

## 2021 Legislative Concept Proposal LC 600 - Minor Revisions

### Problem

A number of minor and technical revisions are required to align agency structure, statutes, and terminology to current practices, change names and references to offices, repeal unused or outdated terminology, and make other similar changes.

### Background

HECC proposes a minor revisions bill each long session that makes a number of technical changes to clean up the statutes. Proposals must have no tangible policy, fiscal, or equity impact, and must be assumed to be completely non-controversial and primarily technical in nature. Typically, these items are too minor or trivial to be considered as a standalone bill.

### Proposed Solution

Highlights this year include shifting reporting dates to better align with data, and changing the name of Oregon Volunteers to OregonServes.
