

# Information Sessions for Oregonians on Unemployment Insurance, Health Insurance, and Food/Financial Assistance

COVID-19, wildfires and other economic factors have affected many businesses and workers throughout the state. These regularly scheduled General Information Sessions are designed for any local businesses and workers affected by current events and all are welcome to attend. Teams are available across the state to provide information and services when a temporary layoff or permanent job loss has occurred. **Our goal is to help Oregon workers to navigate unemployment insurance, health care options, and community services that can provide much needed support while waiting to go back to work or searching for their next job.**
