
Docket Item: 8.0 - Quarterly Strategic Plan Implementation Update**Summary**

The HECC's [Strategic Plan](#) ("the Plan"), adopted in October 2024, describes the vision, mission, goals, and strategies that the Commission intends to guide its work over the following three to five years.

In fall of 2025, agency leadership activated recommendations made by eight cross-office Strategy Implementation teams, as part of phase one of implementation targeting high priority areas. In spring of 2026 as part of phase two of the implementation rollout, agency leadership activated staff developed recommendations supporting an additional five priority strategies. This quarterly informational update to the Commission describes progress the agency continues to make since the last update at the May 7, 2026 Full HECC meeting to advance all activated strategy areas and their accompanying recommended activities. The Commission's comments, questions, and discussion will help to steer this ongoing work.

There are five Strategies which have yet to be activated and await the initiation of a phase three implementation planning process, contingent on several factors, most notably staff bandwidth with ongoing implementation activities. Additionally, strategy thirteen within phase two had no recommendations activated due to budget constraints. This strategy is currently on hold pending reengagement in phase three.

The accompanying materials provide a simplified view of Strategic Plan-related action that has been initiated since summer, 2025. This should not be considered a comprehensive account of HECC activity related to the strategies included within the Plan. Many longstanding agency activities are already aligned with the Plan. Rather, it focuses on activities that the agency has recently begun, or is doing differently, in connection with the Plan.
