needed to hear what the residents think of this bill so you can convey these feelings to the Governor and the Legislature.

If the Council thinks that the original cards need to be submitted, we will gladly forward them to you. We didn’t have the ability to get the cards physically to you in time for this meeting. I will be available for your meeting this Friday December 2 by a zoom connection or phone if you have any questions.

Sincerely,  
Bob Hart, Planning Consultant

I am opposed to SB 762 Wildfire and call for it's repeal. The reason(s) I am against this bill include: (Check all that apply)

- ☒ The map is not accurate and targets properties for insurance companies to raise rates or cancel insurance policies.
- ☒ Mandatory inspections of property to determine if vegetation has been modified for Defensible Space without a warrant or probable cause.
- ☒ Increased costs to property owners for fire protection to be a ~~lien~~ <sup>TAX</sup> against property without a vote of the people.
- ☒ Shifting the burden of Wildfire responsibility to property owners when over 90% of areas burned are Federal Land

☒ Other when I moved here 35 years ago the environmentalists (misguided - single focused - airheads) were just starting to gum up decent forest care.

I am opposed to SB 762 Wildfire bill and call for its immediate repeal. Just "fixing the map" will not solve all the problems created by this bill. It creates far overreaching government intrusion into property rights and will dramatically increase costs of rural living. Other concerns I have are:

over reach of private property rights-

Does not address the real issue of the large forest

*It is government's responsibility to protect citizens. BLM, & the Dept of Forestry have bowed to the "greenies" & shirked their responsibilities. This bill shifts them to property owners at expense & duress. Fees & fines & liens are taxes & should be on the ballot. Let's take back "federally managed" lands. They act as owners & they are proscribed from owning more than "ports," "bases," & Custer Lake.*

*Repeal this ---- bill.*

I am opposed to SB 762 Wildfire and call for it's repeal. The reason(s) I am against this bill include: (Check all that apply)

☒ The map is not accurate and targets properties for insurance companies to raise rates or cancel insurance policies.

☒ Mandatory inspections of property to determine if vegetation has been modified for Defensible Space without a warrant or probable cause.

☒ Increased costs to property owners for fire protection to be a lien against property without a vote of the people.

☒ Shifting the burden of Wildfire responsibility to property owners when over 90% of areas burned are Federal Land

The Map is inaccurate looks like a drive by. How are you going to do mandatory inspections? Why are you doing this? I pay for fire insurance now its going to increase because of this bill. I understand you don't think this will happen, it will happen! 90% of all fires are on federal property, what are you doing to demand the federal government in this respect? my house is already fire protected, building a new house is going to cost a great deal more.

I am opposed to SB 762 Wildfire bill and call for its immediate repeal. Just "fixing the map" will not solve all the problems created by this bill. It creates far overreaching government intrusion into property rights and will dramatically increase costs of rural living. Other concerns I have are:

- Inflationary effects
  - extra costs for seniors on fixed incomes
  - windfall profits for insurance companies
  - Map Grossly inaccurate.
- Unconstitutional violations of property
- I have 100-200 ft. of defensible rights.
- Space yet was designated extreme risk!

are: This is big government overreach, and is not the solution! The map is not accurate! Gov. wants to make property owners pay for all of this when, through our taxes it should all be paid for.

This is going to increase property taxes + ins. fees.  
SB 762 has had such an impact it should be put to the people for a vote! Let the people decide!

- ☒ The map is not accurate and targets properties for insurance companies to raise rates or cancel insurance policies.
- ☒ Mandatory inspections of property to determine if vegetation has been modified for Defensible Space without a warrant or probable cause.
- ☒ Increased costs to property owners for fire protection to be a lien against property without a vote of the people.
- ☒ Shifting the burden of Wildfire responsibility to property owners when over 90% of areas burned are Federal Land

I am opposed to SB 762 Wildfire and call for it's repeal. The reason(s) I am against this bill include: (Check all that apply)

- ☒ The map is not accurate and targets properties for insurance companies to raise rates or cancel insurance policies.
- ☒ Mandatory inspections of property to determine if vegetation has been modified for Defensible Space without a warrant or probable cause.
- ☒ Increased costs to property owners for fire protection to be a lien against property without a vote of the people.
- ☐ Shifting the burden of Wildfire responsibility to property owners when over 90% of areas burned are Federal Land

I am opposed to SB 762 Wildfire bill and call for its immediate repeal. Just "fixing the map" will not solve all the problems created by this bill. It creates far overreaching government intrusion into property rights and will dramatically increase costs of rural living. Other concerns I have are:

I am opposed to SB 762 Wildfire and call for it's repeal. The reason(s) I am against this bill include: (Check all that apply)

- ☐ The map is not accurate and targets properties for insurance companies to raise rates or cancel insurance policies.
- ☐ Mandatory inspections of property to determine if vegetation has been modified for Defensible Space without a warrant or probable cause.
- ☐ Increased costs to property owners for fire protection to be a lien against property without a vote of the people.
- ☐ Shifting the burden of Wildfire responsibility to property owners when over 90% of areas burned are Federal Land

I am opposed to SB 762 Wildfire bill and call for its immediate repeal. Just "fixing the map" will not solve all the problems created by this bill. It creates far overreaching government intrusion into property rights and will dramatically increase costs of rural living. Other concerns I have are: \_\_\_\_\_
