

Docket Item:

2016 Educator Equity Report (in accordance with SB 755 and HB 3375)

Summary:

Educator Equity refers to providing students in Oregon with more teachers that look like them, speak their home languages, and are culturally responsive. Following the leadership of the Chief Education Office and through ongoing work within institutions of higher education and in partnership with community based organizations, efforts around Educator Equity are impacting student learning, success and resilience.

Educators in Oregon are less culturally and linguistically diverse than students and the data show this “gap” is expected to grow in the coming years. The report presented today outlines initiatives to recruit, support, and retain diverse educators in Oregon to cultivate and sustain student success.
