Agency Summary

Agency Summary

About HECC

As the single state entity responsible for ensuring pathways to higher educational success for Oregonians statewide, the State of Oregon's Higher Education Coordinating Commission (HECC) sets state policy and funding strategies, administers numerous programs, approximately $4 billion in public funding, and convenes partners working across the public and private higher education arena to achieve state goals. The HECC is dedicated to fostering and sustaining high quality, rewarding pathways to postsecondary opportunity and success for all Oregonians through an accessible, affordable, and coordinated network of postsecondary and career training programs.

In 2011, the Oregon Legislature established "40-40-20" as the State's goal for educational attainment in Oregon, recognizing the importance of higher education as a target for enabling individual opportunity and achieving societal success in an increasingly knowledge-based global economy. The State's 40-40-20 goal (4-year degree/2-year degree or certificate/high school diploma or equivalent) commits to a future in which all Oregonians will complete their education and gain the ability to contribute to our society and economy. The HECC is responsible for advancing 40-40-20 by overseeing pathways to postsecondary success from the point at which students consider their options for secondary educations through their learning, training, and mastering of skills in postsecondary and career training programs.

Oregon enacted significant higher education governance reform in recent years, providing increased autonomy to public universities while establishing the HECC in 2013 as the sole state commission and agency with coordination, funding, and oversight responsibilities for all aspects of postsecondary education including 7 public universities, 17 public community colleges, private and independent colleges and universities, 9 local workforce development boards and their providers, private career and trade schools, and state financial aid.

As the State of Oregon's single, comprehensive portal to all sectors of higher education, HECC is uniquely positioned to provide strategic focus in areas such as: investing resources to maximize student success, increasing postsecondary affordability, improving pathways to and across postsecondary institutions, and connecting jobseekers with employment. Led by its 15-member volunteer commission, the HECC determines state funding allocations to public institutions, approves new degree and certificate programs, licenses and authorizes private postsecondary institutions, makes budget and policy recommendations to the Governor and Legislature, collects and reports postsecondary data, administers state financial aid and other access programs, administers statewide workforce development activity, and undertakes a variety of other reporting and oversight responsibilities that state law assigns to it. Its approach is guided by a Commission-adopted strategic plan, described in more detail below, that is organized around the Commission's overarching goals of student success, equity, affordability, and economic and community impact, each of which is linked to key performance measures.

The Commission meets publicly on a near monthly basis for full commission meetings. In addition, the HECC convenes work groups, task forces, and advisory committee meetings with specific charges and timeframes.

The Commission is supported by an executive director, who oversees the work of eight offices described below, all of which support the statutory responsibilities of the Commission.

The Office of the Executive Director carries out the central executive role of the agency, as well as communications, legislative affairs, human resources, policy initiatives, and other roles for the integrated agency.

The Office of Operations provides business services to ensure accountability, data driven decisions, and responsible stewardship of resources. It coordinates the establishment of policies and strategies to achieve the agency's mission and strategic goals and ensures compliance with state and federal requirements. The Budget unit provides program and administrative budget planning, financial analysis, and technical budget support. The Financial Services unit provides accounting services, administers employee benefits and payroll, prepares financial reports, and collects funds owed to HECC. Contracts and Procurement oversees purchasing, conducts

solicitations, and prepares and processes contracts and grants. Information Technology provides planning and analysis, networking, data management, security, and customer support services for a myriad of separate information systems. Facilities oversees leasing activities, safety, security, and access to all staff and visitors.

The Office of Research and Data (R&D) collects data on students, courses, demographics, enrollments, academic performance, and academic awards to comply with state and federal reporting requirements, provides effective recommendations to state and agency policy, meets reporting responsibilities, and conducts research to better understand and manage the postsecondary enterprise. The office is responsible for providing postsecondary education research and analytic services to support the Commission's efforts to achieve 40-40-20 and equity in Oregon higher education and to track progress in achieving all of the Commission's strategic goals.

The Office of Academic Policy and Authorization (APA) This office oversees two primary areas of work: 1) the quality, integrity, and diversity of private postsecondary programs in Oregon for the benefit of students and consumers, and 2) public university academic policy. The private postsecondary units include the Office of Degree Authorization (ODA), which authorizes private degree-granting institutions and distance education providers and the Private Career Schools (PCS) licensing unit, which licenses and supports private career and trade schools. ODA and PCS are responsible for student and consumer protection from diploma mills and unlicensed career schools. The public university academic policy unit provides academic coordination related to Oregon's seven public universities, including coordination of the academic program approval process, statewide initiatives and legislative directives to enhance postsecondary pathways and student success.

The Office of Postsecondary Finance and Capital (PFC) provides fiscal coordination related to Oregon's public postsecondary institutions, including financial planning, biennial budget recommendations for the Public University Support Fund, Public University State Programs, Public University Statewide Public Services, capital investments, fiscal reporting and analysis, capital bond funding administration, and the allocation of state funding to public postsecondary institutions.

The Office of Community Colleges and Workforce Development (CCWD) provides coordination and resources related to Oregon's community colleges and adult basic skills providers. CCWD also provides statewide administration related to Career and Technical Education (CTE) to include Carl D. Perkins Vocational and Technical Education Act, Accelerated Learning, Career Pathways, Community College Program Approval, GED ® testing and high school equivalency, English Language Learners, and the Workforce Innovation and Opportunity Act (WIOA) for Adult Education (Title II).

The Office of Workforce Investments (OWI) is focused on ensuring that Oregon's workers have the knowledge, skills, and work-related training they need to secure self-sufficiency wage jobs and meet the needs of our employers – now and in the future. OWI, in partnership with other state HECC offices and state agencies, provides leadership to Oregon's workforce system, WorkSource Oregon. OWI staffs the Workforce and Talent Development Board (WTDB), Oregon Youth Works Advisory Board, and OregonServes Commission. OWI administers the programs under Title I of the federal Workforce Innovation and Opportunity Act (WIOA); federal discretionary grants and state general funds that support programs such as apprenticeship and sector partnerships; the five programs comprising Oregon Youth Works (Oregon Conservation Corps, Oregon Youth Corps, Oregon Youth Employment Program, Oregon Department of Human Services' Youth Employment Program, and WIOA youth program); Oregon's state AmeriCorps program; and the Oregon Volunteers in Disaster system.
The Future Ready Oregon Initiative is also housed in OWI. Future Ready Oregon (SB 1545, 2022) originated in the Racial Justice Council's (RJC) Workforce Workgroup and is advancing an equitable workforce system and increasing opportunities for diverse workers, with a focus on key industry sectors—healthcare, manufacturing, technology.

The Office of Student Access & Completion (OSAC) administers a variety of state, federal, and privately funded student financial aid programs for the benefit of Oregonians attending institutions of postsecondary education, including the Oregon Opportunity Grant, the Oregon Promise, and more than 600 private scholarships. OSAC also administers other student outreach programs, such as Oregon ASPIRE, and works in partnership with foundations, private individuals, financial institutions, and employers. Oregon ASPIRE matches trained and supportive adult volunteer mentors in middle schools, high schools, and community-based organizations to help students develop a plan to meet their education goals beyond high school. OSAC also includes Veterans Education which provides oversight of programs for veterans.

Mission Statement and Statutory Authority:

Mission

The mission of the Higher Education Coordinating Commission, derived from its chartering statutes, is **Through strategic coordination, funding, outreach, services, reporting, and leadership for systems change, the HECC:**

1. **Drives equitable postsecondary access and success for all Oregonians;**
2. **Anticipates and meets workforce and economic needs; and**
3. **Strengthens Oregon's collective future by fostering research, innovation, learning, civic engagement, and cultural contributions.**

HECC Vision Statement

The Oregon Higher Education Coordinating Commission (HECC) envisions a future where all people benefit from the economic, civic, and cultural impact of high-quality postsecondary education, training, and workforce development.

Values and Beliefs

The HECC's 2024-29 strategic plan defines the Commission's list of values and beliefs:

- Collaboration - We believe that collaboration is essential for achieving common goals and driving positive change. When we are collaborating, we proactively share information, optimize resources, seek and give feedback, and foster inclusive participation to ensure that diverse perspectives are heard and valued.
- Creativity and Innovation - We believe that creativity and innovation are catalysts for finding unique solutions and pushing boundaries. When we are creative and innovative, we are not constrained by our current ways of working. We strive for excellence to continuously improve and to leverage information to solve problems in unexpected ways.
- Equity - We believe that equity is crucial in ensuring equal opportunities for all individuals. When our work is rooted in equity, we share power and leadership, engage our communities, and analyze data to remove barriers and create access and pathways to growth.
- Empathy - We believe that empathy plays a key role in understanding and valuing others. When we are empathetic, we strive to recognize the real-life results of our work, are attuned to our shared humanity, and integrate the beliefs and experiences of others into our decision-making.
- Integrity - We believe that integrity guides our actions and decision-making. When we are demonstrating integrity, we operate with transparency, accuracy, honesty, and humility. We trust ourselves and others to do the right thing, and to follow through on our commitments to ensure that there is a clear connection between our values, words, and actions.
- Determination - We believe that higher education in Oregon and the U.S. is at an inflection point requiring significant change. A strong future demands our relentless determination to more effectively center the needs of learners and better address employers' needs. The complexity of this work does not excuse inaction. We will utilize our unique role as a statewide body to lean into this work and determine improvements needed in our approach and processes.

Statutory Authority

HECC's statutory authorities include:

- Authorities related to **providing one strategic vision for Oregon higher education planning, funding, and policy**, including the development of biennial budget recommendations for public postsecondary education in Oregon, making funding allocations to Oregon's public community colleges and public universities, and adopting a strategic plan for achieving the state's postsecondary goals.
- Authorities related to **authorization of programs and degrees**, including approving mission statements and new academic programs for the public institutions, authorizing degrees that are proposed by private and out-of-state (distance) providers, licensing private career and trade schools, and overseeing programs for veterans.
- Authorities related to **administering key financial aid, workforce, and other programs**; including administration of financial aid programs such as the Oregon Opportunity Grant (state need-based student aid) and the Oregon Promise; managing state implementation of the federal Workforce Innovation and Opportunity Act (WIOA) with state, local and regional partners; developing dual credit standards, transfer standards, and credit for prior learning standards; and numerous other directives.
- Authorities related to **evaluating and reporting the success of the higher education efforts**, including data collection, analysis, research, and reporting across all sectors of higher education, and conducting annual institutional evaluations for public universities.

Oregon Revised Statute (ORS) and Oregon Administrative Rules (OAR) for HECC and its Offices:

OAR 583 Higher Education Coordinating Commission Office of Degree Authorization
OAR 589 Higher Education Coordinating Commission Office of Community College and Workforce Development
OAR 715 Higher Education Coordinating Commission

Agency Strategic Plan:

The Higher Education Coordinating Commission is required by statute (ORS 350.075(d)) to adopt a strategic plan for state postsecondary goals, and the Commission committed to updating this plan on a regular basis. The HECC's current 2024-29 Strategic Plan, adopted in October, 2024, provides a foundation and scaffolding for preparing more Oregonians with the degrees, certificates, and training they need to succeed in their goals and careers.

The 2024-29 plan describes challenges and opportunities in higher education, and defines key priorities and strategies that will guide higher education funding and policy decisions within the HECC authority in the areas of goal-setting, funding, pathways, student support, college affordability, and economic and community impact. The plan to improve higher educational success for all Oregonians is anchored by the Equity Lens, which commits the commission and agency to ensure its policy and resource allocation decisions advance equity. The 2016-2020 plan noted that Oregon has considerable work to do before reaching 40-40-20, and while there has been improvement, these improvements have not been seen equally by all groups. Students in Oregon's education pipeline—especially low-income, rural, and students of color—still are not accessing and succeeding in higher education at equitable rates. The Plan states "As Oregon works toward 40-40-20, the HECC will continue to take a lead role in convening partners to further align programming and supports to close the achievement and opportunity gaps for low-income students, students of color, and recent high school graduates. HECC will also deepen connections between Oregon's education and workforce systems." The Strategic Plan, Key Performance Measures, and recent strategic initiatives and activities are available at https://www.oregon.gov/highered/strategy-research/pages/strategic-plan.aspx.

Goals:

The Strategic plan identifies five key Strategic Goals

1. Goal 1 – Relevance. Improve the responsiveness of Oregon's education and training systems to the goals and needs of learner, employers, and communities

Outcomes

- Increase learners' satisfaction with their educational and training experiences.
- Increase the percentage of residents who move from the lower to higher end of the income distribution due to education and training.
- Increase employers' ability to hire qualified workers
- Increase graduates' preparation for solving civic, economic, and social challenges.

Strategies

- **Foster Equitable Workforce Outcomes**: Prioritize programs and experiences that connect underserved learners with sustainable wages, in-demand careers, and equitable advancement opportunities.
- **Connect Postsecondary Education and Training to Workforce Needs:** Facilitate and streamline partnerships between employers and postsecondary education and training, prioritizing essential employability and in-demand technical skills.
- **Contribute to Solving Community Problems**: Increase the proportion of postsecondary learners who work to solve public problems and can collaborate across different perspectives and experiences.
- **Broaden Learners' Understanding of Their Possibilities, Opportunities, and Responsibilities**: Support postsecondary programming that broadens horizons, including by giving learners the opportunity to benefit from and contribute to the cultural, social, and economic vitality of their communities.

2. Goal 2 – Alignment. Align Oregon's education and training systems to create straightforward pathways for learners

Outcomes

- Increase the percentage of recent high school students, GED® completers, and other adults entering post-secondary education and training.
- Increase the rate of credit transfer toward completion of degree or certification.
- Increase employment rates for education and training completers.

Strategies

- **Support Transitions for High School Students, GED® Completers, and Adults into Postsecondary Education and Training:** In collaboration with partners, establish a shared goal for postsecondary participation and implement practices, programs, and policies to achieve it.
- **Connect Learning Across the Education Continuum**: Partner with K-12 and postsecondary education and training providers to align standards in support of straightforward transitions, including simplified transfer pathways.
- **Strengthen Postsecondary to Employment Transitions:** Identify, encourage, and incentivize programs that support education to career transitions.

3. Goal 3 – Affordable Access. Make postsecondary education and training affordable for all Oregonians

Outcomes

- Eliminate the unmet financial need of learners seeking postsecondary education and training.
- Close participation, retention, and completion gaps across income levels.

Strategies

- **Grow State Investment in Learners and Institutions:** By increasing financial aid for students and support for institutions, target state investments to ensure that low- and middle-income Oregon residents can afford postsecondary education and training.
- **Help Learners Meet Their Basic Needs**: Increase public investment and coordination of services such as advising, counseling, housing, dependent care, mental health, and food security.
- **Support Institutional Efficiency:** Provide incentives and support for public education and training institutions to lower costs and increase quality through innovative models such as shared services and collaborative program delivery.

4. Goal 4 – Belonging. Elevate learner voices and support inclusivity and belonging in all postsecondary learning settings.

Outcomes

- Learner satisfaction is high across all demographic groups.
- Completion demographics match the state and/or region's demographics.

Strategies

- **Empower Students:** Gather and utilize student feedback at the institutional level and the HECC to understand and shape institutional and state policies and initiatives that support belonging.
- **Invest in Belonging:** Develop, promote, and fund models and programs that support student belonging and wellbeing both in the classroom and throughout learning spaces.
- **Connect Learners to College and Career Pathways:** Build learners' awareness and connection through clearly communicated pathways and career opportunities that are linked to their interests.
- **Support Providers in Connecting Learners to Pathways:** Evaluate and promote best practices for postsecondary education and for training providers to design learner pathways and career opportunities that are culturally responsive.

5. Goal 5 Leadership. Infuse postsecondary education, workforce development, research, and innovation into Oregon's economic development strategies.

Outcomes

- Make postsecondary education and training a key driver in the State economic development plans and strategies.
- Increase opportunities for diverse partners to share in the co-creation of workforce education and training strategies in response to statewide economic priorities.

Strategies

- **Enhance Partnerships for Economic Development:** Partner with state, local, and private entities to ensure that economic development plans incorporate postsecondary education, research and innovation, and workforce development strategies.
- **Identify and Respond to Partner Needs:** Work with industry, education, labor, and community partners to identify barriers to equitable access and completion of postsecondary education and to inform recruitment, retention, and advancement strategies that are equitable and supportive of a diverse workforce.
- **Support Business Recruitment and Retention:** Collaborate with federal, state, and local economic development agencies to ensure postsecondary education and training are contributing to business recruitment and retention.
- **Quantify and Evaluate Postsecondary Education's Economic Development Impact:** Assess and influence the effectiveness of college/university strategies to advance economic development.

To effectively exercise its functions, the HECC works in close partnership with campus leaders, governing boards, faculty, students, and state partners—playing a critical convening role for Oregon higher education and the communities that it affects.

Criteria for 2025-27 Budget Development:

The HECC relied on input from a variety of state and local agencies and partners when developing the agency budget. The budget development advances:

- Oregon's Educational Attainment Goal: the 40-40-20
- The HECC Strategic Plan, Strategic Framework, and Oregon's Strategic Roadmap for Oregon Postsecondary Education and Training, and the
- The Equity Lens

Recognizing the urgency to improve educational attainment for its residents, Oregon has committed not only to improving, but to becoming one of the best-educated populations in the world. In 2011, the Oregon Legislature adopted an ambitious goal to ensure that by 2025:

- 40 percent of Oregonians have earned a bachelor's degree or higher.
- 40 percent of Oregonians have earned an associate's degree or postsecondary credential as their highest level of educational attainment.
- 20 percent of Oregonians have earned at least a high school diploma, an extended or modified high school diploma, or the equivalent of a high school diploma as their highest level of educational attainment.

The goal, known as "the 40-40-20 Goal," has become shorthand for the efforts of the Legislature, Governor, state education boards, commissions, and agencies to significantly improve the education achievement levels and prosperity of Oregonians by 2025. The 40-40-20 Goal provides a clear target – a "North Star" aligned with Oregonians' economic, civic, and social aspirations -- against which to generally gauge the State's educational progress. The HECC, the Oregon Department of Education, and the Governor have worked together under the belief that in order for the 40-40-20 Goal to be meaningful, it must be accompanied by the clear understanding that increased levels of attainment of diplomas, degrees and certificates must be achieved equitably, with Oregon's diversity – of race, ethnicity, gender, home language, socioeconomic status and geography – equally well-represented in each stage.

With the passage of House Bill 2311 in 2017, Oregon clarified its 40-40-20 educational goal to focus it strategically on young Oregonians rising through the education system. As of January 1, 2018, the 40-40-20 was refocused as a pipeline goal, applying to the expected high school class of 2025 (and beyond), rather than to all adult Oregonians. House Bill 2311 also clarified the state's commitment to ambitious educational outcomes for working-age Oregonians by requiring that HECC work with the Oregon Workforce Investment Board and institutional partners on creation of a new set of goals for the adult population.

The HECC Strategic Plan and HECC's budget development is anchored by the Equity Lens, which commits the HECC to ensuring that its policy and resource allocation decisions advance equity. The Oregon Equity Lens was adopted by the HECC in 2014 as a cornerstone to the State's approach to education policy and budgeting. The purpose of the Equity Lens is to clearly articulate a shared goal for an equitable education system, to put into place the intentional policies, investments, and systemic changes necessary to reach this goal and to create clear accountability structures to ensure that we are actively making progress and correcting past inequities.

The graphic on the following page represents the latest date in Oregon reaching this 40-40-20 goal:

Cover Memo

HECC Equity Work
By promoting collaboration and coordination between Oregon's education and workforce partners, as well as through our own programs and policy leadership, HECC staff ensure that Oregonians experience increased access, equity, and success in completing their higher education, training, and career goals. HECC agency employees are encouraged to utilize our equity framework and considerations to help them better serve our partners, achieve HECC Equity Goals, and specific equity goals set by each office. Recognizing that in some cases not every consideration is applicable, each office/team incorporates relevant equity lens considerations into existing processes.

HECC DEI Goals

- Equity Goal 1: STRUCTURAL INEQUITIES—Lead in the elimination of structural inequities in postsecondary education and training by centering systemic equity into all decision making.
- Equity Goal 2: AGENCY CULTURE—Make diversity, equity, & inclusion an integral component of the agency's identity and culture.
- Equity Goal 3: OUTREACH—Create culturally responsive outreach and engagement in all areas of the postsecondary education and training system.
- Equity Goal 4: CONTINUOUS LEARNING—Create a culture of continuous learning, collaboration, and improvement.

At HECC, we work consistently to consider our actions and outcomes. In all processes, offices/teams are expected to embed these considerations:

- Set Outcomes
- Analyze Data
- Meaningfully Examine Impacts
- Evaluate
- Stay Accountable

HECC GRB Analysis:

1. **Who benefits from agency programs, both directly and indirectly?**
   - HECC operates a diverse and wide-ranging suite of programs and processes that touch on all aspects of the higher education student experience, as well as those that create opportunities for workforce training and advancement both directly and indirectly. The agency both directly funds and engages with learners and trainees and works with institutions and training providers through its funding authority, regulatory activity, and convening work. This memo covers all aspects of our agency work that impact Oregon's students and families, adult learners, workforce, faculty/staff, institutional leadership, community partners, and the economy. Highlighted are the following work areas:
   - Providing strategic vision for Oregon higher education
     - Developing state goals for the postsecondary system, including community colleges, public universities, and student access programs

    - Adopting a strategic plan for achieving the state's postsecondary goals
    - Developing a comprehensive, biennial higher education budget request linked to the strategic plan
- Distributing funding to institutions, students, workforce boards, and other partners
    - Adopting formulas for the distribution of state funding to community colleges and, separately, public universities
    - Developing, awarding, and monitoring grants and contracts for the distribution of state and federal funding to higher education and workforce partners
    - Adopting methodologies for the distribution of state financial aid to Oregon students
- Administering key financial aid, workforce, and other programs
    - Oregon Opportunity Grant
    - Oregon Promise
    - Oregon Teacher Scholars Program
    - Oregon Student Child Care Grant
    - ASPIRE student mentorship program
    - Oregon Youth Corps
    - Oregon Conservation Corps
    - Oregon Youth Employment Program
    - OregonServes
    - Federal Workforce Innovation and Opportunity Act investments
- Coordinating postsecondary education pathways
    - Approving mission statements for public universities
    - Approving new certificate and degree programs at public universities and community colleges
    - Approving statewide transfer pathways, a common course numbering system, and policies and procedures related to the movement of students between community colleges and public universities
    - Managing licensure and teacher registration for private career schools
    - Developing dual credit standards and credit for prior learning standards Approving resident tuition increases greater than 5 percent for public universities

2. Who will be burdened by agency programs?

- Recognizing that building trust and confidence in what we are trying to accomplish takes time. The unintended consequences or burdens of what HECC leads can impact students, Oregon's workforce, faculty/staff, and leadership depending on the context of new mandates or initiatives. Due to the consistency of competing interests, the perception of wins and losses can vary across the board. In our process, we strive to balance this through finding the common ground for all impacted, transparency, and timely updates. In our engagement with groups and individuals,

connections range from the initial meeting to collaboration in the implementation of new legislation that could make a significant equity impact for postsecondary education and training. While HECC has made progress in diversifying engagement in our policy and budget development processes, challenges remain. Communities that have been historically marginalized from higher education continue to miss opportunities, are excluded, and may legitimately distrust state and institutional processes. Additionally, some community members continue to feel alienated from systems and processes that appear to confer respect and legitimacy based on one's level of formal education.

A separate challenge is that as a coordinating commission for postsecondary education and training, HECC does not directly oversee the governance of Oregon's colleges, universities, and training providers. As a result, many of the barriers that learners encounter – including issues of culture, climate, and representation – may not be easily or obviously addressed through HECC or other state action. State policy has a critical role to play in creating equitable conditions for learners, but it operates at a step or two of removal from classrooms and campuses.

3. How does the agency increase or decrease racial equity? Do proposed new programs have potential unintended/racial equity consequences? What benefits may result from the program?

- HECC as an agency exists to support the institutions and workforce partners in the increase of racial equity in postsecondary education and training. We strive to be thoughtful in our planning and collaboration in efforts to create solutions that are meant to interrupt systemic barriers for students and those in our workforce. Each program that the HECC leads/administers is meant to support increased access and equitable treatment for our identified priority populations and all underserved communities. This said, we still have a long way to go to achieve racial equity. With increased needs of our students, the underfunding of higher education and training, the increase of cost to support goods and services, the increase of basic needs in most systemic cases increases the racial equity gap or keeps us in the same place after our best efforts. The HECC recognizes that in this context an unintended consequence in our programs has been that only certain groups are accessing the support and opportunities we provide. In efforts to interrupt the persistence of this gap, at the HECC we have incorporated our Equity Impact Protocol in our processes. This allows us to interrupt our default in just serving the usual groups or individuals. Program leads prioritize the identification of barriers and unintended consequences in their planning and implementation. This helps to mitigate possible outcomes to a program. Recognizing that an unintended consequence can be bad or good, once identified, program leads are already equipped to approach the work with continuous improvement in mind. By being grounded in this way, they can adjust or amend the situation and better reach those that the programs are intended to serve. This new collective process has allowed each HECC office to engage with students, adult workers, and external partners in new ways. From showing up in new spaces to reaching out to partners that haven't traditionally worked with the HECC, we have been able to make meaningful progress. The change in how program leads approach their processes has allowed more students and adults to access the benefits that each HECC program provides.

4. Whose voices and perspectives are not at the table? Why?

- For the process of developing 2025-2027 legislative and budget requests, we continue to stay grounded in our Strategic Roadmap and agency equity goals, aligning, setting clear expectations of how every office engages in this process, and having consistent check ins and discussions. In

reflecting through who we are still missing in our outreach and engagement, we must do better in inviting those that we are serving to the table. We also need to better identify new collaborators among student-based organizations, more culturally specific CBOs, workforce, and K12 partners that can connect us to student and parent groups. As a state agency, at times it can be difficult to shift into incorporating new voices and perspectives. With tight timelines and staff thinking they can't just connect with partners outside their formal work, our agency progress can at times fall backwards. In addition to this, under the new state leadership transition, we experienced more limitations on how we should engage partners in our processes. Reaching out intentionally for ARB coordination and feedback was not permitted until late in the process. Although this context existed, due to more consistent connections since the last biennium, HECC staff found that they were still able to bring partner voices and ideas for legislative concepts to our review and budget process. The HECC continues to prioritize the expansion of who our partners in postsecondary education and training are and how they can be incorporated in the work.

5. What does the agency do to ensure multiple perspectives are part of our decision-making process?

- Although as an agency we need to improve in our engagement, more staff continue to incorporate these steps to better ensure multiple perspectives in their processes: making personal connections through phone calls, invitations to participate in different parts of our implementation processes, email communications, site visits and events where allowed, virtual meetings and presentations, meet and greets, use of Equity Lens Tools, creation of accessible materials to support the navigation of our state process, translation/interpretation, and sharing of newsletters through new GovDelivery System. The new HECC engagement process has also incorporated the intentional identification of partners at the beginning, and follow up with partners in efforts to not leave our partners in a state of not knowing next steps or about process conclusion.

HECC BACKGROUND AND DEI WORK

ABOUT THE COMMISSION AND AGENCY

The State of Oregon's Higher Education Coordinating Commission (HECC) is the primary state entity responsible for ensuring pathways to postsecondary education success for Oregonians statewide and serves as a convener of the groups and institutions working across the public and private higher education arena.

Established in 2013, the HECC is a volunteer commission appointed by the Oregon Governor and confirmed by the Oregon State Senate with funding and policy responsibilities for higher education and the workforce statewide. The Commission holds approximately eight day-long, public meetings annually. It hires and oversees an Executive Director that leads a state agency of the same name.

Major duties, authorities, and functions of the Commission include:

- Providing one strategic vision for Oregon higher education planning, funding, and policy; and
- Establishing methodologies for distributing public funding to community colleges, public universities, students, workforce boards, and other partners; and
- Coordinating postsecondary degrees, programs, and academic pathways; and
- Administering key Oregon financial aid, workforce, and other programs; and
- Evaluating and reporting the success of higher education efforts.

In 2019, the HECC received legislative approval to hire its first staff position focused exclusively on issues of diversity, equity, and inclusion (DEI). This position supports all the agency's staff, as well as the Commission, in adhering to the commitments articulated in the HECC Equity Lens (see below), including community engagement and relationship building. Some of the HECC's recent equity-related strategies and resources are described on this page of the HECC website.

VISION STATEMENT

The HECC's vision statement, adopted in 2017, reads in part:

> "The HECC envisions a future in which all Oregonians—and especially those whom our systems have underserved and marginalized—benefit from the transformational power of high-quality postsecondary education and training."

See the HECC's full mission, vision, and values here.

2021-25 STRATEGIC ROADMAP

In August, 2021, the HECC finalized its Strategic Roadmap for Oregon postsecondary education and training. This document, which was informed by the contributions of nearly 1,500 stakeholders and partners over two years, sets an ambitious path forward by describing how postsecondary systems, policies, and practices need to change in order to achieve Oregon's goals for educational attainment and equity.

The Roadmap opens as follows:

"This strategic roadmap reflects the Commission's perspective that postsecondary education in Oregon and nationally must undergo fundamental transformation to heal a society riven by wealth and ideology gaps that higher education has helped to create. To equitably serve all learners and prepare them for lifelong success, Oregonians must upend centuries of tradition that equate excellence with exclusion. We must replace our habit of asking, 'Are students ready for college?' with a different question: 'Are colleges ready for students?' We must insist that those whom our systems have collectively failed to serve well – including emerging bilingual Oregonians, members of Indigenous communities, immigrants, and others from diverse racial and ethnic backgrounds – represent the State's greatest potential and deserve its focus. We must recognize that the way prestige is often defined and measured in postsecondary education is fraught with systemic barriers for underserved populations. Instead, we should reward schools based on how well they foster the talents and contributions of underserved individuals and communities. We should channel institutional competition towards cooperation. We should celebrate the progress that Oregon has made in providing equitable access to postsecondary education, while recognizing that for all students to succeed requires additional transformation. Finally, to promote new discoveries, better problem-solving, and more inclusive communities, we must embrace alternative traditions of learning and knowing, while also sharpening longstanding methods of research and scholarship."

The Roadmap sets the following five categories for strategic action as major areas of focus for the HECC, the Legislature, and other partners, with specific examples described in the document:

1. **Transform and innovate to serve students and learners best**—Support education and training institutions in continuing to transform, expand, and redesign their outreach and delivery models to engage today's learners.
2. **Center higher education and workforce training capacity on current and future state needs**—Focus postsecondary education and training resources to serve Oregonians where they are and who they are, with a priority on communities and populations that have been historically underserved.
3. **Ensure that postsecondary learners can afford to meet their basic needs**—Improve college affordability for Oregonians and ensure that fewer students struggle with homelessness, housing insecurity, and food insecurity.
4. **Create and support a continuum of pathways from education and training to career**—Ensure that all learners have access to a full range of education and training options beyond high school, including apprenticeships, career certificates, and college degrees.
5. **Increase public investment to meet Oregon's postsecondary goals**—Through adequate and sustained levels of public investments, minimize tuition increases and build programs and services to equitably serve learners.

HECC AGENCY OFFICES

- Office of the Executive Director (EDO)
- Academic Policy and Authorization (APA)
- Community Colleges and Workforce Development (CCWD)
- Public Postsecondary Finance and Capital (PFC)
- Student Access and Completion (OSAC)

- Office Workforce Investments (OWI)
- Office of Research and Data (R&D)
- Office of Operations

PROGRAMS INCLUDED

HECC operates a diverse and wide-ranging suite of programs and processes that touch on all aspects of the higher education student experience, as well as those that create opportunities for workforce training and advancement. The agency directly funds and engages with learners, trainees and works with institutions and training providers through its funding authority, regulatory activity, and convening work.

This plan covers all aspects of agency work, highlighted in the following work areas:

Providing strategic vision for Oregon higher education

- Developing state goals for the postsecondary system, including community colleges, public universities, and student access programs
- Adopting a strategic plan for achieving the state's postsecondary goals
- Developing a comprehensive, biennial higher education budget request linked to the strategic plan

Distributing funding to institutions, students, workforce boards, and other partners

- Adopting formulas for the distribution of state funding to community colleges and, separately, public universities
- Developing, awarding, and monitoring grants and contracts for the distribution of state and federal funding to higher education and workforce partners
- Adopting methodologies for the distribution of state financial aid to Oregon students

Administering key financial aid, workforce, and other programs

- Oregon Opportunity Grant
- Oregon Promise
- Oregon Tribal Student Grant
- Oregon Teacher Scholars Program
- Oregon Student Child Care Grant
- ASPIRE Mentorship Program
- Oregon Youth Corps
- Oregon Conservation Corps

- Oregon Youth Employment Program
- OregonServes
- Federal Workforce Innovation and Opportunity Act investments
- Approving mission statements for public universities
- Approving new certificate and degree programs at public universities and community colleges
- Approving statewide transfer pathways, a common course numbering system, and policies and procedures related to the movement of students between community colleges and public universities
- Managing licensure and teacher registration for private career schools
- Developing dual credit standards and credit for prior learning standards
- Approving resident tuition increases greater than 5 percent for public universities

OREGON HECC EQUITY LENS

Soon after its establishment in 2013, the HECC adopted an educational Equity Lens. This Lens had been under development during the prior two years, advised by community conversations led by the Governor's office and the Oregon Education Investment Board (OEIB), and was intended for all education agencies (P-20). Since that time the HECC has updated and focused the Lens on postsecondary education, and it remains a cornerstone to the Commission's and its staff's approach to postsecondary education policy and funding.

Achieving the universal goal of educational equity requires targeted strategies to eliminate racial disparities and other identity-based disparities. The HECC is committed to intentional action as an anti-racist, equity-centered agency, and Commission. The purpose of the Equity Lens is to:

- Clearly articulate the shared goals we have for our state of an equitable education and training system, and explicitly identify persistent and severe disparities in outcomes; and
- Assess how current and proposed policies, programs and practices benefit and/or burden underserved learners and communities to identify where policies, programs, and practices need to be strengthened or changed; and
- Make intentional equity-informed decisions, actions, targeted interventions, investments and enact systemic change to improve equitable educational outcomes and access to services, programs, and resources; and

- Strengthen public involvement through transformational community engagement, access to information, and decision-making opportunities; and
- Create clear accountability structures to ensure that we are actively making progress and correcting where there is not progress.

The Equity Lens confirms the importance of recognizing institutional and systemic barriers and discriminatory practices that have limited access and success for many learners in the Oregon education and training system. By utilizing the Equity Lens, HECC aims to provide a common vocabulary and protocol to assess how programs benefit and/or burden underserved students and communities, and to make decisions on resource allocation, partnership, engagement, and strategic initiatives to support equitable educational outcomes. We are committed to explicitly identifying disparities in education and training outcomes for the purpose of targeting areas for action, intervention, and investment. We are simultaneously committed to identifying strengths in communities and promising practices in our educational and workforce systems.

We focus the HECC Equity Lens on Oregonians who are currently and historically underserved in access to and success in postsecondary education and training, and in the programs and services impacting these measures. We intentionally place racial equity at the forefront to counterbalance and dismantle racist policies and practices that perpetuate inequities. We are committed to explicitly identifying and urgently addressing the most severe and persistent disparities for learners, while shifting to a more equitable education and training system for all Oregonians.

In addition to race and ethnicity, we recognize that numerous other areas of identity-based inequities, such as socioeconomic status are inextricably linked. The definitions of historically and currently underserved groups in the context of postsecondary education and training may vary according to the specific outcome under attention, and may include racial/ethnic identity, socio-economic background, first-generation, dis/ability status, gender, sexual orientation, parental status, veteran status, geographic origin or location, and other characteristics. It is also important to recognize that many Oregonians identify with numerous communities or intersecting identities, and may be limited by compounding systems of barriers, exclusion, or marginalization practices. We must formulate new approaches to ensure all residents can live and thrive in our state, across their identities. While we focus on educational equity and center the urgency of improving racial equity in education, we recognize that racial disparities persist across numerous key indicators of success including health, education, housing, and economic opportunity amongst others. Advancing racial equity in Oregon will take foundational reform. Furthermore, while the HECC Equity Lens focuses on postsecondary education and training, we affirm our longstanding commitment to partnership on urgently addressing inequities across the education systems in Oregon.

In serving our underserved students and learners in Oregon, for postsecondary education and training, while we center racial equity, the broader set of identities of historically and currently underserved learners may vary according to the specific outcome under consideration. For example, the characteristics of underserved Oregonians in a particular county who are accessing workforce training opportunities may be different from characteristics of underserved groups for high school seniors applying for financial aid. It is important to center racial equity and to identify the most severe and persistent disparities for students and learners. For the HECC, postsecondary education equity will be achieved once one's community or characteristic—including but not limited to racial/ethnic identity, socio-economic background, dis/ability status, gender, parental status, veteran status, sexual orientation, and geographic origin or location—no longer predict inequitable access to and success in postsecondary education and training.

HECC DIVERSITY, EQUITY, AND INCLUSION

Diversity, equity, and inclusion, and affirmative action work are essential to achieving state education goals and promoting a workplace culture and environment that supports the success of all who learn, work, and engage with the agency. The HECC provides agency leadership in workforce DEI and cultural humility through the application of our vision, mission, and Equity Lens. We are committed to leveraging diverse perspectives to create innovation and synergy resulting in stronger, more effective, and more equitable outcomes. The HECC is committed to establishing progress monitoring and maintaining a work environment where all employees are valued, treated fairly, and are provided opportunities to develop and grow to their full potential. The agency promotes excellence in workforce DEI, Affirmative Action, and cultural competency by:

- Committing to recruit, retain, and advance talented staff from historically underrepresented populations.
- Intentionally creating an environment of respect that is supportive of workplace success and fostering a climate of diversity, equity, inclusion, and cultural humility.
- Recognizing that every employee plays a part in the agency's inclusive work environment by being respectful, supportive, and acting with integrity toward one another.
- Acknowledging each person's skills, talents, knowledge, experiences, and personalities to broaden the range of perspectives in and approaches to conducting the agency's work.
- Implementing an integrated strategy with performance accountability for workforce DEI and cultural competency.
- Creating internal opportunities for learning, research, implementation, and assessment that promotes a shared understanding and empowers staff to act.
- Promoting a culture of inclusiveness and social justice.
- Actively addressing systemic oppression through research, programs, and policies.
- Supporting DEI in our services and administration.

APPLYING THE LENS

Continuous Learning and Education

The HECC is a learning organization and as a key value of continuous learning, it is important that all staff are encouraged and supported to engage and learn about topics related to Diversity, Equity, Inclusion and Accessibility. On-going learning promotes growth, development, and knowledge. Learning about DEI and Accessibility creates avenues for employee engagement that help sustain their health, and wellness.

Professional learning and development extend to all employees of the agency. The HECC goal is to surpass the state minimum by attaining at least 20 hours annually of learning for all permanent employees. The HECC strives to be an agency where staff are motivated, empowered, supported, and engaged. Training activities are

integrated with and linked within the performance management process along with continuous improvement, which is a distinguishing feature of learning organizations.

As the agency moves forward its commitment to foster learning environments and promote continual growth and improvement, it is crucial that all aspects of equity, diversity and inclusion be at its core foundation. As such, important conversations take place to determine the overarching perspectives, beliefs, and vision amongst HECC leadership/management. The following agency priorities have been identified:

- Nurture an environment intentionally inclusive of diverse groups, people, and perspectives.
- Align equity, diversity and inclusion efforts with board, commission, and agency strategic plans.
- Recruit, hire, support, promote and retain diverse staff.
- Increase cultural awareness and staff diversity.
- Maintain a strong, clear, and consistent process for the entire agency to center Diversity, Equity, and Inclusion (DEI) in its communications.
- Align DEI efforts with agency programs, policy development, rulemaking, and services in alignment with the HECC Equity Impact Protocol.

While the agency's leadership and coordination with partners on equity and student success is vital to achieving Oregon's higher education and workforce goals, it is equally important to engage the agency's internal staff at all levels.

- All staff are regularly informed of DEI events occurring in local areas. Staff representation is encouraged at community-based and/or equity-focused events and convenings, demonstrating the agency's support and creating additional agency awareness.

HECC DEI GOALS AND ACCOUNTABILITY

HECC DEI GOALS

The Agency DEI Action Plan finalized in 2022 includes SMART (specific, measurable, achievable, relevant, and time-bound) goals, as determined for each office, is aligned to the HECC Affirmative Action plan expectations and is in support of the following Four (4) HECC Equity Goals:

1. Lead the elimination of structural inequities in postsecondary education and training by centering systemic equity into all decision making.
2. Make diversity, equity, & inclusion an integral component of the agency's identity and culture.
3. Enhance culturally responsive outreach and engagement in all areas of the postsecondary education and training system.
4. Strengthen a culture of continuous learning, collaboration, and improvement.

At the HECC, we administer the comprehensive state budget for postsecondary education and workforce investments and develop and implement policy and procedure through legislative direction. These tasks and decisions can enhance the lives of our students and partners to create a stronger Oregon. To make equity-centered decisions, the HECC has begun to intentionally use our new Equity Impact Protocol in our projects, contracting opportunities including Request for Application/Proposal (RFA/RFP) development, policy, and

budget planning; and in collaborating with our partners, externally and internally. It is important to note that our Equity Impact Protocol aligns the HECC DEI Goals with the Office Equity Action Plans.

USE OF DATA

HECC's Strategic Roadmap is anchored by the understanding that Oregon cannot fulfill its overall goals for postsecondary education and the economy without significantly closing equity gaps, particularly for learners of color. For example, while about 37% of white Oregonians have completed a bachelor or graduate degree, only about 20% of Oregonians who identify as Black, Hispanic, Native American, or Pacific Islander have done the same. To meet Oregon's statutory goals for this measure as well as for certificates and associates degrees (each 40%) will require doing better for all Oregonians, but especially for those whom higher education opportunities have been marginalized and underserved.

This isn't simply a mathematical exercise of meeting abstract state goals. As we note in nearly every HECC general presentation, the inequitable distribution of higher education in Oregon compounds the inequitable distribution of income and wealth. In an economy where postsecondary education confers a large and increasing wage premium, inequities in postsecondary access and success exacerbate economic inequalities. Oregon's wage data, matched with educational attainment data, bears this out.

In 2021, HECC published five equity briefs (appended to this document) that provide an in-depth look at data on the challenges and successes of public college and university students of color. Each Equity Brief focuses on the challenges of success—from high school through college and into the workplace—and where progress in reducing gaps has or has not been made for each racial/ethnic group.

While disparities are pervasive at all levels of education for students of color, underserved students do not all have the same experiences. The briefs provide separate analyses for Asian American/Asian learners, Black/African American learners, Latino/a/x/Hispanic learners, Native American/Alaska Native learners, and Native Hawaiian/Pacific Islander learners. These documents, which originated in requests from culturally specific organizations for a specific look at the experience of their community, provide a foundation for the HECC's community engagement efforts.

Finally, each of the HECC's legislatively-mandated Key Performance Measures are annually reported disaggregated, by race, in order to focus legislative, Commission, and public attention on critical equity issues.

HECC OFFICE EQUITY ACTION PLANS

Each office submitted initial office goals through their office director, these goals are pertaining to their body of work in alignment with the four (4) agency equity goals developed in 2020. After the creation of the new Office Equity Plan Template, offices updated and submitted the new plans in August 2022. The goals, outcomes and measures were also finalized in 2022; however, they will be malleable and adjust as needed. The DEI Director along with the Inclusion and Equity Specialists will monitor the progress quarterly and provide an update at all-staff meetings. Managers and supervisors will implement their office plan and model the actions to support the equity goals. The Affirmative Action (AA) Representatives also support the staff and

help provide opportunities to build capacity, as well communicate statewide AA/DEI expectations and guidance. The DEI Director meets with each office to make sure they are on track and provide support.

In 2022, to support the HECC's DEI team agency accountability process of ongoing monitoring and quarterly reporting, the HECC DEI Council began to serve as the agency advisors to the DEI Director and Executive Team in vetting the progress of the Agency Equity Action Plan across all the offices.

The council members also serve as ambassadors to equity work and assist in building fluency and courage to become productive interrupters as equity leaders in the agency. The council will discuss problems of practice and identify recommended solutions. The DEI Director along with the new team will meet with each office to make sure they are on track and provide support.

THE HECC DIVERSITY, EQUITY, AND INCLUSION COUNCIL

Our DEI Council is committed to energizing the agency's diversity efforts. The DEI Council's mission is to foster a climate that empowers all to embrace a culture of diversity, equity, and inclusion as a valued asset. HECC management and staff prioritize these values through professional development and engagement to achieve equity-driven results.

The DEI Council strives to:

- Support accountability for the four (4) Agency Equity Goals; and
- Create an agency culture that celebrates the unique attributes of all people; and
- Create a workplace where individual strengths are recognized and appreciated, and all employees are encouraged to contribute; and
- Provide a safe learning environment for all staff for increased cultural humility and cultural agility; and
- Collaborate closely with the agency Learning & Change Management Team to provide learning events in support of learning, DEI, engagement, culture, and wellness.

The HECC remains fully committed to an enhanced and vibrant internal culture of inclusion and strive to surpass our goal of recruiting, hiring, retaining, and promoting people with disabilities, people of color, and women in our workforce. Through the leadership of the Executive Director, Executive Team, and DEI Council, it is expected that each employee of the agency treats all partners, customers, and fellow employees with dignity and respect.

The agency actively seeks to be an employer of choice because we are a welcoming and accessible agency with an environment that is inclusive and supportive. We believe that different cultural perspectives strengthen our teams and discussions that lead to creativity and innovation in the way we approach our work. The agency continues to dedicate resources to the DEI Council to support its efforts to energize the agency's diversity efforts.

HECC ENGAGEMENT

HECC ENGAGEMENT HISTORY

The HECC's adoption of its Equity Lens in 2013 reflects the Commission's longstanding commitment to engaging community partners equitably in the coordination and alignment of goals, priorities, and actions. In the subsequent years, HECC staff – guided by its equity-oriented Commission – have steadily increased outreach to and engagement of community partners, and the governments of the nine federally recognized tribes of Oregon. For the most part, this has not occurred according to a formal plan or with accountability for results. Prior to the creation of a DEI office within the HECC in 2019, it was primarily left to program and policy managers to conduct outreach and consult with community partners, individually and inconsistently.

In 2018, the Lumina Foundation, a major national higher education philanthropic organization, selected Oregon as one of three states, at the time, to receive a Talent, Innovation, & Equity (TIE) grant. The grant was awarded in recognition of the HECC's and Legislature's efforts to eliminate disparities in postsecondary education success rates between Oregon's overall student population and the historically underrepresented students of color. Among other the activities, the grant helped fund HECC to host twelve roundtable meetings with diverse communities statewide in 2019. Working with community leaders who were equity champions, HECC identified and engaged participants from a broad range of professional backgrounds including PreK-20 educational institutions, business, foundations, city, and state government agencies, and health and cultural community organizations that engage, serve, and support the students and families of the underrepresented student communities HECC aims to better serve.

During our Talent, Innovation, and Equity Grant work, the HECC underwent an analysis for agency strengths and opportunities. Findings included strengths in addressing disparities and prioritizing equity strategies in the work. Through our community engagement focus group process, we identified the need to create deeper relationships, expand the voices, and following up with them to continue in a transparent way. With the addition of a new Director of DEI and team, we are better able to coordinate a more complete process of engagement and operationalize DEI work for the agency, build capacity in our commitment, and serve as points of contact for our existing and new partners.

Through these conversations, HECC identified unique and common barriers that impact the equity populations and recommendations to close equity gaps and increase degree attainment. This information helped to inform the HECC and provide guidance to policy creation, design, and implementation of strategies and resources that lead to increased degree attainment and erase equity gaps.

Subsequent TIE-sponsored activities included providing sub-grants to institutions to support collaborative partnerships with culturally responsive community-based programs, launching educational communications on the need for equity such as the Real Opportunity video, sponsoring focus group research on learners of color, and providing multi-lingual resources to campuses on marketing to adult learners of color.

CURRENT ENGAGEMENT OBJECTIVES: A NEW STRATEGY

This plan is designed to support HECC Leadership and staff in their engagement work for both policy/statutory items, such as rulemaking and budget requests. We are committed to a more open and transparent process with increased partner engagement. We strive to use data that explicitly identifies disparities in education outcomes to act, intervene, and invest in equitable practices. To take these steps we must understand and address the impact of our power and position in assisting or hindering Oregon's students. To truly learn with and about the communities we serve in Oregon, we commit to meaningful and consistent engagement efforts.

Our objectives and expectations for engagement are as follows:

- **We will directly solicit partners for ideas and partnership opportunities:** While HECC has always been open to outside ideas, it has never developed a formal process for soliciting them and considering them in the same manner that internally generated proposals are considered. For the 2023-25 policy and legislative development cycle, HECC engaged with a myriad of existing and new partners on the front end, during the brainstorming phase of our processes. We are identifying areas where we can continue to collaborate as we move forward.
- **We will directly engage with partners in the development of our internal requests:** In addition to, the agency working with external partners to identify the most important higher education and workforce training problems facing the state and communities, we are also working to design solutions, programs, and interventions more collaboratively. All our collective work will be worked through individually, and through a collaborative process that involves representatives of diverse interests.
- **We will thoroughly examine equity impacts utilizing our HECC Equity Lens Tool:** Through the work of the HECC DEI office and as a requirement of the legislative and policy development process, HECC staff must thoroughly analyze the equity impacts of our work as they are being developed. Moving forward, no concept or budget package will be put forward without such an analysis.
- **Through outreach efforts and discussions with new partners,** we will create deeper opportunities to co-create concepts that represent what is needed.

In the different parts of the overall process, we will achieve meaningful collaboration and empowerment with those we can build relationships with and are impacted by our collective work.

THE BROADER CONTEXT OF ENGAGEMENT OBJECTIVES: RISKS, CHALLENGES, MITIGATIONS, AND COMMUNITY BENEFITS

While HECC has made progress over the last eight years in diversifying engagement in our policy and budget development processes, challenges remain. Communities that have been historically excluded from higher education may legitimately distrust state and institutional processes. Additionally, some community members may feel alienated from systems and processes that appear to confer respect and legitimacy based on one's level of formal education. Finally, higher education frequently and unnecessarily employs acronyms, complexity, and jargon that may unfairly exclude from meaningful participation from almost anyone who isn't already an "insider."

A separate challenge is that as a coordinating commission for postsecondary education and training, HECC does not directly provide oversight or govern Oregon's colleges, universities, and training providers. Public Universities and Community Colleges are overseen by boards As a result, many of the barriers that learners encounter – including issues of culture, climate, and representation – may not be easily or obviously addressed through HECC or other state action. State policy has a critical role to play in creating equitable conditions for learners, but it operates at a step or two of removal from classrooms and campuses.

The single most effective way for the HECC to mitigate these risks is by building authentic, gracious, and consistent relationships with community groups and community members. No single presentation, email, or conversation will overcome the mistrust, missing information, and/or alienation that community members may experience when engaging with the postsecondary education policymaking process. These engagement objectives will assist HECC staff and commissioners in creating conversations and partnerships that can restore trust and create pathways for full inclusion in postsecondary education and workforce training.

For the 2023-25 Biennium the HECC DEI Team will be implementing the HECC Office Community Engagement Readiness Assessment Guidebook. This will help each HECC office unpack the broader context of their engagement efforts and map their community partner networks. With technical assistance from the DEI Team, HECC Offices can move to repair mistrust and harm and truly learn from students and their communities about building tools for student success across Oregon.

COMMUNITY PARTNERS

The following is an initial list of community -based organizations, workforce and national partners, institutions, student groups, equity leaders, state leaders, that we are currently connecting with for our process and agency work:

HECC Convened Equity Partners	HECC Equity Advisory Committee	HECC Leadership Council for Equity				
Workforce and National Partners	Local Workforce Investment Boards	Inter-Institutional Faculty Senate	Oregon Education Association	American Federation of Teachers – Oregon	Oregon Community College Association	Western Interstate Commission for Higher Education
	Oregon Alliance of Independent Colleges and Universities	Northwest Career Colleges Federation	U.S. Department of Education	State Higher Education Executive Officers Association	Public University Council of Presidents	
Community Based Organizations	Latino Network	Self Enhancement Inc.	Native American Youth and Family Center	Asian Pacific American Network of Oregon	Immigrant and Refugee Community Organization	Oregon Campus Compact
	Coalition of Communities of Color	United Way Network	Oregon Partnership for Education Justice (FBO)			
Other Advocacy Groups	Stand for Children	Technology Association of Oregon	Oregon Workforce Partnership	Oregon Business and Industry	Portland Business Alliance	ASC/States4Service
	Oregon Business Council	Oregon Student Association	Oregon Student Voice			
Philanthropy	Ford Family Foundation	Oregon Community Foundation	PGE Foundation	Foundations for a Better Oregon / Partners for Educational Justice	Meyer Memorial Trust	Racial Justice Council (Education Recovery Committee)

State Boards and Commissions	State Board of Education	STEM Investment Council	Workforce Talent and Development Board	Oregon Conservation Corps Board	Oregon Youth Corps Advisory Board	OregonServes Commission
	Financial Aid Advisory Committee	Educator Advancement Council	Government to Government Education Cluster	Teacher Standards and Practices Commission	Legislative Commission on Indian Services	
State Government and Agencies	Governor's Office	Early Learning Division	Oregon Department of Education	Oregon Employment Department	Bureau of Labor and Industries	Youth Development Division
	Oregon Legislature					
Postsecondary Institutions	Public Universities	Community Colleges	Private Degree Granting Institutions	Private Career Schools		

ENGAGEMENT METHODS, OUR HOW

In 2019, the Legislature funded and HECC filled the new role of the Director of Diversity, Equity & Inclusion, reporting to the Executive Director. This position allows for continued prioritization and accountability to our equity work and commitment. Supplemented by two additional DEI staff positions created by the Legislature in 2021 (and filled recently), the nascent DEI team leads equity and diversity efforts both internally and externally for the agency, supporting our goals for equitable outcomes in postsecondary education and training, and ensuring that agency leadership and staff upholds our Equity Lens in policymaking, budgeting, engagement strategies and implementation. In 2021, HECC leadership and staff engaged in continued professional development in building their understanding of what it means to authentically engage our existing and new partners. The first big change occurred for our Commission, where our newly appointed Chair, Terry Cross reorganized how we bring multiple perspectives and voices to the invited testimony portion of our agendas. We now have extended time for testimony and connect personally with guests who have not traditionally been a part of our process, and who bring new energy and alignment to our strategic goals. This example is just one of the new strategies we are implementing at the HECC.

All the efforts to date have pushed the HECC on a path to meaningful and continuous engagement. From the TIE Grant to the Commission Chair calling for student voices to be centered. From the Equity Lens and Strategic Roadmap that made equity the foundational component to our work as an agency. For the next biennium the HECC will continue to make progress to our agency equity goals, using the enhance tools developed in the last year, while building on the years of work and learning.

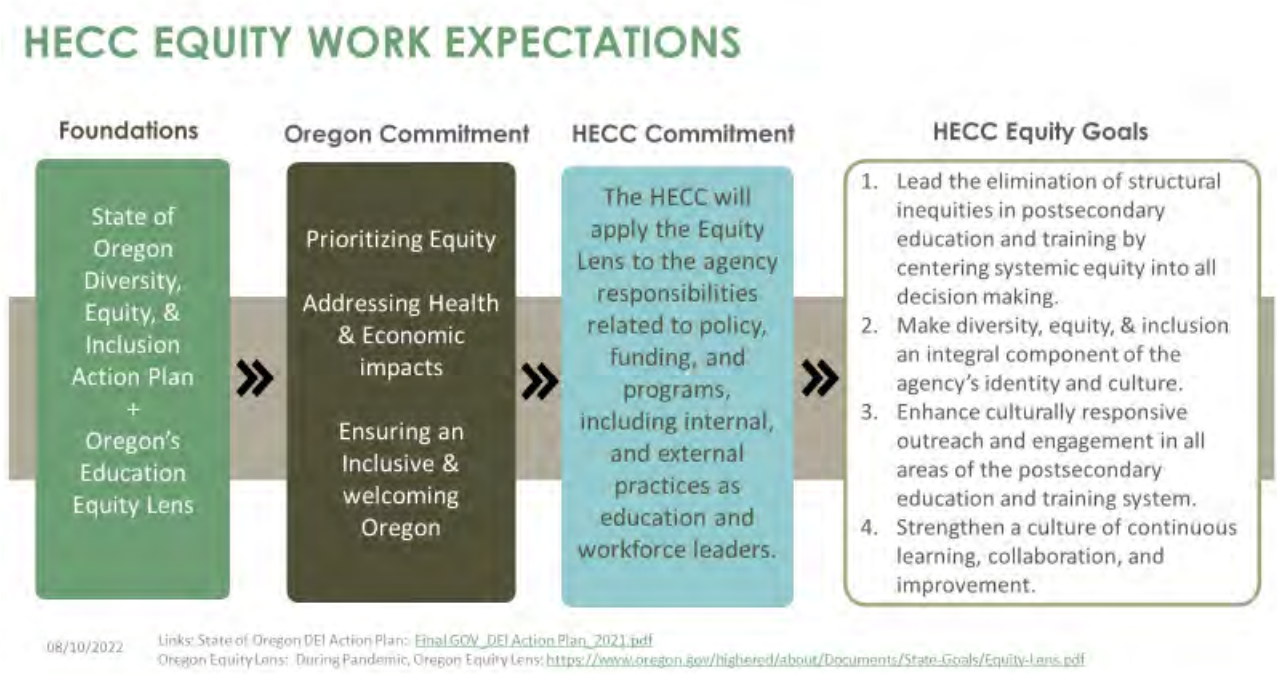
CLOSING THE LOOP

For the process of developing our continuous engagement work, all HECC offices are connecting with partners to bring their voices and ideas into the legislative work we must implement. Recognizing there is not a one size fits all approach, each office is currently in process of connecting with our partners in several ways: making personal connections through phone calls, email communications, site visits and events where allowed, virtual meetings and presentations, meet and greets, use of Equity Lens Tools, creation of accessible materials to support the navigation of our state process, sharing of newsletters through the new GovDelivery System. The new HECC engagement process also incorporates the intentional follow up to not leave our partners in a state of not knowing next steps or about process conclusion. Through the collaborative efforts of the HECC DEI Team and HECC Leadership, we are also prioritizing the expansion of who our partners in postsecondary education and training are. In thinking through who are we missing in our outreach, we have identified new collaborators among student-based organizations, more culturally specific CBOs, workforce, and K12 Partners that can connect us to student, parent, and community groups.

These relationships and learnings will give the HECC new insights and direction of where to go next in creating more equitable educational opportunities for all of Oregon's students, transforming our state for the better.

HECC EQUITY GOALS AND STRATEGIES

FIGURE 1: EQUITY GOALS Alignment and Expectations 2022



Lead in the elimination of structural inequities in postsecondary education and training by centering systemic equity into all decision making.

Operate with urgency and accountability:

- The HECC will ensure agency accountability by creating a plan of action.
- Set priorities and clear expectations regarding the agency's anti-racist equity work:
- Each HECC office will set equity goals that support the overall capacity building for the HECC.

Make diversity, equity, & inclusion an integral component of the agency's identity and culture.

Build organizational capacity:

The HECC commits to agency transformation so that the impact is sustainable.

- Operationalize a racial equity lens:

- The HECC believes that it is essential to use a racial equity lens when changing and/or considering new policies and practices that no longer perpetuate inequities.

3 *Create culturally responsive outreach and engagement in all areas of the postsecondary education and training system.*

Partner with other institutions and communities:

- The HECC commits to work in partnership with communities and institutions to achieve meaningful results.

Provide clear communications and access:

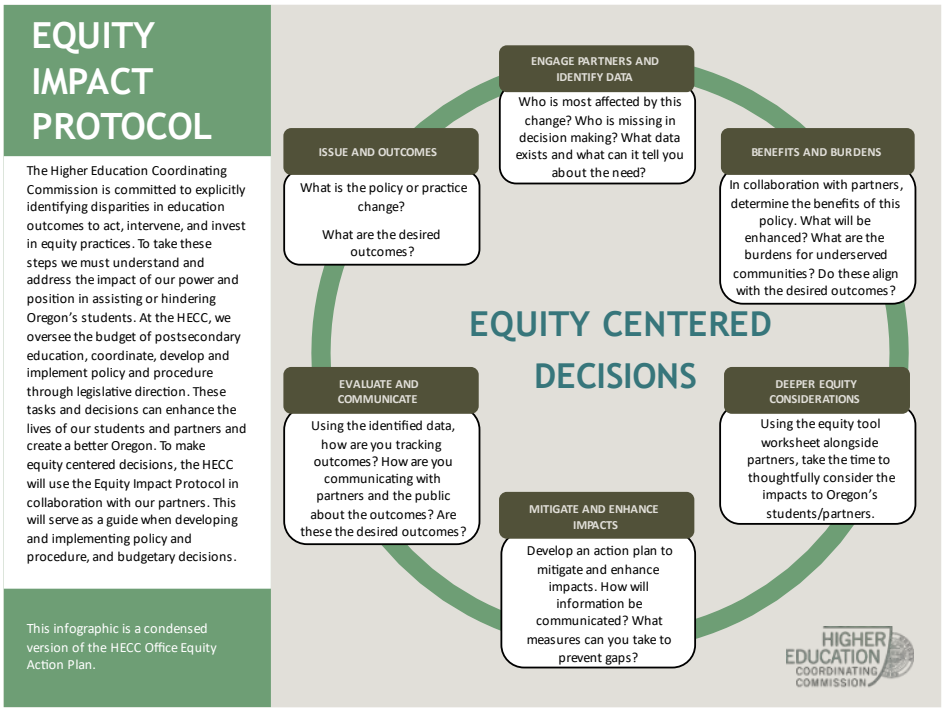
- The HECC is committed to internal and external collaboration and transparency.

4 *Create a culture of continuous learning, collaboration, and improvement.*

Develop leadership fluency:

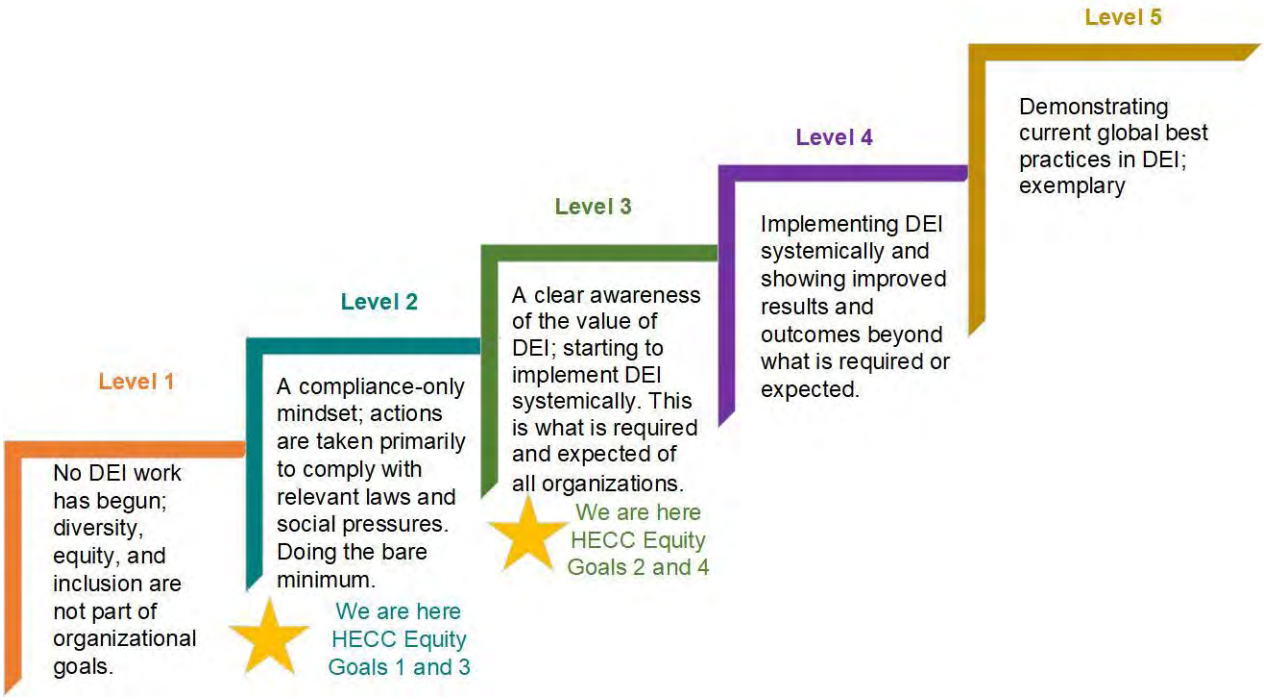
- The HECC will implement ongoing training of its employees in order to build a diverse, inclusive, and equitable workforce.
- Use data to guide initiatives and training:
- The HECC will use data to measure the success and impact of agency decisions, and progress.

HECC EQUITY IMPACT PROTOCOL



HECC 2023 GOAL PROGRESS

(Rubric levels from Global DEI Benchmarks 2021)



New goals will be submitted in the new office equity plan template in August 2023. The new template incorporates a deeper dive into their engagement work as it relates to the agency goals. Offices are also working on broadening their knowledge and incorporating the HECC Equity Lens considerations and impact tool in their processes. This continues to support HECC's culture/climate and equity priorities.

- CCWD, Operations, OWI, PFC, OSAC, Future Ready, APA's plans have incorporated operationalizing the lens as a goal.
- DEI team continues to develop the resources and tools folder for learning expanding to individual office needs.
- R&D, OWI, and APA have goals on understanding and incorporating Data Equity and Justice.
- OSAC and APA have goals on expanding and practicing authentic engagement and outreach.
- EDO and PFC have goals on increasing access for students who experience disabilities and incorporating student voice and experience into decision making process.

The work continues and plans keep evolving. These are the things that the agency needs to keep working on:

1. The broad theme across most plans is that they did not have actionable steps or timeline that could be tracked.
2. Even for plans that did have milestones, those have not been followed up on yet.
3. Because some offices are still focused on building their fluency, policy goals have not been incorporated yet.

4. Offices need to proactively build in engagement planning and equity considerations.
5. Consistently present an equity impact analysis after every big policy project.

HECC AGENCY DEI PLAN ACTIVITIES

ACTIVITY	OFFICE	DEADLINE	PROGRESS	EQUITY GOAL
AABS (African American/Black Students Group) participation	APA	Ongoing	Part of the Student Success work and ODE	1,3,4
Actively seek diversity among commission members	EDO	2023	Still seeking out 2 new members	1,2,3,4
Aspire program and annual conference	OSAC	Ongoing	Big updates and expectations being applied	3,4
Bring Your Child to Work Day – annual (not hosted during pandemic)	HR	Yearly	Resumed again in 2023	2
COBID language in policies and piloting technical assistance for contracts	Operations	2022-23	Finding success in this new work	1, 4
College nights/ college fairs/ dislocated worker events	OSAC/ OWI	Ongoing	Reaching new groups	3,4
Communication strategies- outreach to diverse community partners	EDO/ DEI	Ongoing	Currently finalizing a new readiness assessment for engagement practices	1,3,4
Combined efforts of DEI Council and Learning and Change Management Teams	HR/DEI	Ongoing	Rebuilding group for continuous planning	2, 4
Complete College America national meetings	EDO/ APA	Yearly	Need update	1,3,4
HECC Equity Action Plans Monitoring	DEI	Quarterly	Updated plan template to use in August	1,2,4
DEI Agency Collaboration Network Member, DAS established 2020	HR/DEI	Monthly	Group is reforming	1,3,4

Tribal Student Support Network Event	DEI	May 1st & 2nd	Complete	1, 3, & 4
DEI "Equity Connect" events	DEI/HR	2022-23	3 of 4 events planned	2,4
Tribal Student Access Grant work	OSAC	Ongoing	Network and making connections	1,3, & 4
Update DEI Statements in job announcements	HR	2022	Complete	1,2
DEI Statewide Conference agency participation on planning committee	DEI	2019-2022	2023 in transition with new CCO at DAS	2,4
Disaggregation of KPMs for equity data	R&D	Ongoing	Building in Data Equity components	1, 4
Education Cluster – Government to Government (G2G) – 9 Oregon Tribal Nations Participation	EDO/ DEI	Quarterly	HECC covering food for June meeting in Warm Springs.	1,3,4
Employee Resource Groups and Affinity Groups (partner with other agencies)	HR/DEI	Monthly	Started in 2022, HECC just joined	2,4
FAFSA+ working with Oregon tribal nations	OSAC	Ongoing	Increased outreach with new position	1,3, 4
GED presentations in Spanish	CCWD	Ongoing	Need update	3
GED Annual Summit	CCWD	Yearly	Completed 2022, Planning for next year	1,4
HECC All Staff Meeting – Learning, Staff Engagement, and DEI Events - quarterly	All Offices	Ongoing	Each office presents their work monthly	2,4
Development of diversity-based questions in interview questions for all hires	HR/ DEI	2023	Need to now differentiate the levels of the questions	1,3,4
Incorporation of bias training for all managers hiring	HR/ DEI	2023-24	Currently exploring what that could look like	1,3, 4

Future Ready Training in grant awards, including points for focused populations	Future Ready/ DEI	2022-23	Still hiring positions and embedding lens considerations in processes	1,2,3,4
Statewide Institutional Snapshots – highlighting underrepresented populations- Continued development of data equity approaches	R&D	2021-Present	Still working on several data projects and reports	1,2,4
Latino/a/x & Indigenous Student Success Advisory Member	DEI	Ongoing	Part of the Student Success work and ODE	1,3, 4
Mentoring program – to be developed	HR/ DEI	2023-24	Still incorporating	2,4
New federal mandate to meet accessibility standards, website update	EDO	Summer 2023	Reviewing current web pages	1,2,4
RJC- Education Recovery Committee presentations and participation	EDO DEI	Ongoing	Group is grounding itself for new goals for 2023-24	1,4
SHEEO National Equity Advisory Group Member	EDO/ DEI	Ongoing	Working with Equity Advisory group	1,4
Staff evaluation and professional development planning w/cultural competency	HR/ DEI	Quarterly	Managers still working on incorporating documentation of staff learning	1,3
Incorporation of equity impact analysis in all major policy projects	All Offices	Ongoing	ET still has to decide when to incorporate the full analysis	1,2,3
Transfer work (impact on underserved populations)	CCWD/ APA	Ongoing	Recent update to the Commission	1,4
CC Funding Formula Work	PFC/ CCWD	June 2023	Recently presented equity impact analysis	1,3, 4
RFP Development with equity considerations	OWI/	Ongoing	New round of RFPs just went out	1,3, 4

	Future Ready/Procurement			
LGBTQ+ Student Success Advisory	DEI	2022-Present	Coordinating efforts to connect K12 to Postsecondary	1,3,4
HSI Coordination	DEI	2022-Present	Have begun with presentations in different settings	1,3,4

REIS Cover Memo - Oregon Youth Employment Program

Program Overview
The Higher Education Coordinating Commission's (HECC) Office of Workforce Investments (OWI) received two new youth workforce development programs in the 2021 legislative session. The two new programs are the Oregon Conservation Corps (OCC) (separate and distinct from HECC's Oregon Youth Corps) and the Oregon Youth Employment Program (OYEP). OCC came with a mandated governor appointed advisory committee and OYEP required no citizen oversite. OWI, at that time, also administered the Oregon Youth Corps Advisory Board.

The first milestone was to look at streamlining operations and gaining efficiencies. Therefore HECC/OWI created **Oregon Youth Works**, an umbrella of youth programs within HECC/OWI, which includes Oregon Conservation Corps, Oregon Youth Corps, and Oregon Youth Employment Program. By creating Oregon Youth Works, staff began to align programming where necessary, remove silos and duplication if needed, and identify gaps in program access.

The next major milestone was to sunset the Oregon Youth Corps Advisory Board and the OCC Advisory Committee and create one new overarching advisory body. HB 3563 (2023) was passed by the Oregon Legislature in 2023 and codified into law (ORS 660.320). The bill sunset the two advisory bodies mentioned above and created the Oregon Youth Works Advisory Board. The board held its inaugural board meeting on July 9, 2024.

The purpose of this Governor appointed board is to:

- Provide equity minded advice on, and oversight of, the implementation and alignment of youth workforce development programs;
- Contribute to the development, refinement, and execution of Oregon Youth Works' strategic framework; and
- Promote and advocate for the financial and programmatic sustainability and advancement of youth workforce development programming within HECC/OWI.

The third major milestone is in process. HECC is developing a Legislative Concept for the 2025 session that would bring the authorities for Oregon Youth Corps, Oregon Conservation Corps, and the Oregon Youth Employment Program under the same chapter of law, Chapter 660. Once the authorities are aligned, HECC, under the advisement of the Oregon Youth Works Advisory Board, will concentrate on initiatives that strategically align and sustainably fund youth workforce development programs. This work is further discussed in the *Informed Decision-Making* section.

It is important to note that HECC/OWI offers grant opportunities in all of Oregon's 36 counties and nine federally recognized tribes. HECC/OWI does not provide direct service. HECC grants funds to local service providers across the state including school districts, non-profits, municipalities, Local Workforce Development Boards, tribes, and other non-governmental organizations. While grantmaking is the main function of the programming, other valuable resources are also provided such as training, networking, sharing of best practices, technical assistance, and partnering with other federal and state agencies.

Equity is at the heart of all the individual programs and HECC's Equity Lens is applied throughout. Programs have individual populations that are identified in statute. The common theme is providing access and services to youth and young people that have traditionally been left behind, underserved, and/or marginalized.

<u>Oregon Youth Works Programs</u>

Oregon Youth Corps
Oregon Youth Corps was created in 1987 by the Oregon Legislature. Its mission is to provide opportunities to advance youth workforce and stewardship experiences that strengthen communities across Oregon. Oregon Youth Corps unites a network of local workforce providers throughout Oregon that provide workforce and individual development opportunities with underserved and disconnected youth populations. While many great projects are completed each year

and many technical skills are learned, the primary focus of the program is to teach youth problem solving and essential employability skills. There are both summer and year-round opportunities and summer programs must pay at least Oregon's minimum wage. The Oregon Youth Corps serves youth and young people between the ages of 13-24.

In 23-25 the funding for this program was approximately $7.5 million, including approximately $2.5 million in one-time GEER funding. HECC's 2025-2027 Agency Request Budget includes approximately $2.4 million from the Amusement Device Tax (ORS 320.005 – 320.150) and approximately $2.7 million from the Oregon Youth Employment Fund ((ORS 660.354) (OAR 715-102-0025)) for Oregon Youth Corps. Funding for this program is included in HECC's current CSL.

Oregon Conservation Corps (OCC)
Senate Bill 762 (2021) established The Oregon Conservation Corps (OCC) program for the purposes of reducing the risk wildfire poses to communities and critical infrastructure, creating fire-adapted communities, and engaging youth and young adults in workforce training. HECC grants OCC funding to organizations across the state to aid in reducing wildfire risk to communities while providing workforce training to the next generation of land managers. While project work can happen year-round, crews may have to shut down at the height of fire season, due to red flag warnings. Participants must be paid at least Oregon's minimum wage or its equivalent. Youth and young people ages 16-26 may participate in this program.

Funding for this program is **not** a part of HECC's Governor's Recommended Budget for 2025-2027. OCC was funded with one-time funding ($10 million) in the 2021-2023 biennium and again with one-time funding ($10 million) for the 2023-2025 biennium. This program is at risk of shuttering if additional funds are not allocated which would decrease wildfire community risk reduction and training and employment for youth and young people across the state.

Oregon Youth Employment Program (OYEP)
HB 2092 (2021) funded the Oregon Youth Employment Program (OYEP). The purpose of OYEP is to provide meaningful workforce and career development experiences for young people, such as internships, apprenticeships, summer jobs, and workforce preparation to youth and young adults. HECC grants funds to the nine Local Workforce Development Boards who then administer the programming at the regional level. Programming takes place year-round but there is a heavy emphasis on summer employment. Participants must be paid at least Oregon's minimum wage or its equivalent. OYEP serves youth and young people between the ages of 14- 24 is funded through state General Funds.

HECC's 2025-2027 Governor's Recommended Budget includes approximately $6.8 million from General Fund for the Oregon Youth Employment Program's Oregon Youth Employment Fund (ORS 660.354). Funding for this program is included in HECC's current CSL.

Racial Equity Impacts of the Program

Oregon Youth Works embraces diversity, equity, inclusion, and access in its mission to increase opportunity for Oregon's young people through the funding of workforce development programs. We understand that creating a culture of diversity, equity, inclusion, and access requires the intentional examination of systemic policies and practices that, even if they have the appearance of fairness, may perpetuate disparities. An understanding of historical contexts and an active investment in changing social structures and practices over time are key to ensuring that individuals from all communities have opportunities and support to realize their full potential.

Oregon Youth Works commits to diversity, equity, inclusion, and access throughout the grantmaking process, inviting new partners into the workforce system and placing an emphasis on serving youth and young adults from priority populations which include, but are not limited to: communities of color, women, low-income communities, rural and frontier communities, veterans, persons with disabilities, youth who experience the justice system, members of Oregon's nine federally

recognized Indian tribes, and individuals who identify as members of the LGBTQ2SIA+ community. We have worked to operationalize our commitment to diversity, equity and inclusion in our grant making processes through the following actions:

- Applying the HECC's Equity Lens to all aspects of our work;
- Consulting with current partners and grantees to inform our planning to develop an inclusive, low barrier grant process;
- Hosting a series of information sessions designed to provide potential applicants an opportunity to ask questions and receive guidance;
- Soliciting engagement in the scoring process from diverse organizations, entities, and partners;
- Providing funding up front to applicants that demonstrate a need for immediate funds; and
- Shifting practices with tribal agreements that acknowledges and recognizes tribal sovereignty.

ORS 418.657 requires that 75 percent of the youth and young people served with Oregon Youth Corps funds must be "disadvantaged and at-risk youth."

For Oregon Conservation Corps, ORS 476.696 requires HECC to have a grant process that, "uses an equity lens in awarding grants by identifying and supporting populations with greater vulnerability, including communities of color, indigenous communities, communities with members who have limited proficiency in English and communities with lower-income members."

For the Oregon Youth Employment Program, ORS 660.353 requires HECC to, "award grants in a manner that ensures no less than 20 percent of program funds are available to organizations with direct experience serving communities of color." It further requires HECC to, "ensure that at least 75 percent of program participants are from communities of color, rural communities, communities that have faced generational poverty or other communities that have been historically underrepresented in youth employment as identified by the commission by rule (OAR 715-102-0005).

OAR 715-102-0005 further requires Local Workforce Development Boards to demonstrate, through the submission of a community engagement plan, a commitment to serving underrepresented populations, including those listed above.

Data Analysis

At a very high level, youth unemployment rates continue to be higher than the overall unemployment rate. According to the U.S. Bureau of Labor and Statistics, in July of 2023, the National unemployment rate was 3.5% At the same time, the unemployment rate for youth, aged 16–24-year-olds was 8.7%.

Furthermore, the racial and ethnic disparities seen in unemployment among the general population are also present among the youth. For example, in July 2023, Black or African American youth aged 16-24 faced an unemployment rate of 18%, while the statewide unemployment rate for the same age group was 8.7% (source: qualityinfo.org). Similarly, Hispanic, or Latino youth aged 16-24 had an unemployment rate of 10.5%.

Unfortunately, at this time, HECC continues to have no central reporting portal that can be used to capture this data for our youth workforce development programs. The data is collected through Word documents, Excel spreadsheets, and participant survey results that are tallied by hand by OYW program staff. The one exception to this is the new reporting database exclusively for Oregon Youth Corps programs that has been in the works for the last few years.

Staff monitors the data that is reported from the grantees on a quarterly basis and collects final data through final reports. This information is analyzed against zip code census data to ensure that priority population targets are being met. If targets are off, staff then can work with the grantees to bring local programming and targets back into alignment. Program data for the 2021-2023 biennium is discussed below in the *Data Selection* section.

Benefit vs. Burden Determination

In general, all of Oregon benefits from Oregon Youth Works programming. This includes individual participants, families and communities, and business and industry. The participants come from youth populations that have traditionally been underserved and underrepresented which includes but is not limited to youth from communities of color, youth from rural communities, youth with disabilities, youth in the juvenile justice system, homeless/houseless youth, youth in foster care, youth with basic skill deficiency, youth identifying as LGBTQIA2S+, and youth communities that have faced generational poverty.

Inclusive Communications

When working with the Local Workforce Development Boards there is a structured local project plan requirement. The plan that details how they and their subrecipient program providers partner with, reach out to, and engage their community, CBO's, employers, and agencies. They must explain how they came up with the course of action and how data, research, assessments, community engagement, etc. informed that course of action. All local plans are reviewed and approved at the state level by the Workforce and Talent Development Board.

When working with other Oregon Youth Works grantees, site visits take place where staff visit individual programs and communities across the state. This gives staff the opportunity to meet with program leaders, participants, and community partners to talk about needs and possible solutions. Information is also communicated through the reporting and survey processes described in other sections of this document.

The expansion of virtual-based platforms during and after the pandemic has made it much easier to establish communities of practice for both grantees and other state agency staff. These platforms have been extremely useful in bringing people from across Oregon together for quarterly meetings at virtually no cost.

Data Collection and Data-Informed Decision Making

Data is collected on a quarterly basis and in final reports at the end of each program. Oregon Youth Works staff interpret and share the data with the Oregon Youth Works Advisory Board, the Office of Workforce Investments, the HECC Commission, the legislature, Office of the Governor, and other boards and commissions as requested.

As mentioned earlier in this document, the role of the new Oregon Works Advisory Board is to:

- Provide equity minded advice on, and oversight of, the implementation and alignment of youth workforce development programs;
- Contribute to the development, refinement, and execution of Oregon Youth Works' strategic framework; and
- Promote and advocate for the financial and programmatic sustainability and advancement of youth workforce development programming within HECC/OWI.

The Board will use the data collected by staff to inform future programmatic decision making.

This work may also include but not be limited to:

- Identifying key partners within the youth workforce system across Oregon;
- Exploring options for a comprehensive assessment of current youth workforce development programs within state government to identify strengths, gaps, and areas for improvement;
- Developing a strategy to align existing programs with the goals and priorities outlined in Oregon Youth Works' Strategic Framework, ensuring coherence and efficiency in program delivery;

- Advocating (when appropriate and allowable) for policies at the state level that support sustainable funding for youth workforce development programs, emphasizing the importance of equity and inclusion;
- Engaging with the legislature (when appropriate and allowable) to advocate for increased funding for youth workforce development within HECC/OWI's budget allocation;
- Developing strategies to ensure the long-term sustainability of youth workforce programs, including diversifying funding sources and exploring innovative financing models;
- Establishing key performance measures to monitor the effectiveness and impact of Oregon Youth Works' activities and initiatives;
- Conducting regular evaluations of board activities and program outcomes to identify successes, challenges, and areas for improvement;
- Implementing mechanisms for gathering feedback from partners, including youth participants, to inform continuous improvement efforts; and
- Maintaining transparency in decision-making processes, ensuring that all partners and the public are informed and engaged in the work.

Current Statistics

The following represents Oregon Youth Works combined program participant data (youth and young people served) from the 2021-2023 biennium:

- Female 32%
- Male 62%
- Non-Binary 4%
- Prefer not to disclose 2%
- American Indian/Alaska Native 8%
- Asian/Asian American 2%
- Black/African American 3%
- Hispanic or Latino/a/x 16%
- Multi-Racial 5%
- Native Hawaiian/Pacific Islander 1%
- White 54%
- Prefer not to disclose 11%
- Academic Gap 18%
- Criminal Justice System 7%
- Disability 11%
- English Language Learner 4%
- Experiencing Economic Hardship 41%
- Child Welfare/Foster System 4%
- Homeless/Houseless/Unsheltered 5%
- LGBTQIA2S+ 8%
- Pregnant or Parenting 2%

Community Informed Policy and Partnerships

HECC DEIA staff have been an integral part of all aspects of the rollout and ongoing implementation of Oregon Youth Works including initial concepts, rulemaking, the drafting of the Request for Application, and application components.

Traditionally, most of the community informed policy conversations have taken place during site visits to individual communities. As mentioned earlier, virtual meeting technology has made it possible to effectively bring people together from across the state by facilitating communities of practice via Zoom or Teams.

The Advisory Board will also be assessing community needs and may recommend new internal policies to enhance the connection between Oregon Youth Works and policy-making discussions informed by the community and youth.

Resource Allocation and Accessibility

Through statutory language, administrative rules, and policies within the Request for Application, Grantees are required to serve identified populations. Throughout Oregon Youth Works there is potential and opportunity in all geographic areas of the state. HECC staff monitor program performance to ensure the identified populations are being served.

Culturally specific and responsive strategies that address the distinct needs of Oregonians are developed at both the state and community levels. These strategies must be included in each grant application. Grantees must explain the strategies in detail, providing specific and detailed responses that utilize qualitative and quantitative data, research, assessments, and results from community engagement wherever possible. Additionally, grantees are required to describe how their project will address the identified problems or needs. The continuing development of onsite monitoring tools will help determine if programming is accessible regardless of:

- Disability or status;
- Language;
- Access to technology; and
- Geographic location.

All grantees are required to comply with all applicable federal, state, and local laws, including ADA requirements.

At the state level, Oregon Youth Works staff are strengthening existing partnerships with tribal representatives from Oregon's nine federally recognized tribes, specifically within the Education Cluster of Government to Government. After years of partnering with, and listening to, our sovereign partners, there has been a major philosophical shift in how we want to work together in the future. HECC procurement is working on developing individual Intergovernmental Agreements with the tribes. This will eliminate the grantor-grantee relationship, acknowledge sovereignty, and establish a true partnership between governments, where priorities and solutions are developed jointly. At this time, outreach has been made to all nine federally recognized tribes with eight tribes being engaged in conversations and five tribes actively working with Oregon Youth Works and HECC procurement on Intergovernmental Agreements. Additionally, Oregon Youth Works staff are exploring opportunities to secure dedicated funds for the new tribal agreements.

Evaluation

The most important outcomes to Oregon's historically and currently underserved youth cover a wide spectrum. Outcomes such as training, educational achievement, technical skill gain, essential employability skill gain, paid work experience, career guidance, and self-confidence are all critical program outcomes.

The collection and application of data is covered thoroughly in other parts of this document and will not be further discussed in this section. Engagement with local communities once the data is collected has also been well covered.

This has been an exciting time standing up and beginning the alignment of these programs. It has been a major lift to bring on new programming, new staff, sunset advisory bodies to make way for the new Oregon Youth Works Advisory Board, begin to align programming, and continuing to gain efficiencies. Oregon Youth Works is off to a tremendous start. We will continue to listen, learn, and implement with guidance and input from the Advisory Board, the legislature, Office of the Governor, Racial Justice Council, and the communities being served and improved through this investment.

REIS Cover Memo - Oregon Opportunity Grant Program

Program Overview

The Oregon Opportunity Grant (OOG) is a program created to provide student assistance to the highest need students. The 2022 Oregon Opportunity Grant program evaluation report highlighted the affordability challenge that Oregonians face. Most notable, the reduction of the purchasing power of both federal and state aid over the years exacerbates the access and affordability gaps for Oregon's lowest income and most diverse students. Even when they receive OOG, 74% of students at public universities, and 61% of students at community colleges are unable to afford their cost of attendance.

A permanent increased investment in OOG budget is required to provide students the financial support needed to cover rising costs and maintain student purchasing power. With an increased OOG budget, the access and flexibility provided to OOG students during the 2023-24 academic year could continue. Students are typically required to attend fall term at least half time to receive their OOG award. Removal of the fall term requirement increases access and flexibility to non-traditional learners.

Funding Provided in 23-25

For 23-25, OOG was increased significantly to $308 million. This allowed OOG to serve a larger number of the highest need students.

Racial Equity Impacts of the Program

Increased funding for OOG and the proposed changes would primarily impact areas of higher education in relation to racial equity. The intent in changing OOG eligibility requirements is to remove access barriers to higher education for historically underserved students and increase completion rates. Without increased funding, we will need to continue to limit award amounts and implement low estimated family contribution caps.

Data Analysis

State grant aid has proven to be a successful resource to increase Oregon graduation rates. The 2022 OOG report found 59% of public university students and 68% of private, non-profit university students graduated within six years when they received OOG. In comparison, students who received Pell grant but did not receive OOG, had graduation rates of 42% at the public universities and 74% at the private institutions. By expanding state grant funding, we are providing access to higher education for more students and moving towards our 40-40-20 goal. Without additional funding support, state grant awards would either limit the number of students eligible to receive the grant or would have to reduce the award amounts and in turn the purchasing power of students.

Low income and ethnic minority students have the highest barriers to an affordable postsecondary education and training. According to the 2022 OOG report, OOG recipients are disproportionately students of color, female, rural, and first-generation. Increased funding in OOG and state aid grants would provide these students with more purchasing power and ability to enroll at institutions of higher education. Financial aid in Oregon needs to be more responsive and allow flexible enrollment options to recipients (not restrict access points), and promote completion.

Improving current state programs in an integrated framework will facilitate transitions and better support underserved students of all ages.

Benefit vs. Burden Determination
The grant is used to provide direct financial support to low-income Oregonians pursing postsecondary education. The return on this investment impacts individuals, communities, and the state. As outlined previously, grant recipients are more likely to graduate than their counterparts who do not receive the grant. Higher graduation rates in turn provide graduates with higher earning potential and lower unemployment rates. These benefits experienced by the individuals are passed on to the state through higher educated citizens, increased tax revenue, and fewer citizens needing state financial assistance.

A permanent increased investment in OOG budget is required to cover rising educational costs and maintain student purchasing power. Without an increased OOG budget, we would have to implement cost control measures such as; an earlier FAFSA/ORSAA cut-off deadlines, lower the student aid index limit, or remove some of the access flexibility provided to OOG students during the 2023-24 academic year including a fall term enrollment requirement. Removal of the fall term requirement increases access and flexibility to non-traditional learners.

Inclusive Communications
We have advisory meetings with agency equity leaders and communities including Oregon tribes, College Access Networks/NGOs, Financial Aid Advisory, financial aid officials, high school counseling and coordinators, high school administrators, Ford Family and OCF Foundations, public university recruitment staff, Alliance network recruitment staff, and the Oregon Student Association. The meetings provide space for community feedback and information sharing on how we improve our systems and processes for OSAC programs including OOG.

OSAC is working with a vendor to create an updated website for our programs, including OOG information. OSAC is currently working with the vendors to ensure that the website is accessible and accommodates multiple platforms. We are also in the process of having the ORSAA application used by undocumented students translated into Spanish. We are investigating options to have it translated into other languages.

Data Collection and Data-Informed Decision Making
An annual report and evaluation of recipients is prepared by the Higher Education Coordinating Committee. The report examines the academic success and performance of students who receive the grant. It also evaluates whether equity gaps in postsecondary access, affordability and completion are reduced for OOG recipients.

Community Informed Policy and Partnerships
We have reoccurring advisory meetings with agency equity leaders and communities including Oregon tribes, College Access Networks/NGOs, Financial Aid Advisory, financial aid officials, high school counseling and coordinators, high school administrators, Ford Family and OCF Foundations, public university recruitment staff, Alliance network recruitment staff, and Oregon Student Association. The meetings provide space for community feedback, idea development, and information sharing on how to improve systems and processes for OSAC programs including OOG.

Resource Allocation and Accessibility
There are equity challenges and increasing affordability gaps associated with student financial aid. As the cost of attending colleges and universities has significantly increased over the past decade, the ability to pay for higher education has become a larger issue for more students. The current OOG statutory language prioritizes funding to low-income students. The OOG only serves a small fraction of eligible students, and

students receiving these grants face significant affordability challenges. Even with grants and scholarships, estimated family contributions, and estimated own earnings, almost three-fourths of OOG recipients at public universities and over half at the community colleges cannot afford to pay for their higher education according to the 2022 OOG program report.

Evaluation

The proposed program changes increase racial equity for students. The cost of attendance in college and university is a barrier for students from the lowest income backgrounds. Although the OOG does not completely alleviate the unaffordability of college attendance, if the OOG were not in place, roughly 3,000 students would be unable to afford college costs. Moreover, the impact of the OOG was stronger for some historically underserved groups, including first-generation students, Black/African American and Hispanic/Latinx students at the universities and Native American/Alaska Native and Hispanic/Latinx at the colleges, as well as for white students at the community colleges.

Additionally, students who receive an OOG award show better rates of completion than similar students who did not receive the OOG award. 59% of public university students and 68% of private, non-profit university students who had received an OOG graduated within six years. In comparison, only 42% of public university students and 74% of private institutions low-income students who did not receive an OOG but did receive a Pell grant earned their bachelor's degree.

REIS Cover Memo - Oregon Promise Program

Program Overview
The Oregon Promise Grant (OPG) was created to help cover the tuition costs at Oregon community colleges for recent high school graduates and GED graduates. There are many eligibility requirements such as attend a community college soon after high school graduation/GED completion, have a 2.0 cumulative high school GPA or a 145 score for each GED section, be an Oregon resident, and have completed less than 90 college credits.

Each year many students who are awarded the OPG do not use their grant because they attend a four-year institution. Adding the ability to use the grant at an eligible four-year institution would increase the number of students served, and give students the ability to work towards a bachelor's degree without having to transfer from a community college.

Accelerated credits discount the time a student receives OPG prevent students from using their full OPG award eligibility. This policy means credits taken in high school and prior to establishing their educational goals are counted against their eligibility time. Another OPG regulation that prohibits access is the minimum GPA requirement. This requirement limits which students can fund education beyond high school.

Funding for 2023-25 Biennium
The funding level for 2023-25 biennium was $44.2 million.

Racial Equity Impacts of the Program
Changes to OPG would primarily impact areas of higher education in relation to racial equity. The intent in changing OPG eligibility requirements is to remove access barriers to higher education for historically underserved students and increase completion rates.

Data Analysis
OPG recipients tend to be representative of their high school graduating class, though they are somewhat more likely to be women and Hispanic/Latinx. More than half of OPG recipient students are lower-income. The 2022 Oregon Promise Report to the Oregon Legislature found that 39 percent of students in OPG face unaffordable college costs (the published cost of attendance is greater than their grants and scholarships, expected family contribution, and estimated earnings). While the award does not alleviate the unaffordability costs faced by students, without the grant47percent of students would not be able to afford college costs. Historically underserved are impacted at higher rates by the costs of obtaining higher education. 45 percent to 58 percent of OPG students from underserved racial/ethnic groups would have unaffordable costs without the grant.

OPG students show strong outcomes of continued enrollment and certificate/degree completion. Most students in the program earn a credential or are still enrolled at a community college or public university in their second, third, and fourth years after graduating from high school. Since the program began, slightly more high school graduates overall have earned a certificate or degree by four years after high school graduation, and fewer remained enrolled in college or university.

Benefit vs. Burden Determination
We have the ability to enact Student Aid Index limits to prioritize funding to low-income students if funding is not able to cover all eligible students. However, the majority of funding is currently awarded to middle- and higher-income students. Recent reforms passed in 2022 legislative session has helped address the disparity of distribution of dollars in this program. Low-income families are left with a bigger affordability gap today than when the program began. Additionally, OPG also does not typically provide awards for older adults, unless they are recent GED graduates. Another OPG regulation that prohibits access is the minimum

GPA requirement. This requirement limits which students can fund education beyond high school. A 2021 study published by REL Northwest found that lowering the GPA requirement for OPG would likely diversify the application pool by increasing the percentage of eligible students who are low-income, students of color, male, and those that received special education services.

The OPG provides grants for undocumented students who would not otherwise be covered by other grants such as OOG because OPG does not use the tuition equity requirements to be awarded OPG.

Inclusive Communications
We have advisory meetings with agency equity leaders and communities including Oregon tribes, College Access Networks/NGOs, Financial Aid Advisory, financial aid officials, high school counseling and coordinators, high school administrators, Ford Family and OCF Foundations, public university recruitment staff, Alliance network recruitment staff, and Oregon Student Association. The meetings provide space for community feedback and information sharing on how we improve our systems and processes for OSAC programs including OPG.

OSAC recently worked with a vendor to create an updated website that is accessible and accommodates multiple platforms for our programs, including OPG information. The ORSAA application used by undocumented students is available in Spanish, and we are investigating options to have it translated into other languages.

Data Collection and Data-Informed Decision Making
A biennial report and evaluation of recipients is prepared by the Higher Education Coordinating Committee. The report examines the academic success and performance of students who receive the grant. It also evaluates whether equity gaps in postsecondary access, affordability and completion are reduced for OPG recipients.

Community Informed Policy and Partnerships
We have reoccurring advisory meetings with agency equity leaders and communities including Oregon tribes, College Access Networks/NGOs, Financial Aid Advisory, financial aid officials, high school counseling and coordinators, high school administrators, Ford Family and OCF Foundations, public university recruitment staff, Alliance network recruitment staff, and Oregon Student Association. The meetings provide space for community feedback, idea development, and information sharing on how to improve systems and processes for OSAC programs including OPG Resource Allocation and Accessibility. Through statutory language, OPG can implement Student Aid Index levels which would prioritize low-income students if funds are insufficient to provide grants to all eligible students. The grant is available to students in all geographic regions of Oregon.

Evaluation
The program changes proposed would increase racial equity for students. The cost of attendance in college and university is a barrier for students from the lowest income backgrounds. The grant improves affordability and potentially completion for students. Expansion of the OPG to four- year institutions would provide choice in school attendance and needed support that results in improved affordability for historically underserved students. Undocumented students who are not covered by other grant and federal student aid programs are limited to attendance at a community college under current OPG policy. Expansion of OPG to four-year institutions would provide these undocumented students the option to begin coursework towards a bachelor's degree. As noted previously, removing the GPA requirement for OPG would likely diversify the application pool by increasing the percentage of eligible students who are low-income, students of color, male, and those that received special education services.

REIS Cover Memo – Public University Summer Bridge Programs

Overview
During the 2023-25 biennium, the Strong Start Program carried forward $6,792,143 through House Bill 5025 (2023). The continued availability of resources focused on existing initiatives and closing equity gaps in student outcomes. Public universities have used these funds to implement targeted interventions, including academic tutoring, summer bridge programs, first-year experience courses, and comprehensive support services.

The outcomes of the Strong Start Program continue to exceed expectations, with participating students demonstrating higher retention rates, stronger GPAs, and more credit hours completed compared to their non-participating peers.

Racial Equity Impacts of the Program
The Strong Start Program will primarily impact higher education as the racial equity opportunity area. The intent is to address equitable education outcomes providing the resources needed to help underrepresented students reach completion. The goal is to reduce, or potentially close, racial achievement gaps.

Data Analysis
Although they have been narrowing in the recent past, racial achievement gaps remain in higher education across all seven public universities that provide educational services in all regions of the state. The pandemic has created reason to believe progress in reducing these gaps will be halted, or even reversed, unless intervention is undertaken. This is because the pandemic has had a disproportionate impact on underrepresented students and their access to resources and support systems for success in higher education compared to other groups of students.

As included in the Annual Report of Key Performance Measures for the Oregon Higher Education Coordinating Commission graduation rates at public universities are rising overall, and most racial/ethnic gaps have narrowed, but wide gaps remain. Table 1 includes the percentage of public, resident, university first-time, full-time freshmen who earn a bachelor's degree within 6 years, overall and by race/ethnicity.

Table 1: Percentage of Resident First-time, Full-time Freshmen who earn a Bachelor's Degree within 6 Years at a Public University

	2007 Cohort (*2011 Cohort)	**2017 Cohort**
Asian American*	66%	77%
Black or African American	49%	53%
Hispanic or Latinx	60%	60%
Native American or Alaska Native*	49%	41%
Native Hawaiian or Pacific Islander	55%	44%
White	64%	68%
All Students	**64%**	**67%**

Methods and Strategies
While each university tailors its Strong Start Program around the unique strengths of its students and the institution's ability to offer enhanced programming, there are several shared parameters including:

- A focus on serving BIPOC students and students from underserved communities
- A summer orientation kickoff event with continuing support services offered throughout the academic year
- A focus on academic skill building activities including intensive supports in math and writing (common gateway courses)
- The provision of other student success services which may include enhanced academic advising, note-taking and time management skills development, financial literacy programming, and career exploration activities
- The creation of a community of support for participating students to address culture/climate issues

Program activities have also be aligned with Student Success Act parameters in that services will prioritize students from underserved communities. Additionally, program administrators will collaborate with AVID, ASPIRE, GEAR UP, and other student success and/or college access programs to enhance the efficiency of the services offered.

Demographic data on program participants is collected at the student level to ensure an appropriate focus on underrepresented students. The public universities are working within their existing data collection frameworks to collect the relevant data on program participants. That data is reported to the HECC and will be used to assess the program and inform related decision making.

Equitable Outcomes
Over 2,500 incoming and first-year students have participated in and completed Strong Start. The results of the programs area testament to their success.

The universities focused recruiting efforts on students from disadvantaged backgrounds including students with disabilities, first-generation in college, rural, foster youth, abuse survivors, and students with lower high school GPAs. These communication activities occur through the universities' routine efforts to engage all communities in compliance with appropriate accessibility standards to ensure inclusivity.

The initial results for underrepresented students mirrored those of all students who participated with the expectation that these interventions increased racial equity by providing a more robust support infrastructure serving as the foundation for underrepresented student success. It is not expected this program will create a burden for partners.

Of the students enrolled for the first cohort:

- 59% were BIPOC
- 40% were Pell eligible
- 79% were from Oregon

During the 2023-25 biennium, several universities adopted new approaches to supporting Strong Start students:

Portland State University (PSU) utilized these funds for several initiatives, including the Math Start Initiative, which developed courses to improve equity gaps in math for first-year BIPOC students, and the Summer Scholars Program, which provided summer programming and workshops for first-year and transfer

students. Additionally, PSU hosted events such as First-Gen Fest and Study Palooza, and redesigned the first-year general education curriculum through the FRINQ Redesign Project.

Oregon Tech used Strong Start funds to provide intensive academic supports, particularly in math and writing, at both their Klamath Falls and Portland-Metro campuses. These supports included workshops, tutoring, and professional coaching.

Eastern Oregon University (EOU) offered the Strong Start Plateau Award to help students impacted by the pandemic complete their degrees on time. EOU also conducted a Summer Bridge program, which provided a two-week academic orientation, and an Extended Bridge program that offered wraparound academic and co-curricular supports throughout the school year. Additionally, EOU piloted an Alternative Spring Break program and provided retention scholarships and a Strong Start Video Project to enhance student engagement and retention.

Evaluation

As shown in Table 2, the Strong Start Program continues to exhibit substantial positive impacts on student outcomes, particularly among underrepresented and disadvantaged groups. This analysis highlights the program's effectiveness in improving retention rates, GPAs, and credit completion compared to non-participating students across several public universities in Oregon.

Table 2: Initial Results for the Academic Year 2022-23 Cohort

	Fall to Winter Retention		Fall GPA		Fall Credits Completed	
	Participant	**Non-Participant**	**Participant**	**Non-Participant**	**Participant**	**Non-Participant**
EOU	95%	81%	3.4	3.2	15.5	11.8
OIT	94%	93%	3.15	3.19	14.2	12.9
OSU	98.5%	93%	3.08	3.21	13.4	13.2
PSU	87.5%	81.5%	2.37	2.26	10.3	9.9
SOU	97%	56%	3.02	1.89	16.1	8.8
UO	95.5%	95.7%	3.11	3.16	13.3	13.7
WOU	97%	92%	3.06	2.99	13.4	12.5

*PSU's "Strong Start" and "Not Strong Start" data compares outcomes for students admitted below a 3.0 high school GPA.

** SOU's "Not Strong Start" student data represents a control group of 25 randomly selected Bridge-eligible students who enrolled at SOU in Fall 2022 and either declined a spot in the program or did not apply.

***UO's Summer Bridge program intentionally focuses on serving low-income, first-generation, and students of color where historic and persistent opportunity gaps exist for retention, credit completion, and GPA. Comparisons of Summer Bridge and non-Summer Bridge participant outcomes among low-income, first-generation, and students of color show even greater outcomes for traditionally underserved students who participate in the Summer Bridge program.

Retention Rates

Strong Start students consistently show higher fall-to-winter retention rates compared to their peers who did not participate in the program. For instance, at Eastern Oregon University (EOU), the retention rate for Strong Start students was 95%, significantly higher than the 81% retention rate of non-participating students. This trend is evident across other universities as well, such as Southern Oregon University (SOU), where Strong Start participants had a retention rate of 97% compared to just 56% for non-participants**.

Grade Point Average (GPA)

The GPA data further illustrates the success of the Strong Start Program. At EOU, Strong Start students achieved an average fall GPA of 3.4, compared to 3.2 for their non-participating counterparts. Similarly, at Oregon Institute of Technology (OIT), the GPA of Strong Start students was 3.15, only slightly lower than the 3.19 GPA of non-participants, indicating that the program helps maintain strong academic performance.

Credit Hours Completed

One of the most significant indicators of the program's effectiveness is the number of credit hours completed by Strong Start students. At EOU, Strong Start participants completed an average of 15.5 credits in the fall term, compared to 11.8 credits for non-participants. This pattern is consistent across other institutions, reflecting the program's role in encouraging students to take and complete more coursework, thereby accelerating their path to graduation.

Comparative Outcomes

Comparing outcomes among different universities, it is clear that the Strong Start Program has a broad positive impact. For example, at Portland State University (PSU), the retention rate for Strong Start students was 87.5%, higher than the 81.5% for non-participants. The GPA for Strong Start students at PSU was slightly higher (2.37 vs. 2.26), they also completed more credits on average (10.3 vs. 9.9), demonstrating increased academic engagement and persistence.

The Strong Start Program's support was critical to sustaining these positive outcomes. The program's success in enhancing retention, GPA, and credit completion underscores its value in supporting student success, particularly for those from underrepresented backgrounds.

State-Owned Building and Infrastructure:

None.

INFORMATION TECHNOLOGY

Strategy and Modernization Plan

June 2020

Version 1.2 // 2020 – 2025

Powered by:

Oregon Higher Education Coordinating Commission

Hello, Oregon Higher Education.

We are at a transformational time in higher education. Even before the outbreak of the novel coronavirus in Spring of 2020, our state's public and private institutions of higher education and workforce development were already facing rapid changes, persistent educational disparities and pressure to increase college efficiency, coupled with the proliferation of new technologies and a growing demand for more responsive, personalized information technology (IT) services.

Then the impacts of the COVID-19 global pandemic upended normal operations, causing all of us to shift to e-learning, and to explore cloud technologies almost overnight. This left us inspired by how we all responded to the demands of the moment and embraced a new normal. The pandemic also shined a bright light on the systemic barriers and digital divide that continues to limit access and success for many underserved and marginalized students in the Oregon education system.

As we look ahead to the future, we certainly will continue to face challenges with anticipated budget shortfalls and the uncertainty and potential volatility in student enrollment, while we continue to build on the synergy and efficiency of HECC's operation. We know we can overcome these challenges by applying the same tenacity, collaboration and innovation that we applied during the Spring of 2020.

On behalf of our agency, the Higher Education Coordinating Commission (HECC), we are excited to share with you our vision for embracing this moment to modernize our technology ecosystem and reduce the digital divide that contributes to educational disparities for underserved populations. The *HECC's Information Technology Strategy and Modernization Plan* lays down the path for how our agency will modernize itself, aligning to the *Governor's Modernization Plan* and the *State Enterprise Information Services (EIS) Strategic Framework*. We are inspired and excited to realize the inclusive, user-friendly, reliable and secure technology future the agency has envisioned.

Even more importantly, our *HECC IT Strategy and Modernization Plan* puts the technology in place to enable us to better serve you — our employees and our state's community colleges, public universities, private postsecondary institutions and workforce partners — and ultimately achieve HECC's vision of educational equity and excellence for each and every child and learner in Oregon.

Let's do this together.

Ben Cannon
HECC Executive Director

Robel Tadesse
HECC Chief Information Officer

Appendix B: Deep Dive: Application Inventory & Rationalization Roadmap	48
Appendix C: Deep Dive: DevOps Capability Assessment Summary	56
Appendix D: Collaboration Tools, Summary by Office	60

LET'S START BY SAYING THANK YOU

We could not have completed this 5-year Information Technology (IT) Strategy without the support of the Oregon Higher Education Coordinating Commission (HECC) staff, our partners, our stakeholders, and our consultants who all contributed their insight and advice on how HECC can better serve you through our technology and operations support. We view this document as a baseline, that we will adapt and implement iteratively and incrementally together, responding to the shifting landscape that lay ahead of us.

Acknowledgments

This HECC Information Technology (IT) Strategy was supported by over 60 representatives from our higher education and workforce development partners across the State of Oregon who participated in interviews, surveys, and capability assessments, as part of our IT modernization and planning process, including:

- Representatives from all eight Offices of the HECC
- State of Oregon Enterprise Information Services
- State of Oregon Employment Department (OED)
- Aveda Institute
- Blue Mountain Community College
- Chemeketa Community College
- Clackamas Community College
- Ford Family Foundation
- Linfield College
- Linn-Benton Community College
- Portland Community College
- Portland State University
- Oregon State University
- Southern Oregon University
- Worksystems
- Our HECC partner on this work, Slalom Consulting

Thank you!

HOW THIS PLAN FITS INTO OREGON'S HIGHER EDUCATION STRATEGIC GOALS

Mission

The mission of the Higher Education Coordinating Commission (HECC), derived from our chartering statutes, is to:

1. Dramatically and equitably improve postsecondary educational attainment levels;
2. Improve Oregon's economic competitiveness and quality of life; and
3. Ensure that Oregon students have affordable access to colleges and universities.

Vision

The HECC envisions a future in which all Oregonians—and especially those whom our systems have underserved and marginalized—benefit from the transformational power of high-quality postsecondary education and training.

About the HECC

As the single state entity responsible for ensuring pathways to higher educational success for Oregonians statewide, the State of Oregon's Higher Education Coordinating Commission sets state policy and funding strategies, administers over $1.2 billion annually of public funding, and convenes partners working across the public and private higher education arena to achieve the state's goals. The HECC is dedicated to fostering and sustaining high quality, rewarding pathways to postsecondary opportunity and success for all Oregonians through an accessible, affordable, and coordinated network of college and career training programs.

HECC Strategic Goals

Student Success	Equity	Affordability	Economic & Community Impact

HECC's information technology strategy enables us to realize these goals

EXECUTIVE SUMMARY

The Oregon Higher Education Coordinating Commission (HECC) envisions a future in which all Oregonians—and especially those whom our systems have underserved and marginalized—benefit from the transformational power of high-quality postsecondary education and training. Our ability to achieve this future for Oregonians will be enabled by this 5-year Information Technology (IT) Strategy and Modernization Plan to put in place a set of modern data and technology capabilities.

In alignment with the *Governor's IT Modernization Strategies* and *State Enterprise Information (EIS) Strategic Framework*, the *HECC IT Strategy and Modernization Plan* is the agency's roadmap to plan, implement and govern how we maximize the results of our current and future technology-related investments and resources for the next five years. Through this plan, HECC advocates for how technology can be used to remove systemic barriers and reduce the digital divide that limits access and success for many underserved and marginalized students in the Oregon education system.

These investments will address the current technology landscape, which is highly fragmented, relies on outdated and difficult-to-support technologies, and is burdened with many years of technical debt, resulting in inefficiencies, reliability challenges, and unfriendly experiences for employees and partners. As the HECC implements this plan to modernize its technology, we will reduce educational disparities and enable a more accessible, affordable and coordinated education system across Oregon.

Our Vision

We seek to transform into a modern technology organization that effectively collaborates with core agency operations across our eight offices. Working with the State EIS, we intend to create a digital experience that our employees, partners and students will find equitable, efficient and valuable. Furthermore, the user friendly, accessible and reliable data and technology will lead to, rewarding pathways to postsecondary opportunity and success for all Oregonians.

Our Strategic IT Investments and Epics

To realize this vision, we have put in place three overarching outcomes or themes, which are supported by nine investments—also known as our HECC IT Portfolio Epics. These strategic IT initiatives and investments will be delivered in an incremental and iterative manner over the next five years, adjusting our priorities to respond to the needs of our employees and partners.

Outcome 1. Improve Core Technology Management Capabilities

Epic 1.1 Strengthen IT Governance
Epic 1.2 Strengthen Product Ownership Capability
Epic 1.3 Improve Technology Workload Management

Outcome 2. Establish a Platform Approach for Digital Transformation

Epic 2.1 Establish Platform Architecture and Development Environment
Epic 2.2 Implement Cloud Strategy (Migrate to the Cloud)
Epic 2.3 Grow DevOps Capability and Skillsets

Outcome 3. Deliver a Reliable, User-Centric Technology Experience

Epic 3.1 Replace Legacy Applications
Epic 3.2 Centralize Software Management of Productivity and Enterprise Collaboration Tools
Epic 3.3 Develop an Operating and Maintenance Plan that Factors Technology Lifecycle

Our Cross-Functional Governance and Scope

As with most IT modernization efforts anywhere, we recognize the need for improved technology partnership across all HECC offices and functions through increased cooperation, collaboration and transparency – in both planning and delivery of IT services and products.

Our agency can achieve its vision more effectively through an IT Strategy and IT Governance approach that is adaptive, customer-centric, and cross-functional in nature to ensure that HECC IT investments support HECC's strategic objectives that produces measurable results. This implies that there will be resource investment implications for the entire Agency contained in HECC's IT Strategy, beyond the IT department.

We will govern execution of our agency's IT Strategic Plan using a cross-functional governance team for decision-making and oversight with an enterprise point-of-view for how HECC chooses to leverage technology to meet its goals, with appropriate owners for cross-functional implementation of our shared HECC IT Roadmap.

While some strategic initiatives on our 5-year IT Roadmap can be led by IT, many initiatives require agency-level collaboration and accountability that spans across offices and functions. We will do this together to advance our shared mission to enable student success, equity, affordability, and economic and community impact for all Oregonians.

CURRENT IT LANDSCAPE

The following observations on the current state of IT at HECC are aggregated from a combination of technology and DevOps capability model assessments, environmental scans, surveys and discussions over 60 stakeholders representing all eight HECC offices, the State of Oregon EIS, and direct feedback from over 14 higher education institutions and workforce development organizations across Oregon.

A number of factors contribute to the current IT landscape, most notably the passage of SB 242 in 2011, and SB270 and HB 3120 in 2013, which created the HECC by integrating previously separate state agencies and offices and related statutory authorizations, funding and staffing. The creation of HECC brought together the related missions of these agencies under one umbrella, along with their many disparate IT systems, applications, and cultures. Additionally, within the previous separate agencies, continuous improvements in technology were limited and often undertaken as one-off projects rather than considering system-level needs.

The combined Agency's current technology landscape is highly fragmented, relies on outdated and difficult-to-support technologies, and is burdened with many years of technical debt, all resulting in large inefficiencies, reliability challenges, and unfriendly experiences for external partners and customers, especially for disadvantaged and underserved populations with the least resiliency to overcome technology challenges.

See Appendix for the planning process used to inform our assessment of the current IT landscape at HECC.

Key Challenges Impacting Internal Operations

The current IT landscape and agency operations across HECC's eight offices is impacted by interrelated challenges that impact all areas of HECC's operations and performance, as shown in the diagram below. These challenges include:

- Fragmented data systems
- Legacy application infrastructure that is hard to maintain and high levels of technical debt that make improvements difficult.
- Immature product ownership capability and business analysis capacity.
- Limited access to cloud technologies, coupled with newer DevOps practices that are just starting to take hold.
- Technology workload management issues and capacity constraints that negatively impact IT service responsiveness.
- Nascent IT governance and steering, inhibited by ongoing integration of separate agencies and legacy systems.
- Fragmented or ineffective productivity tools not adequately supported by training, documentation and other types of organizational change support.

Further, an assessment of the current technical architecture revealed that:

- Many underlying technologies are at or near end-of-support.
- Releases are time-consuming and require significant manual steps.
- Applications are built around technologies best suited to on-premises deployment, hard to migrate to cloud.
- Hard-to-maintain applications (examples: FAMIS, D4A).
- Different representations of similar data entities between applications.
- Data cleansing and transformation is time-consuming and requires manual steps.
- Bug fixes consume a significant portion of developers' time.
- Fixing one thing often breaks another.
- No common enterprise view of data.
- Data visualization and analysis often performed in Excel spreadsheets.
- Demand for some applications is highly cyclical, meaning significant excess capacity for much of the year

These challenges not only impact HECC's operations and performance, they contribute to our state's educational disparities, instead of enabling our vision of educational equity and excellence for every child and learned in Oregon. For example, in its current state, the current Financial Aid Management Information System (FAMIS) is not able to provide application formats in multiple languages, nor does it provide mobile-friendly application processing. These technoloy challenges inhibit the ability of historically underserved populations to gain access to the state and federal financial aid resources needed.

For additional details, a deep dive into the HECC application inventory and rationalization roadmap, technical architecture and DevOps capability assessment is available in the Appendix, along with current state summaries for each of HECC's eight offices, located in the related HECC Current State Assessment documentation.

Key HECC IT Challenges and Recommended Investments

Challenge / Opportunity	Description
Fragmented data systems; Limited enterprise data governance	Across the HECC agency and Oregon post-secondary stakeholders, there is a great need for a longitudinal view of students and the impact of programs, but fragmentation of data systems makes this impossible via automated technology, and high data inconsistency due to no enterprise data governance makes this infeasible with more manual approaches.
Legacy application infrastructure and technical debt	Legacy application infrastructure and technical debt from multiple pre-existing agencies (without continuous improvement investments over the last three decades) have left HECC technology teams without any spare capacity to do more than keep the trains running by whatever means necessary, and impacts external customers and access to finanial aid and equitable outcomes for students. *Note: See Appendix and attached HECC Current State Assessment for deep dive into Application Inventory and Rationalization Roadmap.*
Weak product ownership capability and business analysis capacity	Weak product ownership capability and business analysis capacity within the Agency have hamstrung technology teams in meeting the agency's and external stakeholders' needs.

Key HECC IT Challenges and Recommended Investments

Challenge / Opportunity	Description
DevOps practices are not yet mature	DevOps practices are limited, especially regarding test and automation. Current inefficiencies, quality issues, and fire fighting in software development and release processes will be significantly improved once the IT department fully adopts and operationalizes DevOps best practices; however, further DevOps maturity will require adoption of cloud technologies. *Note: See Appendix and attached HECC Current State Assessment for deep dive into DevOps Capability Assessment.*
Nascent IT governance and steering	Historical silos between technology and business functions have inhibited the chance for technology-business partnership in meeting the Agency's needs and constrained Agency leadership on IT governance and steering, contributing to an inability to solve the challenges identified in this project.
Challenges with technology workload management	Understaffed technology teams, a large legacy infrastructure burden and constraints, and development and release inefficiencies have contributed to a history and ongoing challenges with technology workload management, leading to a pervasive lack of Agency trust in technology teams to achieve required objectives and timelines, despite high respect for and confidence in technology team staff members.

Key HECC IT Challenges and Recommended Investments

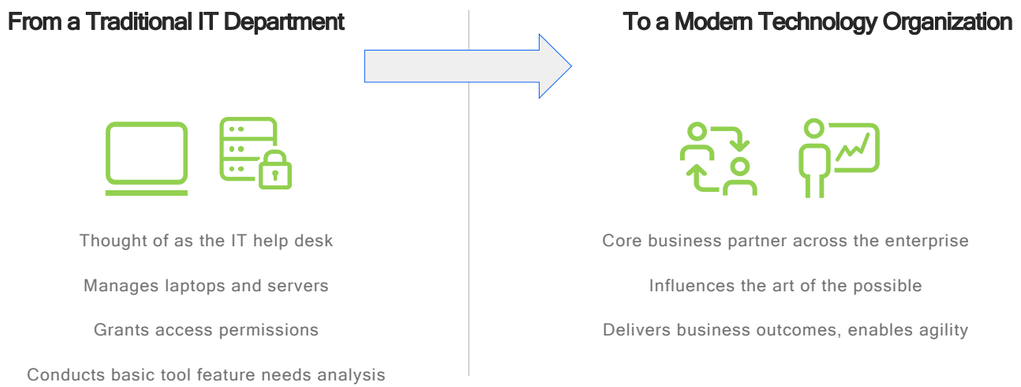
Challenge / Opportunity	Description
Fragmented, ineffective office productivity tools	Decentralized software selection and procurement, and inadequate stakeholder engagement for past decisions, has sustained a fragmented landscape of COTS office productivity tools that are poorly serving the Agency's communication, collaboration, and coordination mission to "cheer and steer" post-secondary education policy and institutions

HECC IT STRATEGIC INITIATIVES

As the state's higher education agency, HECC is positioned to take an enhanced leadership role to ensure accessible, affordable, and coordinated network of postsecondary and career training pathways exist for all Oregonians. Our ability to achieve this future for Oregonians will be enabled by the 5-year plan defined here to put in place a set of modern data and technology capabilities. In alignment with the Governor's Information Technology (IT) Modernization Strategies and the State EIS Strategic Framework, the HECC IT Strategy and Modernization Plan is intended to be the agency's roadmap to plan, implement and govern how we maximize the results of our current and future technology-related investments and resources for the next five years.

The vision we aspire to realize is one of enhanced delivery of services to our employee and partners using better integrated, cohesive modern data and technology capabilities, platforms and applications. Through the HECC's technology modernization initiative described in this plan, we will be better positioned to ultimately achieve HECC's vision of educational equity and excellence for each and every child and learner in Oregon.

We seek to transform to a modern technology organization that effectively collaborates with core agency operations across our eight offices, and with the State EIS, where we transform:



To realize this vision, we have put in place these three overarching outcomes or themes, which are supported by nine strategic investments designed to achieve these three overarching outcomes—also known as our HECC IT Portfolio Epics.

Outcome 1. Improve Core Technology Management Capabilities
Outcome 2. Establish a Platform Approach for Digital Transformation
Outcome 3. Deliver a Reliable, User-Centric Technology Experience

These strategic IT initiatives and investments will be delivered in an incremental and iterative manner over the next five years, adjusting our priorities to respond to the needs of our employees and partners, as described in the Appendix. It is also important to note that these initiatives do not constitute all of the technology investment that HECC technology teams need to complete over the next five years. They will need to support and maintain the security and computing infrastructure of current legacy applications until those systems are replaced and to continuously improve the functionality, maintenance, and management of all other systems and tools.

Outcome 1. Improve Core Technology Management Capabilities

Before beginning the large efforts to plan and implement an enterprise platform, it is important for HECC to improve the way it prioritizes, steers, and governs technology initiatives so that it maximizes the return on investment achieved with limited resources. Improvements are needed to evolve the current practices and capabilities around IT and data governance, product ownership, and work intake and backlog management so that HECC can deliver and improve the way it serves stakeholders.

Epic 1.1 | Strengthen IT Governance

Goals

- To ensure effective and efficient use of IT in enabling the Agency to fulfill its mission and meet its goals by aligning IT and business strategy, investments, and provide oversight over IT's ongoing impact on Agency operations.
- To drive strong cross-functional partnership and collaboration at the Agency leadership and working level.

Owners

IT Governance Committee (ITGC), HECC CIO and Business Leaders

Action Plan

The ITGC can improve IT governance and steering by implementing policies and processes in the following areas:

- **IT strategy alignment, adoption, and evolution.** Formally adopt an IT strategy that is aligned amongst the business and technology leaders on the ITGC. The ITGC should periodically revisit and update the IT strategic plan and roadmap (e.g., annually or biennially with the legislative budget cycle)
- **IT initiative prioritization.** develop a prioritization framework fit for the Agency that considers factors such as: business value, strategic alignment, risk, complexity, and cost
- **IT initiative oversight.** require ITGC review for significant IT initiatives at project kickoff and at periodic intervals or milestones while the project is active to ensure the it is:
  - ◇ Sufficiently resourced, including designation of a Product Owner and strong teaming between business and technology
  - ◇ Has well-defined business outcomes identified with a plan for monitoring and reporting, as needed
  - ◇ Has an org change plan, starting with an assessment of change readiness at the beginning of the project/product
- **IT service delivery oversight.** Periodically review KPIs on IT service delivery (e.g., IT support tickets and response; software development metrics) and occasionally conduct internal and external customer satisfaction surveys to identify trends and opportunities for continuous improvement

Next steps:

- Draft, align across all members, and finalize a future-state charter for the HECC ITGC
- Draft, align, and finalize any policies, procedures, and decision-making frameworks as needed to support the meeting cadence and agenda focus of future ITGC meetings

Epic 1.2 | Strengthen Product Ownership (PO) Capabiility

Goals

- To build a capability that brings business and technology stakeholders together to work differently, in a more collaborative, transparent, cross-functional way.
- To successfully identify, enable and empower the individuals who will become the HECC Product Owners and Product Managers of the data and technology products and projects needed to achieve HECC's strategic goals.

Background: Product ownership is a functional discipline that originated in the world of Agile software development but is broadly applicable outside of Agile. Product Owners must be familiar with the business (agency) context and ensure that desired outcomes are correctly translated into the features and capabilities of new technology tools and systems that are needed to achieve those outcomes. Furthermore, product owners prioritize features and elements that need to be developed and incorporated so that those with the highest value are implemented sooner. The technology development team works on items in the order prioritized by Product Owners. Product Owners are responsible for confirming that implemented features and capabilities meet the needs of end users by testing them with users as soon as they become available for testing before the final product is complete, and for providing testing feedback to the team for product improvement. In some cases, for large, technically complex projects, there may also be a need for a Technical Product Owner role to help translate functional needs into technology details, to prioritize the technical work needed to build technology infrastructure components, and to consider the adaptability of technology solutions to future needs.

Owners

CIO, Business and Technology Owners from all eight HECC Offices, selected Product Owners

Action Plan

Strengthening product ownership as an Agency capability will require improvements related to governance, process, and people skills.

- **Governance** – Instituting Product Owners will improve governance of projects by clarifying responsibility for choosing what gets built or implemented in the end product relative to the needs of the agency and end users. Additionally, we recommend that Product Owners play a leading role in business case analysis used by the IT Governance Committee to make decisions on technology investments, as well as a role in periodically updating the Committee on project progress towards business outcomes

Action Plan (cont.)

- **Process** – Product ownership and the role of Product Owners should be integrated into any Agency processes for project planning and management of technology initiatives. To the extent possible, projects should have a consistent Product Owner and/or Technical Product Owner from the beginning of the project and its justification through to completion of the project and validation of the outcomes delivered
- **People** – Product Owner and Technical Product Owner roles do not need to be exclusive jobs, but rather can in some cases be roles assigned to existing functional or organizational roles, such as the role of Project Manager or Business Analyst, so long as designated individuals have the needed business or technical context knowledge

Next steps:

- Identify a designated product ownership trainer for the Agency from within the IT Department, and pursue professional development to establish product ownership expertise of the designated Agency trainer (a "train the trainer" investment)
- Obtain or develop product ownership training material that can be used by the Agency trainer to train product owners in areas of the Agency where projects are planned or underway

Epic 1.3 | Improve Technology Workload Management

Goals

- To grow a culture, mindset and workflow of continuous improvement that will increase customer satisfaction and address resource capacity gaps through use of new or upgraded workload management tools or systems and work intake processes or compliance.
- To increase transparency into the gaps between workload levels and IT workload demand, and develop capacity-planning capabilities that decrease response cycles and KPIs.

Background: IT work typically falls into three main categories: planned improvement work to develop or implement new tools or systems or to upgrade existing ones (either business/customer-focused or internal IT-focused improvements); planned sustainment work to maintain existing tools and systems or as part of routine IT operations; and unplanned emergent work required to correct issues (e.g., software bugs) or react to urgent needs that are discovered. In a healthy IT environment, most of technology staff time can be spent on planned work rather than emergent work. Unfortunately, due to legacy systems, large amounts of technical debt, and current software development and release practices (e.g., low DevOps maturity), HECC technology teams have faced a significant amount of emergent work, which reduces their ability to successfully manage planned work in meeting internal and external customer needs. Customers sometimes face unpredictable response times, receive unsatisfactory resolution, or are told their request cannot be supported for extended lengths of time into the future. As a result, some Agency staff have given up on requesting support for tools and systems critical to their work. Additionally, technology work backlogs have accumulated outdated enhancement requests that are as much as three years old in some areas and are unprioritized and ignored.

Owners

Business Owners from all 8 HECC Offices, Technology Teams responsible for work intake and management

Action Plan

Currently, technology teams do not have good baselines on their workloads or sufficient metrics for tracking throughput and performance. For example, they may not have fresh work backlogs, including work not captured because there are not consistent, processes or behaviors for when and how Agency staff request technology support. Aged, unprioritized work backlogs also tend to have adverse influence on work management, value delivery, and continuous improvement. Agency Office managers and technology teams should take the following steps, as applicable, to improve work management and tracking.

Action Plan (cont.)

Cleanse and update work backlogs to re-baseline:

- Using product owners, inventory all previous enhancement requests related to legacy apps that are currently in backlogs, capture any current needs that are not represented, and close items that have been resolved or are no longer needed
- Group the enhancements based on interrelated functionality or system/ tool impacts, such that the groupings could be addressed as independent improvement projects, and prioritize these groupings into a backlog of projects for legacy system stabilization or deferral pending future legacy system replacement

Establish go-forward processes for work intake:

- For technology teams without formal work intake, establish processes and tools that facilitate work request capture and transparent management, and utilize change management to transition customers to using the new intake request process
- Intake processes and communication of expectations to customers should encourage adherence to standardized approaches segregated by request type (e.g., routine IT help desk support vs critical application fixes vs minor

Cleanse and update work backlogs to re-baseline:

- Using product owners, inventory all previous enhancement requests related to legacy apps that are currently in backlogs, capture any current needs that are not represented, and close items that have been resolved or are no longer needed
- Group the enhancements based on interrelated functionality or system/ tool impacts, such that the groupings could be addressed as independent improvement projects, and prioritize these groupings into a backlog of projects for legacy system stabilization or deferral pending future legacy system replacement

Establish go-forward processes for work intake:

- For technology teams without formal work intake, establish processes and tools that facilitate work request capture and transparent management, and utilize change management to transition customers to using the new intake request process
- Intake processes and communication of expectations to customers should encourage adherence to standardized approaches segregated by request type (e.g., routine IT help desk support vs critical application fixes vs minor bug or enhancement requests vs significant capability enhancements) that ensure an accurate and current catalog of unresolved Agency needs relevant to technology teams
- Product Owners and technology teams should regularly review backlogs to maintain accuracy and prioritization, and to ensure trends or strategic needs have visibility with the ITGC

Action Plan (cont.)

Implement work and service management KPIs and pursue continuous improvement initiatives:

- Technology teams should adopt work tracking tools that facilitate measurement and assessment of KPIs
- bug or enhancement requests vs significant capability enhancements) that ensure an accurate and current catalog of unresolved Agency needs relevant to technology teams
- Product Owners and technology teams should regularly review backlogs to maintain accuracy and prioritization, and to ensure trends or strategic needs have visibility with the ITGC

Implement work and service management KPIs and pursue continuous improvement initiatives:

- Technology teams should adopt work tracking tools that facilitate measurement and assessment of KPIs

Cleanse and update work backlogs to re-baseline:

- Using product owners, inventory all previous enhancement requests related to legacy apps that are currently in backlogs, capture any current needs that are not represented, and close items that have been resolved or are no longer needed
- Group the enhancements based on interrelated functionality or system/ tool impacts, such that the groupings could be addressed as independent improvement projects, and prioritize these groupings into a backlog of projects for legacy system stabilization or deferral pending future legacy system replacement

Establish go-forward processes for work intake:

- For technology teams without formal work intake, establish processes and tools that facilitate work request capture and transparent management, and utilize change management to transition customers to using the new intake request process

Outcome 2. Establish a Platform Approach for Digital Transformation

Many of the functional needs across the business areas of HECC have common patterns of use, and most of the technology needs could be built on a common infrastructure. To modernize its legacy applications and satisfy new application needs, the Agency should implement and build on a cloud-centric enterprise technology platform. Once a platform has been established along with the first application developments, additional applications can be built on top of the platform in a more efficient manner and as resources become available.

Epic 2.1 | Establish Platform Architecture and Development Environment

Goals

Establish an integrated platform architecture by implementing the core technology foundations so that the Agency can develop the modern environment on top of the platform

Background: Across the Agency, there are numerous legacy applications, and most have their own unique combination of database and application technologies used. Rather than replace these applications and databases individually in a siloed, fragmented manner, the Agency should pursue a platform approach.

Owners

CIO, in partnership with Business Owners from all eight HECC Offices/ Departments

Action Plan

- **A modern N-tier platform architecture should be adopted** that is highly modular and service-oriented to optimize adaptability, quality, and code re-use. Page 32 illustrates a high-level example of this architecture
- **The data-centric elements of the platform should include both enterprise data stores as well as a reporting warehouse** integrated with modern analytics and visualization tools
- **A Low-Code Application Platform (LCAP), coupled with a robust services layer (consistent with the details laid out in the Technical Deep Dive Appendix), should be utilized** in order to reduce the maintenance overhead of the technology platform and allow lightweight application development that can provide some level of decoupling of Office agility from technology team resource constraints. Many LCAP vendors are available, however Microsoft's platform would best leverage existing IT Department skillsets and investments
- The technology needs of FAMIS are likely to be the most stringent within the Agency based on data sensitivity considerations, direct student interfaces, and program complexity; and, as FAMIS is currently farthest along in EIS stage-gate approval, it will likely be beneficial to build the platform core components and FAMIS replacement at the same time as one project
- To ensure that the new enterprise platform foundation incorporates an enterprise data schema and model that best facilitates cross-Office data analysis, the Agency will need to institute enterprise data governance and an enterprise data model that all Office applications will be built on as legacy applications are replaced. This work will need to be accomplished either in advance of or in conjunction with initial development of the enterprise platform

Action Plan (cont.)

Next steps:

- Train or hire internal resources with experience establishing and implementing Enterprise Architectures, or pursue a vendor RFP
- Evaluate platform technology and LCAP alternatives, and down-select
- Determine/implement the minimum required platform components for first use case (likely FAMIS)
- Establish a framework within the Agency for business application development on the low-code platform and sustainment regarding responsibilities for Offices/business users, IT, and data owners

Epic 2.2 & 2.3 | Implement Cloud Strategy (Migrate to the Cloud) & Grow DevOps Capability and Skillsets

Goals

DevOps, which tightly integrates and automates software development/release and software system operations activities, is a set of best practices (processes and technologies) utilized by modern technology organizations. Adopting and maturing DevOps practices within software development teams will enable many benefits including increased Agency agility and achievement of strategic outcomes that are dependent on technology. Currently, the HECC IT Department has limited adoption and consistency in DevOps practices; however, significant DevOps improvements are dependent on migration to public cloud technologies (e.g., Azure, AWS). Migration to the cloud will also provide additional efficiency and agility improvements to the Agency, by leveraging more off-the-shelf modern technologies and reducing the overhead associated with technology infrastructure maintenance.

Owners

IT Department Leaders, in collaboration with Business Owners from all eight HECC Offices/Departments

Action Plan

- Three use cases of computing "workloads" (e.g., web servers, databases, microservices) should be considered for cloud and DevOps implementation:
  - ◇ Existing workloads based in legacy systems – for many of these workloads, there may not be a good ROI for shifting them to the cloud as-is, based on expected time to replacement or on technical or architectural constraints (e.g., monolithic applications that aren't composable) that limit shifting them to the cloud or implementing DevOps technologies (e.g., CI/CD pipelines, monitoring, test automation). Legacy workloads should be considered for cloud and DevOps migration (in their current technology and architectural state) on a case basis
  - ◇ New workloads or replacements to existing legacy workloads that are implemented as part of the enterprise platform recommended in this strategic plan – these workloads should be implemented as cloud-native with full DevOps technology and process integration
  - ◇ New or legacy replacement workloads that are implemented prior to and separate from definition and implementation of the enterprise platform foundation – Implementing these workloads as cloud-native and DevOps-integrated will provide the fastest and likely lowest cost path to implementation and will enable the easiest re-integration into the enterprise platform once in place

Action Plan (cont.)

- Based on the use cases above, develop a cloud migration strategy and down-select on a public cloud vendor. The Microsoft Azure cloud will likely be the easiest for the Agency to adopt based on its existing Microsoft-centric IT environment; however, other vendor clouds such as Amazon AWS are also viable and may offer advantages based on the enterprise platform needs for Platform-as-a-Service cloud technologies, or based on cost comparisons
- As part of migrating to the cloud, fully implement DevOps practices and move toward micro-services and composable architectures that support independent, isolated software releases

Next steps:

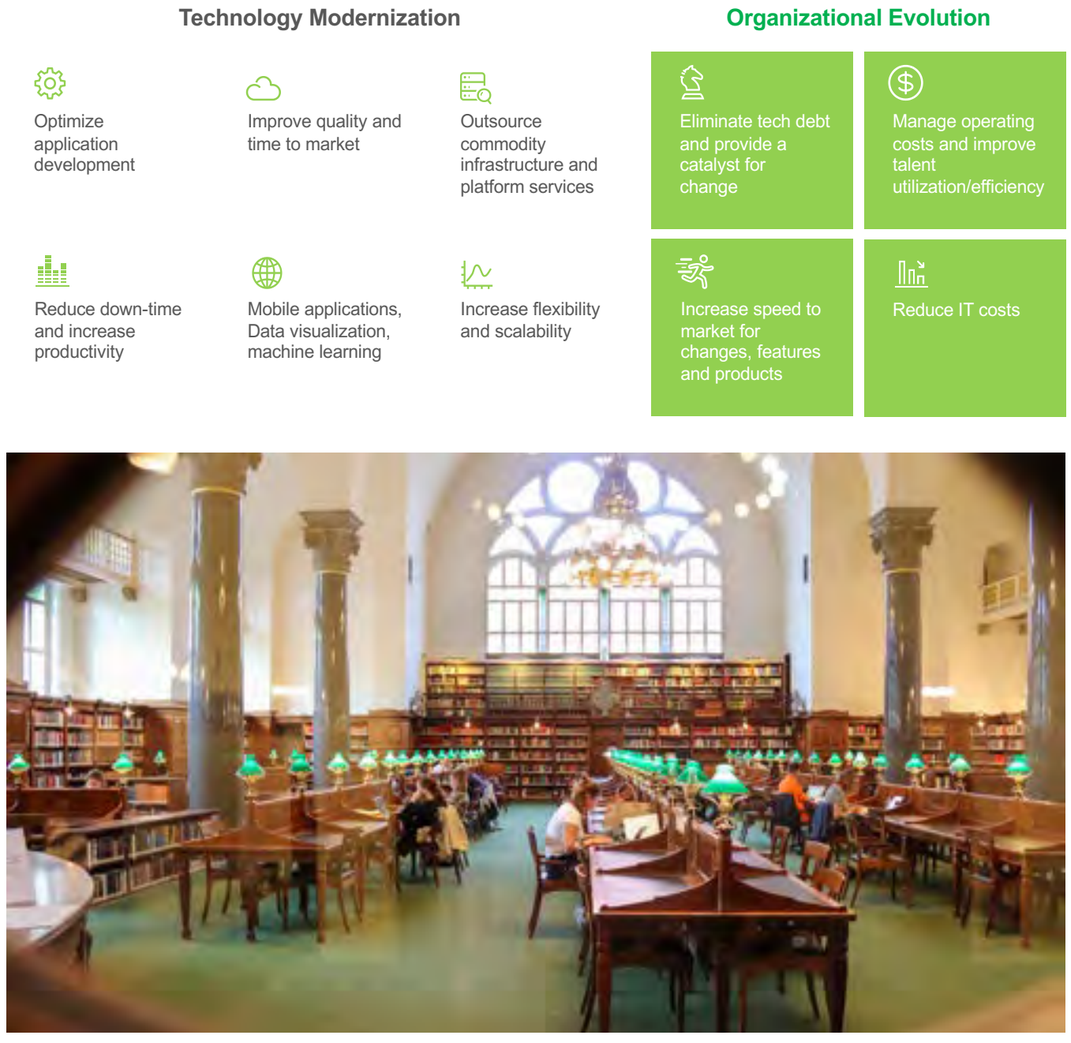
- If possible, development of the cloud migration strategy, down-selection to a public cloud vendor, as well as execution of the cloud migration should occur as part of (or coincident with) the technology program that implements the enterprise platform
- To prepare for that work, technology teams can begin consolidating lists of existing workloads and identify any viable use cases for shifting legacy workloads into the cloud, as discussed in the Recommended Approach
- EIS identified that the Agency should work with its SIPM early to estimate cloud migration cost impacts to the Agency and any utilization changes of State Data Center resources

Refer to HECC DevOps Capability Assessment, summarized in Appendix C, for more detailed gaps and next steps that HECC plans to take to continue growing its DevOps capabilities and skillsets throughout the service lifecycle, from design through development to deployment, to improve software delivery and IT effectiveness

Highlights from HECC DevOps-Cloud Modernization Plan

In line with the State's Cloud Strategy and Guidance, and HECC's IT modernization plan, the agency is already planning for its migration to the cloud and further development of internal DevOps capabilities. The agency's journey to the cloud, as with any organization, is one that likely will take several years, as it is a modernization effort that requires not only new platforms, but also a shift in culture and development of new knowledge, skills and abilities in the agency's IT employees.

As the agency migrates to the cloud and builds its internal DevOps capabilities, it will start to realize a number of positive outcomes, such as:



As the agency explores its path to the cloud, here are the application architecture alternatives to explore, and integrate into its 5-year IT strategy roadmap. Option 3, to take a hybrid approach, is the path that is currently the best fit for the agency's roadmap.

Criteria	Option #1 Custom Application Development Around Cloud Microservices	Option #2 Full Transition to LCAP Platforms and Cloud	Option #3 Hybrid Approach Utilizing Both LCAP and Microservices	Option #4 – Phased Application Enhancements using State Data Center Hosting
Description	Transactional apps implemented in React or Angular, RESTful microservices, and modern architecture	UI and business logic of transactional apps migrated to low-code platform	Microservices layer built using RESTful services, UI implemented using LCAP technologies	Gradual evolution of existing applications toward more modern tech stack and UI refresh
Implementation Complexity	High	Low	Medium	Low
Required Development Resources	High	Low	Medium	Low
Alignment with Current HECC technical skills	Low	Medium	Medium	High
Required Upskilling	Cloud development, cloud admin, Modern SPA development, JavaScript/ TypeScript + framework(s)	LCAP development, Cloud admin	Cloud development, cloud admin, LCAP development	Modern SPA development
Risk of Obsolescence	Low	High	Medium	Very High

Outcome 3. Deliver a Reliable, User-Centric Technology Experience

Current legacy applications are built on an evolution of technology that goes back multiple decades in some cases. Sustaining these applications will only get more difficult with time, even with incremental investment to sustain, and they will struggle to deliver the modern technology experiences that most people now expect. The Agency should plan to replace all legacy applications over the next five years, as resources become available, addressing them in priority order of highest risk and impact. Replacing these applications with new ones built on the enterprise platform will provide an opportunity for significant Agency staff efficiency gains and will enable the potential for a longitudinal view of students across the many facets the Agency oversees. Additionally, the Agency can make near-term efficiency and effectiveness improvements by migrating to improved office productivity collaboration tools used for tasks like videoconferencing, conducting surveys, and communicating with contact lists.

Epic 3.1 | Replace Legacy Applications

Goals

Based on an enterprise application rationalization consideration, risks associated with current legacy application designs and technologies, and the goals laid out in this strategic plan (e.g., achieving an enterprise platform technology approach), the Agency should replace all legacy applications, utilizing an enterprise platform approach to the extent possible. A list of legacy and new application needs is summarized in this document.

Owners

IT Department Leaders, in collaboration with Business Owners from all eight HECC Offices/Departments

Action Plan

- EIS has begun an initiative for Stage Gate process to approve enterprise modernization programs, which are collections of agency projects that share interdependencies based on technical, resource, or business case factors. Based on the enterprise platform approach recommended in this strategic plan, and use of technology team resources to support integration of replacement applications, the HECC should pursue a modernization program encompassing the legacy application replacements and high priority new applications identified in this initiative
- Because technology investments in business application system replacements may become available at an Agency Office level vice an enterprise level, the ITGC's prioritization of individual projects may necessarily be dynamic.
  Technology teams and the ITGC should maintain a prioritization backlog of legacy replacement and new application projects, such that as the necessary types of resources become available to undertake the next available project of highest priority, work on project planning and Stage Gate 2 approval can begin quickly with minimal additional enterprise assessment or alignment required
- As detailed in the enterprise platform recommendation, the Agency can pursue an optimal funding investment path by building the enterprise platform foundation and core components as part of the first one or more application development projects. Subsequent projects will then face a much lower development and implementation cost by leveraging already-existing infrastructure and frameworks
- These application development projects do not have to be undertaken together, however doing so will provide additional efficiency and enterprise coordination benefits with integration into a common platform
- A preliminary list of priority legacy replacement and new application needs is included in Appendix B

Action Plan (cont.)

Next steps:

- The ITGC should review and prioritize the backlog of legacy application replacement and new implementation projects once a prioritization framework is aligned as an ITGC standard process
- Document the business case for an agency modernization program for EIS Stage Gate 1 approval, leveraging the assessment and strategic planning information in this IT Strategic Plan
- After modernization program approval, document planning information for Stage Gate 2 project approval of the highest priority projects in the ITGC backlog

See the Appendix B for the Legacy Replacement and New Application Backlog.

Epic 3.2 | Centralize Software Management of Productivity & Enterprise Collaboration Tools

Goals

Decentralized software selection and procurement, and inadequate stakeholder engagement for past decisions, has sustained a fragmented landscape of COTS office productivity tools that are poorly serving the Agency's communication, collaboration, and coordination mission to "cheer and steer" post-secondary education policy and institutions.

Owners

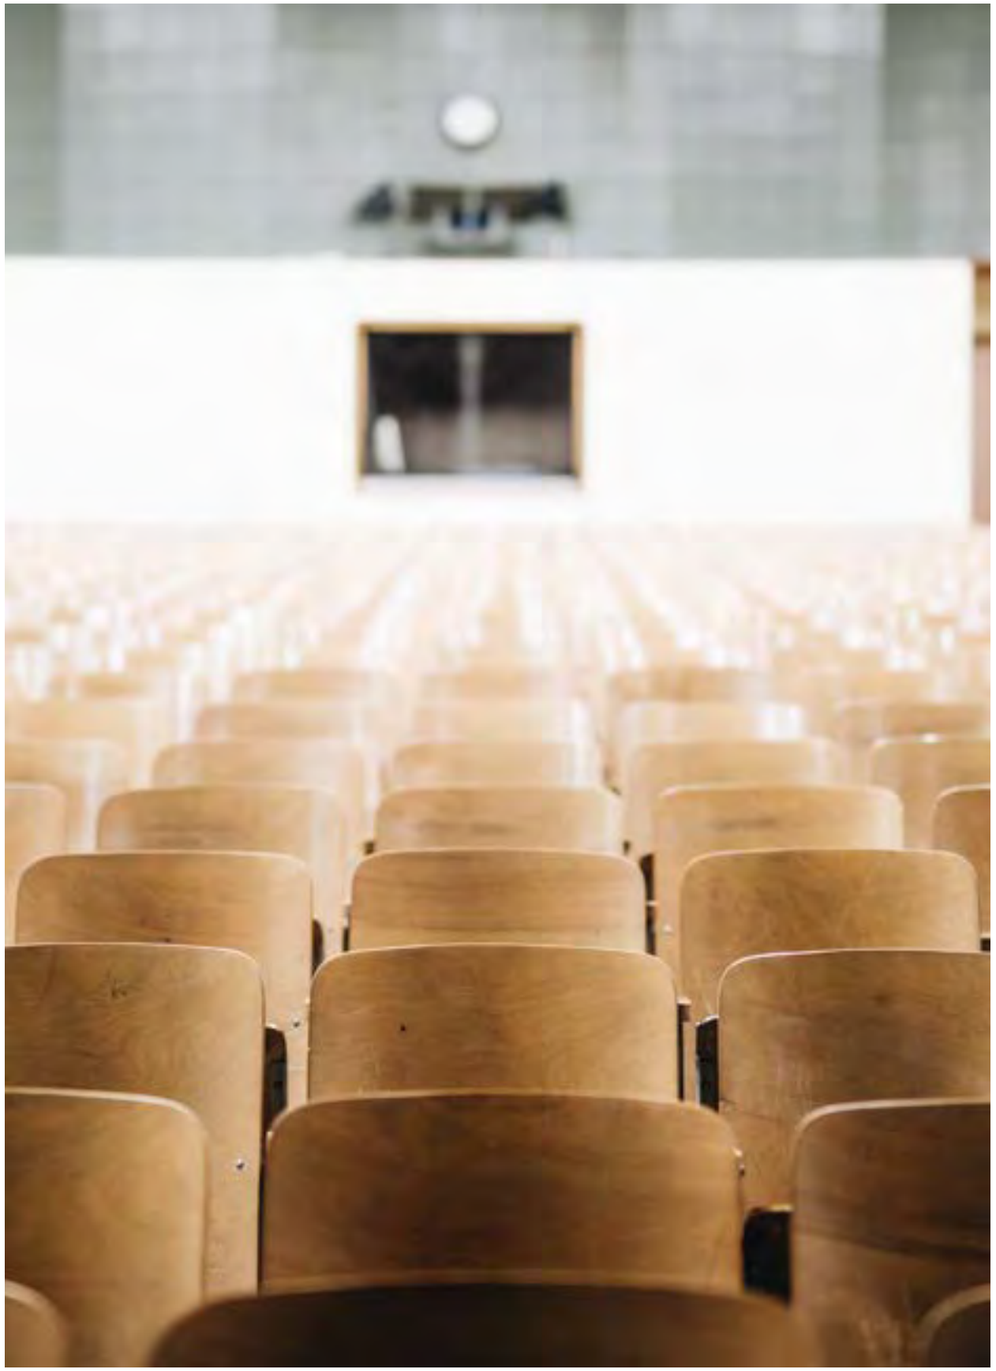
CIO, in collaboration with Business Owners of Collaboration Tools

Action Plan

- Document, align, and implement enterprise policies for productivity software, including:
  - ◇ Selection
  - ◇ Procurement
  - ◇ License Management and Provisioning
  - ◇ Training
- Migrate to enterprise collaboration tools and licensing that better meet agency needs in each of the use case categories identified here
- Establish an enterprise content governance process for external-facing Agency websites and for the internal intranet, including:
  - An intake process that allows for digital request submissions and tracking
  - Clear roles and responsibilities between Agency Communications and IT departments

Next steps:

- Review the results of the *Office Productivity and Collaboration Tools Survey* in the Appendix to inform backlog of more centralized software selection and organizational change support to enable people to use the tools



Epic 3.3 | Develop an Operating & Maintenance Plan that Factors Technology Lifecycle

Goals

To develop a process of monitoring, upgrading, and maintaining the agency's core IT infrastructure and application on a continuous basis ensuring that the agency technology investment is fully functional and performs optimally. IT Operation and Maintenance is critical in keeping IT systems and networks secure and operating effectively and efficiently.

The Operations and Maintenance comprises the following objectives:

- Maintain a high level of support services including training and documentation
- Use a work order system to measure service levels and outcomes
- Provide outstanding Cloud IT services, deployment and maintenance Service
- Perform required security activities such as contingency planning, and audits.

Owners

Business Owners from all eight HECC Offices, Technology Teams responsible for work intake and management

Action Plan

Strive for excellent Customer Satisfaction: Align services with customer expectations. Conduct survey and gap analysis of key service expectations against current service delivery.

- Engage and develop employees
- Implement IT service management (ITSM change management)

Implement new Service Desk: Streamline service delivery through process improvement and automation in alignment with best practices such as ITIL.

- Continue to provide reliable and time and cost-efficient help desk support
- Increase self-service options. Identify how to provide self-service where options currently do not exist such as password change

Deployment and Maintenance Service: Perform new technology projects, replacement and upgrades (e.g. SQL Server upgrade, Office 365, OneDrive, etc)

- Immediate accessibility to new software functionality through rapid technology updates
- Deploy innovative technology solution that meets emerging needs of the agency such as video collaboration tools

Reduce Security Risk: Provide a full range of IT services, systems and support to help the agency: protect its data assets, to ensure that data systems and data use are compliant with relevant federal and state law and regulations, and with applicable contractual obligations.

Action Plan (cont.)

- Ensure the computing environment remains as safe, secure, confidential, and usable and reduce technical and security risks
- Review plans for disaster recovery and business continuity and execute already-known components

Next Steps:

- Procure and implement a new helpdesk software that supports ITIL best practices before the end of the biennium
- Create a technology service catalogue, perform regular employee training on office productivity tools, and conduct annual survey of customer satisfaction
- Develop and execute a project schedule for technology service maintenance and operation plan as well as migration plan to cloud services that takes into consideration IT staff training, capacity and workload
- Implement CIS top six control sets and ensure HECC achieves above 95% on the State monthly audit of Vulnerability Management Program. Develop a disaster recovery and business continuity plan. Adopt appropriate technology security policies for the agency

IT metrics are quantifiable measurements that enable IT leaders to efficiently manage the operations of providing IT services and products. While it can sometimes be difficult to measure indicators of IT performance, especially with numerous IT-relevant KPIs. It's important to use fundamentally insightful IT metrics—both internal and external focused—that matter most to HECC's mission, and its provision of products and services. While metrics tied to rewards are motivational, they may not move all of the levers necessary to ensure modernization and transformation. According to state CIOs surveyed, it is important to ensure that all elements of HECC's operating model are measured, including process, tools, governance, people enablement, and technology.

HECC Technology-Related Outcomes, Investments and Metrics

#	Outcome	Investments (or Epics) // Related Success Indicators	Year 1	Year 2-5
1	**Improve Core Technology Management Capabilities**	**1.1 Strengthen IT Governance** Indicator A // ITGC charter, policies and procedures in place Indicator B // Performance against schedules for: (1) active IT project reviews, (2) IT investment backlog prioritization reviews, (3) IT service KPI review, (4) IT strategic plan and roadmap refresh	x	
		1.2 Strengthen Product Ownership (PO) Capability Indicator A // # of employees who are qualified to be Product Owners based on completion of training Indicator B // % of projects or products with an assigned PO, targeting 100% Indicator C // % of projects or product backlogs that have been reviewed with business and technology managers within a defined period of time (at least quarterly)	x	
		1.3 Improve Technology Workload Management Indicator A // KPIs are defined and measured on a regular cadence Indicator B // KPIs are trending in a positive direction (toward defined targets)	x	

#	Outcome	Investments (or Epics) // Related Success Indicators	Year 1	Year 2-5
2	**Establish a Platform Approach for Digital Transsfor-mation**	**2.1 Establish Platform Architecture and Development Environment** Indicator A // % of enterprise data accessible via a shared data services layer Indicator B // % of agency programs with access to fiscal budget information via a platform portal Indicator C // Availability and performance of self-service analytics and reporting Indicator D // Availability and performance of rapid development, testing and deployment of business applications		x
		2.2 Implement Cloud Strategy (Migrate to the Cloud) Indicator A // % of workloads in the cloud (target 100% for critical business applications) Indicator B // Operational cost of application in the cloud vs legacy baseline Indicator C // Other custom indicators based on HECC's targets defined in the Cloud-DevOps Capability Model and EIS standards		x
		2.3 Grow DevOps Capability and Skillsets Indicator A // # of manual steps in the software testing and release processes Indicator B // Release frequency Indicator C // % of workloads with automated monitoring		x

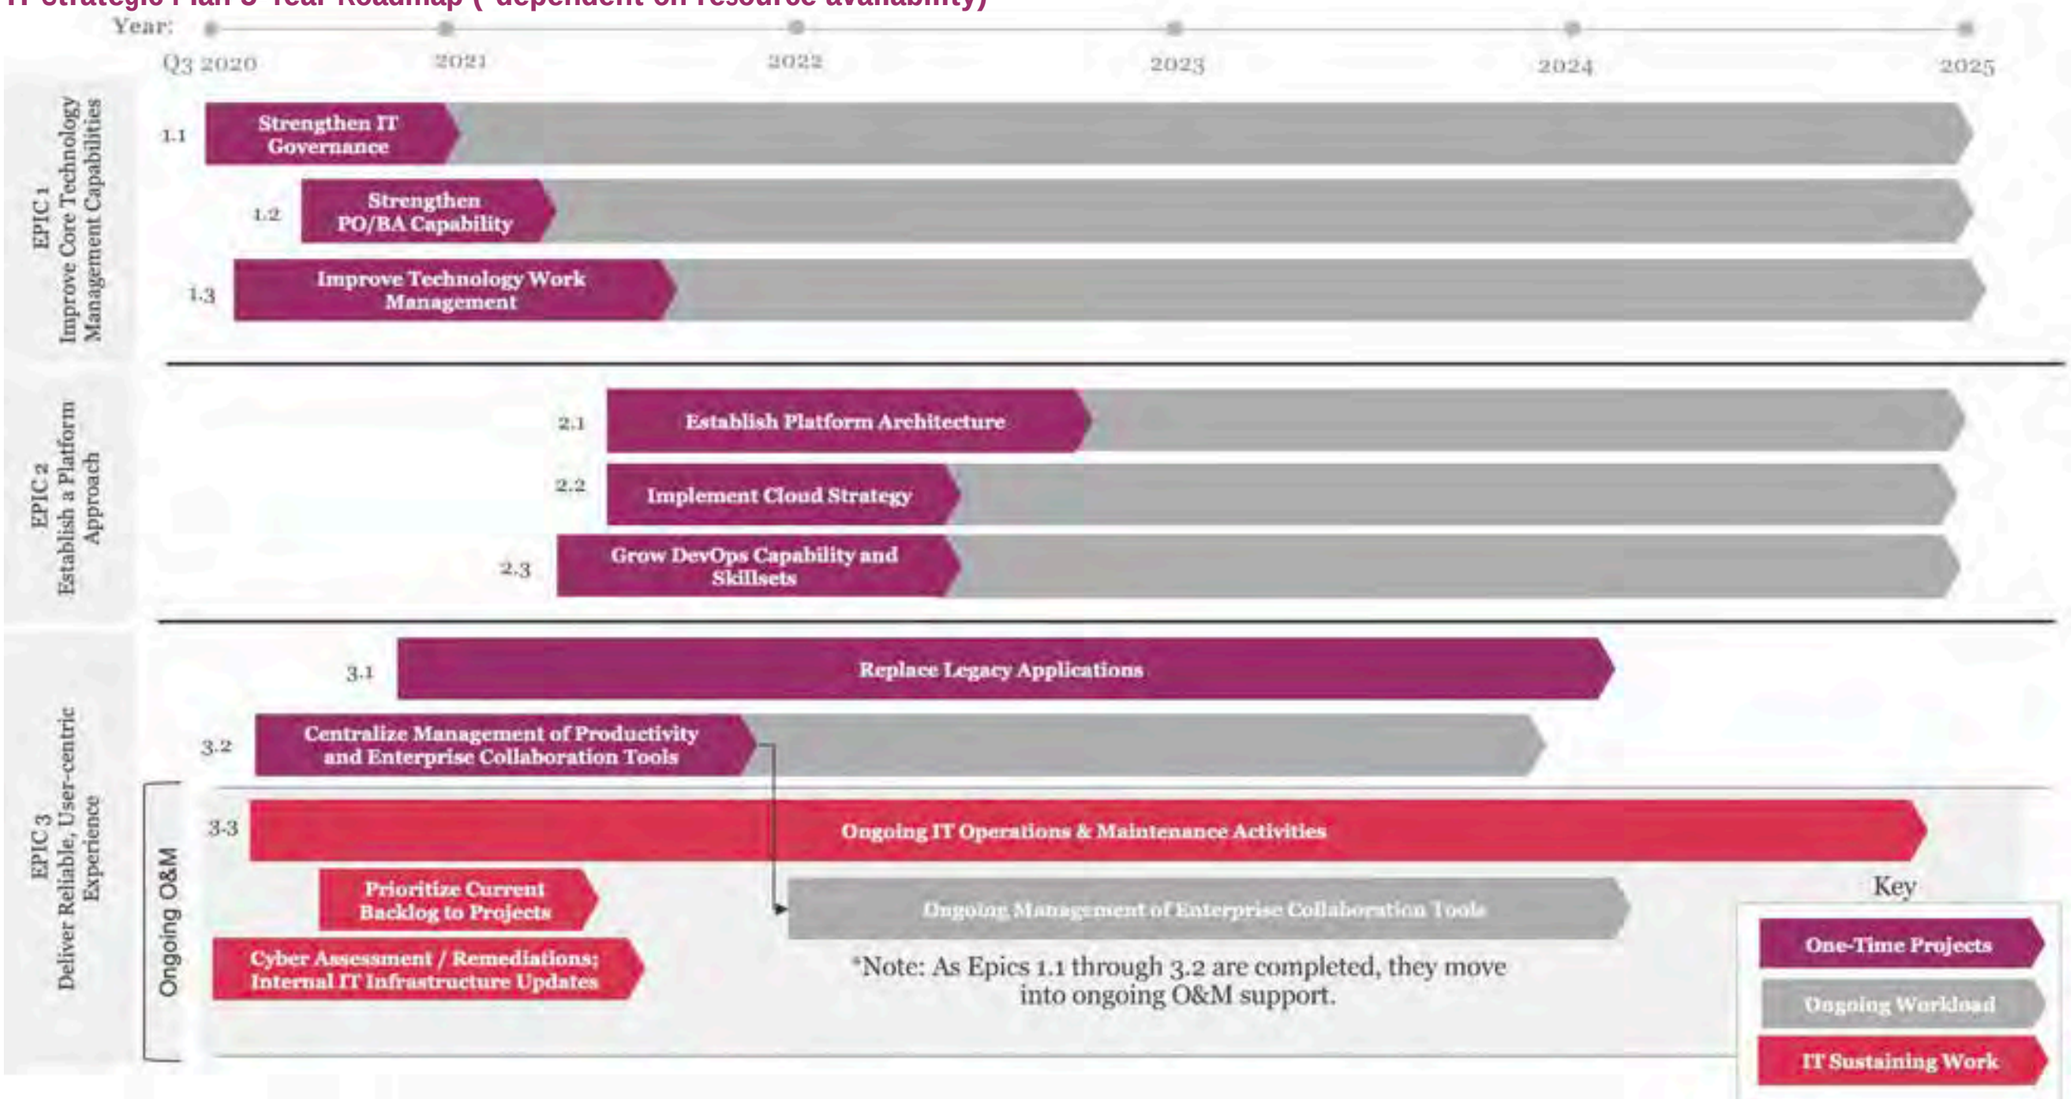
#	Outcome	Investments (or Epics) // Related Success Indicators	Year 1	Year 2-5
2	**Establish a Platform Approach (cont'd)**	**2.3 Grow DevOps Capability and Skillsets (cont'd)** Indicator D // Code coverage % in testing automation Indicator E // Other software quality metrics (e.g., software bugs @ each stage, required rollbacks) Indicator F // Ability to execute environment configuration vs infrastructure-as-code Indicator G // Other custom indicators based on HECC's targets defined in the Cloud-DevOps Capability Model and EIS Standards		x
3	**Deliver a Modern Reliable Technology Experience**	**3.1 Replace Legacy Applications** Indicator A // # of applications using MS Access (reduce to zero as quickly as possible) Indicator B // % of application integrated into the enterprise platform Indicator C // # of needed stakeholder web portals not implemented Indicator D // % of application projects with fully documents business cases aligned to EIS principles	x	x
		3.2 Centralize Software Management of Productivity and Enterprise Collaboration Tools Indicator A // Enterprise policies for productivity software procurement and management in place Indicator B // KPIs based on survey results of employee use and satisfaction with productivity tools	x	

HECC Technology-Related Initiatives, Investments and Metrics

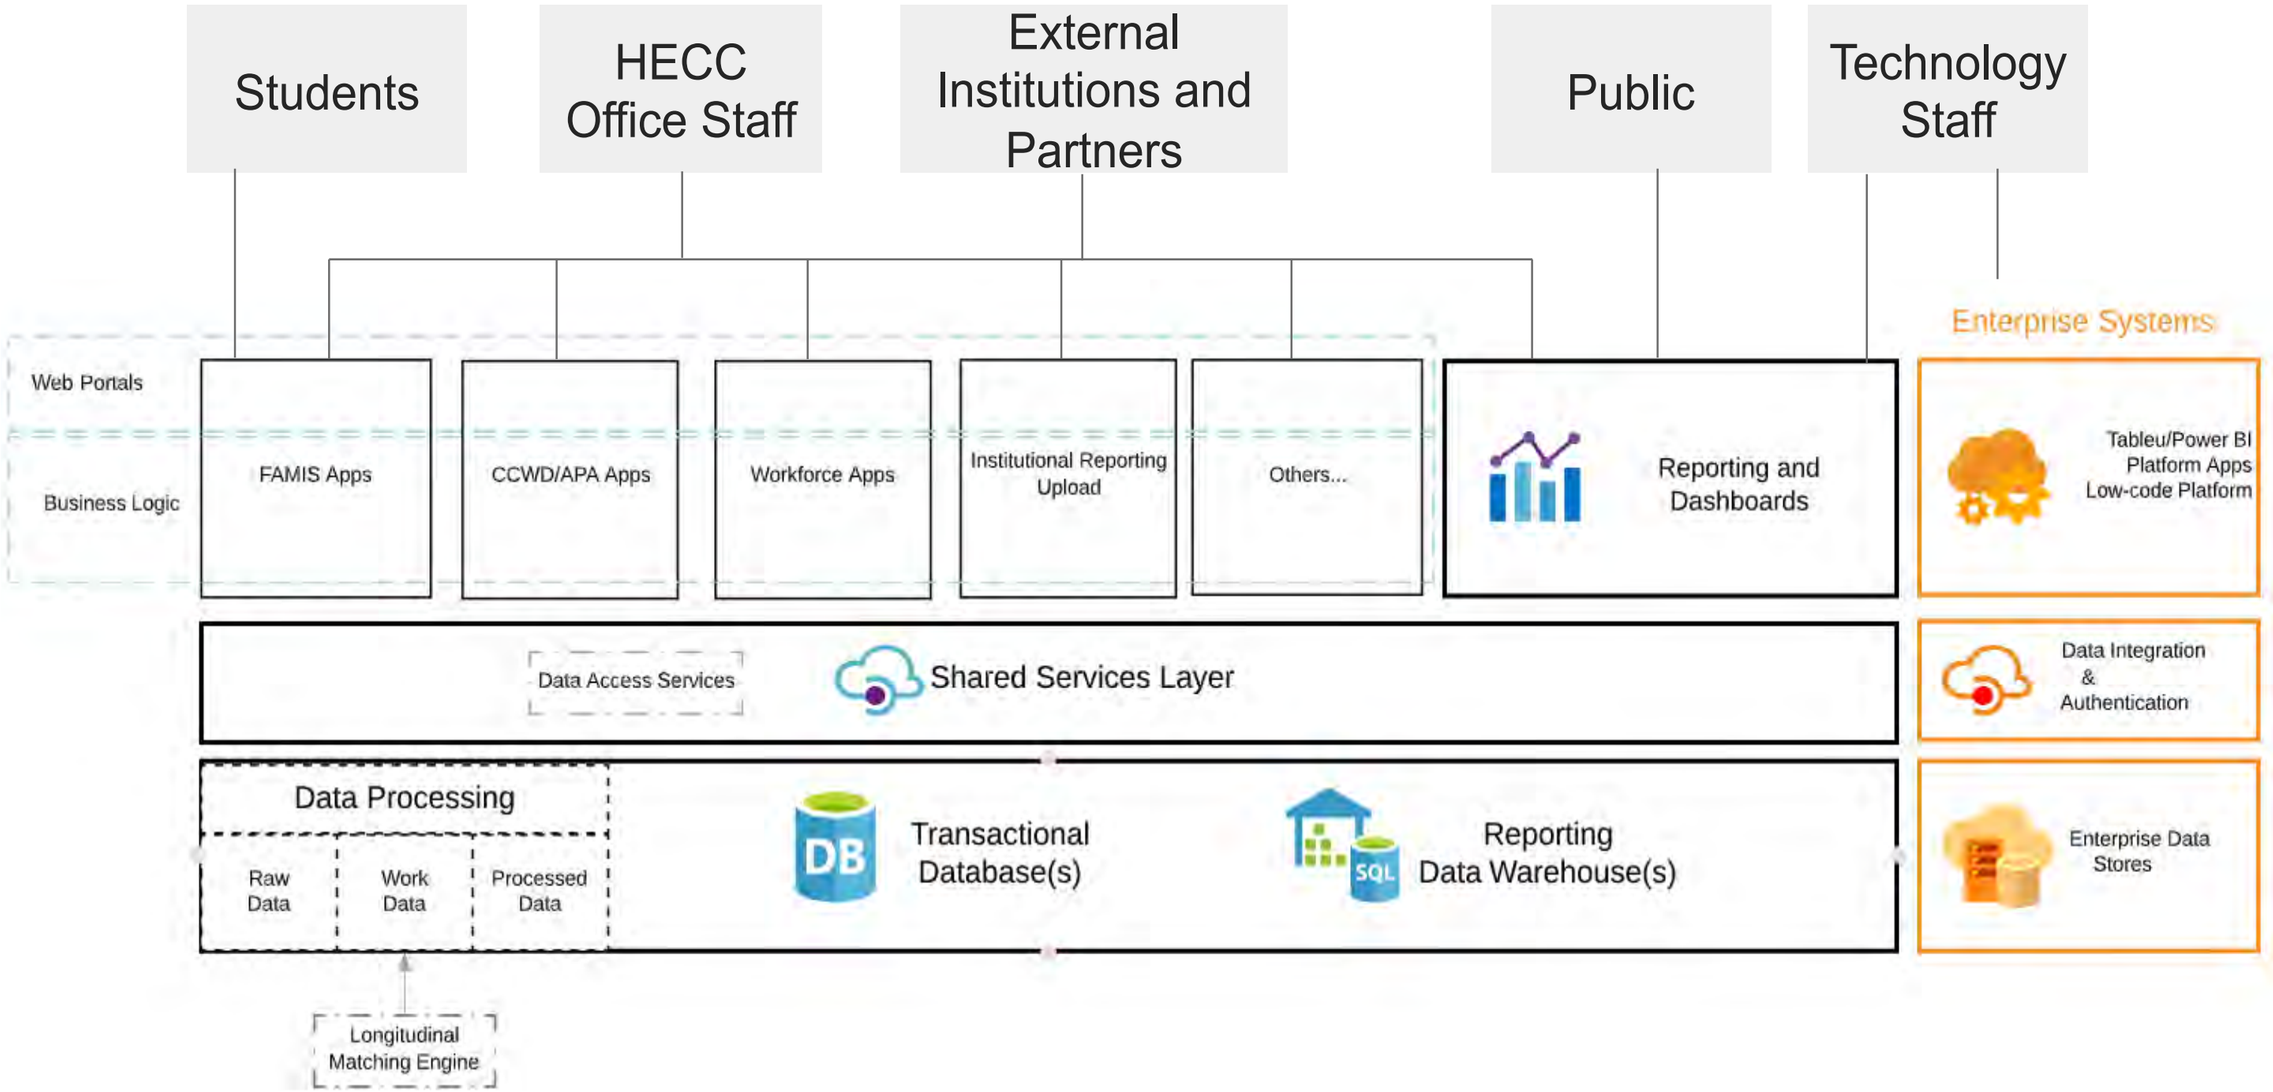
#	Outcome	Investments (or Epics) // Related Success Indicators	Year 1	Year 2-5
3	**Deliver a Modern Reliable Technology Experience**	3.3 **Develeop an Operating and Maintenance Plan that Factors Technology Lifecycle** Indicator A // Service delivery and ITIL KPIs are defined and trending in a positive direction Indicator B // Vulnerability management and business continuity plans and KPIs defined and trending in a positive direction Indicator C // Employee KSAs reflect modern skillsets needed to operate and maintain Cloud and DevOps services		x

TECHNOLOGY MODERNIZATION ROADMAP & ARCHITECTURE

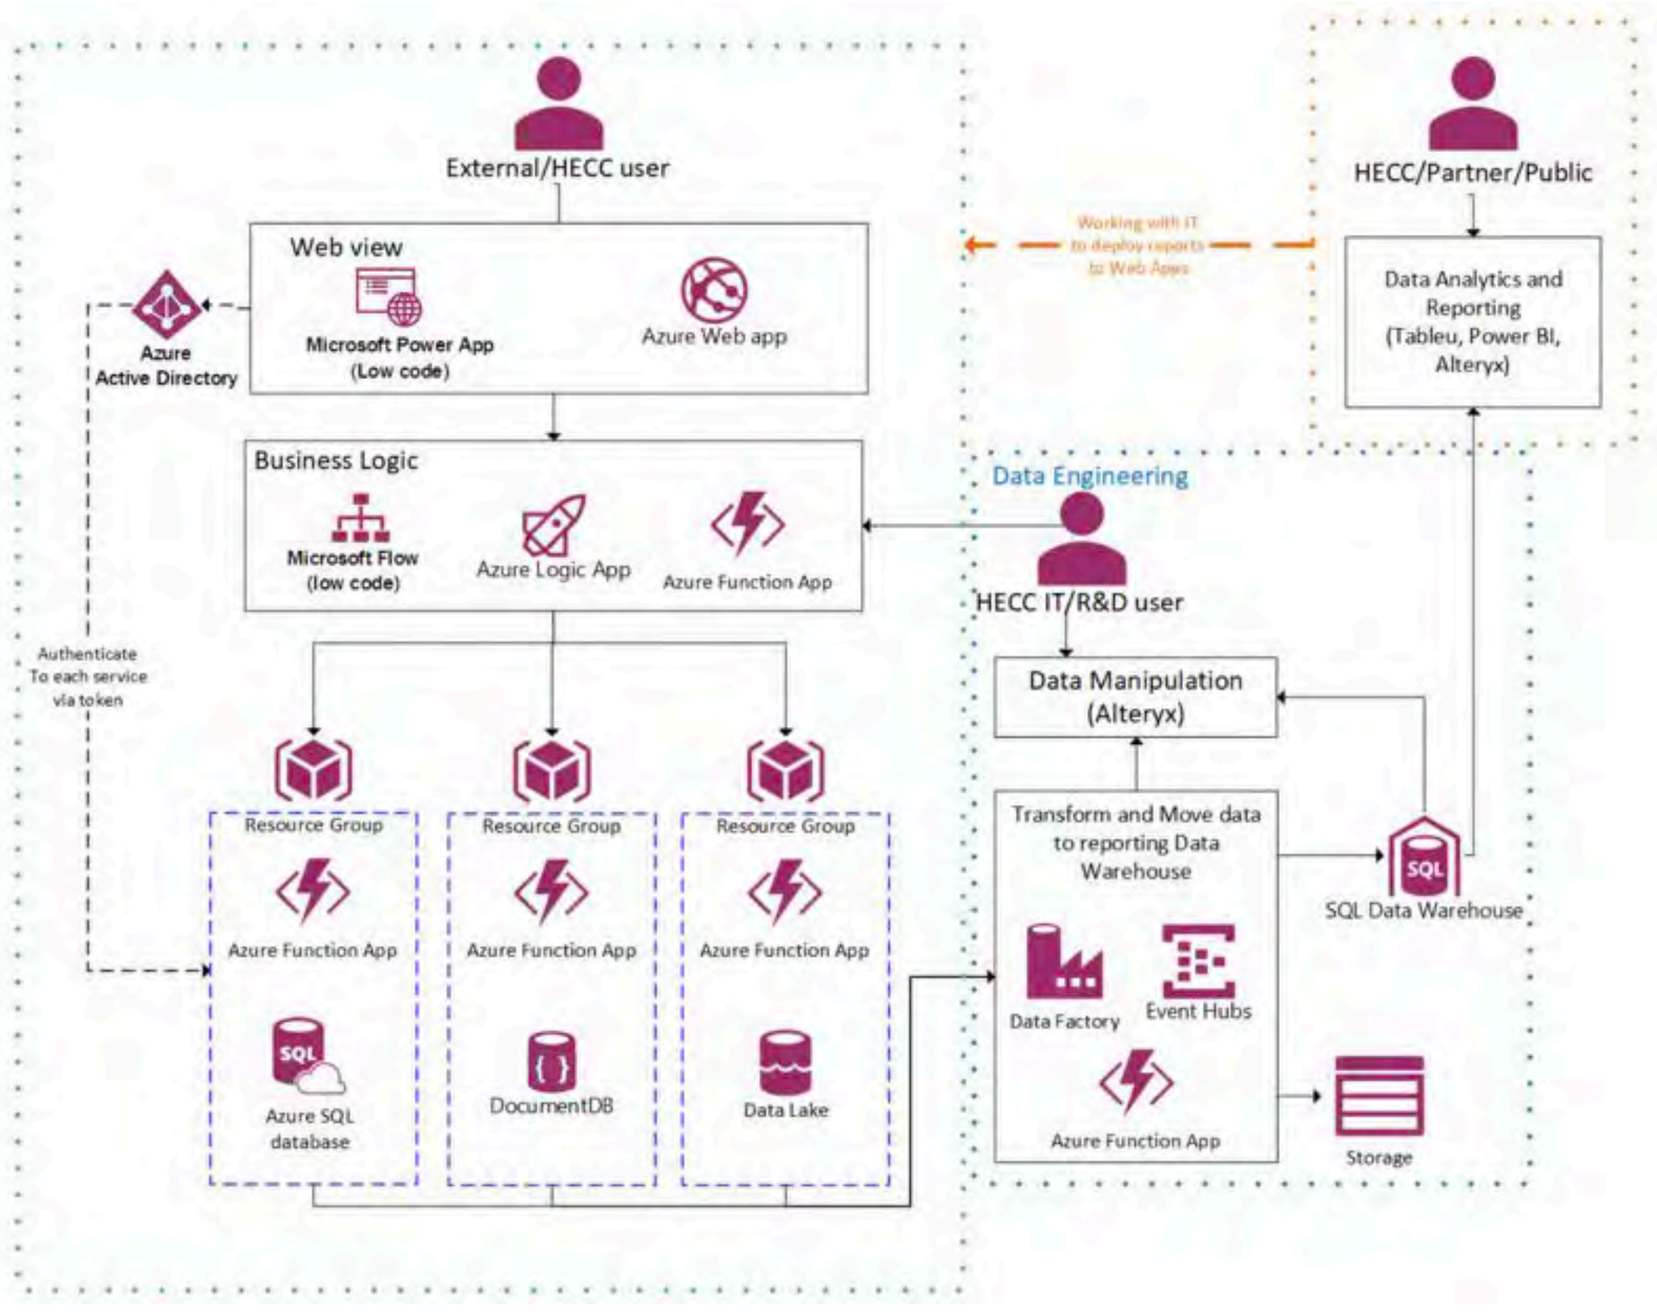
IT Strategic Plan 5-Year Roadmap (*dependent on resource availability)



Future HECC Conceptual Enterprise Platform



Future HECC Conceptual Platform Architecture



Appendices

Appendix A	Our Planning Process
Appendix B	Deep Dive: Application Code Inventory & Technology Rationalization Roadmap
Appendix C	Deep Dive—HECC DevOps Capability Assessment
Appendix D	Office Productivity Collaboration Tools Survey, Results by Office

Appendix A: Our Planning Process

The following diagram summarizes the planning process used to assess the gaps in current HECC business and IT capabilities, which informed the development of the IT strategy, roadmap and prioritized backlog of investments needed to support agency operations now, and in the future. The recommended findings and recommendations were informed by the over 50 stakeholders representing 15 organizations who were interviewed and surveyed, coupled with review of the technology architecture, application rationalization, and use of IT and DevOps capability models to assess 300+ pain points and HECC current and desired capability levels.

Appendix B: Deep Dive: Application Code Inventory & Technology Rationalization Roadmap

Code Repository	App Name	Purpose	UI Technology	DB Technology	Prog Language	Maintenance State
FAMIS	Internal Tools	Student to scholarship matching and disbursement	.NET MVC	SQL Server 2016	C#	IT Maintained
FAMIS	Big Blue		Access Web Apps	SQL Server 2016	VB.Net	Lights on
Scarf / Iris	Scarf / Iris	Data store for reporting on student data	None	Oracle	PL/SQL	Minimal
D4A	D4A Admin	Admin login portal for D4A	Windows Forms	SQL Server 2016	VB.Net	Minimal
D4A	D4A Program Approval (“Web Forms”)	Community college program and course approval	Web Forms	SQL Server 2016	VB.Net	
D4A	D4A DataMart/Web App	Community college student enrollment and completion, revenue and expenses	Web Forms	SQL Server 2016	VB.Net/C#	Minimal
PPS	PCS Collection	Private career school student and completion data	Web Forms	SQL Server 2016	C#	Minimal
PPS	PCS Transcript	Archive transcripts from private career schools that have closed down	Windows Forms	SQL Server 2016	VB	Minimal
PPS	AxPCS Vets	Access application for managing teachers and programs for Private Career Schools	Access Web Apps	SQL Server 2016	SQL	Minimal
Workforce	Workforce	Workforce Layoffs	Web Forms / .NET MVC	SQL Server 2016	C#	Minimal
Workforce	Draw System	Manage WIOA funding streams for Workforce investment boards	Web Forms	SQL Server 2016	C#	Minimal

Appendix B: Deep Dive: Application Code Inventory & Technology Rationalization Roadmap

Code Repository	App Name	Purpose	UI Technology	DB Technology	Prog Language	Maintenance State
Workforce	File Transfer Utility	Safe sending/receipt of files	Web Forms	SQL Server 2016	C#	Minimal
Workforce	Layoff Tracking System	Tracks Oregon WARNs (Worker Adjustment and Retraining Notification) and Rapid Response activities	Web Forms / .NET MVC	SQL Server 2016	C#	Minimal
Workforce	Report Viewer	Serves SSRS reports. Currently only used for National Career Readiness Certificate (NCRC) reports.	Web Forms	SQL Server 2016	C#	Minimal
Workforce	WIOA Reports	Manages reports for public and internal consumption	Windows Forms	SQL Server 2016 & SSRS	C#	Minimal

Workforce	Oregon Youth Conservation Corps	Grantee reporting system	Web Forms	SQL Server 2016	C#	Minimal

Legacy Replacement and New Business Application Backlog

Applications identified as mission-critical, strategic, high risk, and/or with statutory mandates

New / Legacy	Current Application / Need	Enterprise Impacts (HECC Offices)	Application Description / Usage	Prioritization Considerations / Comments
Legacy	FAMIS	Primary: OSAC, R&D Secondary: OWI (OYC)	Financial aid management information system used to administer, report on, and provide a student application portal for state financial aid grants and private scholarships and to exchange eligibility data with institutions	The current FAMIS system uses MS Access, is nearly unsupportable, suffers student-facing reliability issues, and has unimplemented OPG mandate; a FAMIS replacement project has EIS Stage Gate 1 approval
Legacy	D4A, Scarf(Iris)	Primary: R&D Secondary: APA, CCWD	Database and reporting systems used to collect and analyze institutional data from universities, community colleges, and private career schools for research, policy, and funding-related uses	These multiple databases can be consolidated and enabled with a more powerful and flexible analytics capability as part of the enterprise platform
New	Budget-Tracking Portal	Operations, all Offices managing programs/grants	Internally-accessible portal where up-to-date program and grant budget information can be tracked; incl. capability for external parties to upload invoices and to automate processing of SFMA data	Current Excel PowerPivot tools in use are single point failures for staff understanding, and a robust portal can be implemented as part of the enterprise platform
New	Statewide Transfer Portal	CCWD, APA	Pending legislative initiative based on HB2998 to create a centralized post-secondary community system for coordination of transfer credits	If approved by the legislature, this application could become a top priority initiative by mandate
Legacy	PCS-VETS (incl. Collections, Transcripts)	APA	Applications used to collect and track authorization requests for PCS programs, license PCS organizations and instructors, and archive PCS transcripts when schools close	The current PCS-VETS application relies on MS Access and relies on shared drives and email to collect documents and data, creating data loss and corruption risk

Legacy Replacement and New Business Application Backlog (cont'd)

Applications identified as mission-critical, strategic, high risk, and/or with statutory mandates

New / Legacy	Current Application / Need	Enterprise Impacts (HECC Offices)	Application Description / Usage	Prioritization Considerations / Comments
New	ETPL	OWI	Federal WIOA-mandated list of statewide eligible training providers	This system is required by statute
Legacy	WIOA, Perkins Grant Tracking; TOPS Pro	Primary: CCWD Secondary: OWI	Applications used to collect documents and track grant performance; there is also a CCWD need for a new application to collect documents and track college compliance in multiple areas	Current tools create large inefficiencies and heavily rely on MS Access and Excel. It is likely that multiple use cases can be covered by a common data collection and reporting portal
Legacy	Web Forms	CCWD	Applications used to track CC program and course approval	The current application is missing mandated functionality
New	Institutional Financial Health	Primary: PFC Secondary: R&D	Collecting, tracking, and reporting on financial health data from post-secondary institutions (not currently a stakeholder-aligned initiative)	This need was identified as strategic and high-impact given the trends and heightened legislative and public interest around institution financials
New	Credentials of Value List	CCWD, OWI	Need to track a list of defined valuable career credentials and how to achieve them, and track adults who have completed them	This need was identified as a strategic priority to further CTE, adult attainment, and 40/40/20 goals
Legacy/New	OYC Program Portal	OWI	Need to accept applications, track programs and participants, and facilitate reporting through a common mobile-friendly portal	The OYC program is inefficient to administer and participate in, and OYC has faced funding cuts with limited ability to demonstrate impact through data; enterprise platform integration may identify longitudinal impact

Appendix C: Deep Dive: DevOps Capability Assessment Summary

As part of the HECC IT current state assessment, a DevOps capability assessment was performed. DevOps is a flavor of Lean IT where operations and development engineers work together throughout the service lifecycle, from design through development to deployment, to improve software delivery and IT effectiveness. Using a DevOps capability model, current and desired capabilities were assessed in these seven dimensions:

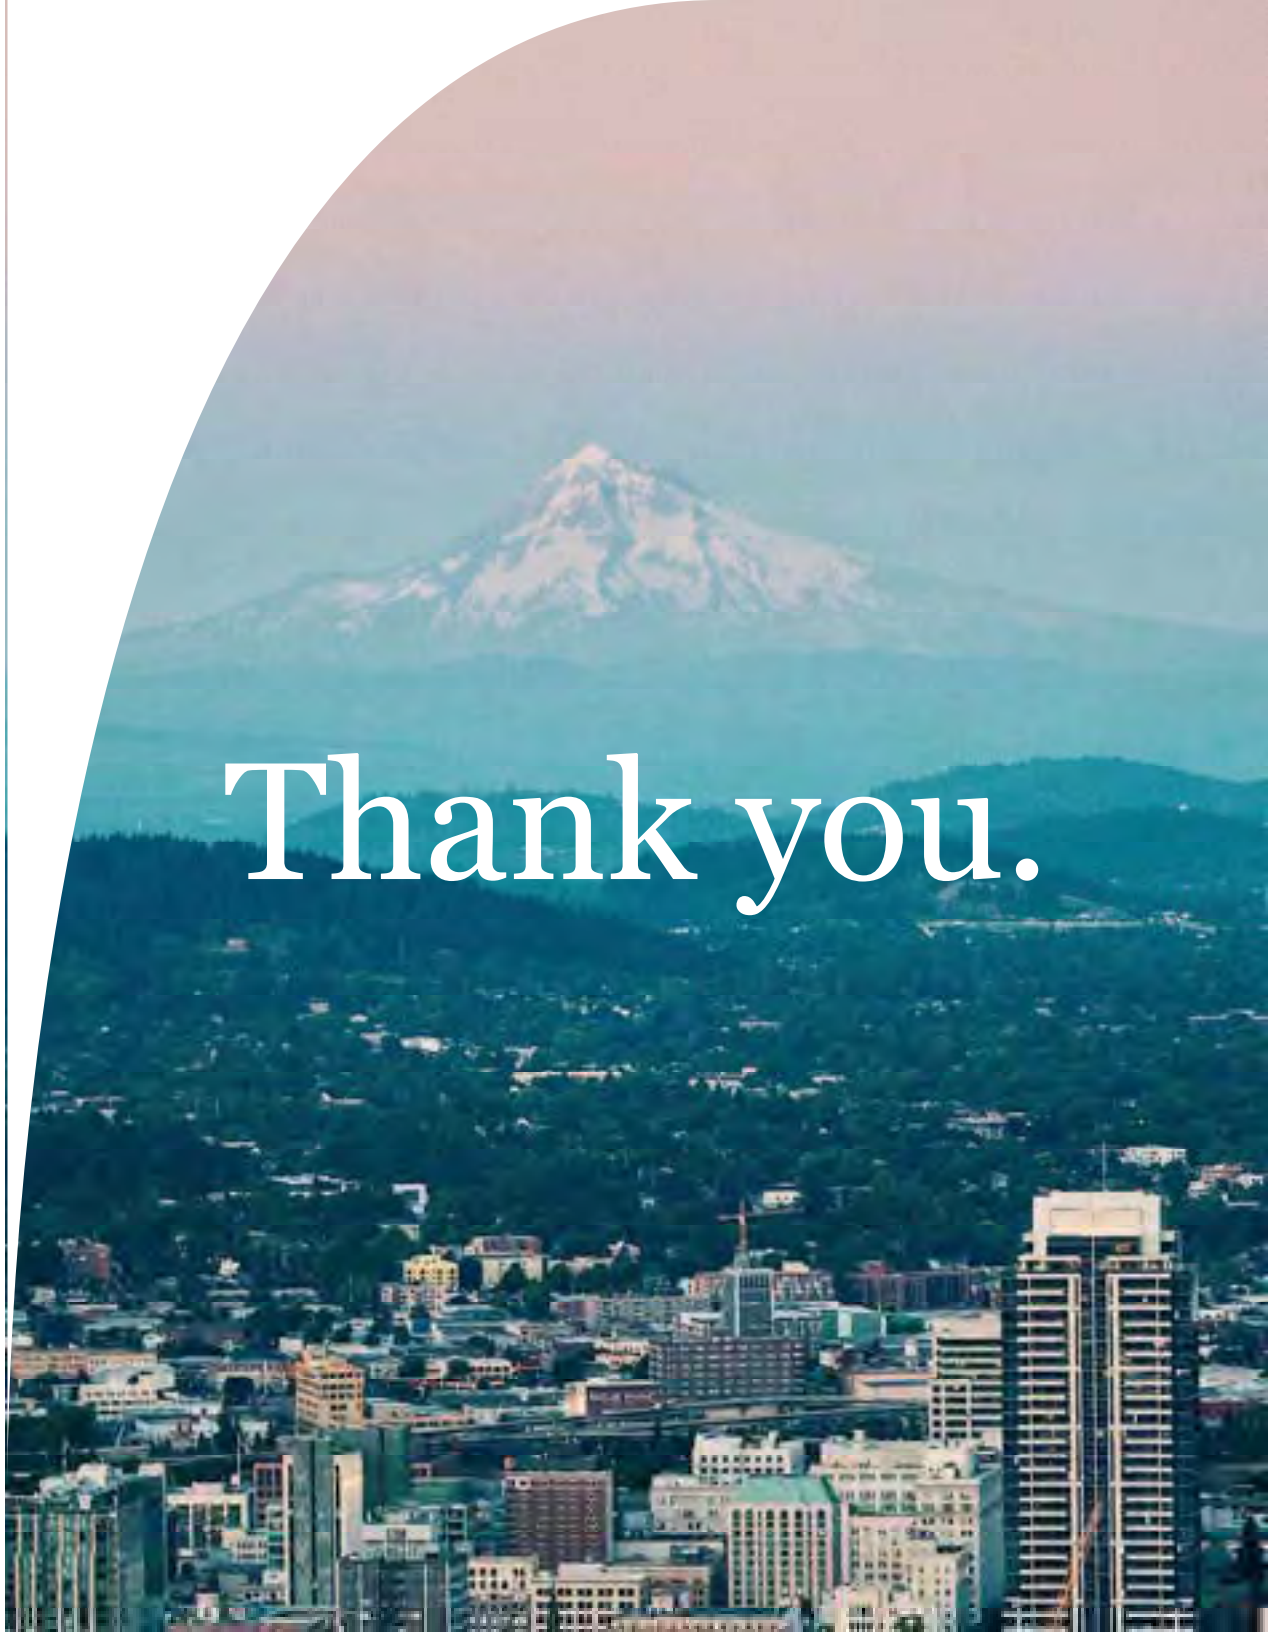
The DevOps capability scores were measured using the scale below:

	Stage 1: Limited	**Stage 2:** Implemented	**Stage 3:** Evolving	**Stage 4:** Integrated	**Stage 5:** Adaptive
Vision	No defined path to production and unclear processes for standard changes	A defined path to production is creating the foundation of the deployment pipeline	Automated deployment is leveraged and version-controlled, infrastructure is managed in a versioned and automated fashion	Feedback loop for improvement is established and leveraged to continuously improve	The application and delivery pipeline are consciously evolved based on internal and external drivers
Success Factors	Little standardization around work, limited understanding of what DevOps is with understanding around silos between development operations and business and efforts to align currently competing goals and objectives	The standard path to production is defined and implemented, the organization understands what DevOps is, and the relationships among Development, Operations, and the Business are collaborative and aligned upon common goals and objectives	Work is standardized, automated where appropriate, and standardization is understood and used across all teams	The organization learns through quantitative and qualitative feedback and measurements, translating feedback into actionable changes, and with cross-disciplinary teams deliver work in incremental and iterative ways	Strategic work includes experimentation, continuous deployment, and application of customer journey information and data to innovate new solutions
Key Enablers		A culture that promotes cross-functional collaboration through managing the overall transformation	Systems thinking and visibility of all work in the system	A culture that supports learning through experimenting and mistakes, and tools to support open and frequent communication	Ability to design and test experiments, and a culture that is customer-centric and allows for taking calculated risks

Appendix D: Collaboration Tools Survey, Results by Office

Number Responding and Office % for "Important" or "Very important" In Each Collaboration Tool Category						
	Video Conferencing	Conducting Surveys	Collaborative Document Sharing/Editing	Email Communications	Creating Videos	Event Management
Office of the Executive Director	8 (89%)	5 (56%)	5 (56%)	6 (67%)	5 (56%)	3 (33%)
Office of Operations (non-IT)	7 (41%)	3 (18%)	7 (41%)	4 (24%)	0 (0%)	1 (6%)
IT Department	6 (50%)	3 (25%)	6 (50%)	5 (42%)	0 (0%)	1 (8%)
Office of Research & Data	5 (45%)	4 (36%)	5 (45%)	7 (64%)	1 (9%)	2 (18%)
Office of Student Access and Completion	14 (70%)	14 (70%)	13 (65%)	14 (70%)	9 (45%)	6 (30%)
Office of Academic Policy and Authorization	7 (58%)	5 (42%)	8 (67%)	8 (73%)	5 (45%)	3 (27%)
Office of Post-Secondary Capital and Finance	4 (100%)	1 (25%)	4 (100%)	2 (50%)	1 (25%)	1 (25%)
Office of Community Colleges and Workforce Development	15 (100%)	13 (87%)	14 (93%)	12 (86%)	9 (64%)	5 (36%)
Office of Workforce Investments	14 (88%)	11 (69%)	11 (69%)	14 (88%)	7 (44%)	8 (50%)
Agency-wide	**80 (69%)**	**59 (51%)**	**73 (63%)**	**72 (63%)**	**37 (32%)**	**30 (26%)**

* n=116 participants (87% participation rate within Agency)



Thank you.

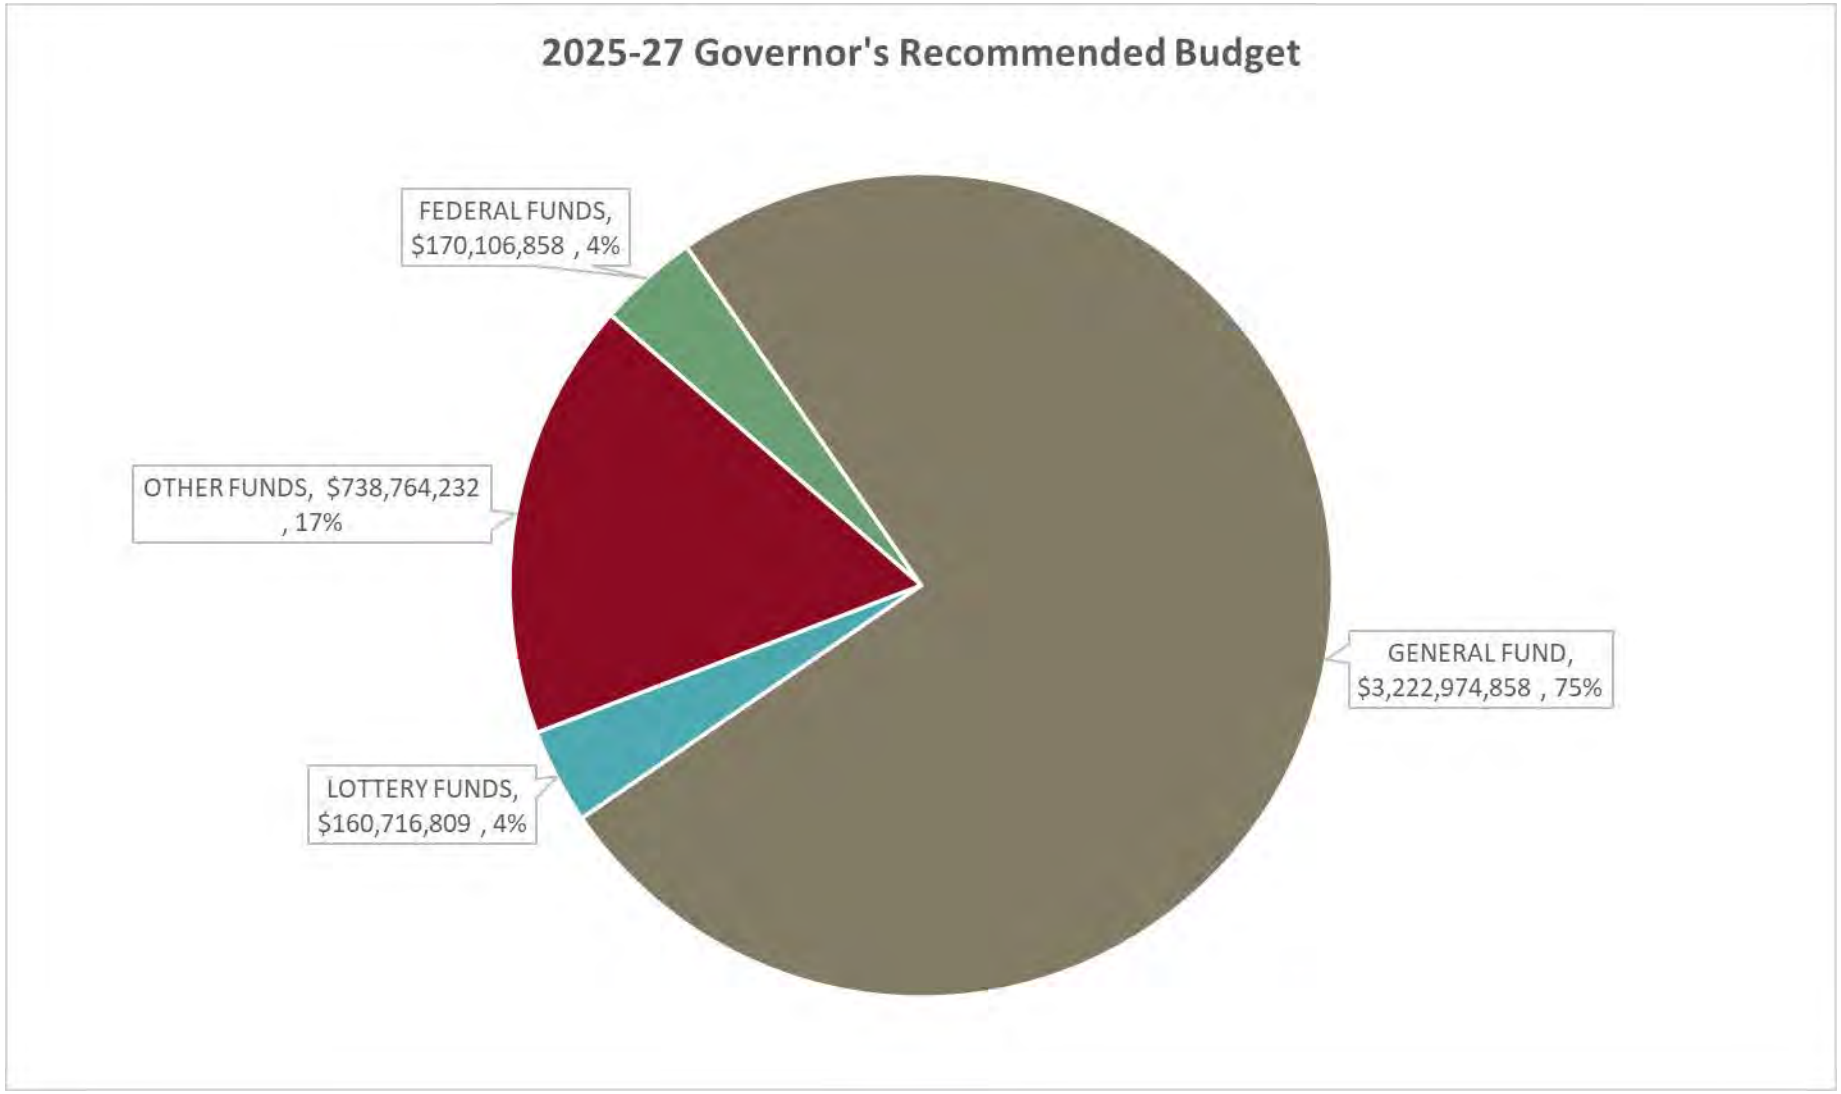
Revenues

REVENUES: REVENUE FORECAST NARRATIVE

2025 - 27 Governor's Recommended Budget



REVENUES: REVENUE FORECAST NARRATIVE

REVENUE SUMMARY

Twenty five percent of the 2025-27 Higher Education Coordinating Commision's Governor's Recommended Budget (GRB) is funded through the combination of Federal Funds, Other Funds, and Lottery Funds. More detailed information of the programs funded by these sources is included in the Program narratives.

Lottery Funds ($160,716,809)

Transferred in from DAS, lottery funds are used by Oregon Student Access & Completion for the Oregon Opportunity Grant, and by Post-Secondary Finance & Capital for Extension Service, Sports Action Lottery, and Institution Debt Service.

Federal Funds: ($170,106,858)

While there are some small sections of Federal Funding that allows for administrative, and other miscellaneous expenditures across the agency, the majority of Federal Funding touches Community Colleges & Workforce, Workforce Investments, and Post Secondary Finance & Capital. Major sources of Federal Fund revenues come from U.S. Department of Labor and U.S. Department of Education.

- **Community Colleges and Workforce Development (CCDW):**
  The Adult Education and Family Literacy Act (AEFLA), Title II of the Workforce Innovation and Opportunity Act (WIOA) is used to support developmental education for adults. This program is funded by the U.S. Department of Education, and requires us to provide Maintenance of Effort (MOE). MOE percentage is based off of the NRS table, previously reported at 78%, and is paid in a combination of General Fund and Other Funds, specifically Timber Tax amounts.

- **Office of Workforce Investments (OWI):**
  OWI is responsible for Title I of the Workforce Innovation and Opportunity Act (WIOA) that funds employment and training programs for adults, dislocated workers, youths, and other workforce programs. This program is funded by the U.S. Department of Labor.

- **Post-Secondary Finance & Capital (PFC):**

  Public University Debt Service is partially funded by $4 million in build America bonds.

Other Funds (Total estimated: $738,764,232)

Other Funds touch HECC Programs, Community Colleges & Workforce, Workforce Investments, Oregon Student Access & Completion, Academic Policy and Authorization, and Post-Secondary Finance & Capital. Major sources of Other Funds revenues come from donations, grants, taxes, fees, and transfers from other state agencies.

REVENUES: REVENUE FORECAST NARRATIVE

- **Community Colleges and Workforce Development (CCDW):**
  CCWD runs the High School Equivalency Program to provide the GED® Test to adults without a high school credential. ORS 326.550 allows the State Board of Education to establish a nonrefundable application fee to cover the costs of administering the progam. The GED Testing fees are $38 per student for GED®, with HECC receiving $8 of each testing fee to provide services related to the GED® test to Oregon educators, including access to GED Manager ™ (the web portal designed to help educators & test administrators manage their programs), fielding questions, and professional development services to educators at the Oregon GED® testing sites and in the Oregon GED® test preparation centers.

  Carl Perkins and Technical Education Act Funds are to more fully develop the academic, career, and tehcnical skills of high school and community college students who enroll in career and technical education programs. The Oregon Department of Education receives the funds from the U.S. Department of Education and then passes a portion to CCWD.

- **Office of Workforce Investment (OWI):**
  Funded by administrative fees, OWI staffs and supports the Oregon Volunteers Commision, supporting statewide service and volunteer efforts, and providing funds for the state-based AmeriCorps program.

  OWI supports the Oregon Youth Conservation Corps to establish and maintain an education and environment program for disadvantaged and at-risk youth. A significant share of the funding for this program comes from Amusement Device Taxes (ADT), Oregon State Marine Board grants and partner agencies.

  OWI supports the Oregon Conservation Corp that was established in 2021 with SB 762 to help with wildfire migration. This is intended to be funded with solicited donations.

  OWI handles the Workforce Ready grants that are funded by ARPA funds granted in 2022 by SB 1545.

- **Oregon Student Access and Completion (OSAC):**
  OSAC adminsters more than 600 individual privately funded programs to help make college more affordable for Oregon Students. Funding of nearly $18 million was contributed by private donors in 2021-23.

- **The Office of Academic Policy and Authorization (APA):**
  Funded by licenses and fees (School Applications/Teacher Registrations/Transcript Requests/ SARA). APA serves 104 institutions through degree authorization and 214 private career schools.

- **Post-Secondary Finance & Capital (PFC):**

REVENUES: REVENUE FORECAST NARRATIVE

The debt service program includes revenue generated by self-supporting programs such as gifts, grants, or building fees.PFC also receives timber tax revenue from DOR that is distributed to Community Colleges.

HIGHER EDUCATION COORDINATIONG COMMISSION
OFFICE OF THE EXECUTIVE DIRECTOR
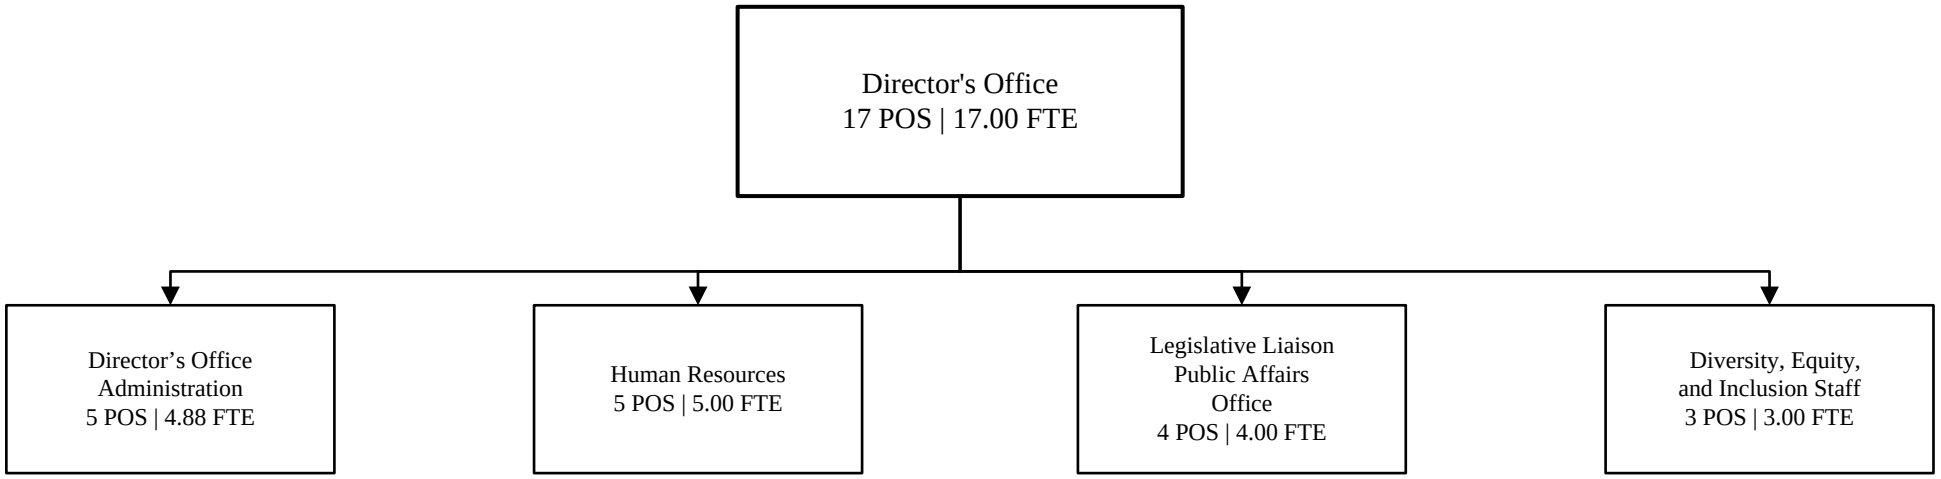
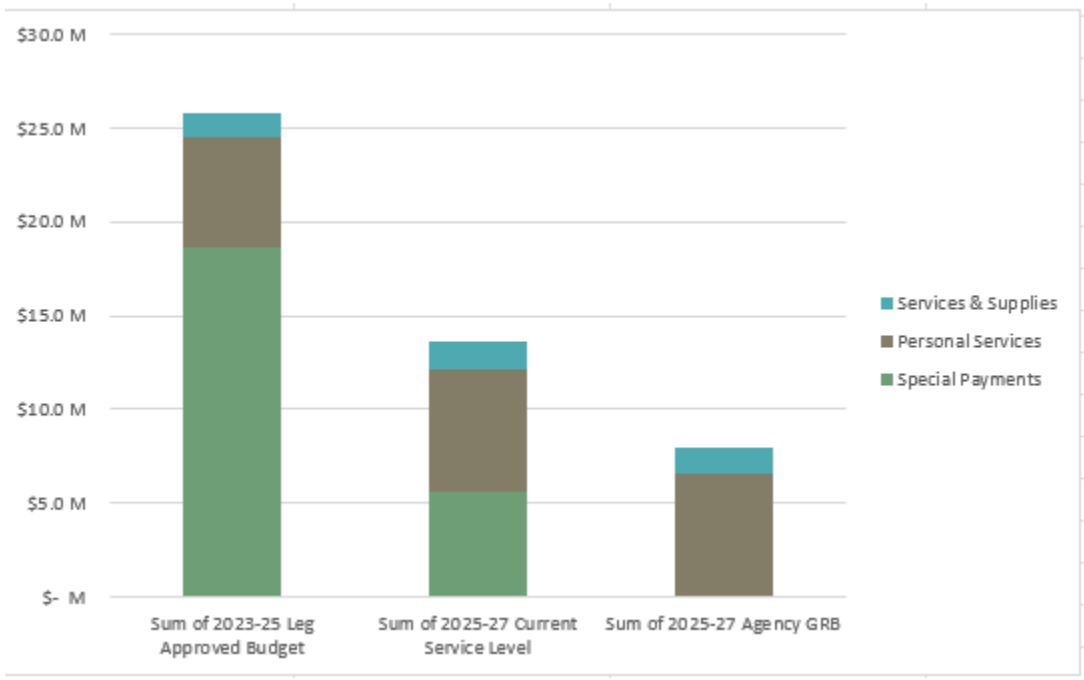
Organizational Chart 25-27 GRB



DIRECTORS OFFICE

The Office of the Executive Director provides leadership and direction to all Higher Education Coordinating Commission offices, and includes the following functions: legislative affairs, diversity equity and inclusion (DEI) coordination and initiatives, human resources, internal audits, policy development and leadership, communications and other supports to the agency.

The programs are highlighted below, however for the detailed program narrative, please refer to the SCR section noted below in the budget binder.



Executive Director

The role of the Executive Director is to design, develop and implement strategic plans for the organization in a manner that is both cost and time-efficient. The Executive Director is also responsible for the day-to-day operation of the organization, which includes managing committees and staff as well as developing business plans in collaboration with the Commission. The Executive Director is accountable to the Chair of the Commission and reports to the Commission members on a regular basis. The Commission provides guidance, but delegates the management of the agency to the Executive Director. The Executive Director leads the organization and develops its organizational culture.

DIRECTORS OFFICE

Higher Education Board of Commissioners

The State of Oregon's Higher Education Coordinating Commission (HECC) is the primary state entity responsible for ensuring pathways to postsecondary education success for Oregonians statewide, and serves as a convener of the groups and institutions working across the public and private higher education arena.

Established in 2011 and vested with its current authorities in 2013, the Higher Education Coordinating Commission is a 15-member volunteer commission appointed by the Oregon Governor and confirmed by the State Senate. The Commission develops and implements policies and programs to ensure that Oregon's network of colleges, universities, workforce development initiatives and pre-college outreach programs are well coordinated to foster student and jobseeker success. It also advises the Oregon Legislature and the Governor on policy and funding to meet state postsecondary goals.

Human Resources

Human Resources (HR) provides employee services including compliance with labor law and employment standards, administration of employee benefits, recruitment and retention, training and development, performance management, and discipline.

Legislative Liaison

The Legislative Liaison provides coordination and guidance of legislative activities and regularly work with the Governor's Office and the Legislature to help shape and implement policy and law.

Public Affairs Officer

The Public Affairs Officer (PAO) is responsible for developing a working relationship with reporters and other media representatives, maintaining a robust community relations program, keeping contact with other government agencies, and keeping internal and external publics informed on issues that may affect them. HECC's PAO partners with other agencies prior to contacting and releasing information to the media including releases and public statements involving local, regional and national news.

Diversity, Equity and Inclusion

The Diversity, Equity and Inclusion team is responsible for coordinating and guiding all efforts to define, understand, assess, foster and cultivate diversity. It also develops and oversees programs, services, and initiatives designed to enhance the recruitment and successful retention of staff from diverse and underrepresented population groups. This team serves as liaison and develops partnerships within the community to promote diversity as an essential element of the mission of HECC.

Internal Auditor

The internal audit function is an independent, objective assurance and consulting activity designed to add value and improve the operations of the agency. The internal audit function focuses on fiscal accountability and performance, and provides management with analyses and recommendations.

DIRECTORS OFFICE
ESSENTIAL PACKAGES

Essential Packages

The Essential Packages estimates the cost to continue current legislatively approved programs into the 2025 - 2027 biennium. The total of all current service level packages are represented below and detailed under each essential package category.

General Fund	($5,109,693)
Other Funds	$0
Lottery Funds	$0
Federal Funds	$2,159
Total Funds	($5,107,534)

Package 010: Vacancy Factor and Non-PICS Personal Services

This package includes standard 4.2 percent inflation on non-PICS Personal Service & Vacancy Factor, to include Temporary Appointments, Overtime Payments, All Other Differential, Public Employees Retirement System, Pension Obligation Bond Repayment and Social Security. The Vacancy Savings calculation methodology is provided by the Department of Administrative Services.

General Fund	$16,091
Other Funds	$0
Lottery Funds	$0
Federal Funds	($18,159)
Total Funds	($2,068)

Package 021: Phase in

Package 021 identifies budget adjustments resulting from program phase-ins for budget items funded for less than 24 months during a biennium.

There are no phase-ins for this program.

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

DIRECTORS OFFICE
ESSENTIAL PACKAGES

Package 022: Phase out

Package 022 identifies decreased costs from the elimination of programs and other one-time funded costs.
There are no phase outs for this program.

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

Package 031: Standard Inflation and State Government Service Charges

The standard inflation factors are provided by the Department of Administrative Services as follows:

- Services and Supplies and Capital Outlay, by the standard 4.2 percent
- Non-state employee and Professional Services costs by the standard 6.8 percent
- Attorney General costs by the allowable 23.26 percent

This package increases Services & Supplies by the standard 4.2 percent and non-state employee and Professional Services costs by the standard 6.8 percent inflation rates. The hourly rate for Attorney General costs are increased by 23.26 percent. The package also adjusts costs for changes in State Government Service Charges.

General Fund	$332,727
Other Funds	$0
Lottery Funds	$0
Federal Funds	$27,000
Total Funds	$359,727

DIRECTORS OFFICE
ESSENTIAL PACKAGES

Package 032: Above Standard Inflation with CFO Analyst Approval

This package includes the amount above the inflation in package 031 for a limited set of factors including:

- Medical services inflation such as Oregon Health plan provider expenditures, amounts above standard inflation up to 5.6 percent
- DAS Price list items that are usage-based such as motor pool and printing services
- Non-state employee and Professional Services as applied to Special Payments, amounts above standard inflation up to 6.8 percent

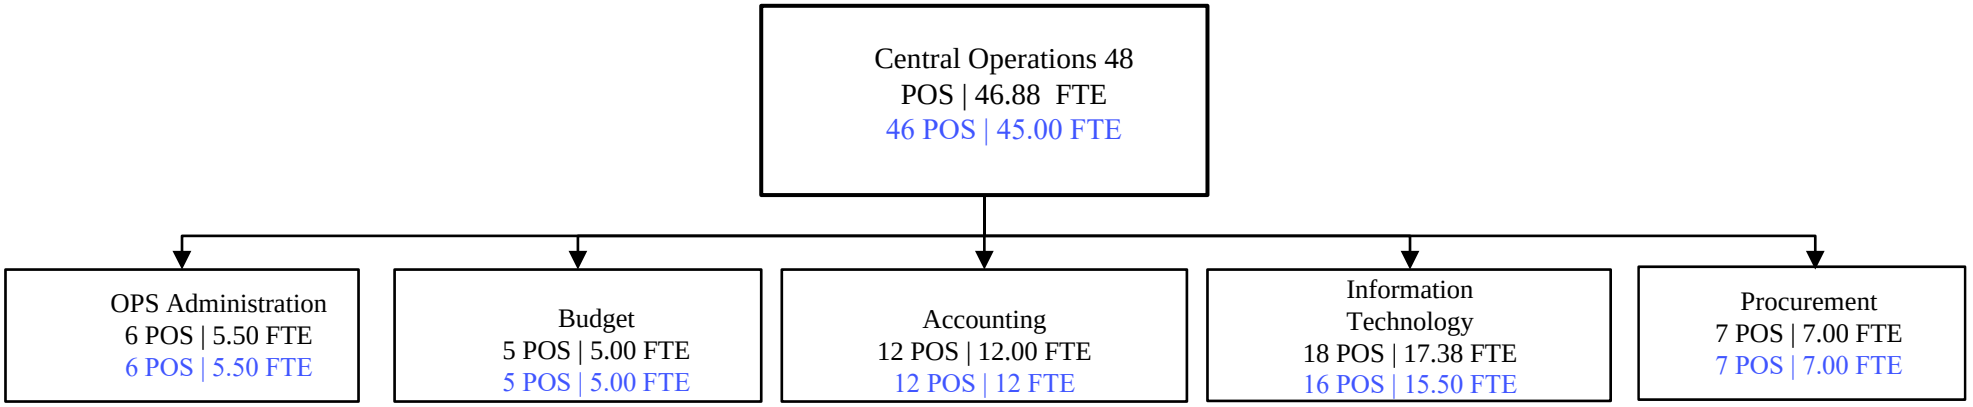
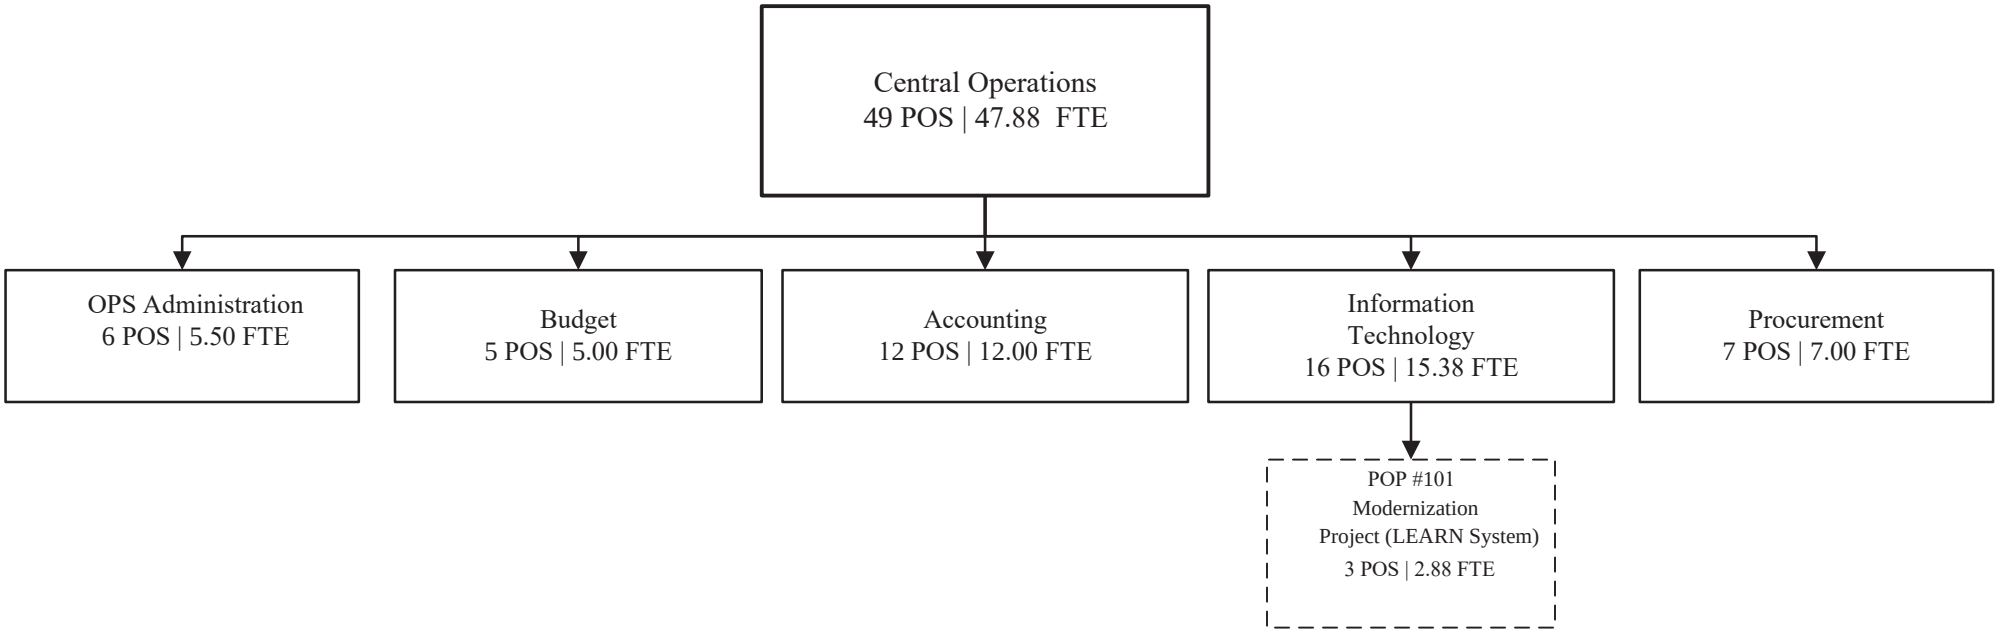
Central Operations

HIGHER EDUCATION COORDINATIONG COMMISSION
OFFICE OF OPERATIONS 23-25 LAB and 25-27 CSL



HIGHER EDUCATION COORDINATIONG COMMISSION
OFFICE OF OPERATIONS

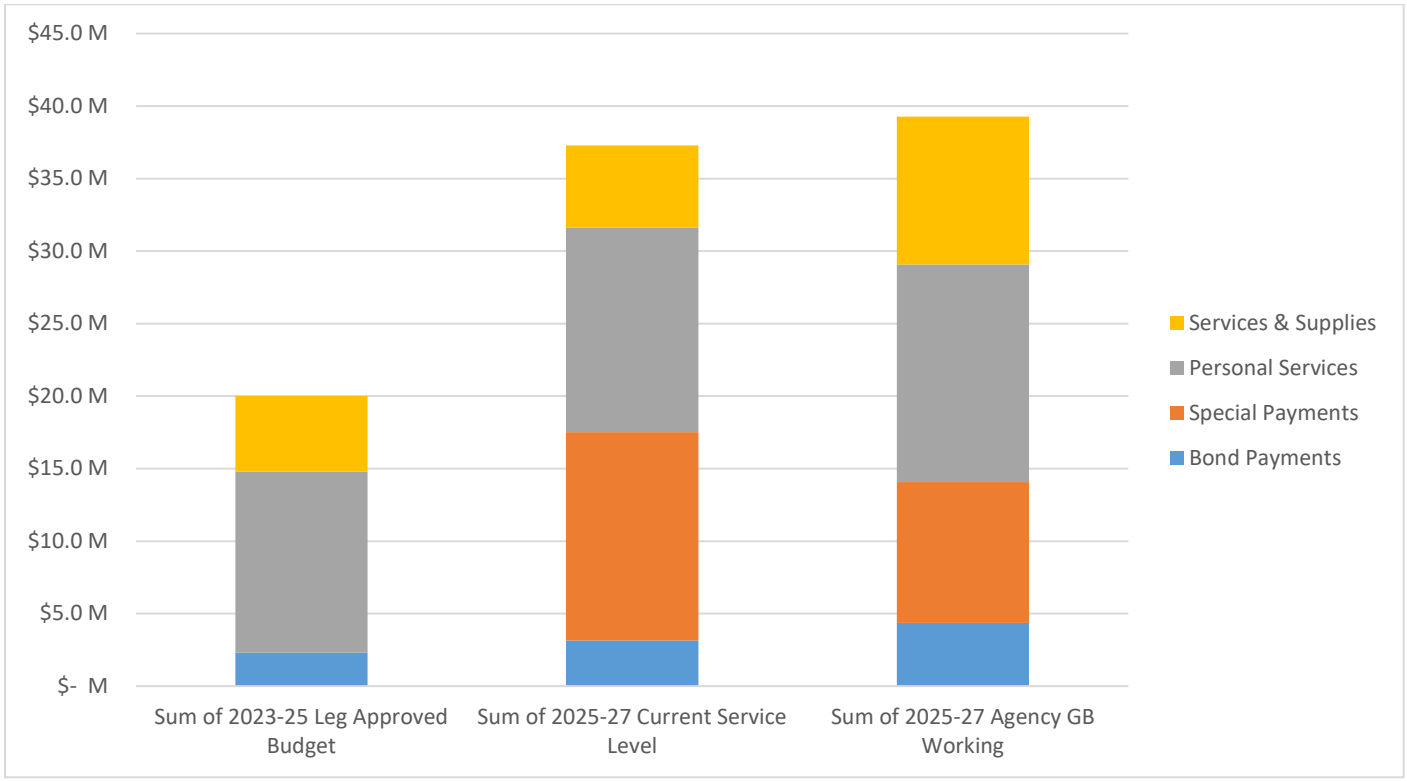


CENTRAL OPERATIONS

The Office of Operations provides centralized business services and support to the Higher Education Coordinating Commission (HECC). The Office of Operations include Information Technology, Contracts and Procurement, Fiscal Services, Project Management, and Facilities Management services.

Funding Request for 25-27

The funding request for Central Operations is above CSL due to our policy option package 101. This package will allow Operations to complete the IT Modernization Project and position Operations for success moving forward. The need for the positions in this package became evident during the hold process for the Modernization Project.



Information Technology

The Information and Technology unit is responsible for maintaining and implementing computer, audio-visual equipment, and phone system technology and projects. It includes help desk, application development and support, network maintenance, and support for portable devices. Most of the systems that the department supports are used for reporting, grant and fiscal management, and financial aid application and management.

CENTRAL OPERATIONS

Contracts and Procurement

Contracts and Procurement prepares, issues, and awards contracts and grants to qualified vendors and grantees and oversees purchasing practices. It also trains program staff to ensure that grant-making and reporting practices adhere to all federal and state laws and regulations.

Fiscal and Budget Management

Fiscal Services is responsible for the department's budget development and administration, financial reporting, accounts receivable, accounts payable, bond management, and employee payroll. This unit oversees a complex budget worth over $3 billion that includes one of the state's largest capital construction portfolios.

Facilities

Facilities oversees building reception, furniture leasing, maintenance, security, safety, and access issues for HECC.

Important background information for decision makers:

The costs of delivering the operations functions of the department are almost exclusively staffing related. There is very little programmatic funding. If staff are lost due to budget reductions, shared services cannot continue the same level of support to postsecondary education, student access and completion, academic policy and authorization, and workforce and training programs in the agency. The exception to this in 25-27 is the IT Modernization Project which accounts for the increase in our ARB.

CENTRAL OPERATIONS
ESSENTIAL PACKAGES

Essential Packages

The Essential Packages estimates the cost to continue current legislatively approved programs into the 2025 - 2027 biennium. The totals of all current service level packages are represented below and detailed under each essential package category.

General Fund	$528,108
Other Funds	$1,284,934
Lottery Funds	$0
Federal Funds	$13,111
Total Funds	$1,826,153

Package 010: Vacancy Factor and Non-PICS Personal Services

This package includes standard 4.2 percent inflation on non-PICS Personal Service & Vacancy Factor, to include Temporary Appointments, Overtime Payments, All Other Differential, Public Employees Retirement System, Pension Obligation Bond Repayment and Social Security. The Vacancy Savings calculation methodology is provided by the Department of Administrative Services.

General Fund	$212,086
Other Funds	$(6,797)
Lottery Funds	$0
Federal Funds	$(36,547)
Total Funds	$168,742

Package 021: Phase in

Package 021 identifies budget adjustments resulting from program phase-ins for budget items funded for less than 24 months during a biennium.

There are no phase-ins for this program.

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

CENTRAL OPERATIONS
ESSENTIAL PACKAGES

Package 022: Phase out

Package 022 identifies decreased costs from the elimination of programs and other one-time funded costs.

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

There are no phase-ins for this program.

Package 031: Standard Inflation and State Government Service Charges

The standard inflation factors are provided by the Department of Administrative Services as follows:

- Services and Supplies and Capital Outlay, by the standard 4.2 percent
- Non-state employee and Professional Services costs by the standard 6.8 percent
- Attorney General costs by the allowable 23.26 percent
- Capital Outlay increases by the allowable 4.2 percent inflation.
- Special Payment increases by 4.2 percent inflation rate.

This package increases Services & Supplies by the standard 4.2 percent and non-state employee and Professional Services costs by the standard 6.8 percent inflation rates. The hourly rate for Attorney General costs are increased by 23.26 percent. The package also adjusts costs for changes in State Government Service Charges. Capital Outlay increases by the allowable 4.2 percent inflation. Special Payment increases by 4.2 percent inflation rate.

Operations (OPS)

Policy Option Package 101 – Modernization Project (LEARN System)

Purpose: To complete the HECC Information Technology Modernization project, the Lifelong Educational Advancement Resource Network (LEARN) System. This phase includes completing the replacement of HECC's Financial Aid Management Information System (FAMIS); the outdated legacy system operated by the HECC's Office of Academic Policy and Authorization (PCSVets); and the agency's federally required Eligible Trainer Provider List (ETPL). Completing the intended scope of the project will enable the HECC to use one IT platform (LEARN), to store its data and meet the agency's needs for these three Offices. In addition, HECC intends to plan the incorporation of an agency-wide grant management system into the LEARN System that will greatly increase our customer service across all programs, customers and institutions.

Justification: In 2023-2025, the HECC was authorized to begin a modernization project to replace three legacy systems as part of this project. The HECC, for various reasons detailed below, will not be able to fully replace the systems in 2023-2025. The HECC is asking for additional funding to be able to finish that modernization work and to plan and design a grant management system to serve all HECC Offices.

In collaboration with DAS Procurement and Oregon's Enterprise Information System (EIS), HECC has worked with a project management firm, a quality assurance firm, and negotiated a contract with a System Implementation vendor to enter into a two-phase contract. Stage Gate Three approval was withheld and the start of the first phase was put on hold at the direction of EIS from May 23 through October 24, 2023. As a result, EIS and HECC spent six months in an extended planning phase prior to HECC receiving its Stage Gate Three endorsement for Phase 1. During the hold period, HECC and EIS addressed concerns including organizational change management, contract scope and responsibilities, budget transparency, data governance, staff resource availability, and other critical aspects of project management.

While the time on hold did strengthen the relationship between EIS and the HECC, improve the overall quality of the agency's Modernization Plan, and establish the need for additional IT staff, the delay is also responsible for increasing the amount of work to be done by HECC and inflating project costs by extending temporary project staffing and contractual investments over a longer period. The hold also reduced the amount of time available to complete the work. Focusing on the success of the project with the resources available, HECC is set to complete Phase 2 in September 2025 (followed by a three-month warranty), which will include migrating the core functionality of all three legacy systems into one new system, LEARN. The core functionality includes financial aid management for schools and students, an ETPL that meets some of the standards for the federal government, and a private career school portal that allows schools to apply and renew their licensing online. The features that had to be deferred include college access and outreach programs, required data reporting and a federal reporting mechanisms for WIOA grants, and consumer protection and monitoring functionality for private career schools.

The systems being replaced by the LEARN system are:

1. The Office of Student Access and Completion's (OSAC's) FAMIS,
2. The Office of Workforce Investment's (OWI's) processes used to manage the ETPL, and
3. The Office of Academic Policy and Authorization's (APA's) legacy IT system and paper work arounds.

For OSAC, Phase 2 will not include functionality for college access and outreach programs that are vital for increasing FAFSA/ORSAA completion and informing students about avenues for funding college. This has a detrimental effect on students, particularly low-income and historically underserved students, who are trying to access financial aid information and resources to help pay for college and hinders students from completing their applications or pursuing post-secondary education and training opportunities. The Phase 3 work will allow HECC to fully replace all OSAC functionality, including college access programs. Currently,

FAFSA+ and ASPIRE are not included in Phase 2. The FAFSA+ program provides information on FAFSA filing to high schools and community-based organizations that work with students on college access. Unless Phase 3 is funded, Oregon high schools and community-based organizations will lose access to this incredible tool that allows them to work with individuals who have not successfully completed a FAFSA so that all students have a full complement of funding options for education and training. This opens the door to financial aid for many first-generation and historically underserved students. The FAFSA+ program allows schools and organizations to identify and work with students who may just need additional support to complete the FAFSA and explore education and training options after high school. ASPIRE is Oregon's only state-run college access program. ASPIRE partners HECC staff with staff at middle schools, high schools, colleges, and community-based organizations to mentor students to help them plan for success after high school and how to achieve their goals.

The ETPL is a critical resource that supports informed consumer choice for locally relevant, job-driven training options. The list provides information on training costs, program duration and location, and other important information that consumers can use to select the best training option. If an individual is seeking WIOA-funded assistance for career-based training or skill building opportunities, the ETPL is the first, best, and often only resource available to them. If a training program is not included on the list, it is not eligible to accept federally funded subsidy, with very few exceptions. The federal government has mandated the HECC to establish a fully functional ETPL and reporting mechanism. Phase 2 will fully address the needs of applying for and producing the ETPL but will not address the reporting mechanism. Failing to replace the current reporting mechanism will result in sanction of the agency and potentially loss of $32 million in annual federal funding. The funding loss would be catastrophic and come with significant impact to workforce services in Oregon.

For APA, only partial replacement of PCSVets and current paper workaround processes is possible in Phase 2. The result is that APA will continue to have paper driven processes outside of any system that could be made more efficient using technology. Phase 2 will address front-end user interface and application processes and invoicing for APA schools. Consumer protection work is not included in Phase 2 as we need to build the foundation before we can add that layer of APA's work. This POP would allow the HECC to move student complaints out of an unsupported Access Database and increase the ease of all parties involved (student, school, HECC staff) to provide required information. The added functionality will give the student and school transparency into where the complaint is in the process for tracking purposes. Additionally, APA will be able to bring site visit oversight functionality into LEARN. Staff will be able to use the system to determine which schools may be at risk and target monitoring actions early to those most at risk so HECC can work with the school to make needed adjustments prior to a school needing to close which is detrimental to students. Student Tuition Protection Fund claim processing would be brought into LEARN and no longer be calculated and tracked on spreadsheets from emails outside a system. Claims and all related documentation would be made within the LEARN portal which would allow the HECC to provide tracking of where a claim is in the process and if any required information is missing.

Additionally, the HECC currently does not have a grant management system despite giving out billions in state and federal funds each year/biennium from Offices across the agency. An earlier effort to acquire a grant management system was not successful due to time and capacity challenges. This funding will allow the HECC to begin the planning and design work for a full-cycle grants management system within LEARN which impacts the work of all of the HECC's Offices and will lead to increased efficiency across the board by HECC staff and by grantees. The HECC is seeking to consolidate data into a single system. In keeping with the HECC's goal of consolidating data and processes into a single system, it intends to build the grant management system in LEARN. The benefits of a full cycle grant management system within LEARN include better data analytics, ability to see multiple grants by the same organization within a single view, increased transparency, and a move towards a single way for organizations to interact with HECC Offices.

Solution/How Achieved: To achieve the original vision for the HECC Modernization Project and meet the data governance and project management needs of the agency, HECC has worked with EIS and its contractors to plan a third phase of the project. This third phase will require a third and final round of funding through Q-Bonds. The first phase, Mobilization, was completed April 19, 2024. This phase includes requirement refinement, the creation of a data dictionary, and solution design. The second phase, Implementation, is set to begin July 1, 2024 and be completed in September of 2025 before the start of a 3 month warranty period. Phase 2 will result in the replacement of the core functionality for all three systems, FAMIS, ETPL, and PCSVets into one new system, LEARN. The third phase,

which is this policy option package, will result in all features originally envisioned in the project before the hold being incorporated into LEARN, the inclusion of an agencywide grant management system, and the staffing necessary to successfully meet the operational needs of HECC for data governance and project management.

The HECC will continue to work with EIS and its current contractors to incorporate the remaining features during Phase 3 and begin planning and design of a grant management system. In addition, the HECC has amended the original business case and filled the gaps in HECC's IT staffing identified through the efforts of HECC, EIS, and a consulting firm contracted by HECC during the hold.
During the hold, EIS identified areas that the HECC needed to shore up related to data governance and IT project management and organizational change management. This additional staff will allow HECC to use best practices when managing IT projects, operating and maintaining the LEARN system and performing data governance throughout all if its offices and programs.

Equity Impact: This project will make college access, scholarships, job-seeker training, school certifications, and grant funds easier to access for all Oregonians.

Staffing Impact: The positions outlined below are requested to ensure the success of the Project and to fill the gaps in HECC's Data Governance and IT Project Management as identified through our work with EIS during the hold.

Operations

Outcomes/Performance Measures/Benchmarks: Complete consolidation of all three systems into one unified system by December 2027. The planning and design of an agency wide grant management system. Increased completion rates for scholarship applications, improved customer service for private schools, and increase enrollment in Eligible Training Provider Programs.

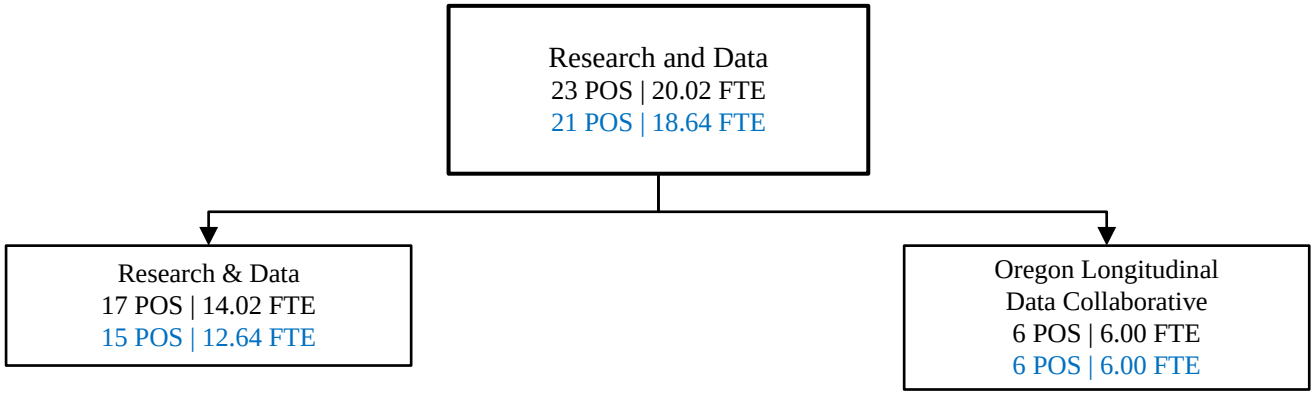
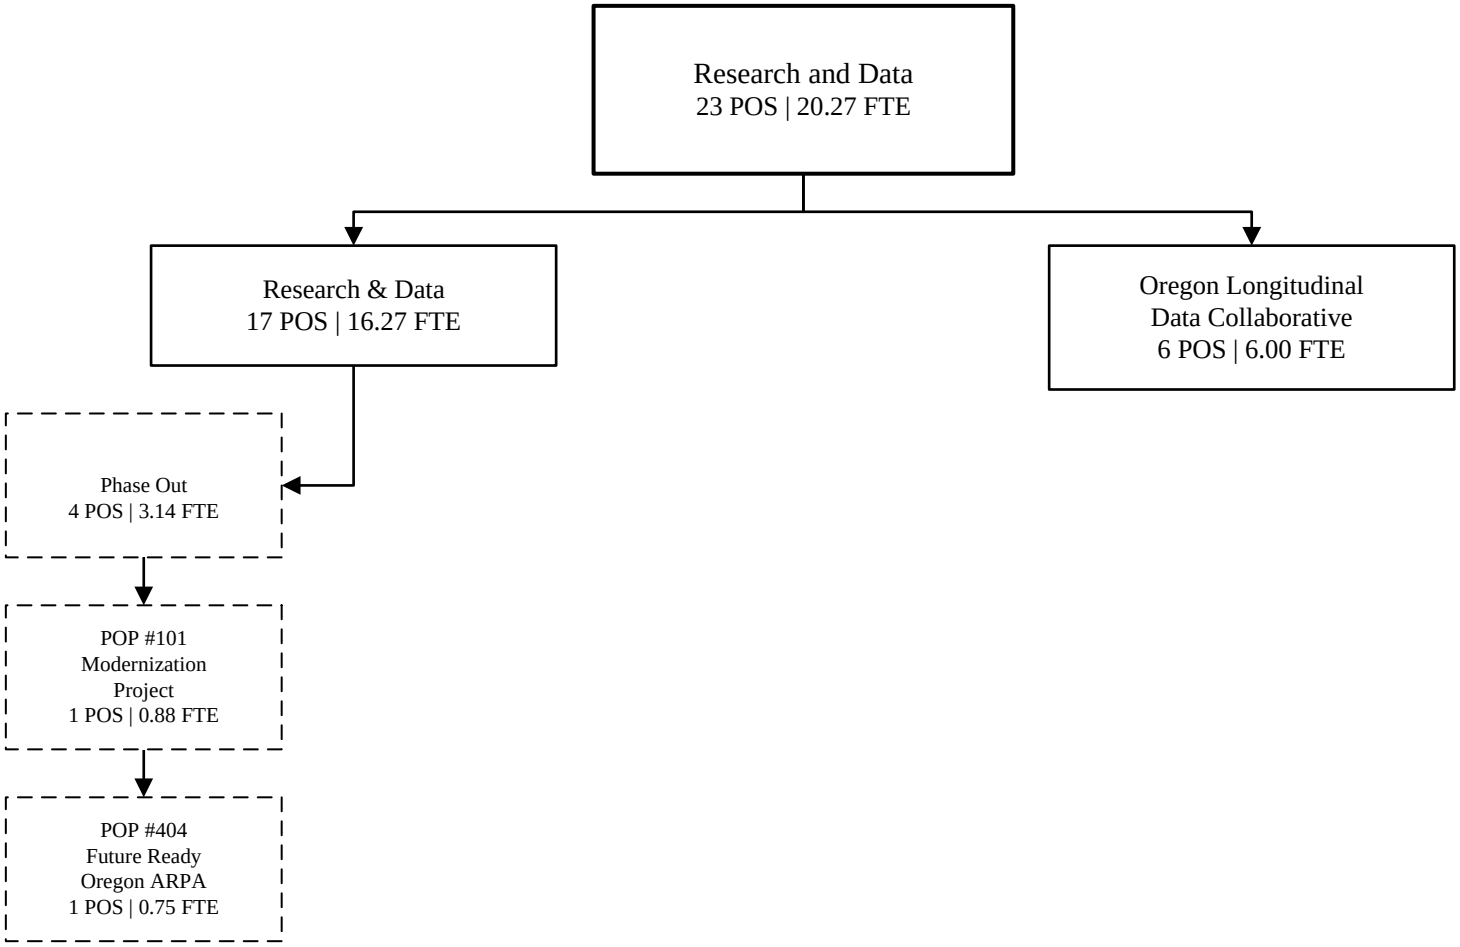
Research and Data

HIGHER EDUCATION COORDINATIONG COMMISSION
RESEARCH AND DATA 23-25 LAB to 25-27 CSL



HIGHER EDUCATION COORDINATIONG COMMISSION
RESEARCH AND DATA 2025-27



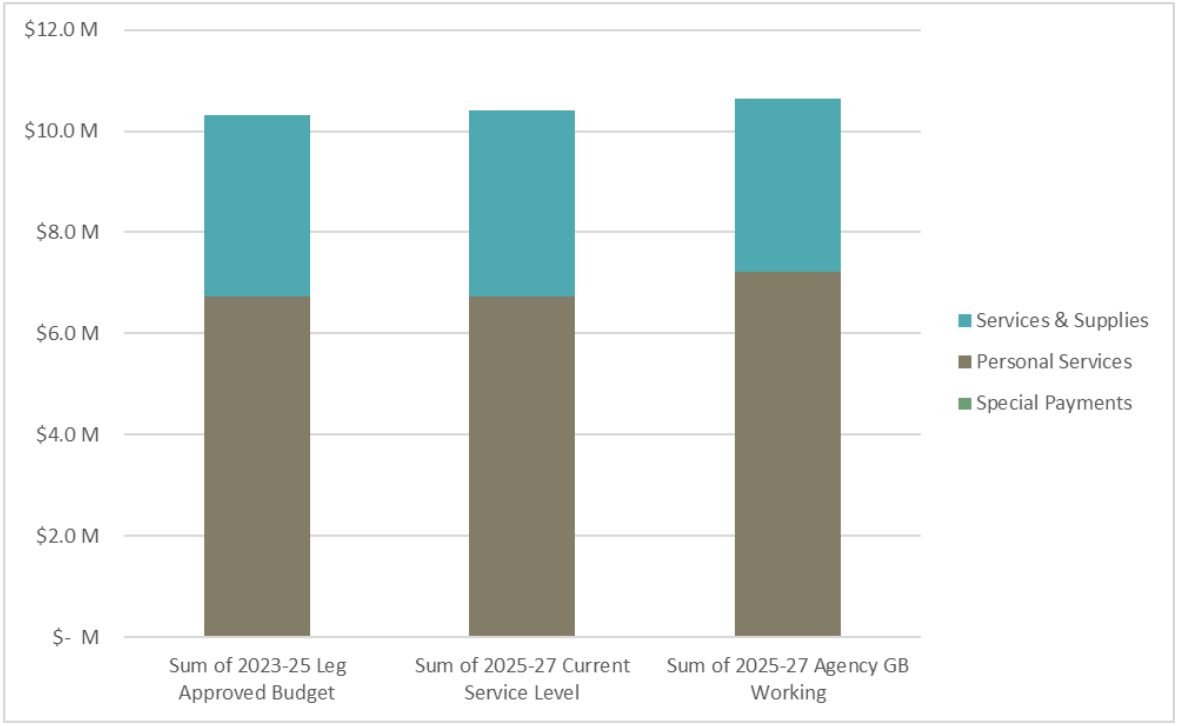
RESEARCH AND DATA

The Office of Research and Data

The Office of Research and Data (R&D) is responsible for providing education research and analytic services to support the Commission's efforts to achieve 40-40-20 and equity in Oregon education and to track progress in achieving all of the Commission's strategic goals. The Office encompasses both a Postsecondary Research and Data (PRD) team and the Oregon Longitudinal Data Collaborative (OLDC). PRD collects, analyzes, and reports research and data on postsecondary education and training to comply with state and federal reporting requirements and to inform decisions on the postsecondary education enterprise. The OLDC manages a data matching system that brings together K-12, postsecondary, and workforce data to support reporting and policy research that crosses these sectors.

Funding Request

For 25-27 R&D is requesting CSL with the following exceptions. Policy Option Package (POP) 101 requests a Research, Analysis, and Statistics Manager 2, which will reside in R&D. In working with the Enterprise Information Services in the early part of the Modernization Project it became clear that HECC needs to focus on all the data passing through and created by the work of the agency. POP 104 requests a continuation of an .75 OF funded Operation and Policy Analyst 3 to continue the work for Future Ready Oregon through its completion on December 31, 2026.



RESEARCH AND DATA

Program Descriptions

Postsecondary Research and Data:

Postsecondary Research and Data (PRD) receives student records from all public colleges and universities and, to a limited extent, from private institutions. It then processes and analyzes these records to inform and improve Oregon postsecondary education and training. PRD reports on students and their characteristics, enrollment, courses, academic progress, academic pathways, completion, and labor market outcomes. It publishes and submits legislative reports, analyzes data for policy and program implementation, and tracks progress toward student equity and success.

It uses a five-layered framework to accomplish these functions:

- *Maintain and develop the postsecondary data collection.* Collect data from five educational sectors: public university, community college, private career schools, private degree-granting institutions that are not exempt from State authorization, and (new in 2020) private degree-granting institutions that are exempt from State authorization. This involves receiving, validating, and processing multiple data collections from each sector, improving data quality, and working closely with institutional partners.
- *Develop coordinated and connected student data*. Synchronize data across four different data systems and, when possible, match students across sectors.
- *Define what data are used and how they are used*. Standardize definitions and measures, implement common rates and measures (including across sectors where possible), and expand publicly available data.
- *Inform the public with impartiality*. Inform the Commission and the public through publication of Legislative reports, agency key performance metrics, other reports (e.g., annual higher education snapshots), providing interactive public data, and conducting data analyses for policy workgroups and implementation.
- *Develop and evaluate policy*. Conduct research and analysis to support agency policy development, evaluate existing policies and programs, and make recommendations for policy actions based on data analyses.

PRD works closely with Oregon's seven public universities, 17 community colleges, private institutions, workforce development, the Governor's Office, the Legislature, and other key partners.

Oregon Longitudinal Data Collaborative

The Oregon Longitudinal Data Collaborative (OLDC) is the program name for Oregon's Statewide Longitudinal Data System (SLDS) that matches and links data about students as they move through school and the workforce. Technology enables the system to provide these linkages without revealing the identity of any students. The mission of the OLDC is to use this technology to support objective analysis and reliable conclusions based on robust cross-sector, longitudinal education data. With the OLDC researchers can draw on student data from K-12 to higher education to the workforce linked in a systematic way. The SLDS partners with state agencies that collect student data and acts as a central hub where the data can be linked and analyzed.

The purpose of the OLDC is to improve student learning. Cross-sector data allows policy makers to clearly identify program outcomes across student populations and geographic regions. This helps the state pinpoint and address areas of inequities so it can better direct resources and funding to programs that are helping students succeed.

RESEARCH AND DATA

The OLDC provides services to its data partner agencies (currently the Oregon Department of Education, the Higher Education Coordinating Commission, The Oregon Employment Department and the Teacher Standards and Practices Commission) in three ways:

1.) Provide matched data – The SLDS can provide matched data to help agencies meet state or federal reporting requirements. In addition, this matched data can be used for internal agency program evaluation and improvement.
2.) Public data reports – The SLDS can aggregate and de-identify the data and produce public data reports. These reports focus on statewide outcomes and connections between programs in different education sectors.
3.) Internal Research - The matched identities and agency source data in the SLDS can be utilized for specific research projects as identified and prioritized by the data partner agencies.

Enabling Legislation/Program Authorization

ORS 350.075(3)(c) defines one of the core duties of HECC as "Coordinate the post-secondary elements of data collection and structure, with the advice and recommendation of the state's independent institutions, community colleges and public universities." This was defined as part of the original authorization statue for HECC in 2013 and is the basis for the postsecondary research and data program (PRD).

The Oregon Longitudinal Data Collaborative (OLDC) administers the Statewide Longitudinal Data System (SLDS) which was originally created under the Oregon Education Investment Board (ORS 326.010(4)(c)). In 2015, the Oregon Education Investment Board became the Chief Education Office, and although the statute was amended, the SLDS remained a core duty of the new office (ORS 326.010 (2)(c)). In 2019, with the sunset of the Chief Education Office, the OLDC was transferred to HECC. ORS 350.075(3)(l) and (m) give HECC authority to "Administer a Statewide Longitudinal Data System" and "The Higher Education Coordinating Commission shall be considered an authorized representative of the state educational agencies."

ESSENTIAL PACKAGES

Essential Packages

The Essential Packages estimates the cost to continue current legislatively approved programs into the 2025 - 2027 biennium. The totals of all current service level packages are represented below and detailed under each essential package category.

General Fund	$(110,717)
Other Funds	$(109,888)
Lottery Funds	$0
Federal Funds	$7,358
Total Funds	$(213,247)

Package 010: Vacancy Factor and Non-PICS Personal Services

This package includes standard 4.2 percent inflation on non-PICS Personal Service & Vacancy Factor, to include Temporary Appointments, Overtime Payments, All Other Differential, Public Employees Retirement System, Pension Obligation Bond Repayment and Social Security. The Vacancy Savings calculation methodology is provided by the Department of Administrative Services.

General Fund	$128,122
Other Funds	$(111,639)
Lottery Funds	$0
Federal Funds	$(2,396)
Total Funds	$14,087

Package 021: Phase in

Package 021 identifies budget adjustments resulting from program phase-ins for budget items funded for less than 24 months during a biennium.
There are no phase-ins for this program.

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

RESEARCH AND DATA
ESSENTIAL PACKAGES

Package 022: Phase out

Package 022 identifies decreased costs from the elimination of programs and other one-time funded costs.

General Fund	$(123,398)
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$(123,398)

Package 031: Standard Inflation and State Government Service Charges

The standard inflation factors are provided by the Department of Administrative Services as follows:

- Services and Supplies and Capital Outlay, by the standard 4.2 percent
- Non-state employee and Professional Services costs by the standard 6.8 percent
- Attorney General costs by the allowable 23.26 percent

This package increases Services & Supplies by the standard 4.2 percent and non-state employee and Professional Services costs by the standard 6.8 percent inflation rates. The hourly rate for Attorney General costs are increased by 23.26 percent. The package also adjusts costs for changes in State Government Service Charges.

General Fund	$107,864
Other Funds	$99,988
Lottery Funds	$0
Federal Funds	$13,858
Total Funds	$221,710

Package 032: Above Standard Inflation with CFO Analyst Approval

This package includes the amount above the inflation in package 031 for a limited set of factors including:

- Medical services inflation such as Oregon Health plan provider expenditures, amounts above standard inflation up to 5.6 percent
- DAS Price list items that are usage-based such as motor pool and printing services
- Non-state employee and Professional Services as applied to Special Payments, amounts above standard inflation up to 6.8 percent

General Fund $0
Other Funds $0
Lottery Funds $0
Federal Funds $0
Total Funds $0

Package 050: Fund Shifts

Package 050 is for significant revenue changes in existing programs.

General Fund $0
Other Funds $0
Lottery Funds $0
Federal Funds $0
Total Funds $0

Package 060: Technical Adjustments

Package 060 is used for technical budget adjustments, such as agency reorganizations and expenditure category shifts. Use of this package requires prior approval by the CFO analyst.

General Fund $0
Other Funds $0
Lottery Funds $0
Federal Funds $0
Total Funds $0

RESEARCH AND DATA
ESSENTIAL PACKAGES

Package 090: Analyst Adjustments

Package 090 reduces travel, computer replacement frequency, and contract services. This package also reduces Federal Funds revenue to correct an error made at CSL.

General Fund	$(205,689)
Other Funds	$0
Lottery Funds	$0
Federal Funds	$(102)
Total Funds	$(205,791)

Package 091: Statewide AG Adjustment

Package 091 reduces Attorney General rates by 7.47 percent to reflect adjustments in the Governor's Budget.

General Fund	$(1,654)
Other Funds	$(497)
Lottery Funds	$0
Federal Funds	$0
Total Funds	$(2,151)

Package 093: Statewide Adjustment DAS Changes

Package 093 represents adjustments to State Government Service Charges and DAS pricelist charges for services made in the Governor's Budget.

General Fund	$(15,962)
Other Funds	$(97,740)
Lottery Funds	$0
Federal Funds	$(4,002)
Total Funds	$(117,674)

Operations (OPS)

Policy Option Package 101 – Modernization Project (LEARN System)

Purpose: To complete the HECC Information Technology Modernization project, the Lifelong Educational Advancement Resource Network (LEARN) System. This phase includes completing the replacement of HECC's Financial Aid Management Information System (FAMIS); the outdated legacy system operated by the HECC's Office of Academic Policy and Authorization (PCSVets); and the agency's federally required Eligible Trainer Provider List (ETPL). Completing the intended scope of the project will enable the HECC to use one IT platform (LEARN), to store its data and meet the agency's needs for these three Offices. In addition, HECC intends to plan the incorporation of an agency-wide grant management system into the LEARN System that will greatly increase our customer service across all programs, customers and institutions.

Justification: In 2023-2025, the HECC was authorized to begin a modernization project to replace three legacy systems as part of this project. The HECC, for various reasons detailed below, will not be able to fully replace the systems in 2023-2025. The HECC is asking for additional funding to be able to finish that modernization work and to plan and design a grant management system to serve all HECC Offices.

In collaboration with DAS Procurement and Oregon's Enterprise Information System (EIS), HECC has worked with a project management firm, a quality assurance firm, and negotiated a contract with a System Implementation vendor to enter into a two-phase contract. Stage Gate Three approval was withheld and the start of the first phase was put on hold at the direction of EIS from May 23 through October 24, 2023. As a result, EIS and HECC spent six months in an extended planning phase prior to HECC receiving its Stage Gate Three endorsement for Phase 1. During the hold period, HECC and EIS addressed concerns including organizational change management, contract scope and responsibilities, budget transparency, data governance, staff resource availability, and other critical aspects of project management.

While the time on hold did strengthen the relationship between EIS and the HECC, improve the overall quality of the agency's Modernization Plan, and establish the need for additional IT staff, the delay is also responsible for increasing the amount of work to be done by HECC and inflating project costs by extending temporary project staffing and contractual investments over a longer period. The hold also reduced the amount of time available to complete the work. Focusing on the success of the project with the resources available, HECC is set to complete Phase 2 in September 2025 (followed by a three-month warranty), which will include migrating the core functionality of all three legacy systems into one new system, LEARN. The core functionality includes financial aid management for schools and students, an ETPL that meets some of the standards for the federal government, and a private career school portal that allows schools to apply and renew their licensing online. The features that had to be deferred include college access and outreach programs, required data reporting and a federal reporting mechanisms for WIOA grants, and consumer protection and monitoring functionality for private career schools.

The systems being replaced by the LEARN system are:

1. The Office of Student Access and Completion's (OSAC's) FAMIS,
2. The Office of Workforce Investment's (OWI's) processes used to manage the ETPL, and
3. The Office of Academic Policy and Authorization's (APA's) legacy IT system and paper work arounds.

For OSAC, Phase 2 will not include functionality for college access and outreach programs that are vital for increasing FAFSA/ORSAA completion and informing students about avenues for funding college. This has a detrimental effect on students, particularly low-income and historically underserved students, who are trying to access financial aid information and resources to help pay for college and hinders students from completing their applications or pursuing post-secondary education and training opportunities. The Phase 3 work will allow HECC to fully replace all OSAC functionality, including college access programs. Currently,

FAFSA+ and ASPIRE are not included in Phase 2. The FAFSA+ program provides information on FAFSA filing to high schools and community-based organizations that work with students on college access. Unless Phase 3 is funded, Oregon high schools and community-based organizations will lose access to this incredible tool that allows them to work with individuals who have not successfully completed a FAFSA so that all students have a full complement of funding options for education and training. This opens the door to financial aid for many first-generation and historically underserved students. The FAFSA+ program allows schools and organizations to identify and work with students who may just need additional support to complete the FAFSA and explore education and training options after high school. ASPIRE is Oregon's only state-run college access program. ASPIRE partners HECC staff with staff at middle schools, high schools, colleges, and community-based organizations to mentor students to help them plan for success after high school and how to achieve their goals.

The ETPL is a critical resource that supports informed consumer choice for locally relevant, job-driven training options. The list provides information on training costs, program duration and location, and other important information that consumers can use to select the best training option. If an individual is seeking WIOA-funded assistance for career-based training or skill building opportunities, the ETPL is the first, best, and often only resource available to them. If a training program is not included on the list, it is not eligible to accept federally funded subsidy, with very few exceptions. The federal government has mandated the HECC to establish a fully functional ETPL and reporting mechanism. Phase 2 will fully address the needs of applying for and producing the ETPL but will not address the reporting mechanism. Failing to replace the current reporting mechanism will result in sanction of the agency and potentially loss of $32 million in annual federal funding. The funding loss would be catastrophic and come with significant impact to workforce services in Oregon.

For APA, only partial replacement of PCSVets and current paper workaround processes is possible in Phase 2. The result is that APA will continue to have paper driven processes outside of any system that could be made more efficient using technology. Phase 2 will address front-end user interface and application processes and invoicing for APA schools. Consumer protection work is not included in Phase 2 as we need to build the foundation before we can add that layer of APA's work. This POP would allow the HECC to move student complaints out of an unsupported Access Database and increase the ease of all parties involved (student, school, HECC staff) to provide required information. The added functionality will give the student and school transparency into where the complaint is in the process for tracking purposes. Additionally, APA will be able to bring site visit oversight functionality into LEARN. Staff will be able to use the system to determine which schools may be at risk and target monitoring actions early to those most at risk so HECC can work with the school to make needed adjustments prior to a school needing to close which is detrimental to students. Student Tuition Protection Fund claim processing would be brought into LEARN and no longer be calculated and tracked on spreadsheets from emails outside a system. Claims and all related documentation would be made within the LEARN portal which would allow the HECC to provide tracking of where a claim is in the process and if any required information is missing.

Additionally, the HECC currently does not have a grant management system despite giving out billions in state and federal funds each year/biennium from Offices across the agency. An earlier effort to acquire a grant management system was not successful due to time and capacity challenges. This funding will allow the HECC to begin the planning and design work for a full-cycle grants management system within LEARN which impacts the work of all of the HECC's Offices and will lead to increased efficiency across the board by HECC staff and by grantees. The HECC is seeking to consolidate data into a single system. In keeping with the HECC's goal of consolidating data and processes into a single system, it intends to build the grant management system in LEARN. The benefits of a full cycle grant management system within LEARN include better data analytics, ability to see multiple grants by the same organization within a single view, increased transparency, and a move towards a single way for organizations to interact with HECC Offices.

Solution/How Achieved: To achieve the original vision for the HECC Modernization Project and meet the data governance and project management needs of the agency, HECC has worked with EIS and its contractors to plan a third phase of the project. This third phase will require a third and final round of funding through Q-Bonds. The first phase, Mobilization, was completed April 19, 2024. This phase includes requirement refinement, the creation of a data dictionary, and solution design. The second phase, Implementation, is set to begin July 1, 2024 and be completed in September of 2025 before the start of a 3 month warranty period. Phase 2 will result in the replacement of the core functionality for all three systems, FAMIS, ETPL, and PCSVets into one new system, LEARN. The third phase,

which is this policy option package, will result in all features originally envisioned in the project before the hold being incorporated into LEARN, the inclusion of an agencywide grant management system, and the staffing necessary to successfully meet the operational needs of HECC for data governance and project management.

The HECC will continue to work with EIS and its current contractors to incorporate the remaining features during Phase 3 and begin planning and design of a grant management system. In addition, the HECC has amended the original business case and filled the gaps in HECC's IT staffing identified through the efforts of HECC, EIS, and a consulting firm contracted by HECC during the hold.
During the hold, EIS identified areas that the HECC needed to shore up related to data governance and IT project management and organizational change management. This additional staff will allow HECC to use best practices when managing IT projects, operating and maintaining the LEARN system and performing data governance throughout all if its offices and programs.

Equity Impact: This project will make college access, scholarships, job-seeker training, school certifications, and grant funds easier to access for all Oregonians.

Staffing Impact: The positions outlined below are requested to ensure the success of the Project and to fill the gaps in HECC's Data Governance and IT Project Management as identified through our work with EIS during the hold.

Operations

Executive Director's Office

Policy Option Package 104 – *Future Ready Oregon (SB 1545, 2022) ARPA Reauthorization*

Purpose: To re-authorize $62.5M in OF expenditure limitation authority for Future Ready Oregon implementation in 25-27. All funding appropriated for Future Ready Oregon in 2022 will be obligated by the end of this year (2024). While project implementation will continue through 2026 and be administered and funded with federal dollars coming to HECC from Department of Administrative Services, new state funding would be necessary to continue this investment through the 25-27 biennium and into the future.

Justification and Solution/How Achieved: Oregon continues to experience significant workforce shortages – and struggles to take advantage of workforce opportunities – in industries and occupations that are critical to equitable prosperity for all Oregonians. Workforce-related priorities, programs, and other initiatives across the state are not always well-aligned, resulting in a workforce system that is often fragmented, inequitable, and difficult to navigate.

To promote sustained economic growth across Oregon, partners must work together to center the needs of underserved and underrepresented Oregonians, align workforce education and training opportunities, and provide comprehensive supports and services that enable individuals to complete trainings and move into high-wage jobs in key industry sectors. These proposed investments integrate proven best practices from Future Ready Oregon programs, continuing to contribute to a more unified, equitable, and accessible workforce system. Furthermore, these program investments align with recent case studies and research on promising practices in workforce development and training including:

- Centering the needs of historically underserved and underrepresented communities through inclusive partnerships
- Flexible funding
- Innovative education delivery and comprehensive student/learner supports that meet students where they are
- Focusing on key sectors of statewide importance
- Systems alignment at the state (policy priorities) and local/regional (program implementation) levels

Equity Impact: Future Ready Oregon advances a more equitable workforce system by centering the education and employment needs of historically underserved and marginalized Oregonians. This involves grantmaking that supports inclusive, culturally specific, and linguistically appropriate initiatives that address systemic barriers faced by Oregon's priority populations, provides critical support to participants, and creates pathways to good-paying jobs in Oregon's key industry sectors. Future Ready Oregon recognizes that advancing a diverse workforce system requires operationalizing a new approach and doing things differently.

Equity in Process Improvements and Engaging Diverse Communities
Future Ready Oregon engages community-based and culturally specific organizations as co-creators of solutions to Oregon's complex workforce and talent development challenges. CBOs encounter significant barriers in pursuit of funding. To ensure greater accessibility to the application process, Future Ready Oregon implements strategies such as providing technical assistance for Requests for Applications (RFAs) through providers who have experience with diverse communities, subject matter diversity (including sector-specific experience and regional expertise), and nonprofit management (including grant writing and financial management experience); hosting webinars and creating detailed, easy-to-navigate FAQs; translating materials and offering live interpretation at webinars; and providing unfunded applicants the opportunity to receive feedback and learn for future funding opportunities, informing subsequent RFAs.

Additionally, Future Ready Oregon embeds equity-focused and human-centered approaches to grant administration, including utilizing alternative reporting methods, such as video check-ins and qualitative reporting that build stronger partnership with grantees and enable the story receivers (grant administrators) to engage with the stories and histories of families, communities, and cultures; simplifying reporting templates with grantee feedback; offering trauma-informed data collection trainings to acknowledge trauma experienced especially by underserved and marginalized communities, to support data collection strategies to mitigate re-traumatizing participants, and to honor the unique identities and experiences of participants; allowing advance payment of funds; and implementing Communities of Practice to foster collaboration amongst grantees, strengthen networks between workforce and economic development professionals, provide subject matter experts, coaching, and technical assistance to grantees on workforce system and sector strategies, and share field-informed innovation.

Equitable Impacts for Individuals
In its first year of implementation, Future Ready Oregon programs served 9,441 participants, 92% identifying as a member of at least one priority population (among those who reported such data) and 62% identifying as a member of at least two priority populations. Programs also served higher proportions of members of priority population participants than the proportion of those members that comprise the labor force, including young people, Black/African Americans, Latino/a/x/Hispanics, Native American/Alaskan Natives, Native Hawaiian/Pacific Islanders, multi-racial people, women, and rural and frontier populations.

Future Ready Oregon's flexible funding, coupled with Workforce Innovation and Opportunity Act (WIOA) funds, enables local workforce development boards to expand their training partners to meet the needs of participants and improve outcomes. This grows their provider ecosystem, which can move quickly from initial contact to plan development to a wide range of services, which has been especially important for priority populations who may have different needs. Future Ready Oregon funding has been blended and braided with WIOA funds for more comprehensive and responsive services, including paid work experience and internships as well as partnership-building with industry, community-based organizations, and training providers. WIOA prioritizes recipients of public assistance, individuals who are deficient in basic skills, or those who are low-income in addition to veterans and eligible spouses and seeks to serve those populations most in-need. The priority populations connected with WIOA-funded services are aligned and complimentary with Future Ready Oregon; however, WIOA is more restrictive and is intended to be a "last dollar" resource. Leveraged WIOA resources will further equity priorities, but their relatively small size and restrictive nature present potential barriers to equity priorities.

Staffing Impact: The positions outlined below are requested to ensure the success of each program.

Reauthorize $62.5 million in OF expenditure limitation authority for 2025-2027, and 7.50 Full-Time Equivalent position authority, including 10.0 FTE for the first 18 months of the biennium (7/1/25-12/31/26): (1) EPM2/EPA1, (1) OPA4/EPM2, (1) OPA3, (5) PA3, (1) AS2, (1) OS2.

Outcomes/Performance Measures/Benchmarks: Assessment measures include:

- The number of individuals from priority populations who have registered for and who have completed a workforce program;
- Data on job placement rates, wages and salary earnings and health and retirement benefits provided for individuals who participated in an established program;
- A description of any new or expanded workforce programs, including training programs, career pathway programs and apprenticeship and preapprenticeship training programs, and
- The types and amounts of any wraparound supports and services provided to individuals from priority populations.

By December 31 of each year, the commission shall prepare and submit a report that includes the information, disaggregated by race, age, gender and geographical area, including any recommendations for future investments and opportunities to leverage private and federal funding to support investments, to the Governor and to the interim committees of the Legislative Assembly related to workforce development.

Revenue Source: Reauthorizes $62.5M in OF expenditure limitation authority.

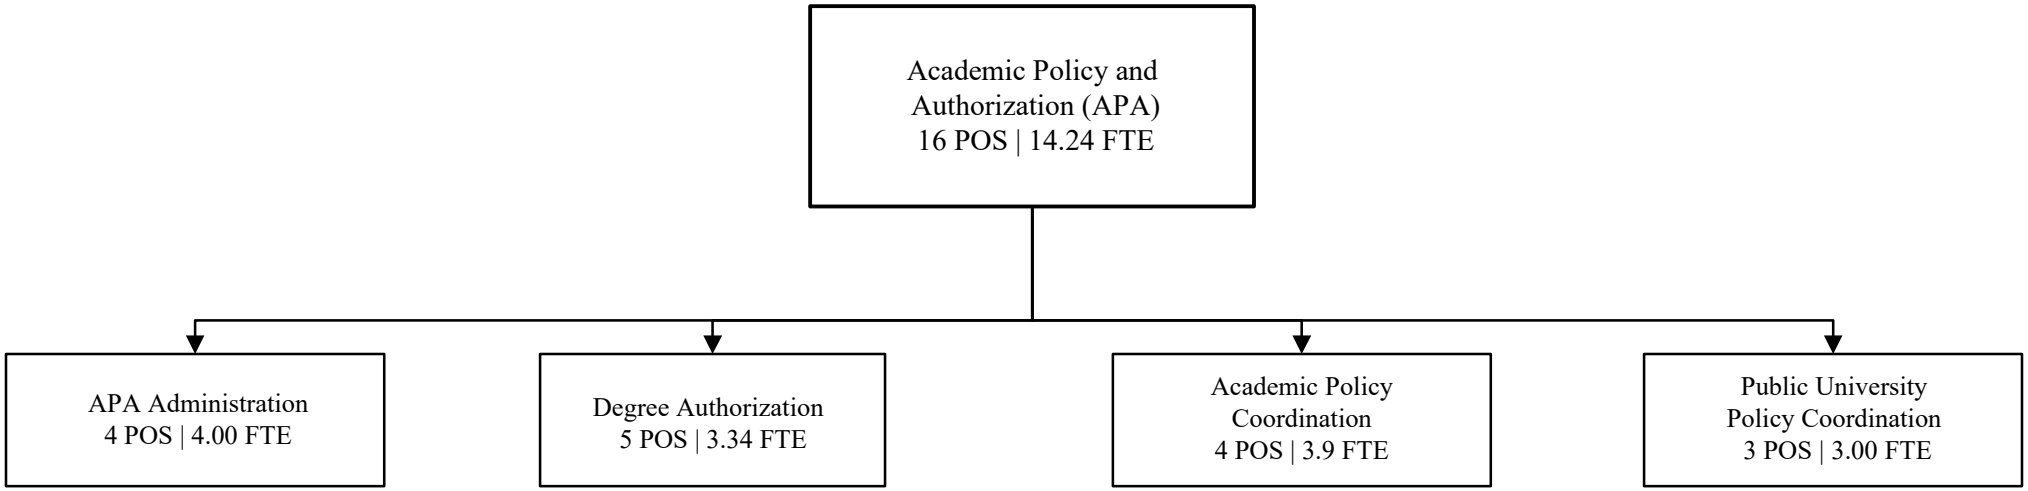
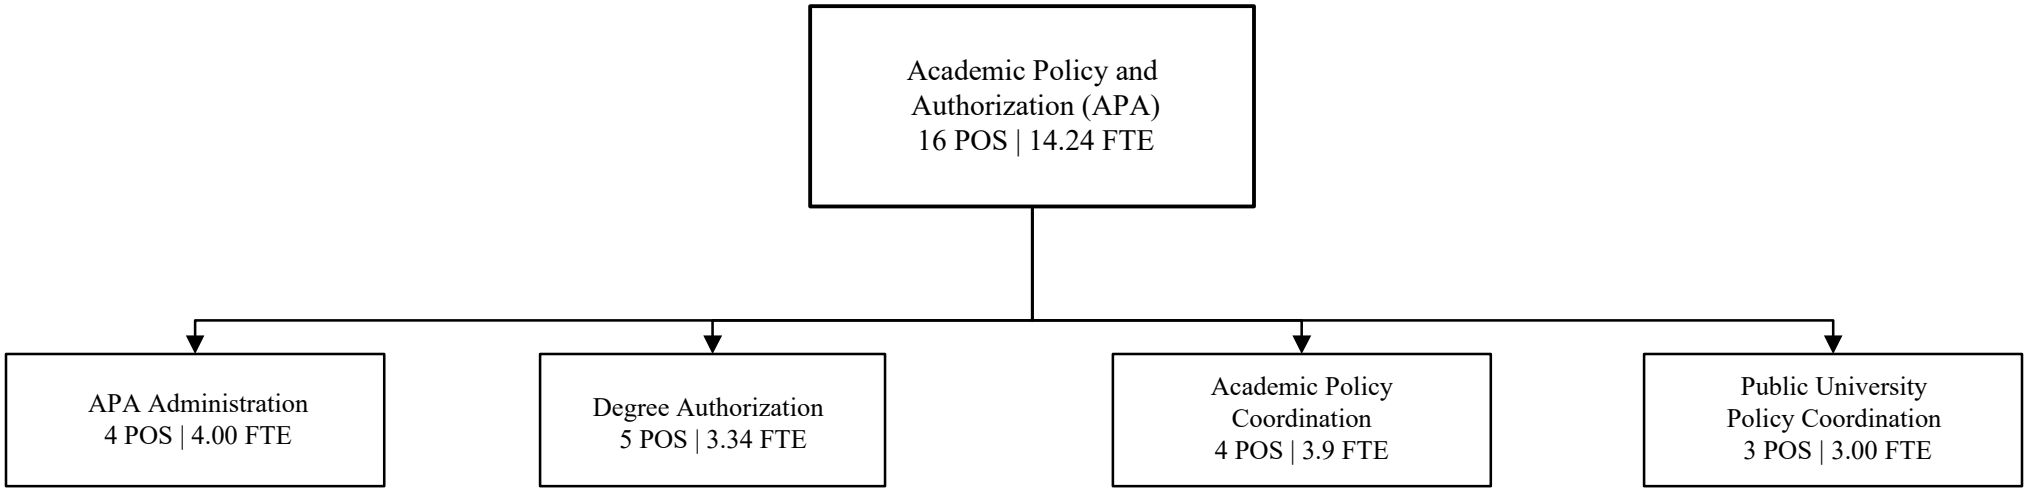
Academic Policy and Authorization

HIGHER EDUCATION COORDINATIONG COMMISSION
ACADEMIC POLICY AND AUTHORIZATION
Organizational Chart 25-27 ARB



HIGHER EDUCATION COORDINATIONG COMMISSION
ACADEMIC POLICY AND AUTHORIZATION
Organizational Chart 25-27 GRB



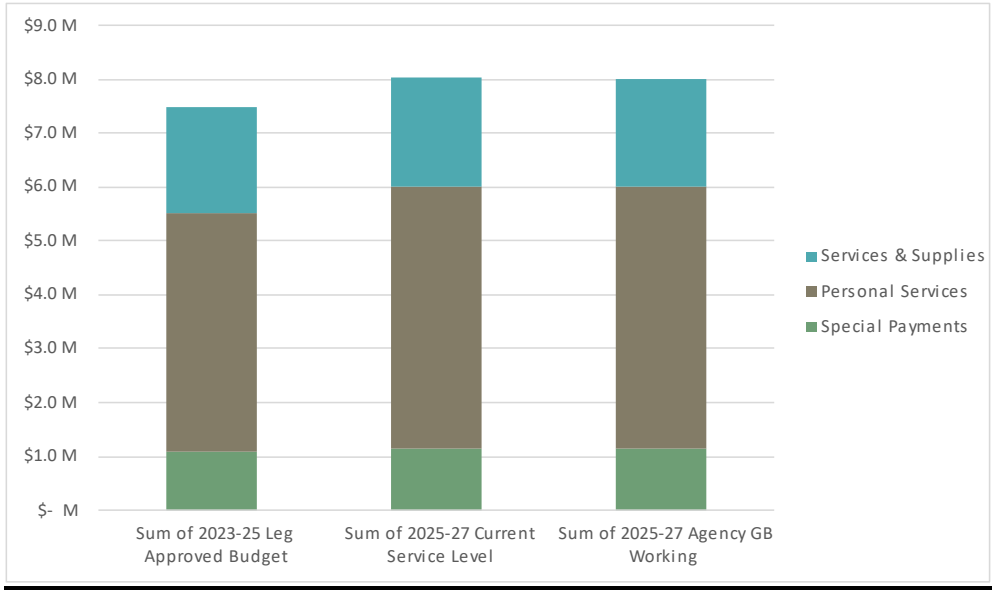
ACADEMIC POLICY AND AUTHORIZATION

The Office of Academic Policy and Authorization (APA)

This office oversees two primary areas of work, the quality, integrity, and approval of private postsecondary programs in Oregon and public university program approval and academic policy. Private postsecondary programs include private degree granting institutions in Oregon, distance learning providers, and career schools. Public university academic policy oversight and program approval applies to the seven public universities in Oregon.

Funding Request

For 25-27, APA is requesting CSL.



Office of Degree Authorization (ODA)

The Office of Degree Authorization approves private degree-granting institutions and distance education providers. ODA oversees the biennial re-authorization of 18 in-state degree granting private institutions, and more than sixty-four out of state degree granting institutions (a mix of public and private). When schools close, ODA steps in to manage the orderly transition of transcripts to a custodial institution or takes ownership of those transcripts. ODA is responsible for student and consumer protection from diploma mills and unauthorized schools. ODA is also responsible for administration of the State Authorization Reciprocity Agreement (SARA) for the state of Oregon, including active investigation of student complaints. There are currently thirty-two Oregon institutions that participate in this national reciprocity agreement, encompassing more than 2,400 schools in forty-nine states (all but California), the District of Columbia, Puerto Rico, and the Virgin Islands.

ACADEMIC POLICY AND AUTHORIZATION

Private Career Schools (PCS)

The Private Career Schools unit license and provides technical assistance to private career and trade schools. PCS is responsible for student and consumer protection and investigates a broad array of student complaints under its enabling statutes (ORS 345). Currently, there are approximately 190 private career schools in Oregon, the largest contingent of these are cosmetology, barbering, and other "personal care" training schools. PCS staff are advised by an advisory board comprised mostly of school owners and staff. This public body advises staff on policy related to private career schools, Administrative Rules, and legislative response to bills affecting the sector. When schools close, PCS staff make sure the transition is orderly as possible to assure that student interests are protected, including the issue of appropriate refunds from the school or via the state-administered Tuition Protection Fund.

Public University Academic Policy Coordination (PUAPC)

Public University Academic Policy Coordination (PUAPC) is responsible for policy coordination related to Oregon's seven public universities to achieve Oregon's higher education goals. The unit approves new programs and provides coordination of policy for transfer initiatives and high school partnerships, student complaints, statewide initiatives, and other legislative directives to enhance postsecondary pathways and student success. The office supports the work of the Oregon Transfer Council to build streamlined credit pathways from community colleges to universities. This unit leads the HECC's response to legislation related to Oregon public university policies, student success, student services, academic programs and student complaints. It carries out statutory authorities of the HECC to perform university evaluations, foster success for current and future Oregon students at public universities related to post-secondary pathways and transitions, and degree completion initiatives.

ACADEMIC POLICY AND AUTHORIZATION
ESSENTIAL PACKAGES

Essential Packages

The Essential Packages estimates the cost to continue current legislatively approved programs into the 2023 - 2025 biennium. The totals of all current service level packages are represented below and detailed under each essential package category.

General Fund	$24,950
Other Funds	$(2,166)
Lottery Funds	$0
Federal Funds	$0
Total Funds	$22,784

Package 010: Vacancy Factor and Non-PICS Personal Services

This package includes standard 4.2 percent inflation on non-PICS Personal Service & Vacancy Factor, to include Temporary Appointments, Overtime Payments, All Other Differential, Public Employees Retirement System, Pension Obligation Bond Repayment and Social Security. The Vacancy Savings calculation methodology is provided by the Department of Administrative Services.

General Fund	$31,817
Other Funds	$(96,942)
Lottery Funds	$0
Federal Funds	$0
Total Funds	$(65,125)

Package 021: Phase in

Package 021 identifies budget adjustments resulting from program phase-ins for budget items funded for less than 24 months during a biennium.

There are no phase-ins for this program.

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

ACADEMIC POLICY AND AUTHORIZATION
ESSENTIAL PACKAGES

Package 022: Phase out

Package 022 identifies decreased costs from the elimination of programs and other one-time funded costs.

General Fund	$(26,926)
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$(26,926)

Package 031: Standard Inflation and State Government Service Charges

The standard inflation factors are provided by the Department of Administrative Services as follows:

- Services and Supplies and Capital Outlay, by the standard 4.2 percent
- Non-state employee and Professional Services costs by the standard 6.8 percent
- Attorney General costs by the allowable 23.26 percent

This package increases Services & Supplies by the standard 4.2 percent and non-state employee and Professional Services costs by the standard 6.8 percent inflation rates. The hourly rate for Attorney General costs are increased by 23.26 percent. The package also adjusts costs for changes in State Government Service Charges.

General Fund	$64,144
Other Funds	$99,608
Lottery Funds	$0
Federal Funds	$0
Total Funds	$163,752

ACADEMIC POLICY AND AUTHORIZATION
ESSENTIAL PACKAGES

Package 032: Above Standard Inflation with CFO Analyst Approval

This package includes the amount above the inflation in package 031 for a limited set of factors including:

- Medical services inflation such as Oregon Health plan provider expenditures, amounts above standard inflation up to 5.6 percent
- DAS Price list items that are usage-based such as motor pool and printing services
- Non-state employee and Professional Services as applied to Special Payments, amounts above standard inflation up to 6.8 percent

There is no Above Standard Inflation for this program.

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

Package 050: Fund Shifts

Package 050 is for significant revenue changes in existing programs.

There are no Fund Shifts for this program.

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

ACADEMIC POLICY AND AUTHORIZATION
ESSENTIAL PACKAGES

Package 060: Technical Adjustments

Package 060 is used for technical budget adjustments, such as agency reorganizations and expenditure category shifts. Use of this package requires prior approval by the CFO analyst.

There are no Technical Adjustments for this program.

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

Package 090: Analyst Adjustments

Package 090 reduces travel, computer replacement frequency, and contract services.

General Fund	$(24,505)
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$(24,505)

Package 092: Statewide AG Adjustment

Package 092 reduces Attorney General rates by 7.47 percent to reflect adjustments in the Governor's Budget.

General Fund	$(483)
Other Funds	$(801)
Lottery Funds	$0
Federal Funds	$0
Total Funds	$(1,284)

ACADEMIC POLICY AND AUTHORIZATION
ESSENTIAL PACKAGES

Package 093: Statewide Adjustment DAS Charges

Package 093 represents adjustments to State Government Service Charges and DAS pricelist charges for services made in the Governor's Budget.

General Fund	$(19,097)
Other Funds	$(4,031)
Lottery Funds	$0
Federal Funds	$0
Total Funds	$(23,128)

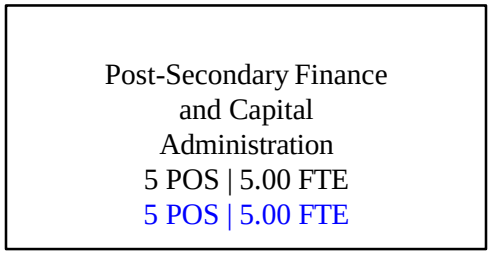
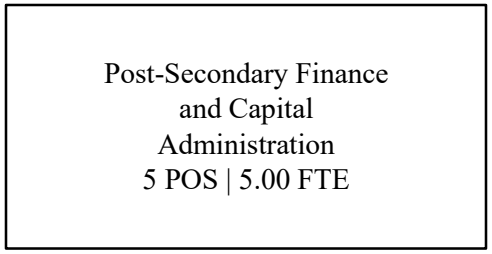
HIGHER EDUCATION COORDINATIONG COMMISSION
POST-SECONDARY FINANCE AND CAPITAL
Organizational Chart 23-25 LAB to 25-27 CSL



HIGHER EDUCATION COORDINATIONG COMMISSION
POST-SECONDARY FINANCE AND CAPITAL
Organizational Chart 25-27 GRB



POST-SECONDARY FINANCE AND CAPITAL

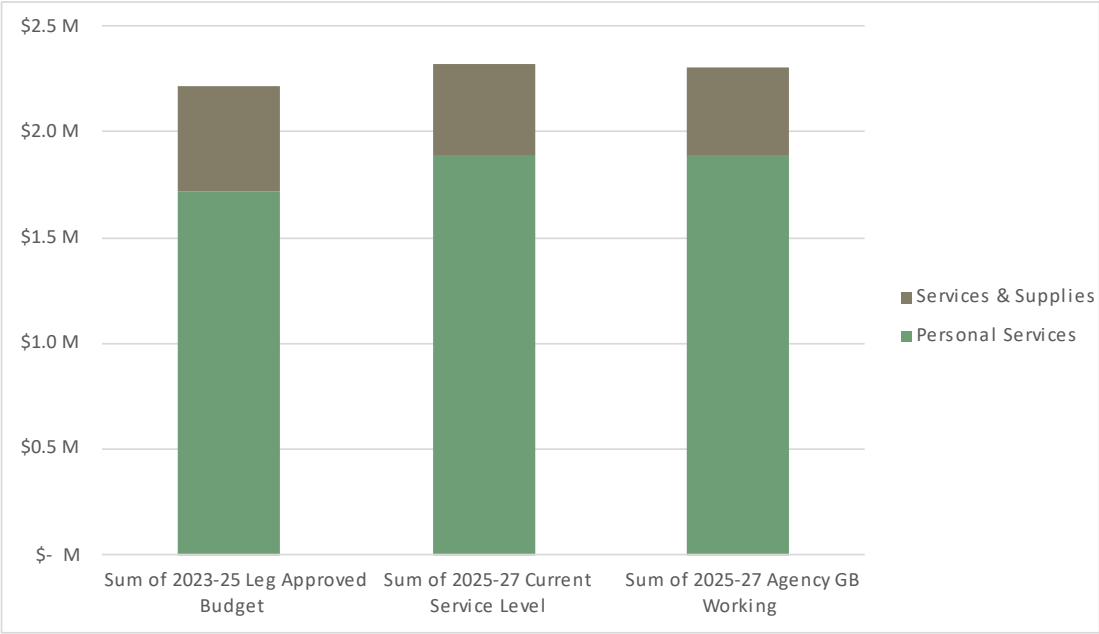
The Office of Post-Secondary Finance and Capital

Provides fiscal coordination related to Oregon's public postsecondary institutions, including financial planning, biennial budget recommendations for the Community College Support Fund, Public University Support Fund, Public University State Programs, Public University Statewide Public Services, capital investments, fiscal reporting and analysis, capital bond funding administration, and the allocation of state funding to public postsecondary institutions.

The programs are highlighted below, however for the detailed program narrative, please refer to the SCR section noted below in the budget binder.

Funding Request

For 25-27, PFC is requesting CSL.



Community College Support Fund (SCR 208)

The Community College Support Fund (CCSF) is the primary vehicle for direct state investment in the operations of Oregon's seventeen community colleges.

Public University Support Fund (SCR 209)

The Public University Support Fund (PUSF) is the primary vehicle for direct state investment in the operations of Oregon's seven public universities.

POST-SECONDARY FINANCE AND CAPITAL

Public University State Programs (SCR 210)
The State Programs category is intended to encompass General Fund support for certain institutes, centers, and programs generally operated by the seven public universities. These efforts address the economic development, resource base, and public service needs of the State of Oregon. Many of these programs have an industry-specific focus and receive additional investments from the private sector as well as other sources.

Statewide Public Service Programs (SCR 211)
Includes Agriculture Experiment Station, Extension Services and the Forest Research Laboratory.

Sports Lottery (SCR 212)
Provides lottery funds to support athletic programs and student scholarships at Oregon's public universities.

OHSU Program (SCR 213)
OHSU has four public missions: education, clinical care, research, and statewide outreach. The university educates the next generation of health care professionals and biomedical scientists, creates new knowledge, translates scientific research into therapies for disease, provides compassionate and evidence-based patient care, and improves health statewide through access and policy initiatives.

Debt Service Programs (SCR 214 | SCR 215 | SCR 216)
The debt service program includes all long-term debt obligations to pay for capital construction projects. These include debt paid by state appropriations and revenue generated by self-supporting programs such as gifts, grants or building fees.

Capital Construction (SCR 217 | SCR 218 | SCR 219)
The capital construction program includes an opportunity for public universities and community colleges to request funding for capital projects, including state-backed debt.

ESSENTIAL PACKAGES

Essential Packages

The Essential Packages estimates the cost to continue current legislatively approved programs into the 2023 - 2025 biennium. The totals of all current service level packages are represented below and detailed under each essential package category.

General Fund	$(87,782)
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$(87,782)

Package 010: Vacancy Factor and Non-PICS Personal Services

This package includes standard 4.2 percent inflation on non-PICS Personal Service & Vacancy Factor, to include Temporary Appointments, Overtime Payments, All Other Differential, Public Employees Retirement System, Pension Obligation Bond Repayment and Social Security. The Vacancy Savings calculation methodology is provided by the Department of Administrative Services.

General Fund	$(8,932)
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$(8,932)

Package 021: Phase in

Package 021 identifies budget adjustments resulting from program phase-ins for budget items funded for less than 24 months during a biennium.

There are no phase-ins for this program.

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

POST-SECONDARY FINANCE AND CAPITAL
ESSENTIAL PACKAGES

Package 022: Phase out

Package 022 identifies decreased costs from the elimination of programs and other one-time funded costs.

General Fund	$(100,000)
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$(100,000)

Package 031: Standard Inflation and State Government Service Charges

The standard inflation factors are provided by the Department of Administrative Services as follows:

- Services and Supplies and Capital Outlay, by the standard 4.2 percent
- Non-state employee and Professional Services costs by the standard 6.8 percent
- Attorney General costs by the allowable 23.26 percent

This package increases Services & Supplies by the standard 4.2 percent and non-state employee and Professional Services costs by the standard 6.8 percent inflation rates. The hourly rate for Attorney General costs are increased by 23.26 percent. The package also adjusts costs for changes in State Government Service Charges.

General Fund	$41,853
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$41,853

POST-SECONDARY FINANCE AND CAPITAL
ESSENTIAL PACKAGES

Package 032: Above Standard Inflation with CFO Analyst Approval

This package includes the amount above the inflation in package 031 for a limited set of factors including:

- Medical services inflation such as Oregon Health plan provider expenditures, amounts above standard inflation up to 5.6 percent
- DAS Price list items that are usage-based such as motor pool and printing services
- Non-state employee and Professional Services as applied to Special Payments, amounts above standard inflation up to 6.8 percent

There is no Above Standard Inflation for this program.

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0

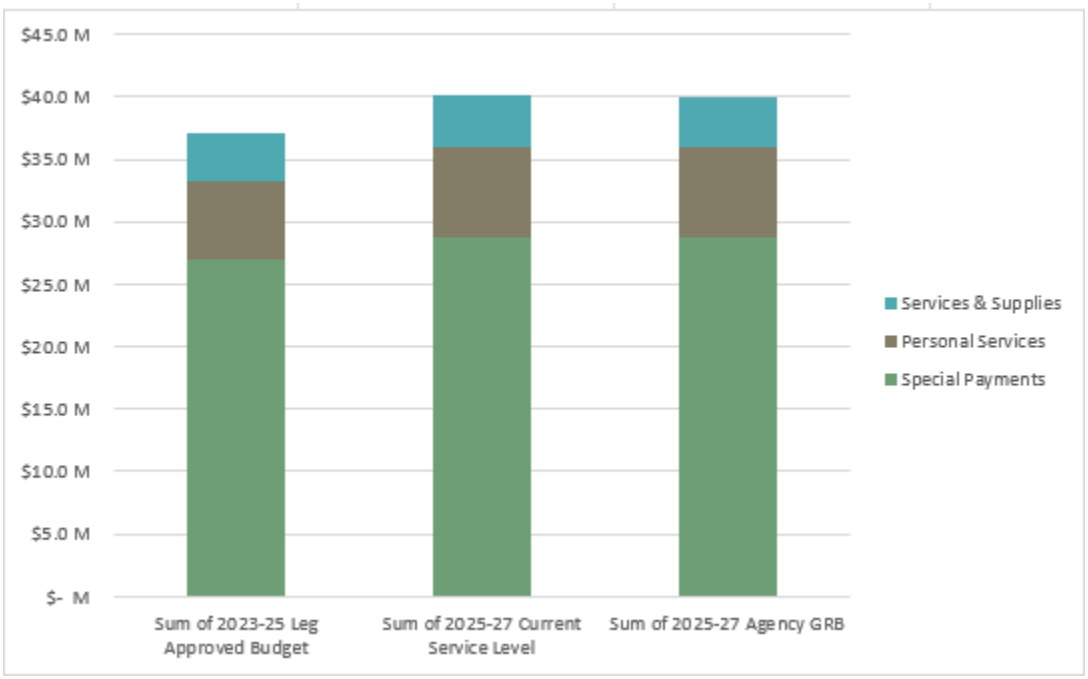
COMMUNITY COLLEGES AND WORKFORCE DEVELOPMENT

The Office of Community Colleges and Workforce Development (CCWD)

Provides coordination leadership and resources related to Oregon's community colleges and adult basic skills providers. CCWD also provides statewide administration related to Career and Technical Education (CTE) (including the Strengthening Career and Technical Education (CTE) for the 21st Century Act), Accelerated Learning, Career Pathways, Community College Program Approval, Credit for Prior Learning, GED ® testing and high school equivalency, English Language Learners, and the Workforce Innovation and Opportunity Act (WIOA) for Adult Education (Title II).

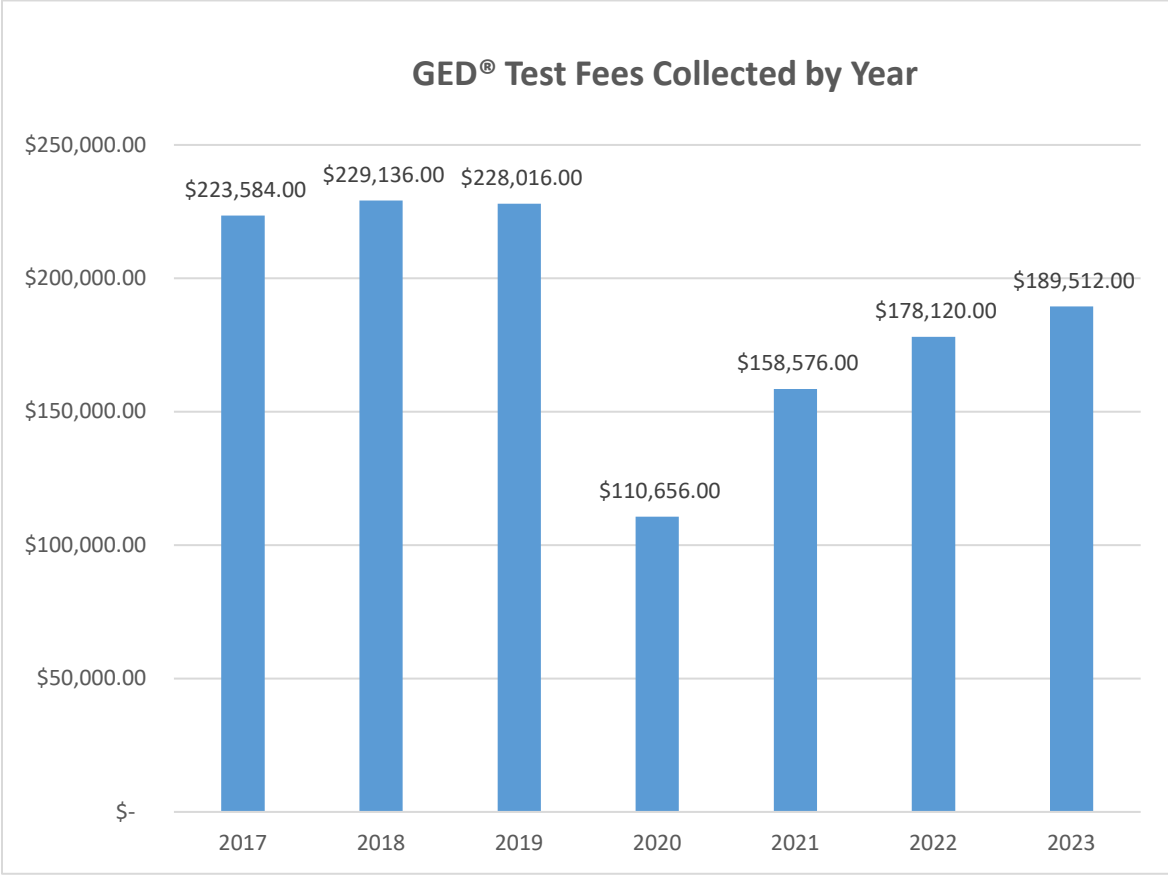
Financial support to community colleges is provided through the funding tools described below.



High School Equivalency Program (Oregon GED Program®) (General Fund & Other Fund)

The purpose of the Oregon High School Equivalency Program is to oversee and improve the high school equivalency testing process for test applicants in Oregon. Included in the oversight is the administration of the testing preparation centers, testing centers statewide, and grant funding allocated by the state. The GED® test, a product of the GED Testing Service, is the only high school equivalency test that is administered in Oregon. Funding to the Oregon GED® Program comes from two sources:

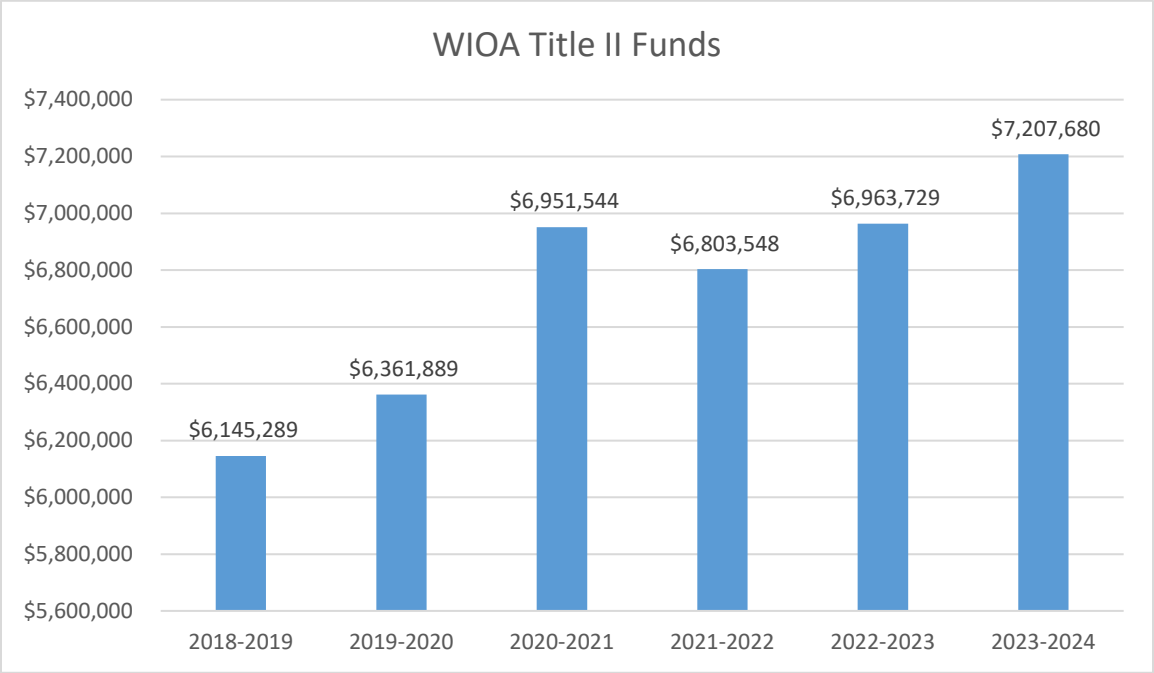
1. GED Testing Service: The GED Testing Service collects $44 per student for GED® testing fees, GEDTS pays the HECC $8 of each testing fee to provide services related to the GED® test to Oregon educators, including access to GED Manager ™ (the web portal designed to help educators & test administrators manage their programs), fielding questions, and professional development services to educators at the Oregon GED® testing sites and in the Oregon GED test preparation centers.



2. The Oregon Legislature: The Oregon Legislature allocates monies to support local programs in providing wraparound services to GED® test students. The grant funds, competitively awarded to programs, are intended to eliminate student barriers to GED® testing and preparation.

Title II

Funding provided by the Adult Education and Family Literacy Act (AEFLA), Title II of the Workforce Innovation and Opportunity Act (WIOA), is used to support Oregon's Adult Basic Skills Program in providing adult Oregonians (those 16 years and older) with the skills they need for family self-sufficiency, careers, community involvement, and further education. The HECC Office of Community Colleges and Workforce Development administers the program by working with community colleges, the Oregon Department of Corrections, and adult education providers across the state to provide strategic leadership, technical assistance, administration of these federal funds, and coordination of programming to meet the educational attainment needs of Oregon adults.



COMMUNITY COLLEGES AND WORKFORCE DEVELOPMENT

Strengthening Career and Technical Education (CTE) for the 21st Century Act (formerly known as Carl D. Perkins) (Other /Federal Fund)

The Strengthening Career and Technical Education (CTE) for the 21st Century Act (formerly known as the Carl D. Perkins Career and Technical Act of 2006) is a federally funded grant used for the development and support of programs of study in career and technical education programs. While this grant is paid directly to the Oregon Department of Education (ODE), ODE partners with the Office of Community Colleges and Workforce Development (CCWD) to ensure the implementation and administration of the program creates true partnerships between the secondary and postsecondary educational sectors. In Oregon, the grant is split equally between the sectors and CCWD receives a portion of those funds for administration, professional development and technical support to Oregon's 17 community colleges.

Career Pathways (General Fund)

Oregon Community College Career Pathways link education and training with intentional student support that enables individuals to secure credentials and advance to higher levels of education and employment in a given occupation or industry sector. Career Pathways is an evidence-based model that improves student outcomes and closes equity gaps through high-quality training and wraparound support services that help students succeed. HECC's Office of Community Colleges and Workforce Development administers funds every biennium to each of the 17 community colleges to create, develop, and sustain pathways for learners into high-quality CTE programs and career opportunities.

Other Community College Support (General/Other Fund)

In addition to CCSF, the Legislature appropriates other community college support to the HECC to support community colleges and community college students. This fund supports: two Skills Centers, the Sabin-Schellenberg Professional Technical Center in Milwaukie and the Margaret Carter Skills Center at Portland Community College; First Generation Student Grants; and an Adults in Custody education program.

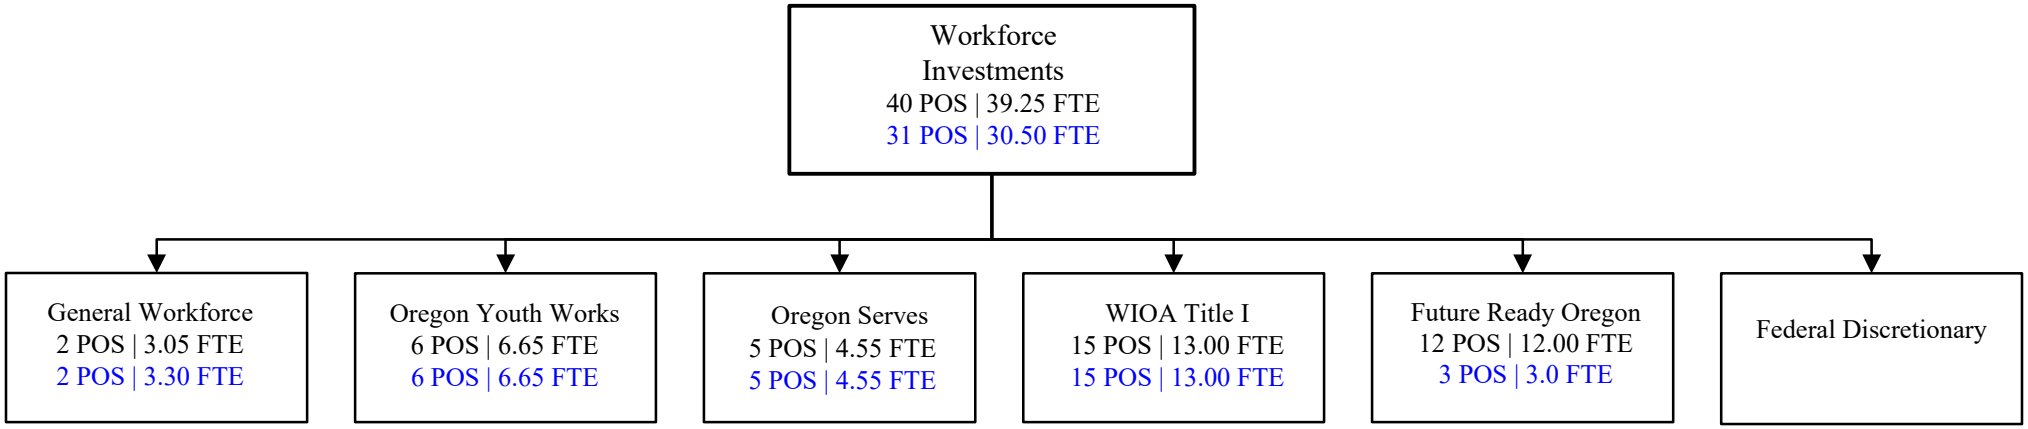
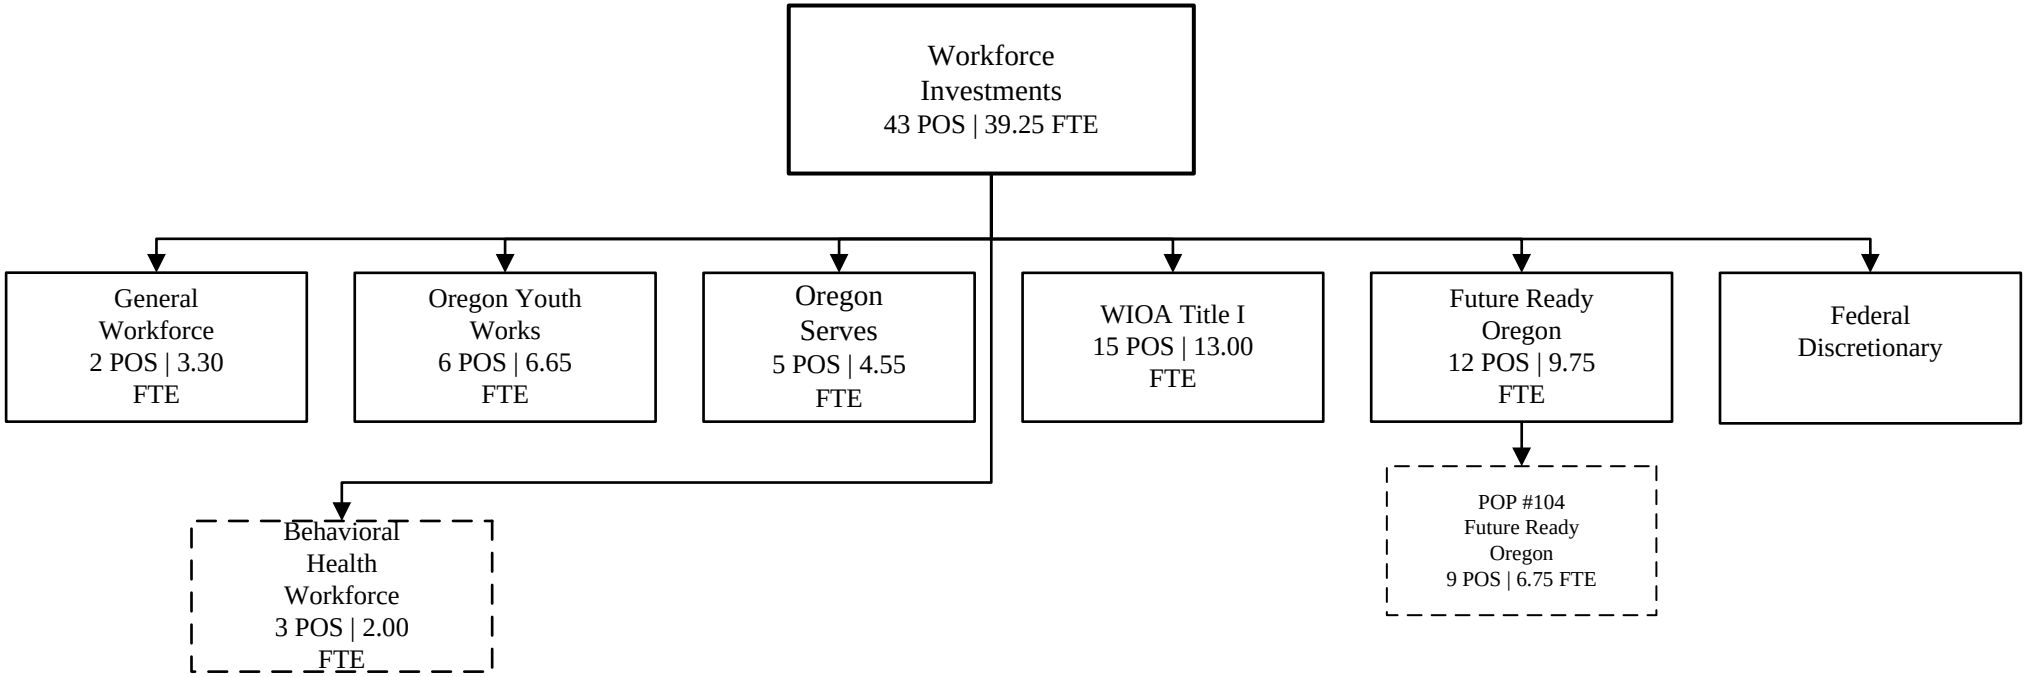
Workforce Investments

HIGHER EDUCATION COORDINATIONG COMMISSION
WORKFORCE INVESTMENTS - 23-25 LAB and 25-27 CSL



HIGHER EDUCATION COORDINATIONG COMMISSION
WORKFORCE INVESTMENTS 25-27 GRB



OFFICE OF WORKFORCE INVESTMENTS

The Office of Workforce Investments (OWI)

OWI is focused on ensuring that Oregon's workers have the knowledge, skills, and work-related training they need to secure self-sufficiency wage jobs and meet the needs of our employers – now and in the future. OWI works in partnership with the Oregon Employment Department (OED), Oregon Department of Human Services (ODHS), Oregon Commission for the Blind (OCB), and others to provide leadership to Oregon's workforce system and is responsible for convening partnerships, supporting and providing technical assistance to the Workforce and Talent Development Board (WTDB) and local workforce development boards (LWDBs), and implementing the Governor's vision and the WTDB strategic plan.

On behalf of the HECC, OWI administers the programs under Title I of the federal Workforce Innovation and Opportunity Act (WIOA) including for youth, adults, dislocated workers, as well as other training-related federal discretionary grants and state general funds that support programs such as apprenticeship and others.

A majority of funds administered by the Office of Workforce Investments provide direct services to Oregonians and Oregon businesses through a series of sub-grants and contracts to LWDBs, non-profits and state agency partners. OWI monitors these investments in Oregon's workforce system, ensuring programmatic compliance and fiscal accountability.

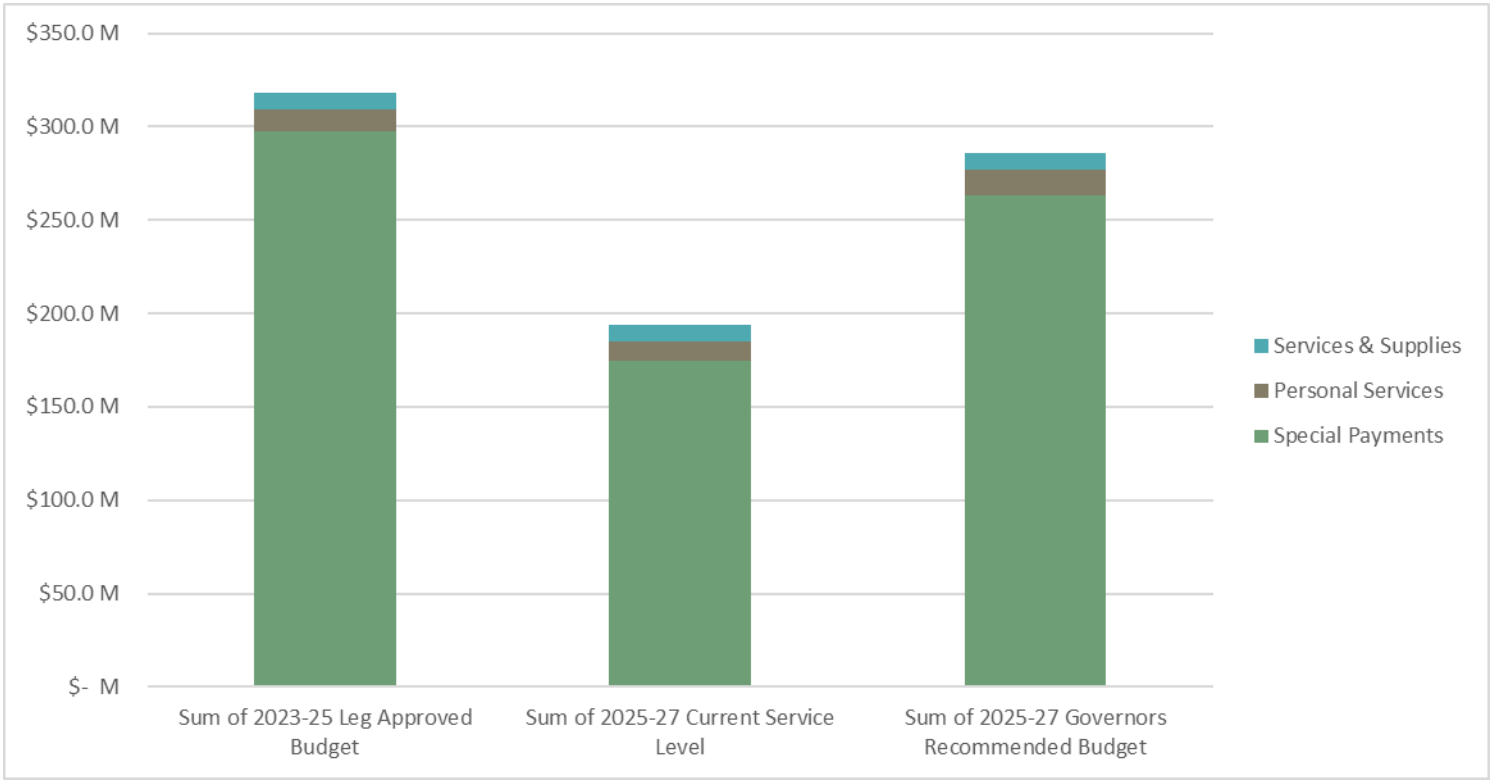
OWI also administers and supports the five programs comprising Oregon Youth Works: the Oregon Conservation Corps, Oregon Youth Corps, Oregon Youth Employment Program, ODHS Youth Employment Program, and WIOA youth program. Through grants administered by OWI to local organizations, these programs provide a variety of paid work experiences, combined with education and training, to young Oregonians. OWI provides staff support to two related citizen advisory boards: the Oregon Conservation Corps Advisory Board and the Oregon Youth Corps Advisory Committee.

OWI supports the OregonServes State Service Commission, OregonServes. As a state commission, OregonServes' role is to promote and elevate service, volunteerism and civic engagement in Oregon Communities. In addition to supporting the commission, OWI's OregonServes staff administer federal and state match funding to AmeriCorps programs in Oregon.

The Future Ready Oregon Initiative is also housed in OWI. Future Ready Oregon (SB 1545, 2022) originated in the Racial Justice Council's (RJC) Workforce Workgroup and is advancing an equitable workforce system and increasing opportunities for diverse workers, with a focus on key industry sectors—healthcare, manufacturing, technology.

OFFICE OF WORKFORCE INVESTMENTS

Funding Request for 25-27



Workforce Innovation and Opportunity Act (WIOA) – Title I

OWI is responsible for implementing both the strategic vision and operational portions of the WIOA state plan, as required by federal law. The strategic vision is created through a business-led process that includes the Governor's Office and the business majority led state workforce board. OWI contracts with the nine Governor-approved LWDBs to implement this vision through service delivery contracts that serve businesses, adults, dislocated workers and youth in all communities throughout the state.

OWI, along with our partners within other HECC Offices, at OED, ODHS, and LWDBs, provide an integrated service delivery system to our customers. The purpose of the integration is to provide workforce activities that increase the employment, retention and earnings of participants as well as increasing access to skill development opportunities including occupational skills training when appropriate. This results in improving the quality of the workforce and enhancing the productivity and global competitiveness of Oregon as well as increasing wages, retention and advancement of Oregonians.

WIOA requires that these grants serve and prepare adults, youth and dislocated workers who are facing serious barriers to employment for participation in the labor force by providing job training and other services that will result in increased employment and earnings, increased educational and occupational skills, and decreased dependency on public support systems, thereby improving the quality of the workforce and increasing the competitiveness of Oregonians. WIOA also promotes the use of career pathways and sector partnerships to increase employment in in-demand industries and occupations.

Adults and Dislocated Workers

Services to Adult and Dislocated worker customers include Basic and Individualized Career Services including job search and placement, initial assessment of skill levels, referrals to appropriate programs and services including supportive services, development of an individual employment plan, mentoring and career planning, short term training, internships or work experiences that are linked to careers.

Customers may also receive appropriate Training Services when deemed appropriate, provided through an eligible training provider and linked to in-demand occupations and careers. Emphasis is given to work based learning, on-the-job-training and apprenticeship opportunities.

Performance targets are established to achieve negotiated outcomes in the following areas:

- Employment after 2nd and 4th quarters after exit
- Median Earnings in the 2nd quarter after exit
- Credential attainment rate

Rapid Response System

The purpose of rapid response is to respond to announcements of layoffs and plant closings by quickly coordinating services and providing immediate aid to companies and their affected workers – to ensure rapid reemployment and to minimize the negative impacts of the layoff.

States are required to maintain a Dislocated Worker Unit (DWU) and designate a Rapid Response Coordinator. Both the DWU and Rapid Response Coordinator are housed in OWI. The DWU is responsible for providing technical assistance, staff training, and assistance to local Workforce Development Boards. The unit also works with the local WDBs to ensure they have the infrastructure, strategy development, and policies in place for management and delivery of rapid response services. The DWU is also the point of contact for, and maintains, the federally required Worker Adjustment and Retraining Notification (WARN) Act list, which alerts workers, families, and communities at least 60 days prior to a plant closing or mass layoff.

Layoff aversion is the first strategy of the rapid response system when seeking to avert a layoff or closure. Helping businesses and workers find innovative ways to prevent, or minimize the duration of, unemployment resulting from layoffs. Layoff aversion may be applied, at any time, to intervene and manage transition that occurs within a local community. Rapid Response Teams have a number of Layoff Aversion tools, often used well in advance of formal notice or request, which can assist a company with changes that reduce or completely avoid layoffs: Business Services, Sector Partnerships, Economic Analysis, Incumbent Worker Training, On-the-Job Training, Customized Training, Work Share Program, and Trade Adjustment Assistance for Firms.

Additional Rapid Response strategies and activities are designed to plan for and respond as quickly as possible following an announcement or notification of a permanent closure or mass layoff, a mass job dislocation resulting from a natural or other disaster, or the filing of a Trade Adjustment Assistance (TAA) petition. Rapid Response delivers services to enable dislocated workers to transition to new employment as quickly as possible. Local Rapid Response Teams coordinate with employers, worker representatives, Trade Act and Organized Labor Unions. Required partners include the Oregon Employment Department; Unemployment Insurance and WorkSource Oregon Services, Health Insurance Marketplace and Unions/Trade Act when applicable. These partnerships are essential to providing affected workers correct information. Rapid Response Teams connect with employers within 48 hours of learning about a potential layoff. Rapid Response services provide timely, consistent, and high-quality services to workers and businesses.

Youth

Services provided for youth customers fall into two categories; in school youth (ages 14-21) and out of school youth (ages 16-24).

Youth programs must include the following elements:

- Financial literacy
- Entrepreneurial skills training
- Services that provide labor market and employment information in the local area
- Activities that help youth transition to postsecondary education and training
- Education offered concurrently with and in the same context as workforce preparation activities and training for a specific occupation or occupational cluster

Additionally, 20% of youth funding must be used for work experiences, such as summer and year-round employment, pre-apprenticeship, on-the-job training or internships and job shadowing.

Performance targets are established to achieve negotiated outcomes in the following areas:

- Education or training activities or employment in the 2nd quarter after exit
- Education or training activities or employment in the 4th quarter after exit
- Credential attainment rate

These activities are supported by funds appropriated by the U.S. Department of Labor and can be spent only on these specific activities.

National Dislocated Worker Grants (DWGs)

Additional discretionary funding is also available through the WIOA in the form of National Dislocated Worker Grants (DWGs).

OFFICE OF WORKFORCE INVESTMENTS

DWGs have 2 types of grant opportunities:

1. Economic Recovery
    a. Layoffs- assisting dislocated workers affected by layoffs or closures
    b. Dislocated Service Members- assisting dislocated workers affected by base closures or unit layoffs
    c. Trade Impacted Workers- assisting dislocated workers affected by layoffs or closures that also are certified as affected by US Trade Agreements

2. Disaster Recovery
    a. Emergencies and Disasters- assisting dislocated workers affected by loss of employment due to natural disasters

Workforce General Fund Grant Programs

OWI manages the state's general fund investment in workforce development, administering these funds through three grant programs:

Local Competitiveness Strategies

Local competitiveness strategy grants support the operations and core work of the LWDBs.

Industry Engagement

Industry engagement grants support the LWDBs' sector engagement work. Specifically, these funds support the development and expansion of Sector Partnerships, which are partnerships of companies, from the same industry and in their natural labor market region, with education, workforce development, economic development and community organizations that focus on a set of key priority issues identified by the target industry. Sector Partnerships are business-driven, highly responsive to industry demand and solution-oriented versus program-oriented.

Work Experience

Work experience grants support LWDB-managed programs that provide paid work experiences to job-seekers in their local area.

Oregon Youth Works

Oregon Conservation Corps

The Oregon Conservation Corps (OCC) Program was established for the purposes of reducing the risk that wildfire poses to communities and critical infrastructure, creating fire-adapted communities, and engaging youth and young adults in workforce training. OCC grants funding to organizations across the state to aid in reducing wildfire risk to communities while providing workforce training to the next generation of land managers. The program is overseen by the Oregon Conservation Corps Advisory Board.

Oregon Youth Corp

Oregon Youth Corps (OYC) empowers youth by providing outdoor work and stewardship experiences throughout Oregon. OYC's vision is to see that Oregon's at-risk youth are successful community members engaged in work, stewardship, and lifelong learning.

OYC provides grant funding, training and resources to youth-serving agencies across the state to create training and employment opportunities for Oregon youth. At least 75 percent of youths served by an OYC-funded program must be disadvantaged and or/at-risk youth. OYC funds two types of programs: Summer Conservation Corps and Community Stewardship Corps. The Summer Conservation Corps (SCC) is OYC's largest state-funded program an has a goal of having a local program in each of Oregon's 36 counties.

Oregon Youth Employment Program

The Oregon Youth Employment Program (OYEP) provides meaningful paid work experiences – such as internships, apprenticeships, summer jobs, etc. – and workforce preparation to Oregonians age 16-24. OWI administers this program through grants to local workforce development boards. As part of their OYEP experience, youth will:

- Develop an individualized development plan that outlines work readiness, career, and educational goals,
- Participate in a paid work experience at least 5 weeks in length,
- Receive work readiness instruction, academic support, and be exposed to career pathways in in-demand occupations and targeted sectors.
- Be paid at least minimum wage (or the equivalent) for their time spent working.
- Have access to English language learner and/or accessibility services as needed.

Oregon Department of Human Services Youth Employment Program

Through an interagency agreement with ODHS, OWI administers the Temporary Assistance for Needy Families (TANF) Youth Employment Program (YEP). This program runs year-round in order to create employment experiences for youth in the Job Opportunity and Basic Skills (JOBS) Program. The focus is on TANF eligible teen parents, non-parenting teens, young parents, and TANF related youth in the Child Welfare Independent Living Program and Vocational Rehabilitation Program between the ages of 16-24. OWI grants funds to the nine LWDBs to carry out this program at the local level.

OregonServes

OregonServes is Oregon's state service commission and was created in 1994 to provide Oregonians with a statewide entity to focus service and volunteer efforts, to enhance the ethic of service and voluntarism in the state and provide funds for state-based AmeriCorps programs. As a state commission, OregonServes' mission is to advance volunteerism, service and civic engagement to enrich lives and strengthen Oregon communities. Oregon Volunteers upholds its mission, and the purposes of the Acts, through:

- Administration of AmeriCorps*State funding
- Promotion of national service, volunteerism and civic engagement
- Implementation of a three-year State Service Plan

- Providing disaster response support to include coordinating unaffiliated spontaneous volunteers and donations

The Commission's work is supported and advised by a maximum-25 member board of Governor-appointed commissioners, whose role is to fulfill the statutory responsibilities for state service commissions as authorized by 42 U.S.C. § 12638 and outlined in 45 CFR 2550.50 National and Community Service Trust Act of 1990 as amended by the Serve America Act. The Oregon Volunteer and Community Service Act, passed in 2007, also solidified Oregon Volunteers' role to promote the development of better communities by using citizen participation and volunteerism to foster greater civic responsibility.

In the 2021 program year, OregonServes is funding 9 programs, which place members statewide to provide direct services to local communities in the areas of environmental stewardship, rural community capacity-building, student success, health and social services and more.

Future Ready Oregon

Future Ready Oregon is a historic package that invests in existing successful programs and in innovative equity-focused solutions to bolster recruitment, retention, and career advancement opportunities for historically underserved and underrepresented priority populations. Future Ready Oregon engages community-based and culturally specific organizations as co-creators of solutions to Oregon's complex workforce and talent development challenges. CBOs encounter significant barriers in pursuit of funding. To ensure greater accessibility to the application process, Future Ready Oregon implements strategies such as providing technical assistance for Requests for Applications (RFAs) through providers who have experience with diverse communities, subject matter diversity (including sector-specific experience and regional expertise), and nonprofit management (including grant writing and financial management) experience; hosting webinars and creating detailed, easy-to-navigate FAQs; translating application materials and offering live interpretation at webinars; and providing unfunded applicants the opportunity to receive feedback and learn for future funding opportunities, informing subsequent RFAs.

Additionally, Future Ready Oregon embeds equity-focused and human-centered approaches to grant administration, including utilizing alternative reporting methods, such as video check-ins and qualitative reporting that build stronger partnership with grantees and enable the story receivers (grant administrators) to engage with the stories and histories of families, communities, and cultures; simplifying reporting templates with grantee feedback; offering trauma-informed data collection trainings to acknowledge trauma experienced especially by underserved and marginalized communities, to support data collection strategies to mitigate re-traumatizing participants, and to honor the unique identities and experiences of participants; allowing advance payment of funds; and implementing Communities of Practice to foster collaboration amongst grantees, strengthen networks between workforce and economic development professionals, provide subject matter experts, coaching, and technical assistance to grantees on workforce system and sector strategies, and share field-informed innovation.

Future Ready consists of ongoing general fund programs such as Industry Consortia that have been embedded into OWI's workforce focus, providing sector-specific workforce and talent development expertise as advisory to the state Workforce and Talent Development Board and the Higher Education Coordinating Commission. Future Ready Oregon leveraged short-term (2021-2023 state General Fund) and long-term (federal American Rescue Plan Act) investments to enhance existing successful programs and create opportunities for new and innovative approaches and partnerships. Through grantmaking and strategic initiatives, the HECC is growing a diverse workforce, increasing opportunities for upward mobility, and advancing a more equitable workforce system. Future Ready Oregon centers the needs of historically underserved and underrepresented communities, couples education and training with wraparound supports and services, focuses on key sectors of our economy—healthcare, manufacturing, and technology—and advances a shared

leadership model, building partnerships and facilitating the co-creation of workforce strategies. Future Ready Oregon grants and strategic initiatives support Priority Populations—communities of color, women, low-income communities, rural and frontier communities, veterans, persons with disabilities, incarcerated and formerly incarcerated individuals, members of Oregon's tribes, older adults, and individuals who identify as members of the LGBTQ+ community—and target key industry sectors—healthcare, manufacturing, and technology.

One time, federally funded programs include Prosperity 10,000, funding for Oregon's nine local workforce development boards to expand opportunities for Oregonians to jumpstart and advance their careers in high-demand industries and occupations; Workforce Benefits Navigators, funding for Oregon's nine local workforce development boards to establish pilot programs that work to connect job-seekers from Priority Populations to workforce programs and help training participants and job-seekers find services and supports for everyday needs such as transportation, food programs, and childcare; and Workforce Ready Grants, competitive grants awarded to workforce service providers and community-based organizations for capacity building, program development, and administering workforce programs in healthcare, manufacturing, and technology that aim to close gaps in educational attainment and employment by centering the needs of historically underserved and underrepresented students by coupling education and training supports with wraparound services.

OFFICE OF WORKFORCE INVESTMENTS
ESSENTIAL PACKAGES

Essential Packages

The Essential Packages estimates the cost to continue current legislatively approved programs into the 2025-27 biennium, as well as other adjustments outside of the Policy Package process. The totals of all Governors Recommended Budget packages are represented below and detailed under each essential package category.

General Fund	$16,860,139
Other Funds	$(117,934,974)
Lottery Funds	$0
Federal Funds	$7,635,722
Total Funds	$(123,245,045)

Package 010: Vacancy Factor and Non-PICS Personal Services

This package includes standard 4.2 percent inflation on non-PICS Personal Service & Vacancy Factor, to include Temporary Appointments, Overtime Payments, All Other Differential, Public Employees Retirement System, Pension Obligation Bond Repayment and Social Security. The Vacancy Savings calculation methodology is provided by the Department of Administrative Services.

General Fund	$17,460
Other Funds	$(55,352)
Lottery Funds	$0
Federal Funds	$(106,349)
Total Funds	$(144,241)

Package 021: Phase in

Package 021 identifies budget adjustments resulting from program phase-ins for budget items funded for less than 24 months during a biennium.

There are no phase-ins for this program.

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

OFFICE OF WORKFORCE INVESTMENTS
ESSENTIAL PACKAGES

Package 022: Phase out

Package 022 identifies decreased costs from the elimination of programs and other one-time funded costs.

General Fund	$(14,086,500)
Other Funds	$(118,758,091)
Lottery Funds	$0
Federal Funds	$0
Total Funds	$(132,844,591)

Package 031: Standard Inflation and State Government Service Charges

The standard inflation factors is provided by the Department of Administrative Services as follows:

- Services and Supplies and Capital Outlay, by the standard 4.2 percent
- Non-state employee and Professional Services costs by the standard 6.8 percent
- Facilities rent by the standard 4.2 percent or adjusted to the Self Support rent rates at 5.2
- Attorney General costs by the allowable 23.26 percent

This package increases Services & Supplies by the standard 4.2 percent and non-state employee and Professional Services costs by the standard 6.8 percent inflation rates. The hourly rate for Attorney General costs are increased by 23.26 percent. The package also adjusts costs for changes in State Government Service Charges.

General Fund	$817,567
Other Funds	$548,230
Lottery Funds	$0
Federal Funds	$4,896,766
Total Funds	$6,262,563

OFFICE OF WORKFORCE INVESTMENTS
ESSENTIAL PACKAGES

Package 032: Above Standard Inflation

Above standard inflation factors are provided by the Department of Administrative Services for certain relevant items.

General Fund	$301,101
Other Funds	$331,186
Lottery Funds	$0
Federal Funds	$2,848,937
Total Funds	$3,481,224

Package 050: Fund Shifts

Package 050 is for significant revenue changes in existing programs. There are no fund shifts for this program.

There are no Fund Shifts for this program.

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

Package 060: Technical Adjustments

Package 060 is used for technical budget adjustments, such as agency reorganizations and expenditure category shifts. Use of this package requires prior approval by the CFO analyst.

General Fund	$0
Other Funds	$0

Total Funds	$0

OFFICE OF WORKFORCE INVESTMENTS
ESSENTIAL PACKAGES

Package 090: Analyst Adjustments

Package 090 eliminates the National Career Readiness Certificate (NCRC) program required by Oregon Revised Statute 660.343. The program certifies workplace and college readiness skills of Oregonians for continued education and workforce training. This package also includes a $5,000,000 investment for pre-apprenticeships and $25,663,287 for the Behavioral Health Initiative workforce.

General Fund	$29,858,648
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$29,858,648

Package 092: Statewide AG Adjustment

Package 092 reduces Attorney General rates by 7.47 percent to reflect adjustments in the Package Description Governor's Budget.

General Fund	$(1,327)
Other Funds	$0
Lottery Funds	$0
Federal Funds	$(1,658)
Total Funds	$(2,985)

Package 093: Statewide Adjustment DAS Charges

Package 093 represents adjustments to State Government Service Charges and DAS pricelist charges for services made in the Governor's Budget

General Fund	$(46,810)
Other Funds	$(947)
Lottery Funds	$0
Federal Funds	$(1,974)
Total Funds	$(49,731)

Executive Director's Office

Policy Option Package 104 – *Future Ready Oregon (SB 1545, 2022) ARPA Reauthorization*

Purpose: To re-authorize $62.5M in OF expenditure limitation authority for Future Ready Oregon implementation in 25-27. All funding appropriated for Future Ready Oregon in 2022 will be obligated by the end of this year (2024). While project implementation will continue through 2026 and be administered and funded with federal dollars coming to HECC from Department of Administrative Services, new state funding would be necessary to continue this investment through the 25-27 biennium and into the future.

Justification and Solution/How Achieved: Oregon continues to experience significant workforce shortages – and struggles to take advantage of workforce opportunities – in industries and occupations that are critical to equitable prosperity for all Oregonians. Workforce-related priorities, programs, and other initiatives across the state are not always well-aligned, resulting in a workforce system that is often fragmented, inequitable, and difficult to navigate.

To promote sustained economic growth across Oregon, partners must work together to center the needs of underserved and underrepresented Oregonians, align workforce education and training opportunities, and provide comprehensive supports and services that enable individuals to complete trainings and move into high-wage jobs in key industry sectors. These proposed investments integrate proven best practices from Future Ready Oregon programs, continuing to contribute to a more unified, equitable, and accessible workforce system. Furthermore, these program investments align with recent case studies and research on promising practices in workforce development and training including:

- Centering the needs of historically underserved and underrepresented communities through inclusive partnerships
- Flexible funding
- Innovative education delivery and comprehensive student/learner supports that meet students where they are
- Focusing on key sectors of statewide importance
- Systems alignment at the state (policy priorities) and local/regional (program implementation) levels

Equity Impact: Future Ready Oregon advances a more equitable workforce system by centering the education and employment needs of historically underserved and marginalized Oregonians. This involves grantmaking that supports inclusive, culturally specific, and linguistically appropriate initiatives that address systemic barriers faced by Oregon's priority populations, provides critical support to participants, and creates pathways to good-paying jobs in Oregon's key industry sectors. Future Ready Oregon recognizes that advancing a diverse workforce system requires operationalizing a new approach and doing things differently.

Equity in Process Improvements and Engaging Diverse Communities
Future Ready Oregon engages community-based and culturally specific organizations as co-creators of solutions to Oregon's complex workforce and talent development challenges. CBOs encounter significant barriers in pursuit of funding. To ensure greater accessibility to the application process, Future Ready Oregon implements strategies such as providing technical assistance for Requests for Applications (RFAs) through providers who have experience with diverse communities, subject matter diversity (including sector-specific experience and regional expertise), and nonprofit management (including grant writing and financial management experience); hosting webinars and creating detailed, easy-to-navigate FAQs; translating materials and offering live interpretation at webinars; and providing unfunded applicants the opportunity to receive feedback and learn for future funding opportunities, informing subsequent RFAs.

Additionally, Future Ready Oregon embeds equity-focused and human-centered approaches to grant administration, including utilizing alternative reporting methods, such as video check-ins and qualitative reporting that build stronger partnership with grantees and enable the story receivers (grant administrators) to engage with the stories and histories of families, communities, and cultures; simplifying reporting templates with grantee feedback; offering trauma-informed data collection trainings to acknowledge trauma experienced especially by underserved and marginalized communities, to support data collection strategies to mitigate re-traumatizing participants, and to honor the unique identities and experiences of participants; allowing advance payment of funds; and implementing Communities of Practice to foster collaboration amongst grantees, strengthen networks between workforce and economic development professionals, provide subject matter experts, coaching, and technical assistance to grantees on workforce system and sector strategies, and share field-informed innovation.

Equitable Impacts for Individuals
In its first year of implementation, Future Ready Oregon programs served 9,441 participants, 92% identifying as a member of at least one priority population (among those who reported such data) and 62% identifying as a member of at least two priority populations. Programs also served higher proportions of members of priority population participants than the proportion of those members that comprise the labor force, including young people, Black/African Americans, Latino/a/x/Hispanics, Native American/Alaskan Natives, Native Hawaiian/Pacific Islanders, multi-racial people, women, and rural and frontier populations.

Future Ready Oregon's flexible funding, coupled with Workforce Innovation and Opportunity Act (WIOA) funds, enables local workforce development boards to expand their training partners to meet the needs of participants and improve outcomes. This grows their provider ecosystem, which can move quickly from initial contact to plan development to a wide range of services, which has been especially important for priority populations who may have different needs. Future Ready Oregon funding has been blended and braided with WIOA funds for more comprehensive and responsive services, including paid work experience and internships as well as partnership-building with industry, community-based organizations, and training providers. WIOA prioritizes recipients of public assistance, individuals who are deficient in basic skills, or those who are low-income in addition to veterans and eligible spouses and seeks to serve those populations most in-need. The priority populations connected with WIOA-funded services are aligned and complimentary with Future Ready Oregon; however, WIOA is more restrictive and is intended to be a "last dollar" resource. Leveraged WIOA resources will further equity priorities, but their relatively small size and restrictive nature present potential barriers to equity priorities.

Staffing Impact: The positions outlined below are requested to ensure the success of each program.

Reauthorize $62.5 million in OF expenditure limitation authority for 2025-2027, and 7.50 Full-Time Equivalent position authority, including 10.0 FTE for the first 18 months of the biennium (7/1/25-12/31/26): (1) EPM2/EPA1, (1) OPA4/EPM2, (1) OPA3, (5) PA3, (1) AS2, (1) OS2.

Outcomes/Performance Measures/Benchmarks: Assessment measures include:

- The number of individuals from priority populations who have registered for and who have completed a workforce program;
- Data on job placement rates, wages and salary earnings and health and retirement benefits provided for individuals who participated in an established program;
- A description of any new or expanded workforce programs, including training programs, career pathway programs and apprenticeship and preapprenticeship training programs, and
- The types and amounts of any wraparound supports and services provided to individuals from priority populations.

By December 31 of each year, the commission shall prepare and submit a report that includes the information, disaggregated by race, age, gender and geographical area, including any recommendations for future investments and opportunities to leverage private and federal funding to support investments, to the Governor and to the interim committees of the Legislative Assembly related to workforce development.

Revenue Source: Reauthorizes $62.5M in OF expenditure limitation authority.

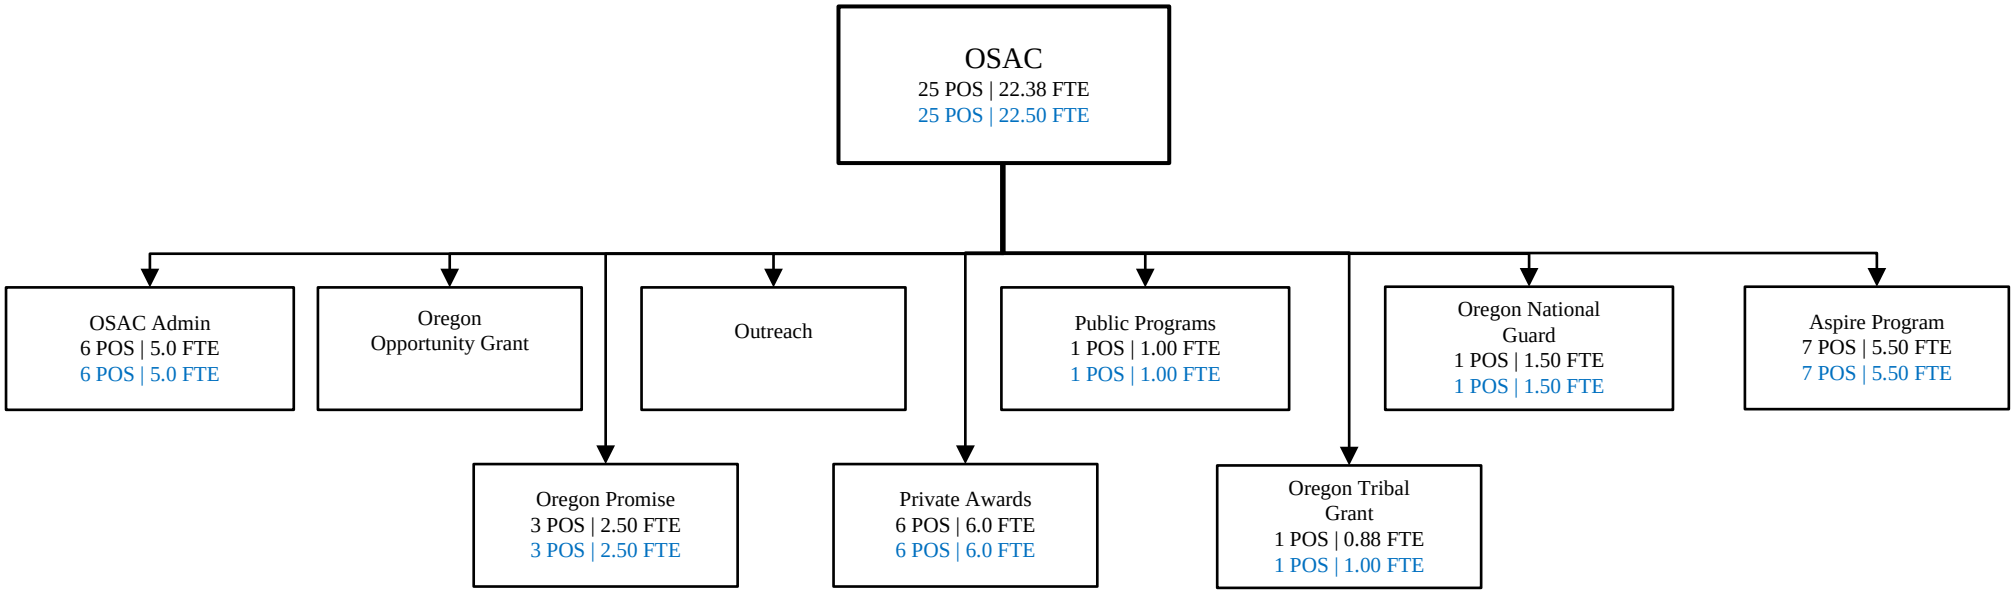
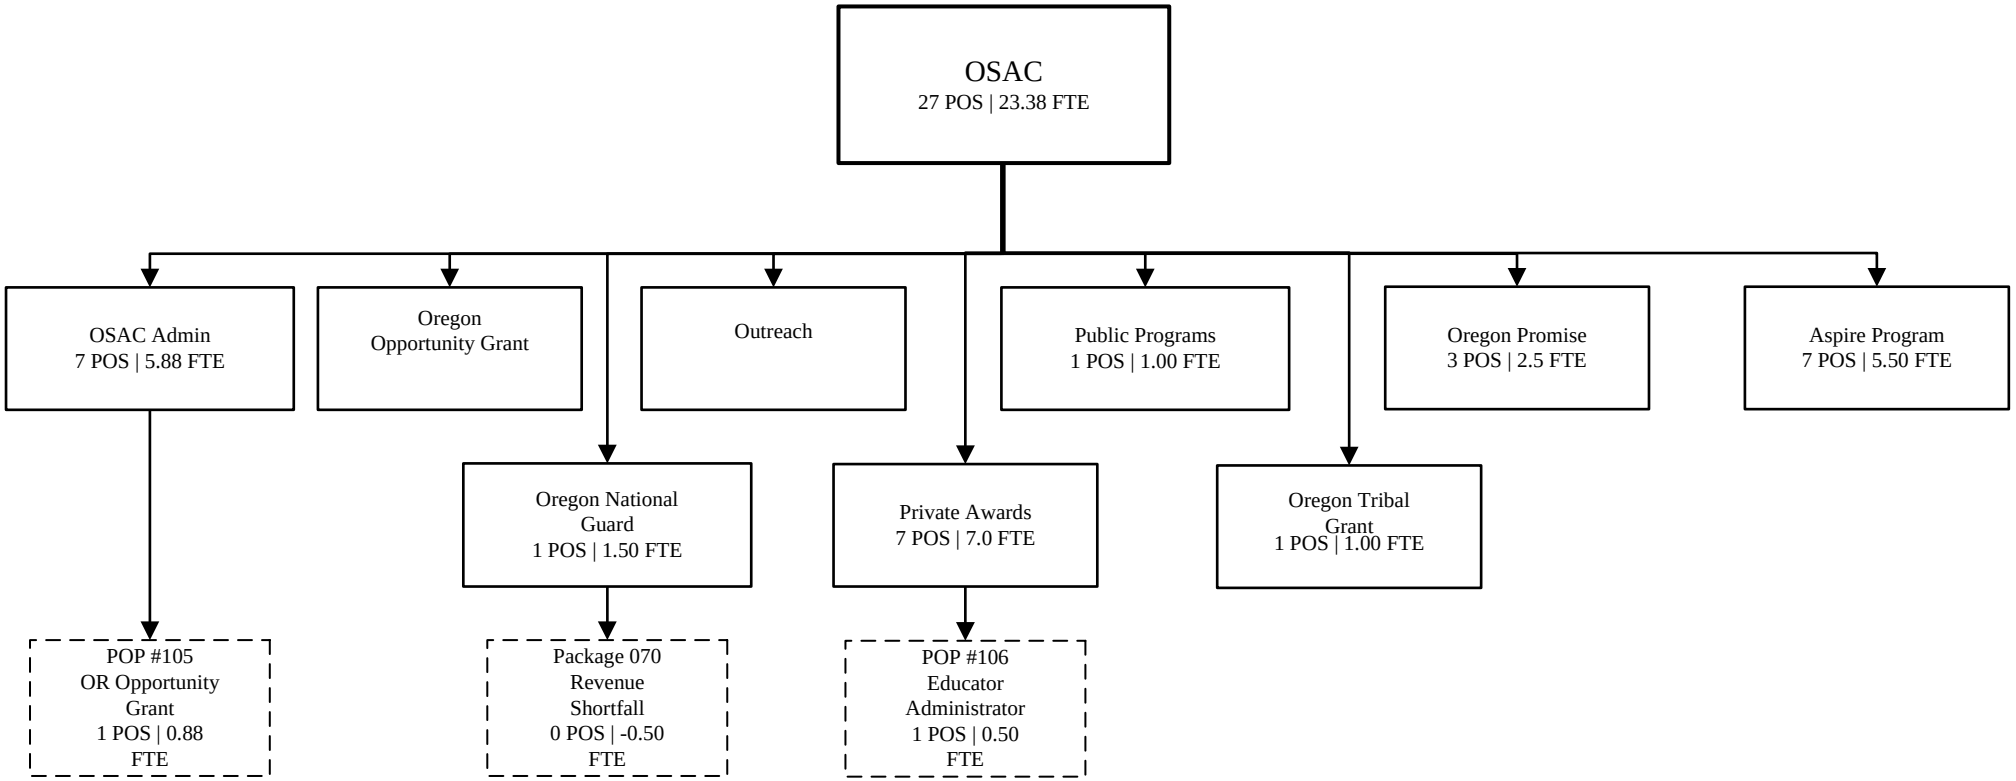
Student Access and Completion

HIGHER EDUCATION COORDINATIONG COMMISSION
OSAC 23-25 LAB to 25-27 CSL



HIGHER EDUCATION COORDINATIONG COMMISSION
OSAC 25-27 GRB



OFFICE OF STUDENT ACCESS & COMPLETION

The Office of Student Access & Completion (OSAC)

Is committed to assisting Oregonians in their pursuit of higher education and a brighter future. Established in 1959 by the Oregon Legislature as the Oregon State Scholarship Commission, OSAC continues to provide innovative funding and programs to Oregon students and families.

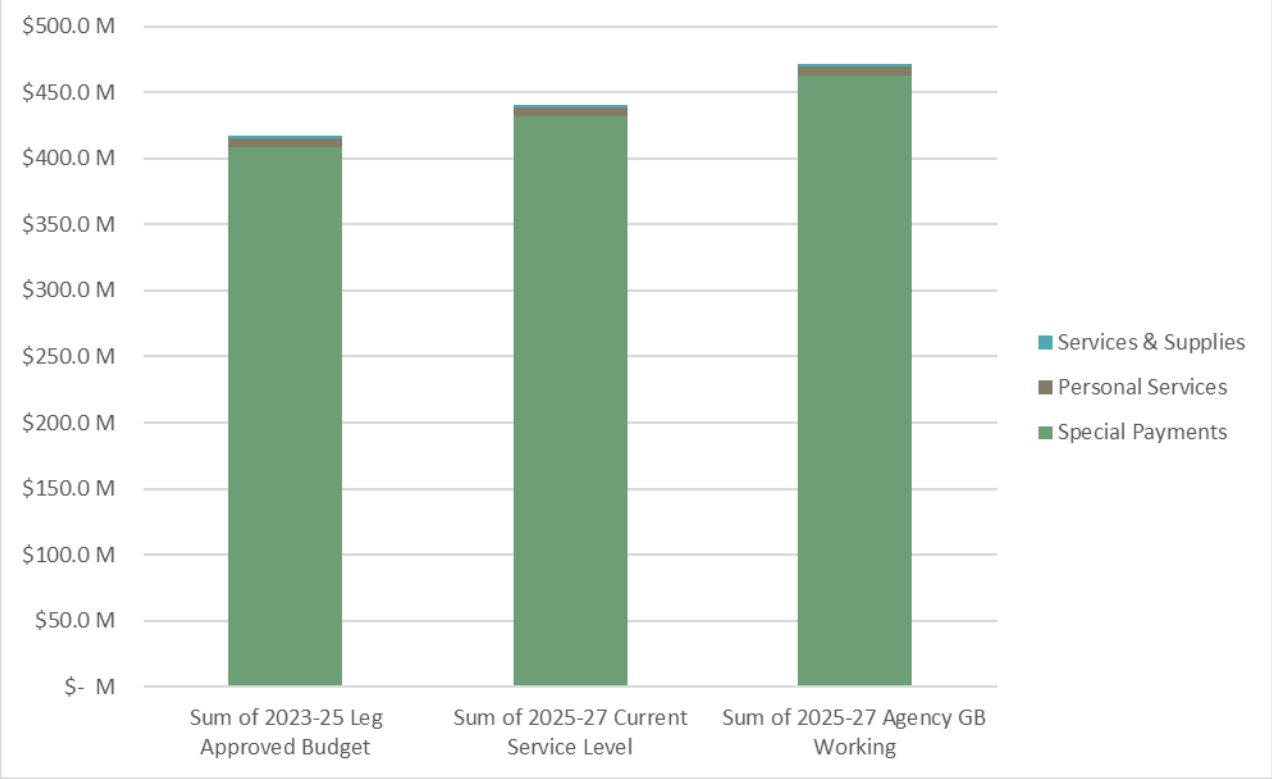
OSAC's many programs include government grants, private scholarships, outreach activities, and mentoring programs to help students with college and career choices. Prominent public grant programs supported by state and/or federal funds that serve approximately 60,000 Oregon residents annually include the Oregon Opportunity Grant (OOG), the Oregon Promise Grant, the Chafee Education and Training Grant for former foster youth, the Oregon Student Child Care Grant, the Oregon National Guard State Tuition Assistance program, the new Oregon Tribal Student Grant, along with several small programs serving targeted groups. In addition to administering government grant programs, OSAC works with a variety of private foundations, membership organizations, private donors, and community groups to administer more than 600 privately funded scholarship programs. OSAC also supports the ASPIRE student mentoring program and provides outreach services, and financial aid publications statewide.

OSAC serves a wide user base including: students, financial aid offices, colleges and universities, high schools, middle schools, outreach sites, state and federal agencies, community based organizations, ASPIRE coordinators and volunteers, stakeholders, donors, Oregon financial aid applicants, the Oregon Legislature, and the Higher Education Coordinating Commission as a whole. The office receives, processes, and stores sensitive data submitted in the Free Application for Federal Student Aid (FAFSA) for more than 350,000 Oregon residents each year. It also supports multiple web portals, online applications, and reporting systems for the many programs it administers.

Funding Request

For 25-27 OSAC is requesting CSL for the majority of its Programs. For OOG, Policy Option Package (POP) 105 requests an increase of $ 25,083,905 and an additional staff member. OSAC also expects to take over the administration and funding of the Oregon Administer Scholarship Program from the Oregon Teachers Scholar Program through POP 106.

OFFICE OF STUDENT ACCESS & COMPLETION



Privately Funded Scholarship Programs

OSAC administers more than 600 individual privately funded scholarship programs to help make college more affordable for Oregon students. Applicants can apply for numerous scholarships by using one common electronic application and submit their entire application and required support documents online at www.OregonStudentAid.gov. In partnership with The Oregon Community Foundation, private individuals, employers, banks, and membership organizations, OSAC coordinates the application and awarding processes. Some of these scholarships are based on merit and achievement; others are based on need and focus on underserved populations, such as low-income students, adult learners, and first-generation college students. The range of scholarship programs administered by OSAC includes irrevocable trust, partner organizations, annual "pass-through" programs, and employer programs. A partnership of private funds and public administration of this magnitude is unique among all the states.

- Private donors contributed over $13 million in scholarships to 4,832 students in 2021-22.
- OSAC continues to see growth in the number of scholarship programs as well as the number of recipients and total dollars awarded.
- More than 13,000 scholarship applications were submitted for the 2021-22 academic year.

State and Federal Grant and Scholarship Programs

A. Oregon Opportunity Grant (state program)

Established in 1971, the Oregon Opportunity Grant (OOG) is Oregon's largest and oldest state-funded, need-sensitive grant program to help Oregon students with the greatest financial need attain a postsecondary education. Each year, the program helps around 40,000 low-income undergraduate Oregon residents pay for a portion of their college expenses at an Oregon community college, Oregon public university, or Oregon-based private nonprofit 4-year institutions. Oregon students apply for the Opportunity Grant by completing the Free Application for Federal Student Aid (FAFSA), which is also the application for Federal Pell Grants and Federal Direct Student Loans. Undocumented Oregon residents who are not eligible for federal student aid can complete an alternative to the FAFSA, the Oregon Student Aid Application (ORSAA), to apply for the grant. Students may receive the grant for the equivalent of 12 quarters or 8 semesters at full-time enrollment; grants are prorated for partial-year or half-time enrollment. To remain eligible for the grant, students must maintain satisfactory academic progress and meet all federal Title IV eligibility requirements, including having no student loan defaults or owing a refund of federal student grant funds. In 2021-22, 38,471 students received OOG funds, totaling more than $89.7 million.

Grant awards are calculated according to a percentage of the total cost of attendance by school sector. In addition, legislation passed in 2015 required OSAC to prioritize OOG awards according to financial need, using a student's Expected Family Contribution (EFC) as the key indicator of the student's financial need. The EFC is calculated according to a federal needs analysis formula that considers the income and financial assets of the student and student's family, if applicable, along with key demographic components such as household size and number in college. The same 2015 legislation also guaranteed a second year of grant eligibility for students who meet several additional requirements.

Due to funding constraints, the number of students who might have been eligible for an OOG award was much greater than the number of students who actually received an award (see figure 1). In order to control costs and equitably serve the students with the greatest financial need, OSAC considered a student's income level, their EFC or the date they filed the FAFSA/ORSAA and awarded those who met the cutoff criteria each year. Furthermore, not every applicant who might have been eligible for an OOG award attended an eligible Oregon school, resulting in fewer students receiving the award than the number who met eligibility criteria.

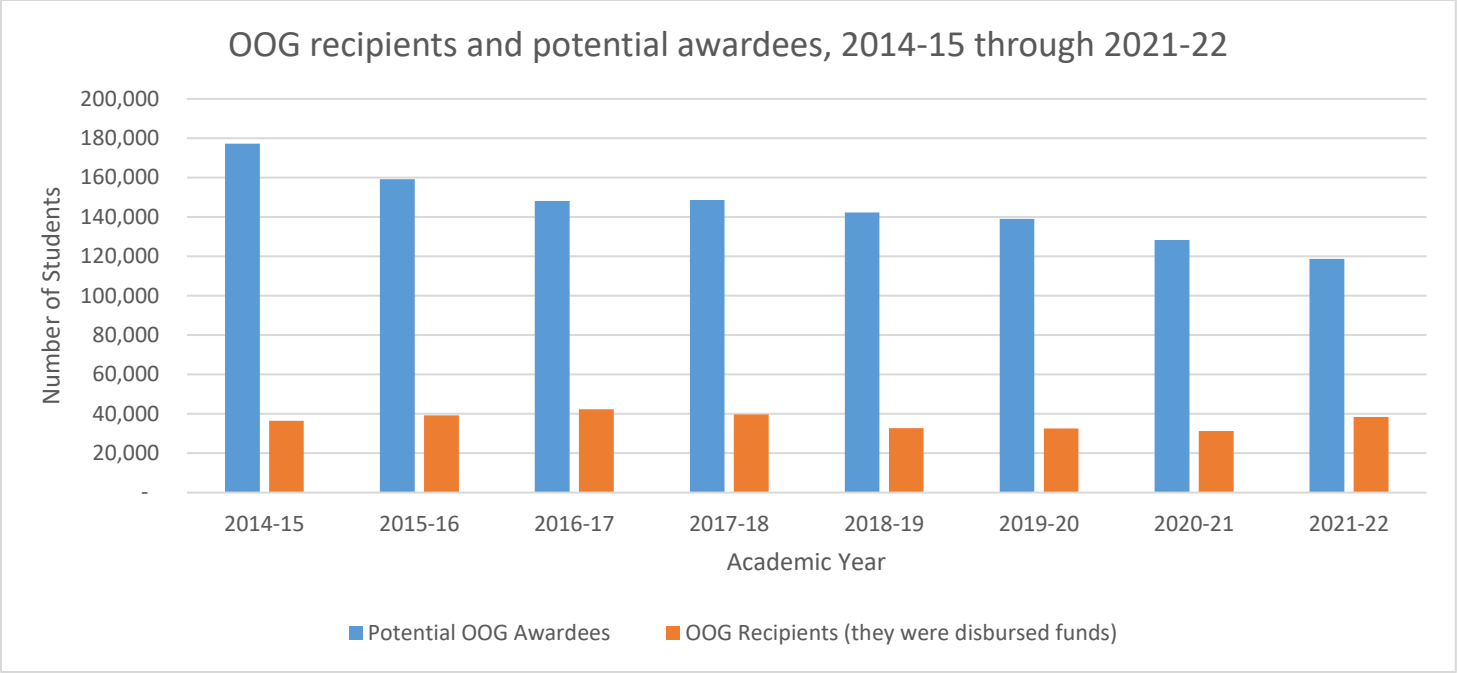


Figure 1. Number of OOG recipients and FAFSA/ORSAA filers with financial need, 2014-15 through 2021-22.

***Prioritized OOG Awards for* Former Foster Youth–** House Bill 3471 from the 2011 Legislative Session required OSAC to prioritize awarding of Oregon Opportunity Grants for identified foster youth. OSAC works with the Oregon Department of Human Services (DHS) to identify those former foster youth who are eligible for the grant. OSAC has set aside OOG funds so foster youth will continue to be awarded during the year even though funds are depleted for all other students. In 2021-22, 218 former foster youth received OOG funds totaling $664,804.

B. Oregon Promise Grant (state program)

Oregon Promise is a state grant established in 2015 that helps to cover most tuition costs at any Oregon community college for recent high school graduates and GED® test graduates. Oregon Promise grant funds are available until the student has attempted a *total of 90 college credits*. There is no limit to the number of years or terms the student can receive the grant, providing the student has not yet reached the 90-credit limit and continues to maintain satisfactory academic progress. To qualify, students must be an Oregon resident and enroll at least half time at an Oregon community college within 6 months of graduation. Applicants must also meet other eligibility criteria, including completing an Oregon Promise Grant application by their appropriate deadline, filing a FAFSA or ORSAA, and having a cumulative high school GPA of 2.0 (2022) or a GED® score of 145 or higher one each test. In 2020-21, nearly 8,950 eligible students received Oregon Promise funds totaling $14.6 million, which was impacted by a $3.6 million legislative budget cut.

Eligible individuals who obtain their high school diploma or GED® test credential while incarcerated or in custody in an Oregon correctional facility can receive the Oregon Promise grant upon release. Passed in 2020, Senate Bill 1605 expanded eligibility to support eligible Oregon foster youth who obtain their high school diploma or GED® test credential while in out-of-state placements.

Passed in 2021, Senate Bill 1522 implemented equity-focused changes starting the 2022-23 academic year. The GPA requirement has been lowered to a cumulative, unweighted 2.0 GPA, the $50 per term co-pay has been removed, and the minimum award will increase from $1,000 to $2,000 for full-time, full-year students, and it will increase at the same rate as the maximum award each year. Also, the First-Year Experience will no longer be a requirement to renew the Oregon Promise Grant.

C. Oregon National Guard State Tuition Assistance (state program)

The Oregon National Guard State Tuition Assistance (ONGSTA) program was created by the Oregon Legislative Assembly in 2018. The program provides funding for tuition at Oregon community colleges, public universities, OHSU, and eligible private institutions for current members of the Oregon National Guard (ONG). The ONGSTA program was originally designed as a "last dollar" program, which means that award calculations first consider all other federal and state grant aid and federal/military tuition assistance the member may be eligible to receive. During the 2021 legislative session, Senate Bill 101 restructured the awarding process. The new awarding structure, implemented during the 2022 winter term, allows the ONGSTA program to be first pay after Department of Defense Federal Tuition Assistance funds have been applied towards student's tuition balance. The bill also allows the HECC to determine a fee award structure and a book allowance. Active ONG members who meet the eligibility criteria, have completed basic training, and have not yet earned a baccalaureate degree or higher may receive funds to pay for up to 90 credits at an Oregon community college or up to 180 credits at an Oregon public university, Oregon Health and Science University, or a qualifying private institution that meets the criteria set forth in ORS 348.597(2). To apply for the grant, ONG members must submit the ONGSTA application, complete and submit the FAFSA, and apply for DoD Federal Tuition Assistance (FTA) if eligible. The Oregon Legislature allocated $3.7 million in General Fund monies for the 2019-2021 biennium which was reduced to $2.5M during a 2020 emergency legislative session. In 2021-22, 283 students received ONGSTA funds totaling $587,548.

D. Oregon Student Child Care Grant (state program)

The Oregon Student Child Care Grant assists student-parents who are enrolled in postsecondary education with safe, dependable child care that supports their children's development while allowing completion of the parents' academic programs. Priority in awarding is given to prior-year recipients who have not exhausted their maximum eligibility, who maintain satisfactory academic progress as determined by their postsecondary institution and criteria set forth by OSAC, and who continue to use an eligible child-care provider. For the 2020-21 academic year, there were approximately 300 valid applications, but only 98 students received an award. Total Student Child Care Grant awards amounted to $622,066. Demand far exceeds the resources available to grant all eligible parents an award or cover the actual cost of child care expenses for grant recipients. Demand far exceeds the resources available to grant all eligible parents an award.

E. JOBS Plus (state program)

Created in 1993 as part of Oregon's welfare reform effort, the JOBS Plus Program makes it possible for eligible participants to receive funding for future educational expenses through Individual Education Accounts (IEA). Employers contribute $1 for every hour that a JOBS Plus participant works in a

subsidized job. Funds are transferred to OSAC when participants have been in an unsubsidized job for at least 30 days. OSAC holds these funds for the participant or immediate family members to use for up to five years. After five years, the IEAs expire, and any unused funds are moved to the fund for Oregon Opportunity Grants. Roughly 30 participants will have IEAs established for them during the coming biennium. Approximately two-thirds of all funds redeemed through the program are used at Oregon's community colleges and four-year universities. In 2021-22, a total of 5 JOBS Plus participants received $3,301.79 in IEA Funds to pay for educational expenses. While participants can use funds for educational expenses, many participate in the JOBS program to get back into the workplace.

F. Scholarships for the Dependent Children of Deceased and Disabled Public Safety Officers (state program)

OSAC has administered the DDPSO program since 1977. Under this program, scholarships are available for dependent children of a public safety officer, reserve officer, or volunteer firefighter, as defined by ORS 243.954, who suffered death or permanent total disability in the line of duty. The program has been funded through the Oregon Opportunity Grant Program for many years, but 2018 legislative changes established a new funding source for the future – 10% of the proceeds from civil forfeitures. OSAC continues to support the program through the OOG funding in the event of insufficient funding from forfeiture proceeds Students apply for the program by completing the FAFSA or ORSAA, along with a separate application. The student's award amount is equal to the amount of tuition and all standard fees levied by the institution of higher education against the student and reduced by any state or federal grant aid the student may have received. There is no application deadline for this program, so students can apply and receive award funds at any time during the academic year. In 2020-21, OSAC awarded scholarships to 11 students totaling $101,138 during the academic year.

G. Oregon Teacher Scholars Scholarship Program (state program)

Created in 2017 by the Oregon Legislature through a partnership with the Oregon Department of Education and the Chief Education Office, this scholarship program provides awards to culturally or linguistically diverse students who are enrolled in a preliminary teacher licensure program approved by the State of Oregon. Eligible students apply through the OSAC scholarship application and are awarded a maximum of $10,000 per year for up to two years. In 2020-21 this scholarship was awarded to 173 eligible students who received a total of $690,000.

H. Chafee Education and Training Voucher program (federal program)

OSAC and the Department of Human Services' Independent Living Program administer the Federal Chafee Education and Training Voucher Program for the benefit of Oregon's current and former foster youth under a partnership established in 2003. Eligible youth may apply year-round via OSAC's Student Portal. Each youth is eligible to receive a maximum award of up to $5,000 per academic year, although actual award amounts may vary year-to-year. To be eligible, both former and current foster youth must meet Federal criteria. In 2021-22, 251 former foster youth claimed total awards of $1,002,375.00.

I. Oregon Tribal Student Grant (state program)

The Oregon Tribal Student Grant is a new state financial aid program supported by the Oregon Legislature's 2022 historic investment in equitable college access and success for tribal students. The Oregon Tribal Student Grant is expected to pay for most or all public undergraduate college-related expenses—including tuition, housing, books, and other costs not covered by other grants—for eligible students who are enrolled members of Oregon's nine federally recognized Tribes and pursuing their first associate, bachelor's, or graduate degree. The grant is intended to cover the average cost of undergraduate attendance after all federal and state grants/scholarships have been applied. The Oregon Tribal Student Grant is currently only funded for the 2022-2023

academic school year. Renewal of the grant is dependent on funding being allocated by the Oregon state legislature. By August 1, 2022, OSAC received over 500 applications. The grant is expected to support 700 students for the 2022-23 aid year.

Outreach and ASPIRE Programs

OSAC's statewide outreach activities provide information about financial aid programs and career and college-planning tools through trainings, presentations, publications, a student portal, applications, ASPIRE sites, outreach events, and social media.

ASPIRE

The ASPIRE program helps educate Oregon students to become career and college ready. ASPIRE offers education, resources, and mentoring opportunities for all students at participating sites. Student supports include 1:1 and group mentoring, activities or events that focus on career exploration, career and college research, admissions applications, scholarships, and financial aid. The program is designed to create a career and college readiness culture in middle schools, high schools, and community-based organizations (CBOs) statewide and is currently in more than 155 sites across Oregon. More than 1,100 mentors and 10,000 students participate each year.

ASPIRE staff develop and maintain information, resources, and trainings for Site Coordinators (who manage the program at each site), mentors (who work directly to support students), students, and families. The program provides printed materials, online resources and information, and in-person presentations and trainings to engage students and families around financial aid and postsecondary planning, train mentors on content to support students, and inform coordinators on how to recruit and train mentors for all participating sites. ASPIRE staff train new Site Coordinators and act as the primary OSAC customer service contact for the sites for the ASPIRE program. They also support sites through community outreach and increase program fidelity through oversight, data collection and data-sharing. Finally, ASPIRE provides annual educational opportunities for participating sites: a statewide conference for Site Coordinators and mentors, which offers training delivered by postsecondary access partner organizations, and regional meetings that bring together Site Coordinators from the various regions of the state to learn from each other about how best to engage students and volunteers in their local program.

OFFICE OF STUDENT ACCESS & COMPLETION
ESSENTIAL PACKAGES

Essential Packages

The Essential Packages estimates the cost to continue current legislatively approved programs into the 2023 – 2025 biennium. The total of all current service level packages are represented below and detailed under each essential package category.

General Fund	$87,897,986
Other Funds	$(35,491,109)
Lottery Funds	$(26,185,931)
Federal Funds	$(5,466)
Total Funds	$26,215,480

Package 010: Vacancy Factor and Non-PICS Personal Services

This package includes standard 4.2 percent inflation on non-PICS Personal Service & Vacancy Factor, to include Temporary Appointments, Overtime Payments, All Other Differential, Public Employees Retirement System, Pension Obligation Bond Repayment and Social Security. The Vacancy Savings calculation methodology is provided by the Department of Administrative Services.

General Fund	$176,707
Other Funds	$(38,312)
Lottery Funds	$0
Federal Funds	$(5,466)
Total Funds	$132,929

Package 021: Phase in

Package 021 identifies budget adjustments resulting from program phase-ins for budget items funded for less than 24 months during a biennium.

There are no phase-ins for this program.

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

OFFICE OF STUDENT ACCESS & COMPLETION
ESSENTIAL PACKAGES

Package 022: Phase out

Package 022 identifies decreased costs from the elimination of programs and other one-time funded costs.

General Fund	$(5,000,000)
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$(5,000,000)

Package 031: Standard Inflation and State Government Service Charges

The standard inflation factors are provided by the Department of Administrative Services as follows:

- Services and Supplies and Capital Outlay, by the standard 4.2 percent
- Non-state employee and Professional Services costs by the standard 6.8 percent
- Attorney General costs by the allowable 23.26 percent

This package increases Services & Supplies by the standard 4.2 percent and non-state employee and Professional Services costs by the standard 6.8 percent inflation rates. The hourly rate for Attorney General costs are increased by 23.26 percent. The package also adjusts costs for changes in State Government Service Charges.

General Fund	$16,515,420
Other Funds	$4,233,687
Lottery Funds	$6,902,000
Federal Funds	$0
Total Funds	$27,651,107

OFFICE OF STUDENT ACCESS & COMPLETION
ESSENTIAL PACKAGES

Package 032: Above Standard Inflation with CFO Analyst Approval

This package includes the amount above the inflation in package 031 for a limited set of factors including:

- Medical services inflation such as Oregon Health plan provider expenditures, amounts above standard inflation up to 5.6 percent
- DAS Price list items that are usage-based such as motor pool and printing services
- Non-state employee and Professional Services as applied to Special Payments, amounts above standard inflation up to 6.8 percent

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

Package 050: Fund Shifts

Package 050 is for significant revenue changes in existing programs. There are no fund shifts for this program.

General Fund	$72,765,360
Other Funds	$(39,686,429)
Lottery Funds	$(33,078,931)
Federal Funds	$0
Total Funds	$0

Package 060: Technical Adjustments

Package 060 is used for technical budget adjustments, such as agency reorganizations and expenditure category shifts. Use of this package requires prior approval by the CFO analyst.

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

OFFICE OF STUDENT ACCESS & COMPLETION
ESSENTIAL PACKAGES

Package 090: Analyst Adjustments

Package 090 reduces travel, computer replacement frequency and contract services ($114,229). The package also increases investments in the Oregon National Guard Student Tuition Assistance grant ($1,100,000) and the Oregon Tribal Student grant ($2,500,000) - both increases are intended to be ongoing..

General Fund	$3,485,771
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$3,485,771

Package 092: Statewide AG Adjustment

Package 092 reduces Attorney General rates by 7.47 percent to reflect adjustments in the Governor's Budget

General Fund	$(730)
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$(730)

Package 093: Statewide Adjustments DAS Changes

Package 093 represents adjustments to State Government Service Charges and DAS pricelist charges for services made in the Governor's Budget

General Fund	$(44,542)
Other Funds	$(55)
Lottery Funds	$0
Federal Funds	$0
Total Funds	$(44,597)

Office of Student Access and Completion (OSAC)

Policy Option Package 105 – Oregon Opportunity Grant

Purpose: To provide student assistance to the highest need students, the Oregon Opportunity Grant (OOG) serves adult learners seeking to return and complete a credential, as well as traditional pipeline/fresh out of high school students. A permanent increased investment in OOG budget is required to provide students the base financial support needed to cover rising costs and maintain student purchasing power. With an increased OOG budget, the access and flexibility provided to OOG students during the 2021-23 and 2023-25 biennia could continue.

Justification: Oregon Opportunity Grant levels remain insufficient to fully award needy students. There are equity challenges and increasing affordability gaps associated with student financial aid. As the cost of attending colleges and universities has significantly increased over the past decade, the ability to pay for higher education has become a larger issue for more students.

The Oregon Opportunity Grant (OOG) only serves a small fraction of eligible students. Students receiving these grants face significant affordability challenges. Even with grants and scholarships, more than three-fourths of OOG recipients at public universities and half at the community colleges cannot afford to pay for their higher education according to the 2021 OOG program report.

Solution/How Achieved: Increase investment in the OOG, by at-least $25M would allow for continued assistance to the highest need students, settle into the transition to the new FAFSA SAI score which increased the pool of high need students, help restore purchasing power for the lowest income/highest need students, help extend the FAFSA/ORSAA filing deadline, sustain efforts to provide waivers to eligible students who enroll late in the year, and implement desired legislative reforms to increase equitable access. Related legislative reforms would remove the shared responsibility model, a dated and unutilized financial aid award model from statute, ensure that all resident Oregon students can access OOG. The following LC concept reforms would help increase equitable access and flexibility for students:

A. *Remove SRM- eliminating the enrollment restrictions to ONLY Half time or Full-time enrollment for award amounts (no-cost to current program).*
B. *Decouple tuition equity from the OOG requirements for eligibility for ORSAA students.*

Equity Impact:

The Oregon Opportunity Grant is the largest financial aid program in the state of Oregon, serving over 38,000 Oregonians in the 2023-24 academic year. The Oregon Opportunity Grant serves students from low socioeconomic backgrounds that face additional challenges and hurdles to overcome to be successful college students. BIPOC communities are vastly overrepresented in college students with the most financial need. Additionally, students' families are often unable to provide financial resources to send their students to college, and most turn to student loan programs to be able to meet their financial needs to continue and persist to graduation.

Low income and ethnic minority students have the highest barriers to an affordable postsecondary education and training. According to the 2021 OOG report, OOG recipients are disproportionately students of color, female, rural, and first-generation. Increased funding in OOG and state aid grants would provide these students with more purchasing power and ability to enroll at institutions of higher education.

Financial aid in Oregon needs to be more responsive and equitably distributed to best serve the lowest income students, allow flexible enrollment options to recipients (not restrict access points), and promote completion. Improving current state programs in an integrated framework will facilitate transitions and better support underserved students of all ages.

Staffing Impact: The positions outlined below are requested to ensure the success of each program.

Office of Student Access and Completion

Policy Option Package 106 – Educator Administrator Scholarship Program

Purpose: To allow HECC to administer the Educator Administrator Scholarship Program (EASP). This program was established and is administered by the Teacher Standards and Practices Commission (TSPC) as the Oregon Administrator Scholars Program. HECC and TSPC have agreed to transfer the administration and funding of this program from TSPC to HECC.

Justification: HECC's Office of Student Access and Completion (OSAC) administers most of Oregon's financial aid to students. OSAC already administers a similar program designed to increase the diversity of teachers in Oregon, the Oregon Teacher Scholars Program (OTSP). As the OTSP is designed to increase the diversity of teachers, the EASP is designed to increase the diversity of Oregon education administrators. The administration of this student financial aid program by OSAC would be a natural extension of the work they do.
.

Solution/How Achieved: Statutorily transfer the authority for this program from TSPC to HECC. Budgetarily transfer the funding for this program, which originates at the Oregon Department of Education, from TSPC to HECC, and use a portion of these other funds support a .5 FTE to administer the program.

Equity Impact: Students in Oregon should enjoy the benefits of having education staff, both educators and their administrators, be as diverse as they are. This program is an important step in meeting this goal.

Staffing Impact: The positions outlined below are requested to ensure the success of each program.

Support to Community Colleges

SUPPORT TO COMMUNITY COLLEGES

Support to Community Colleges

The Community College Support Fund (CCSF) is the primary vehicle for direct state investment in the operations of Oregon's seventeen community colleges.

ORS 350.075(3)(iii)(f) charges the HECC with the responsibility to:

> *Adopt rules governing the distribution of appropriations from the Legislative Assembly to community colleges, public universities listed in ORS 352.002 and student access programs. These rules must be based on allocation formulas developed in consultation with the state's community colleges and public universities, as appropriate.*

The rules governing the distribution of the CCSF are contained in Oregon Administrative Rule Chapter 589 Division 2. Five principles support the policies governing distribution of the CCSF:

1. Access
2. Quality
3. Growth Management
4. Equity
5. Stability

These are described in more detail in 589-003-0100(2)(a-e).

The amount of state funds available for distribution to each community college are defined in two parts: categorical funding and formula funding. Categorical funding is taken off the top before the distribution formula is calculated and includes corrections funding to provide services to inmates, funds to support contracted out-of-district (COD) programs, funds to support targeted investments, and the strategic fund. These are described in OAR 589-002-0120(5) and 589-002-0130 and represent about 1.4% of the total CCSF.

The remainder of the CCSF is distributed through a two-part formula. In part one, a base payment for each community college is calculated using a dollar value per full-time equivalent student (FTE) and the institution's number of weighted, reimbursable FTE enrollment. The base payment per FTE was $973 in FY2022, with additional weighting for small community college districts. The total percent of the CCSF distribution determined by the base payment is approximately 5.7% of the total.
Part two of the formula considers total public resources (TPR) which includes both state general funds and local property tax revenue to ensure equity; a three-year weighted average of enrollment to ensure stability; and growth management to prevent erosion of the level of funding per student and provide predictability. Approximately 93% of the CCSF is distributed through this portion of the formula which is described in more detail in OAR 589-002-0120(6).

This program is managed by the Office of Postsecondary Finance and Capital.

ESSENTIAL PACKAGES

Essential Packages

The Essential Packages estimates the cost to continue current legislatively approved programs into the 2023 – 2025 biennium. The total of all current service level packages are represented below and detailed under each essential package category.

General Fund	$55,437,771
Other Funds	$463,031
Lottery Funds	$0
Federal Funds	$0
Total Funds	$55,900,802

Package 010: Vacancy Factor and Non-PICS Personal Services

This package includes standard 4.2 percent inflation on non-PICS Personal Service & Vacancy Factor, to include Temporary Appointments, Overtime Payments, All Other Differential, Public Employees Retirement System, Pension Obligation Bond Repayment and Social Security. The Vacancy Savings calculation methodology is provided by the Department of Administrative Services.

There are no package 010 adjustments for this program.

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

SUPPORT TO COMMUNITY COLLEGES
ESSENTIAL PACKAGES

Package 021: Phase in

Package 021 identifies budget adjustments resulting from program phase-ins for budget items funded for less than 24 months during a biennium.

There are no phase-ins for this program.

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

Package 022: Phase out

Package 022 identifies decreased costs from the elimination of programs and other one-time funded costs.

General Fund	$(3,535,704)
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$(3,535,704)

Package 031: Standard Inflation and State Government Service Charges

The standard inflation factors are provided by the Department of Administrative Services as follows:

- Services and Supplies and Capital Outlay, by the standard 4.2 percent
- Non-state employee and Professional Services costs by the standard 6.8 percent
- Attorney General costs by the allowable 23.26 percent

This package increases Services & Supplies by the standard 4.2 percent and non-state employee and Professional Services costs by the standard 6.8 percent inflation rates. The hourly rate for Attorney General costs are increased by 23.26 percent. The package also adjusts costs for changes in State Government Service Charges.

General Fund	$54,400,000
Other Funds	$463,031
Lottery Funds	$0
Federal Funds	$0
Total Funds	$54,863,031

Package 032: Above Standard Inflation with CFO Analyst Approval

This package includes the amount above the inflation in package 031 for a limited set of factors including:

- Medical services inflation such as Oregon Health plan provider expenditures, amounts above standard inflation up to 5.6 percent
- DAS Price list items that are usage-based such as motor pool and printing services
- Non-state employee and Professional Services as applied to Special Payments, amounts above standard inflation up to 6.8 percent

There is no Above Standard Inflation for this program.

General Fund	$4,898,475
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$4,898,475

Public University Ops & Student Support

PUBLIC UNIVERSITY OPS AND STUDENT SUPPORT

Public University Operations and Student Support

The Public University Support Fund (PUSF) is the primary vehicle for direct state investment in the operations of Oregon's seven public universities. ORS 350.075(3)(iii)(f) charges the HECC with the responsibility to:

> *Adopt rules governing the distribution of appropriations from the Legislative Assembly to community colleges, public universities listed in ORS 352.002 and student access programs. These rules must be based on allocation formulas developed in consultation with the state's community colleges and public universities, as appropriate.*

The Student Success and Completion Model (SSCM) which allocates the PUSF based on resident degree and certificate completions, enrollment, institution mission, and the success of underserved student populations, replaced a primarily enrollment driven model called the Resource Allocation Model (RAM). The SSCM was reviewed most recently during 2020 consistent with the intent of reviewing the formula every five years. While the policy priorities remain the same, the review resulted in minor, technical changes to the formula.

The current version of the SSCM is comprised of three funding categories:

- **Mission Support (MS) Funding** to support the regional, research, and public service missions and activities of each university. There are four components: base funding, regional access, research support, and public services. The amount devoted to MS is 17% of the total PUSF, and grows by the lessor of inflation or growth in the total PUSF appropriation.

- **Activity-Based Funding (ABF)** distributes resources based on student credit hour (SCH) completions of Oregon resident undergraduate and graduate students. Currently 33% of formula funding is allocated to this category.

- **Outcomes Based Funding (OBF)** rewards degree and certificate completions by Oregon resident students. Completions by targeted students (underrepresented racial/ethnic groups, low-income, rural and military veterans) and those in academic disciplines in high-demand and high-reward fields (STEM, Health, Bilingual Education) earn additional resources through the allocation formula. Currently 50% of formula funding is allocated to this category.

PUBLIC UNIVERSITY OPS AND STUDENT SUPPORT

Each of these areas are based on the following data and resulting calculations:

Category	Data	Calculation
Mission Support Funding	• Base Funding, regional access, and public service funding is based on resident FTE • Research Support – three-year average of research expenditures	• Base funding of $2.9M, variable based on resident FTE for smaller institutions. • Regional access funding based on resident FTEs, a funding amount per FTE, and institutional size. • Research support average proportional share, capped of $2.5M per institution and $5M total. • Public services $330 per resident FTE, maximum of $4.7 per institution.
Activity-Based Funding	• Three-year average of Student Credit Hour (SCH) completions by discipline (CIP) and student level	• After removing Mission Support funding from the total PUSF allocation, 40 percent of remaining funding is allocated to ABF. • Average multiplied by cost weights corresponding to discipline and student level.
Outcomes Based Funding	• Three-year average of resident degree and certificate completions by discipline and student level; includes non-resident doctoral degrees • Three-year average of resident, baccalaureate transfer degrees. • Three-year average of underrepresented student completions (resident baccalaureate)	• Degrees at all levels are funded: BA/BS through PhDs, including graduate certificates • Cost-weighting adjustments are made to reflect program duration and type • Additional weighting awarded for BA/BS degrees earned by underrepresented students and degrees in high-demand and high-reward areas • Allocations for transfer students are discounted relative to non-transfer students • Bonus allocation for transfer students from an Oregon Community College

This program is managed by the Office of Postsecondary Finance and Capital.

Public University State Programs

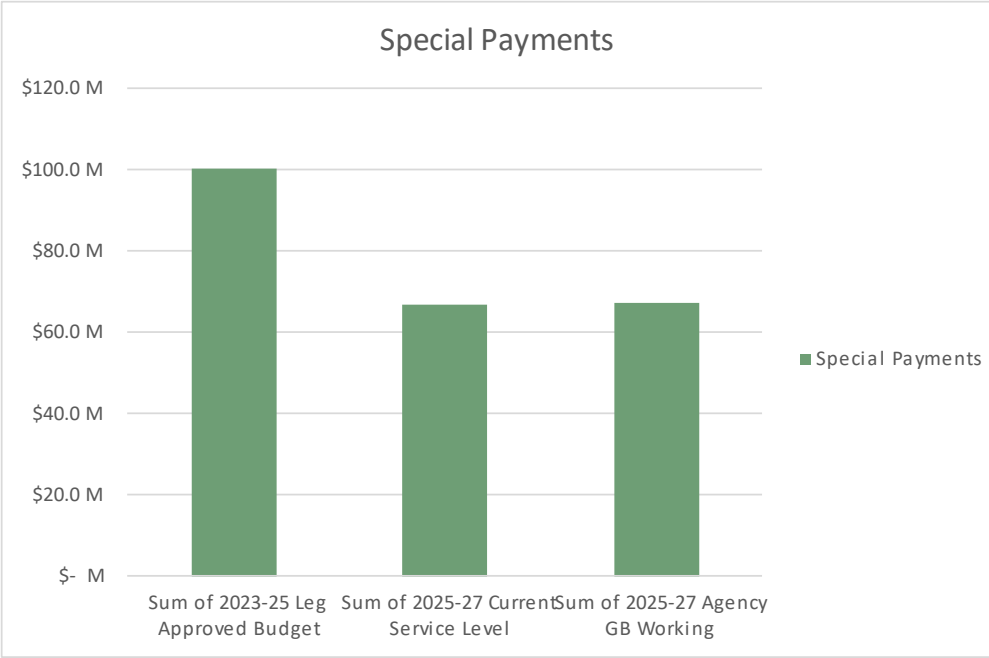
PUBLIC UNIVERSITY STATE PROGRAMS

Public University State Programs (PUSP)

The State Programs category is intended to encompass General Fund support for certain institutes, centers, and programs generally operated by the seven public universities. These efforts address the economic development, resource base, and public service needs of the state of Oregon. Many of these programs have an industry-specific focus, and receive additional investments from the private sector and other sources.

Funding Request

For 25-27, PUSP is requesting CSL.



The following descriptions summarize the purpose and activities of existing State Programs that receive General Fund support:

Clinical Legal Education

This program provides funding to any ABA accredited law school within Oregon which provides clinical legal services to victims of domestic violence, stalking or sexual assault. Distribution of the funds is on an application basis. Currently, the University of Oregon has the only eligible program and receives the entirety of these funds. Distributions of clinical legal education funds is governed by OAR 715-013-0060.

PUBLIC UNIVERSITY STATE PROGRAMS

Oregon Solutions

Oregon Solutions at Portland State University brings together local groups to solve local problems using sustainable methods. The program promotes collaborative efforts between government agencies, commercial businesses, and nonprofit organizations in support of Oregon's economy, environment, and communities.

Dispute Resolution

The UO administers the Oregon Office of Community Dispute Resolution (OOCDR) which provides mediation services and conflict resolution training to private parties along with funding and training support to 20 community dispute resolution centers serving 25 Oregon counties. PSU administers the Oregon Consensus program, within the National Policy Consensus Center, which facilitates collaborative, agreement seeking processes that unite communities, government, and businesses to resolve differences and build durable agreements that address public issues.

Oregon Climate Change Research Institute

The Oregon Climate Change Research Institute (OCCRI) facilitates research, serves as a climate change information clearinghouse, provides technical assistance, and at least once each biennium, assesses the state of climate change science as it relates to impacts on Oregon. OCCRI is housed within the OSU College of Oceanic and Atmospheric Sciences (COAS).

Signature Research

The signature research program was initiated by the legislature in 2003 with funding to support the development of Signature Research Centers for Multi-Scale Materials and Devices at Oregon State University, University of Oregon and Portland State University, and on using nanotechnology to develop products with commercial applications. The overall mission of the initiative is to create high-wage jobs and quality economic development in the state. Distribution of funds between the three institutions is governed by OAR 715-013-0064.

Institute for Natural Resources

The Institute for Natural Resources (INR) at Oregon State University is a cooperative enterprise bringing the scientific knowledge and expertise of Oregon's public universities and other Oregon higher education institutions to bear on natural resource management.

Labor Education Research Center

The Labor Education and Research Center (LERC) at the University of Oregon was established in 1977 in order to give workers and labor unions in Oregon access to the resources and expertise of the state's higher education system.

Population Research Center

The mission of Population Research Center (PRC), located at Portland State University, is to provide population data, information, and research analysis for Oregon and its communities. In addition, it has the responsibility of acting as lead state agency in working with the U.S. Census Bureau to disseminate information at local levels.

PUBLIC UNIVERSITY STATE PROGRAMS

OSU Fermentation Science

Fermentation science funding supports Oregon's fast-growing beer, wine and spirits industries and is one of the only programs of its type in the country.

OSU Ocean Vessels Research

This state-funded program provides ship days for the use of the Research Vessel (R/V) Oceanus in the research and study of Oregon's coastal waters. The appropriation for the current biennium funds 24 days of ship use during the biennium, including fuel, supplies and labor.

TallWood Design Institute

The 2015 Legislature provided funding for what is now known as the TallWood Design Institute (previously known as the OSU Advanced Wood Products Center, operated in conjunction with University of Oregon). The TallWood Design Institute is the nation's only research collaborative that focuses exclusively on the advancement of structural wood products. It conducts the research needed for widespread adoption of mass timber building technology in the U.S. The Institute is a partnership between Oregon State University and the University of Oregon, bringing together the strengths of OSU's College of Forestry and College of Engineering, and the UO's School of Architecture and Allied Arts.

Engineering Technology Sustaining Funds

Engineering Technology Sustaining Funds are utilized to produce Oregon resident engineering and technology-related graduates, catalyze research in engineering and technology fields, and provide a tactical linkage of engineering and technology programs to the labor for needs of Oregon industry. This work is done in order to encourage and deepen connections between universities and engineering and technology industry partners to collectively advocate for additional private and public investment. Following a workgroup process in 2017-18, a new funding model was adopted (as codified in OAR 715-013-0062) to distribute these funds. The new model provides some base funding to all institutions but, beyond that limited amount of funding, distributes funds on the basis of degrees to Oregon residents, research production in targeted fields and the employment and wages of graduates of targeted programs in jobs in Oregon.

Oregon Renewable Energy Center (OREC)

Oregon Tech's OREC program serves small and medium-sized companies seeking a university collaborator to prototype, test, validate and accelerate "cleantech" products, and renewable energy applications. OREC's geo-heat center maintains a geothermal library of over 5,000 publications, and provides information and technical assistance on the use of geothermal energy to thousands of constituents worldwide, with a focus on assisting small Oregon-based businesses with applications of geothermal energy.

Willamette Falls Locks Commission

Portland State University receives funding to support the work of Oregon Solutions as it provides staffing for the Willamette Falls Locks Commission. The Willamette Falls Locks Commission will serve as a policy-making and advisory board for issues relating to the repair, reopening, operation, maintenance and future transfer of ownership of the Willamette River navigational channel and locks system.

Channel Maintenance Impact Study

Funding to perform a study of the benefits and impacts of maintenance activities on habitat complexity and other biological parameters in traditionally maintained channels.

Veterinary Diagnostic Lab

The OSU Veterinary Diagnostic Laboratory is a public-supported facility providing a full range of animal disease diagnostic services to veterinarians, livestock producers, pet owners, and biomedical researchers. In addition to diagnostic services, the Laboratory shares in the training of future veterinarians through instruction of veterinary medical students in the practice of diagnostic medicine.

Environmental Justice Mapping Tool

Funding to provide support to the development of the environmental justice
mapping tool. This work includes participating in stakeholder meetings, inventorying and gathering data, testing the mapping tool and refining functionality, identifying governance structures, development and hosting of the web-based tool for the environmental justice mapping tool on Oregon Explorer.

OSU Research Vessel Pacific Storm

Funding for repair and maintenance of research vessel *Pacific Storm*.

These programs are managed by the Office of Postsecondary Finance and Capital.

PUBLIC UNIVERSITY OPS STATE PROGRAMS
ESSENTIAL PACKAGES

Essential Packages

The Essential Packages estimates the cost to continue current legislatively approved programs into the 2023 - 2025 biennium. The totals of all current service level packages are represented below and detailed under each essential package category.

General Fund	$(33,091,932)
Other Funds	$75,593
Lottery Funds	$0
Federal Funds	$0
Total Funds	$(33,016,339)

Package 010: Vacancy Factor and Non-PICS Personal Services

This package includes standard 4.2 percent inflation on non-PICS Personal Service & Vacancy Factor, to include Temporary Appointments, Overtime Payments, All Other Differential, Public Employees Retirement System, Pension Obligation Bond Repayment and Social Security. The Vacancy Savings calculation methodology is provided by the Department of Administrative Services.

There is no Vacancy/Personal Services for this program.

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

PUBLIC UNIVERSITY OPS STATE PROGRAMS
ESSENTIAL PACKAGES

Package 021: Phase in

Package 021 identifies budget adjustments resulting from program phase-ins for budget items funded for less than 24 months during a biennium.

There are no phase-ins for this program.

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

Package 022: Phase out

Package 022 identifies decreased costs from the elimination of programs and other one-time funded costs.

General Fund	$(37,328,612)
Other Funds	$(250,000)
Lottery Funds	$0
Federal Funds	$0
Total Funds	$(37,578,612)

PUBLIC UNIVERSITY OPS STATE PROGRAMS
ESSENTIAL PACKAGES

Package 031: Standard Inflation and State Government Service Charges

The standard inflation factors are provided by the Department of Administrative Services as follows:

- Services and Supplies and Capital Outlay, by the standard 4.2 percent
- Non-state employee and Professional Services costs by the standard 6.8 percent
- Attorney General costs by the allowable 23.26 percent

This package increases Services & Supplies by the standard 4.2 percent and non-state employee and Professional Services costs by the standard 6.8 percent inflation rates. The hourly rate for Attorney General costs are increased by 23.26 percent. The package also adjusts costs for changes in State Government Service Charges.

General Fund	$3,628,889
Other Funds	$316,200
Lottery Funds	$0
Federal Funds	$0
Total Funds	$3,945,089

Package 032: Above Standard Inflation with CFO Analyst Approval

This package includes the amount above the inflation in package 031 for a limited set of factors including:

- Medical services inflation such as Oregon Health plan provider expenditures, amounts above standard inflation up to 5.6 percent
- DAS Price list items that are usage-based such as motor pool and printing services
- Non-state employee and Professional Services as applied to Special Payments, amounts above standard inflation up to 6.8 percent

General Fund	$107,791
Other Funds	$9,393
Lottery Funds	$0
Federal Funds	$0
Total Funds	$117,184

PUBLIC UNIVERSITY OPS STATE PROGRAMS
ESSENTIAL PACKAGES

Package 050: Fund Shifts

Package 050 is for significant revenue changes in existing programs.

There are no Fund Shifts for this program.

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

Package 060: Technical Adjustments

Package 060 is used for technical budget adjustments, such as agency reorganizations and expenditure category shifts. Use of this package requires prior approval by the CFO analyst.

There are no Technical Adjustments for this program.

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

Package 090: Analyst Adjustments

Package 090 includes a Behavioral Health Initiative investment for the OSU AgriStress Helpline.

General Fund	$500,000
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$500,000

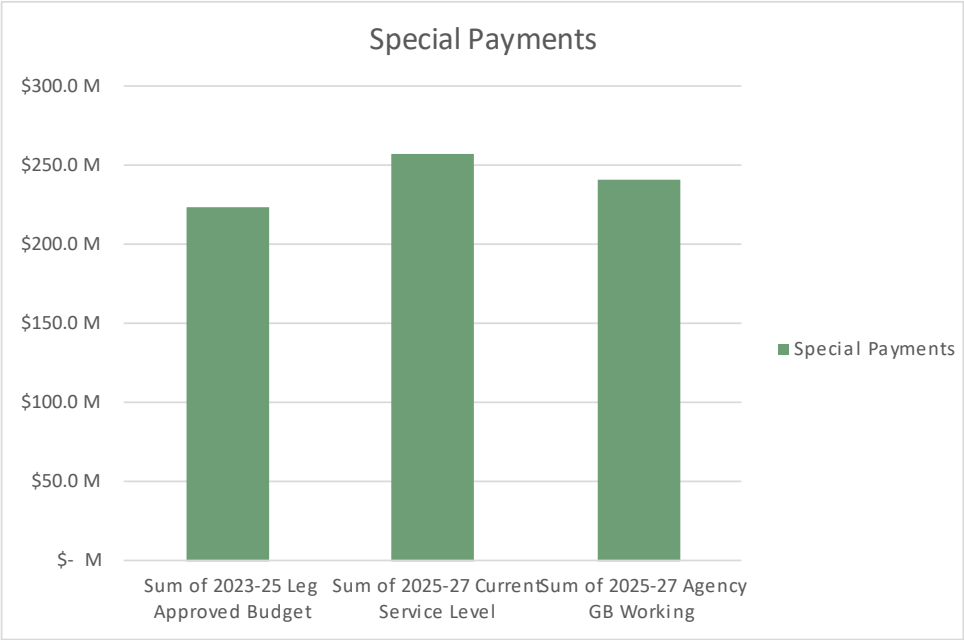
Statewide Public Services

The Statewide Public Services (SPS)

Includes the Agriculture Experiment Station, Extension Services and the Forest Research Laboratory.

Funding Request

For 25-27, SPS is requesting CSL.



Agricultural Experiment Station

The Agricultural Experiment Station (AES) the principal agricultural and related natural resources research agency of the State of Oregon. Its mission is to conduct research to solve problems and generate innovations in the agricultural, biological, social, and environmental sciences for the benefit of Oregonians. Its research relates to Oregon agriculture, associated industries, and natural resources. It also provides public services and technical assistance and in so doing:

- Helps ensure a stable and productive system of agriculture through the sustainable management of natural resources.

- Protects and improves the natural environment and related quality of life.
- Develops new agricultural products and processes.
- Improves marketing of Oregon agricultural products.
- Improves the nutritional value and quality of food.
- Helps protect crops and animals from insects, diseases, and other hazards.
- Contributes to the basic sciences.
- Strengthens rural communities through research on issues critical to their economic development and social fabric.
- Assists developing agriculture in ways that will help alleviate world hunger and promote trade within the United States.

Historic and Physical Setting

The Oregon Agricultural Experiment Station was organized in 1888 with funds provided by the United States Congress through the Hatch Act of 1887. The station comprises 11 branch experiment stations in 14 locations throughout Oregon. The central station on the OSU campus in Corvallis coordinates research activities with the teaching and extension service activities of the College of Agricultural Sciences.

Branch stations are located throughout the state to conduct research that accommodates the widely varying soil, climate, agricultural, cultural, and economic conditions of Oregon. Many branch stations are combined in the same facility with OSU Extension Service offices, and all work closely with the local Extension Office. At the central station in Corvallis, scientists, staff, and students in 14 academic departments and five colleges of Oregon State University (OSU) carry out basic and applied research in agriculture, food systems, environmental and life sciences, and natural resources. The Station also supports seed testing and food safety and environmental stewardship laboratories on the OSU campus that serves the public interest.

Liaison and Planning

In planning its research, the Station actively solicits counsel from industry and citizen groups. Branch experiment stations have advisory committees of local citizens and often work with local representatives of agriculture, food, environmental and natural resource groups. Station administration works with statewide advisory groups and agriculture, food, environmental and natural resource organizations for review of existing programs and the development of new ones that anticipate and address emerging needs.

Cooperation with Other Agencies

Cooperation with state and federal agencies is important and well developed in the Station. There is a tradition and practice of coordination with the Oregon Departments of Agriculture, Forestry, Environmental Quality, Water Resources, Economic & Community Development, and the Oregon Watershed Enhancement Board on matters of mutual concern. The Station also coordinates its programs with counterparts in western states and with agencies of the federal government. Scientists in almost every academic department in the Station meet regularly with counterparts at Washington State University and the University of Idaho, and often share talent and costs of conducting research projects.

Disseminating Results

Research results are disseminated rapidly using a variety of means. This includes field days, Extension Service educational programs, technical and scientific publications, online delivery, print and broadcast news stories in popular media, and the award-winning research publication, "Oregon's Agricultural Progress."

Evaluation

Research programs are regularly reviewed and evaluated, both internally and by teams of scientists from other universities and agencies. These critical reviews indicate that many Station programs are among the best in the nation.

OSU Extension Service

Is the community-based education and outreach arm of Oregon's land, sea, sun and space grant-university. It is cooperatively funded from federal (USDA), state, county, and other sources. The OSU Extension Service engages the people of Oregon with research-based knowledge and education that strengthen communities and economies, sustain natural resources, and promote healthy families and individuals.

Audiences/Program Areas

Extension faculty on the OSU campus and in county offices throughout the state work together with an extensive network of volunteers to develop and deliver educational programs. Extension programs focus on the following areas:

Agriculture and Natural Resources

This program provides education and technical assistance for people with agricultural interests. The major emphasis is on food, feed, energy, fiber, seed, and ornamental production and management of animal and plant production systems. Programs include farm/ranch business management, marketing, value-added processing, natural resource use and conservation, community horticulture, human and environmental health, and bioethics. Audiences include urban and rural residents and businesses, government agencies and communities with wide-ranging interests in conservation, production, and community development.

Family and Community Health

This program helps Oregonians improve their health, family, and community through education and community partnerships. Major programming extends knowledge related to public health, nutrition, exercise science, human development, family financial management, and aging to address important needs in Oregon's communities.

Forestry and Natural Resources

This program improves Oregonians' knowledge of forestry and natural resources and their options for enhancing benefits from these resources. This educational program assists forest owners, managers, processors, users, and students in understanding the importance of both production and

environmental benefits from Oregon's forests. Priority subjects include reforestation, forest management, forest health, wildland fire, intergenerational land transfer, harvesting and processing wood, protection of soil and water, wildlife habitat, and related natural resources use, management, and protection.

Outdoor School Program

Pursuant to 2016's Ballot Measure 99, OSU's extension service coordinates a statewide program designed to coordinate outdoor school programs for Oregon's fifth and sixth grade students. The goal is to provide such programs to all such students throughout the state. This program is funded via lottery funding.

Forest Research Laboratory (FRL)

Oregon's original research agency designed to help solve problems, create opportunities, and develop new understanding and innovation about forest ecosystems, forest management and forest-derived renewable materials; its director is the dean of Oregon State University's College of Forestry. Established by the Oregon Legislature in 1941, the program is supported by state and federal appropriations and by research grants from public and private sources (see Oregon Revised Statute 526.225).

In addition to research in campus laboratories and university forests, studies are conducted cooperatively in public and private forests and in laboratories and manufacturing facilities throughout Oregon and the world.

Faculty, staff, and students from the College of Forestry's Departments of Forest Engineering, Resources, and Management; Forest Ecosystems and Society; and Wood Science and Engineering contribute to a diverse portfolio of fundamental and applied research and outreach activities. Activities benefit from collaboration with many other departments and colleges at Oregon State and elsewhere. Communication of results to science peers, land managers, policy makers, and the public is a high priority.

The FRL, the Corvallis Forestry Sciences Laboratory of the U.S. Forest Service, the Corvallis-based Forest and Rangelands Ecosystem Science Center of the U.S. Geological Service, and related research conducted elsewhere on campus combine to form the largest concentration of forest sciences research in North America.

Cooperation/Research Use

To extend the resources available from state appropriations in the Forest Research Laboratory budget, cooperation and assistance from non-state sources is sought to accomplish Laboratory research goals. Assistance may include the use of private or agency lands for research, contributed equipment, facilities or staff time and funds for specific projects. About 150 collaborators currently participate in a variety of research projects

where results could provide direct benefits to Oregonians. Forestry practices of many collaborators reflect research results immediately, and other stakeholders often follow such working examples more quickly than they do with more conventional methods of conveying research results.

University Grants/Contracts

A significant amount of forestry research is supported by grants and contracts. Grant proposals of Laboratory scientists are required to be directly supportive of Laboratory goals and complementary to projects supported with state funds. Grants are restrictive since they often provide only for basic research, are not available in all program areas, and are for specific/limited time periods. Nevertheless, forestry and natural resources related sponsored research extends the programs of the Laboratory, and help provide research knowledge to a wider range of practitioners. Currently the Laboratory is able to leverage every dollar of appropriated support for faculty and infrastructure into three dollars of additional research funding.

Disseminating Results

Research results are provided to family forestland owners, industry, public land managers, other scientists and the public using a variety of means. This includes Extension Foresters conducting programs around the state, Outreach Education short courses, technical and scientific publications, online delivery, video productions, conference presentations and stories in popular media.

Proposed Program Improvements

The Forest Research Laboratory continuously looks to engage in research that is closely allied with the policy initiatives being pursued by Oregon's legislative and executive branches, as well as programs that add value to the state economy, and protect environmental resources from changing threats. Scientists seek to provide new knowledge that will help inform policy choices about forest resources management, climate change, forest policies for urban areas, alternatives in resource uses, water quality, wildlife habitat, and related matters. Programs are also aimed at improving production processes and adding new products such that Oregonians can pursue economic gains while maintaining a healthy, sustainable environment that meets multiple needs for the state citizens.

These programs are managed by the Office of Postsecondary Finance and Capital.

STATEWIDE PUBLIC SERVICES
ESSENTIAL PACKAGES

Essential Packages

The Essential Packages estimates the cost to continue current legislatively approved programs into the 2023 - 2025 biennium. The totals of all current service level packages are represented below and detailed under each essential package category.

General Fund	$5,815,214
Other Funds	$0
Lottery Funds	$10,654,519
Federal Funds	$0
Total Funds	$16,469,733

Package 010: Vacancy Factor and Non-PICS Personal Services

This package includes standard 4.2 percent inflation on non-PICS Personal Service & Vacancy Factor, to include Temporary Appointments, Overtime Payments, All Other Differential, Public Employees Retirement System, Pension Obligation Bond Repayment and Social Security. The Vacancy Savings calculation methodology is provided by the Department of Administrative Services.

There is no Vacancy/Personal Services for this program.

Sports Lottery

SPORTS LOTTERY (SL)

The Sports Action Lottery program provides lottery funds to support athletic programs and student scholarships. As outlined in ORS 461.543, 88% of all available funding shall be spent on athletic programs. Of that amount, 70% shall be for non-revenue producing sports with 30% for revenue producing sports. At least 50% of the available funding is earmarked for women's athletics.

The remaining 12% of funding shall be spent on scholarships, equally split between a focus on merit and financial need. Although ORS 461.543(4) calls for an amount equal to 1% of the Administrative Services Economic Development Fund to be allocated to Sports Lottery, the funding level and allocation between universities has been set at a different, lower, level by the Oregon Legislature in recent biennia.

This program is managed by the Office of Postsecondary Finance and Capital.

Funding Request

For 25-27, SL is requesting 0.2% above CSL.

OHSU Programs

OHSU Programs (OHSU)

OHSU has four public missions: education, clinical care, research, and statewide outreach. The university educates the next generation of health care professionals and biomedical scientists, creates new knowledge, translates scientific research into therapies for disease, provides compassionate and evidence-based patient care, and improves health statewide through access and policy initiatives.

OHSU offers professional degrees in dentistry, nursing, medicine, pharmacy (OHSU/OSU), other health professions (physician assistants, radiation therapy, dietetics, laboratory medicine and EMT training in conjunction with OIT), and several PhD and Master's degrees along with certificate programs in the sciences. It also educates a large number of interns, residents and fellows in accredited specialty programs in medicine and dentistry.

OHSU receives state funding to support the School of Medicine, School of Nursing, School of Dentistry, the Oregon Child Integrated Dataset (OCID), the Oregon Poison Center, the Child Development and Rehabilitation Center (CRDC), the 30 x 30 by 2030 plan, and the Statewide Behavioral Health Database.

This program is managed by the Office of Postsecondary Finance and Capital.

Funding Request

For 25-27, OHSU is requesting CSL.

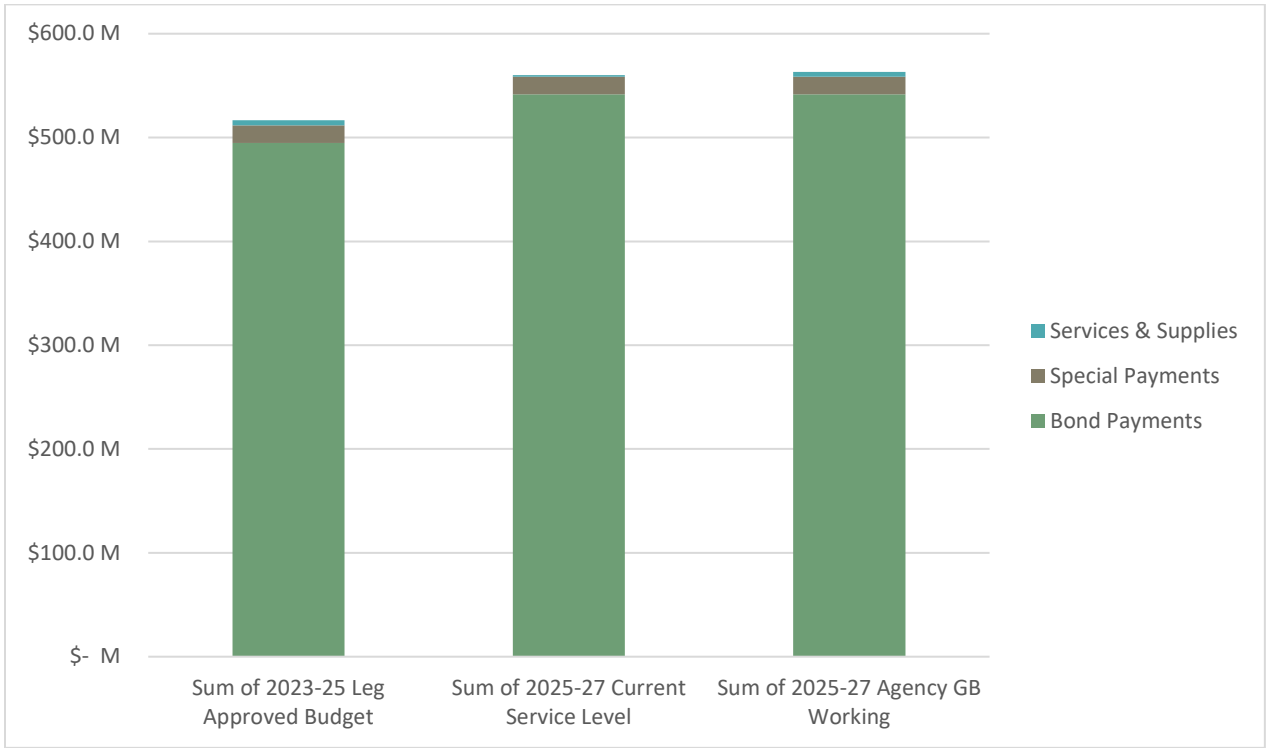
Capital Budgeting

Public University Debt Service

Public University Debt Service (PUDS)

This program includes the debt service for all long-term, state-issued debt obligations on behalf of Oregon's seven public universities. The proceeds of state-issued debt are used to pay primarily for capital construction projects. These include debt paid by state appropriations and revenue generated by self-supporting programs such as gifts, grants or student building fees.



This program is managed by the Office of Postsecondary Finance and Capital.

PUBLIC UNIVERSITY DEBT SERVICE
ESSENTIAL PACKAGES

Essential Packages

The Essential Packages estimates the cost to continue current legislatively approved programs into the 2023 - 2025 biennium. The totals of all current service level packages are represented below and detailed under each essential package category.

General Fund	$156,099
Other Funds	$(3,626,449)
Lottery Funds	$0
Federal Funds	$0
Total Funds	$(3,470,350)

Package 010: Vacancy Factor and Non-PICS Personal Services

This package includes standard 4.2 percent inflation on non-PICS Personal Service & Vacancy Factor, to include Temporary Appointments, Overtime Payments, All Other Differential, Public Employees Retirement System, Pension Obligation Bond Repayment and Social Security. The Vacancy Savings calculation methodology is provided by the Department of Administrative Services.

There is no Vacancy/Personal Services for this program.

General Fund	$0

Other Funds	$(3,626,449)
Lottery Funds	$0
Federal Funds	$0
Total Funds	$(3,626,449)

PUBLIC UNIVERSITY DEBT SERVICE
ESSENTIAL PACKAGES

Package 031: Standard Inflation and State Government Service Charges

The standard inflation factors are provided by the Department of Administrative Services as follows:

- Services and Supplies and Capital Outlay, by the standard 4.2 percent
- Non-state employee and Professional Services costs by the standard 6.8 percent
- Attorney General costs by the allowable 23.26 percent

This package increases Services & Supplies by the standard 4.2 percent and non-state employee and Professional Services costs by the standard 6.8 percent inflation rates. The hourly rate for Attorney General costs are increased by 23.26 percent. The package also adjusts costs for changes in State Government Service Charges.

General Fund	$243,506
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$243,506

Package 032: Above Standard Inflation with CFO Analyst Approval

This package includes the amount above the inflation in package 031 for a limited set of factors including:

- Medical services inflation such as Oregon Health plan provider expenditures, amounts above standard inflation up to 5.6 percent
- DAS Price list items that are usage-based such as motor pool and printing services
- Non-state employee and Professional Services as applied to Special Payments, amounts above standard inflation up to 6.8 percent

There is no Above Standard Inflation for this program.

Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$(87,407)

Office of Postsecondary Finance and Capital

Policy Option Package 107 – Public University Capital Construction

Purpose:
Under statutory authority in ORS 352.089, the commission is directed to establish a process for reviewing public university requests to issue state bonds. The projects are scored and ranked using a commission adopted rubric. The current rubric, adopted in October 2019, is largely informed by the Strategic Capital Development Plan (SCDP) for Oregon's public universities which recommends a focus on capital improvement and replacement.

The primary criteria employed in the rubric focus on a project's alignment with the SCDP including:

- Space renewal, workforce and completion priorities
- Addressing deferred maintenance issues
- Supporting research and economic development
- Collaboration with interested parties

Additional criteria are applied to ensure close alignment with the state's higher education goals. These include the following:

- Student success of underserved populations
- Operational savings and sustainability
- Life safety, security of loss of use
- Leveraging institutional resources
- Institutional priorities

The scoring rubric was changed during 2019 to place more emphasis on a project's alignment with the SCDP which includes space renewal, workforce and completion priorities, deferred maintenance and collaboration. The priority placed on student success for underserved populations was doubled to focus on continued equity efforts. Also, the definition of underserved populations was aligned with the definition used in the university funding formula which includes economically disadvantaged students, ethnic/racial minorities, rural and veteran students.

How Achieved:
The scoring process involves the use of cross-office teams composed of HECC staff. Each team considers a number of projects and grades them as guided by the Commission-adopted rubric. The recommendations are then forwarded for the Commission's consideration.

The timeline for the review process is outlined in the graphic to the left.

Technical assistance is provided by HECC staff throughout the process which often involves site visits by HECC staff with question and answer interaction. During this past round of submissions, materials were submitted including project summaries, construction planning, financial projections and other materials.

For the 2025-27 ARB, the prioritized list was presented to the commission in June 2024 and adopted in August 2024. Typically, the commission approves the prioritized list in its entirety.

Based on precedent, the commission approves the prioritized list in its entirety. To better support the Legislature's decision-making process, the Commission makes no attempt to curtail the list or remove any projects that have been submitted. Rather, the intent is to provide a prioritized list based on a set of principles consistent with the state's higher education goals and in alignment with the strategic plan.

Equity Impact:

PFC partnered with HECC's Diversity, Equity, and Inclusion (DEI) staff to conduct a self-assessment to identify opportunities for improving the prioritizing process. As a result, the following occurred:

- The HECC Equity Lens and Strategic Roadmap were integrated into the capital process.
- The capital principles were reviewed to incorporate a more refined level of consideration focusing on equity.
- The capital guides were reviewed and revised to incorporate an Equity Lens and Strategic Roadmap focus.
- Definitions were expanded to be more inclusive of priority (historically underrepresented) populations.

Staffing Impact: None.

Outcomes:

- **A focus on improvement and replacement.** Six projects include renovations and new construction. Three projects include both renovations and expansions. One project includes land reparation and new construction.

The top priority of this capital plan includes additional funding for the capital improvement and renewal (CIR) formula. The CIR provides critical state funding for deferred maintenance including code compliance issues, accessibility and safety related projects. The CIR allocates the funding based on gross square footage and the density of usage to equitably allocate resources. An increase in funding allows for additional focus on capital renewal priorities.

- **A focus on student success, resiliency, creative thinking, and the arts.** Four projects relate to student success, resiliency, creative thinking, and arts. Two projects focus on health and dental. Two projects are renovations/or expansion of library centers. One project addresses child behavioral health need. One project is a heat plant renovation and creation of a physics laser lab. One project is a data center replacement.

$188.4 million in institutional matching funds. Most of this will be contributed by donors.

$264.2 million in eliminated deferred maintenance. The included projects will eliminate a substantial portion of deferred maintenance at the universities modernizing facilities and allowing for more useable space structured appropriately for current instructional and student support needs.

Projects Approved in the Governor's Recommended Budget:

Policy Option Package 108 – Community College Capital Construction

Purpose:
Under statutory authority in ORS 350.075(3) and as spelled out in OAR 589-003-0100, the commission is tasked with approving all capital construction requests from the state's community colleges to be backed in whole or in part by state-funded debt service and shall list these projects in priority order. The priority is based on how a project accomplishes the following primary criteria:

- Serves an instructional purpose
- Meets an important demonstrated service need of the college
- Meets a facilities' need that cannot be adequately addressed through alternative, interim, or existing facilities
- Serves to complete a comprehensive community college facility
- Meets an important and articulated objective of the college
- Reflects evidence of local planning and needs assessment

Additional criteria are applied to the projects to ensure close alignment with the state's higher education goals. These include the following:

- Addresses safety and security on campus
- Meets occupation, community, or economic needs
- Includes collaboration
- Meets sustainability standards
- Supports student services and spaces

There are additional due diligence criteria as well. These include a statement of need and solution, information about the proposed facility including construction and programming costs, along with construction schedules, planning and other information as needed.

Under statute, community colleges are eligible for up to $8 million in bonding per project and are required to match dollar for dollar with local resources. Colleges are allowed only one project awaiting matching funds at a time. Therefore, not all colleges submit projects every biennium.

How Achieved:
The scoring process involves a capital review committee, in collaboration with the institutions, which reviews and ranks the submitted projects. Technical assistance is provided by HECC staff during the submission process. The capital review committee is typically composed of college presidents and HECC staff.

The timeline for the review process is outlined in the graphic to the left.

The Oregon Presidents Council generally finalizes the recommendations on behalf of the institutions. Then, the recommendations are forwarded for the commission's consideration. For the 2025-27 ARB, the prioritized list was presented to the commission in June 2024 and adopted in August 2024.

Based on precedent, the commission approves the prioritized list in its entirety. To better support the Legislature's decision-making process, the Commission makes no attempt to curtail the list or remove any projects that have been submitted. Rather, the intent is to provide a prioritized list based on a set of principles consistent with the state's higher education goals and in alignment with the strategic plan.

Equity Impact:

PFC partnered with HECC's Diversity, Equity, Inclusion, and Accessibility (DEIA) staff to do a self-assessment in an effort to identify opportunities for improving the prioritizing process. As a result, the following occurred.

- The HECC Equity Lens and Strategic Roadmap were integrated into the capital process.
- The capital principles were reviewed to incorporate a more refined level of consideration focusing on equity.
- The capital guides were reviewed and revised to incorporate an Equity Lens and Strategic Roadmap focus.
- Definitions were expanded to be more inclusive of priority (historically underrepresented) populations.

Staffing Impact: None.

Outcomes:

A focus on improvement and replacement.

A focus on technical skills development.
The Clackamas Community College Center of Excellence for Farming, Horticulture, and Wildland Fire project includes moving these instructional programs out of our oldest building, Clairmont Hall, and constructing a modern training facility to serve Horticulture, Arboriculture, Wildland Fire, and other related programs. The Mount Hood Community College project will upgrade and modernize classrooms and labs to ensure safety, provide technology to help students engage with subject matter, promote innovation, and support student completion as part of the skilled workforce. Upgraded classrooms and labs will improve safety, provide technology to help students engage with subject matter, promote innovation, and support student completion as part of the skilled workforce. Classrooms will be sized and outfitted to support all ranges of instruction. To support some of the college's most in-demand programs, this project includes re-purposing existing space to create a Center for Health Professions.

$56.5 million in institutional matching funds. Most of the project cost, a total of $56.6 million or 77.9%, comes from local, institutional resources. Often this includes substantial local taxpayer support.

$15.7 million in eliminated deferred maintenance. The included projects will eliminate a substantial portion of deferred maintenance at the colleges modernizing facilities and allowing for more useable space structured appropriately for current instructional and student support needs.

Projects Included in Governor's Recommended Budget:

Commission Prioritized Projects/ Governor's Recommended	Bond Type	Tax Status	Sale Date	Par Amount	Project Amount	Cost of Issuance	Matching

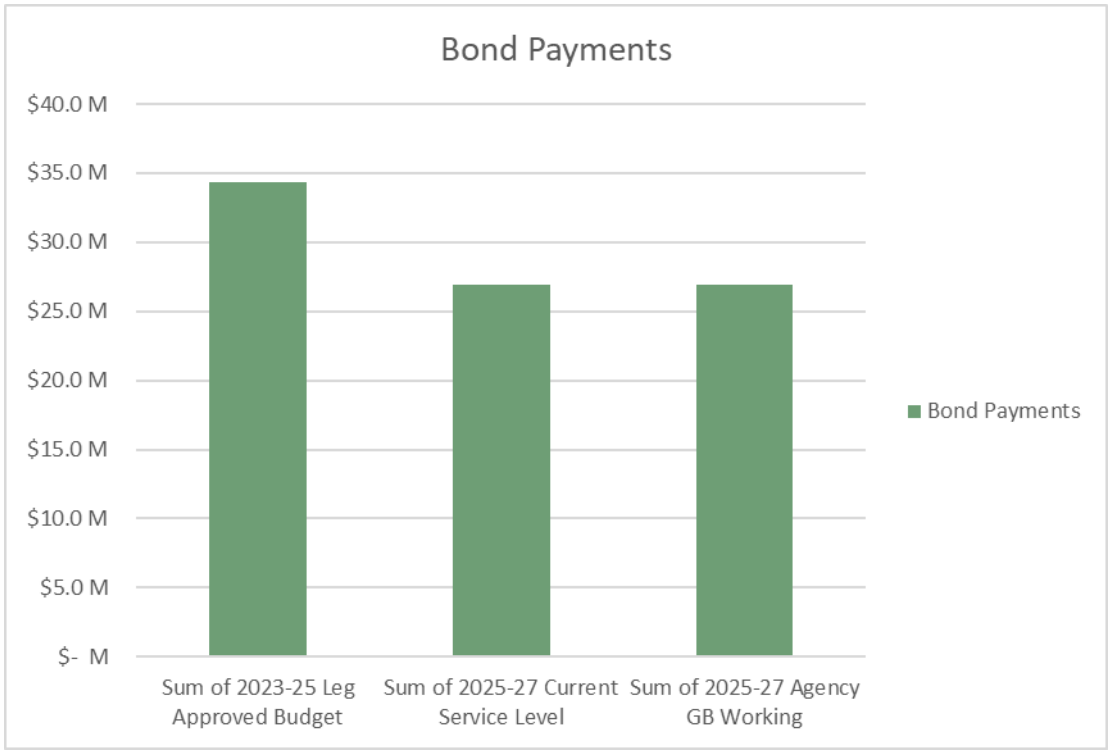
OHSU Debt Service

OHSU Debt Service

OHSU Debt Service

This program includes the debt service for all long-term, state-issued debt obligations on behalf of OHSU. The proceeds of state-issued debt are used to pay primarily for capital construction projects. These include debt paid by state appropriations and revenue generated by self-supporting programs such as gifts, grants or student building fees.



This program is managed by the Office of Postsecondary Finance and Capital.

OHSU DEBT SERVICE
ESSENTIAL PACKAGES

Essential Packages

The Essential Packages estimates the cost to continue current legislatively approved programs into the 2023 - 2025 biennium. The totals of all current service level packages are represented below and detailed under each essential package category.

There are no Essential Packages for this program

Public University Capital Construction

Public University Capital Construction

The budget process is an opportunity for public universities to request funding for capital projects involving state-backed debt. In recognition of limited resources, a prioritization process was established for projects proposed to be backed in whole or in part by state-funded debt service. The following list presents a prioritization of project requests with more details included in the related policy option package.

This program is managed by the Office of Postsecondary Finance and Capital. Brief project descriptions are included below.

Institutions	Project	Description
All	Capital Improvement and Renewal	Capital Improvement and Renewal funds will be allocated by the HECC to the seven public universities for university-determined projects that will address deferred maintenance, code compliance, safety issues, and Americans with Disabilities Act (ADA) accessibility improvements for campus facilities.
Portland State University	New Housing Project	A new residential building on west campus to serve first year students, providing a modern residential hall to support students living on campus. It will include 576 beds with ensuite restrooms and student support spaces.
Portland State University	Center for the Performing Arts	A $611,700,000 collaborative partnership with the City of Portland, a private-hotel partner, philanthropic elements, and PSU. This project includes a new, state-of-the-art 3,000-seat performing arts facility, a 1,200-seat secondary venue owned by PSU along with supporting academic spaces, a 150-room hotel, restaurants, bars and other supporting spaces.

Office of Postsecondary Finance and Capital

Policy Option Package 107 – Public University Capital Construction

Purpose:
Under statutory authority in ORS 352.089, the commission is directed to establish a process for reviewing public university requests to issue state bonds. The projects are scored and ranked using a commission adopted rubric. The current rubric, adopted in October 2019, is largely informed by the Strategic Capital Development Plan (SCDP) for Oregon's public universities which recommends a focus on capital improvement and replacement.

The primary criteria employed in the rubric focus on a project's alignment with the SCDP including:

- Space renewal, workforce and completion priorities
- Addressing deferred maintenance issues
- Supporting research and economic development
- Collaboration with interested parties

Additional criteria are applied to ensure close alignment with the state's higher education goals. These include the following:

- Student success of underserved populations
- Operational savings and sustainability
- Life safety, security of loss of use
- Leveraging institutional resources
- Institutional priorities

The scoring rubric was changed during 2019 to place more emphasis on a project's alignment with the SCDP which includes space renewal, workforce and completion priorities, deferred maintenance and collaboration. The priority placed on student success for underserved populations was doubled to focus on continued equity efforts. Also, the definition of underserved populations was aligned with the definition used in the university funding formula which includes economically disadvantaged students, ethnic/racial minorities, rural and veteran students.

How Achieved:
The scoring process involves the use of cross-office teams composed of HECC staff. Each team considers a number of projects and grades them as guided by the Commission-adopted rubric. The recommendations are then forwarded for the Commission's consideration.

The timeline for the review process is outlined in the graphic to the left.

Technical assistance is provided by HECC staff throughout the process which often involves site visits by HECC staff with question and answer interaction. During this past round of submissions, materials were submitted including project summaries, construction planning, financial projections and other materials.

For the 2025-27 ARB, the prioritized list was presented to the commission in June 2024 and adopted in August 2024. Typically, the commission approves the prioritized list in its entirety.

Based on precedent, the commission approves the prioritized list in its entirety. To better support the Legislature's decision-making process, the Commission makes no attempt to curtail the list or remove any projects that have been submitted. Rather, the intent is to provide a prioritized list based on a set of principles consistent with the state's higher education goals and in alignment with the strategic plan.

Equity Impact:

PFC partnered with HECC's Diversity, Equity, and Inclusion (DEI) staff to conduct a self-assessment to identify opportunities for improving the prioritizing process. As a result, the following occurred:

- The HECC Equity Lens and Strategic Roadmap were integrated into the capital process.
- The capital principles were reviewed to incorporate a more refined level of consideration focusing on equity.
- The capital guides were reviewed and revised to incorporate an Equity Lens and Strategic Roadmap focus.
- Definitions were expanded to be more inclusive of priority (historically underrepresented) populations.

Staffing Impact: None.

Outcomes:

- **A focus on improvement and replacement.** Six projects include renovations and new construction. Three projects include both renovations and expansions. One project includes land reparation and new construction.

The top priority of this capital plan includes additional funding for the capital improvement and renewal (CIR) formula. The CIR provides critical state funding for deferred maintenance including code compliance issues, accessibility and safety related projects. The CIR allocates the funding based on gross square footage and the density of usage to equitably allocate resources. An increase in funding allows for additional focus on capital renewal priorities.

- **A focus on student success, resiliency, creative thinking, and the arts.** Four projects relate to student success, resiliency, creative thinking, and arts. Two projects focus on health and dental. Two projects are renovations/or expansion of library centers. One project addresses child behavioral health need. One project is a heat plant renovation and creation of a physics laser lab. One project is a data center replacement.

$188.4 million in institutional matching funds. Most of this will be contributed by donors.

$264.2 million in eliminated deferred maintenance. The included projects will eliminate a substantial portion of deferred maintenance at the universities modernizing facilities and allowing for more useable space structured appropriately for current instructional and student support needs.

Projects Approved in the Governor's Recommended Budget:

Community College Capital Construction

Community College Capital Construction

ORS 341.009 (13) stipulates the state should maintain a policy of substantial state participation in community college building costs with certain limitations. The Office of Postsecondary Finance and Capital administers the requirements according to OAR 589-003-0100, Community College Construction.

The capital construction projects requested in this budget include projects at five of the state's community colleges. The following list presents a prioritization of project requests with more details included in the related policy option package.

This program is managed by the Office of Postsecondary Finance and Capital. Brief project descriptions are included below.

College	Project	Description
Clackamas CC	Center for Excellence for Farming, Horticulture and Wildland Fire	Campus renovations and enhancements to foster student access, success and safety. Addressing seismic resiliency, ADA compliance, hybrid learning technologies, and campus safety measures.
Mt Hood CC	Classroom and Lab Renovations	Upgrade and modernize classrooms and labs to ensure safety, provide technology to help students engage with subject matter, promote innovation, and support student completion as part of the skilled workforce. Upgraded classrooms and labs will improve safety, provide technology to help students engage with subject matter, promote innovation, and support student completion as part of the skilled workforce. Classrooms will be sized and outfitted to support all ranges of instruction. To support some of the college's most in-demand programs, this project includes re-purposing existing space to create a Center for Health Professions.
Klamath CC	Cosmetology Program and Building	The Cosmetology Program is currently housed at an off-campus facility. Work with building owners to upgrade leased building for ADA compliance. Work with architect to design and build cosmetology center on campus.

ESSENTIAL PACKAGES

Essential Packages

The Essential Packages estimates the cost to continue current legislatively approved programs into the 2023 - 2025 biennium. The totals of all current service level packages are represented below and detailed under each essential package category.

There are no Essential Packages for this program

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

Package 010: Vacancy Factor and Non-PICS Personal Services

This package includes standard 4.2 percent inflation on non-PICS Personal Service & Vacancy Factor, to include Temporary Appointments, Overtime Payments, All Other Differential, Public Employees Retirement System, Pension Obligation Bond Repayment and Social Security. The Vacancy Savings calculation methodology is provided by the Department of Administrative Services.

There is no Vacancy/Personal Services for this program.

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

COMMUNITY COLLEGE CAPITAL CONSTRUCTION
ESSENTIAL PACKAGES

Package 021: Phase in

Package 021 identifies budget adjustments resulting from program phase-ins for budget items funded for less than 24 months during a biennium.

There are no phase-ins for this program.

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

Package 022: Phase out

Package 022 identifies decreased costs from the elimination of programs and other one-time funded costs.

There are no phase-outs for this program.

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

COMMUNITY COLLEGE CAPITAL CONSTRUCTION
ESSENTIAL PACKAGES

Package 031: Standard Inflation and State Government Service Charges

The standard inflation factors are provided by the Department of Administrative Services as follows:

- Services and Supplies and Capital Outlay, by the standard 4.2 percent
- Non-state employee and Professional Services costs by the standard 6.8 percent
- Attorney General costs by the allowable 23.26 percent

There is no standard Inflation for this program.

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

Package 032: Above Standard Inflation with CFO Analyst Approval

This package includes the amount above the inflation in package 031 for a limited set of factors including:

- Medical services inflation such as Oregon Health plan provider expenditures, amounts above standard inflation up to 5.6 percent
- DAS Price list items that are usage-based such as motor pool and printing services
- Non-state employee and Professional Services as applied to Special Payments, amounts above standard inflation up to 6.8 percent

There is no Above Standard Inflation for this program.

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

COMMUNITY COLLEGE CAPITAL CONSTRUCTION
ESSENTIAL PACKAGES

Package 050: Fund Shifts

Package 050 is for significant revenue changes in existing programs.

There are no Fund Shifts for this program.

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

Package 060: Technical Adjustments

Package 060 is used for technical budget adjustments, such as agency reorganizations and expenditure category shifts. Use of this package requires prior approval by the CFO analyst.

There are no Technical Adjustments for this program.

General Fund	$0
Other Funds	$0
Lottery Funds	$0
Federal Funds	$0
Total Funds	$0

Office of Postsecondary Finance and Capital

Policy Option Package 108 – Community College Capital Construction

Purpose:
Under statutory authority in ORS 350.075(3) and as spelled out in OAR 589-003-0100, the commission is tasked with approving all capital construction requests from the state's community colleges to be backed in whole or in part by state-funded debt service and shall list these projects in priority order. The priority is based on how a project accomplishes the following primary criteria:

- Serves an instructional purpose
- Meets an important demonstrated service need of the college
- Meets a facilities' need that cannot be adequately addressed through alternative, interim, or existing facilities
- Serves to complete a comprehensive community college facility
- Meets an important and articulated objective of the college
- Reflects evidence of local planning and needs assessment

Additional criteria are applied to the projects to ensure close alignment with the state's higher education goals. These include the following:

- Addresses safety and security on campus
- Meets occupation, community, or economic needs
- Includes collaboration
- Meets sustainability standards
- Supports student services and spaces

There are additional due diligence criteria as well. These include a statement of need and solution, information about the proposed facility including construction and programming costs, along with construction schedules, planning and other information as needed.

Under statute, community colleges are eligible for up to $8 million in bonding per project and are required to match dollar for dollar with local resources. Colleges are allowed only one project awaiting matching funds at a time. Therefore, not all colleges submit projects every biennium.

How Achieved:
The scoring process involves a capital review committee, in collaboration with the institutions, which reviews and ranks the submitted projects. Technical assistance is provided by HECC staff during the submission process. The capital review committee is typically composed of college presidents and HECC staff.

The timeline for the review process is outlined in the graphic to the left.

The Oregon Presidents Council generally finalizes the recommendations on behalf of the institutions. Then, the recommendations are forwarded for the commission's consideration. For the 2025-27 ARB, the prioritized list was presented to the commission in June 2024 and adopted in August 2024.

Based on precedent, the commission approves the prioritized list in its entirety. To better support the Legislature's decision-making process, the Commission makes no attempt to curtail the list or remove any projects that have been submitted. Rather, the intent is to provide a prioritized list based on a set of principles consistent with the state's higher education goals and in alignment with the strategic plan.

Equity Impact:

PFC partnered with HECC's Diversity, Equity, Inclusion, and Accessibility (DEIA) staff to do a self-assessment in an effort to identify opportunities for improving the prioritizing process. As a result, the following occurred.

- The HECC Equity Lens and Strategic Roadmap were integrated into the capital process.
- The capital principles were reviewed to incorporate a more refined level of consideration focusing on equity.
- The capital guides were reviewed and revised to incorporate an Equity Lens and Strategic Roadmap focus.
- Definitions were expanded to be more inclusive of priority (historically underrepresented) populations.

Staffing Impact: None.

Outcomes:

A focus on improvement and replacement.

A focus on technical skills development.
The Clackamas Community College Center of Excellence for Farming, Horticulture, and Wildland Fire project includes moving these instructional programs out of our oldest building, Clairmont Hall, and constructing a modern training facility to serve Horticulture, Arboriculture, Wildland Fire, and other related programs. The Mount Hood Community College project will upgrade and modernize classrooms and labs to ensure safety, provide technology to help students engage with subject matter, promote innovation, and support student completion as part of the skilled workforce. Upgraded classrooms and labs will improve safety, provide technology to help students engage with subject matter, promote innovation, and support student completion as part of the skilled workforce. Classrooms will be sized and outfitted to support all ranges of instruction. To support some of the college's most in-demand programs, this project includes re-purposing existing space to create a Center for Health Professions.

$56.5 million in institutional matching funds. Most of the project cost, a total of $56.6 million or 77.9%, comes from local, institutional resources. Often this includes substantial local taxpayer support.

$15.7 million in eliminated deferred maintenance. The included projects will eliminate a substantial portion of deferred maintenance at the colleges modernizing facilities and allowing for more useable space structured appropriately for current instructional and student support needs.

Projects Included in Governor's Recommended Budget:

Commission Prioritized Projects/ Governor's Recommended	Bond Type	Tax Status	Sale Date	Par Amount	Project Amount	Cost of Issuance	Matching
Clackamas CC – Center for Excellence for Farming, Horticulture, and Wildland Fire	XI-G	Exempt	March 2027	8,085,000	8,000,000	85,000	24,000,000

Business Case for POP 101 – IT Modernization Project

Completion of Deferred Scope

Project Overview

In 2023-2025, the HECC was authorized to begin a modernization project to replace three legacy systems as part of the HECC Modernization project. The HECC, for various reasons detailed below, will not be able to fully replace the systems in the 2023-2025 biennium. The HECC is asking for additional funding to be able to finish that intended scope of work and to plan and design a grant management system to serve all HECC Offices (see details on the grant management system work in a separate section below).

In collaboration with DAS Procurement Services and Oregon's Enterprise Information System (EIS), HECC has worked with a project management firm, a quality assurance firm, and negotiated a contract with a System Implementation (SI) vendor to enter into a multi-phased contract. Stage Gate Three approval was denied and the start of the first phase was put on hold at the direction of EIS from May 23 through October 24, 2023. As a result, EIS and HECC spent six months in an extended planning phase prior to HECC receiving its Stage Gate Three endorsement for Phase 1. During the hold period, HECC and EIS addressed concerns including organizational change management, contract scope and responsibilities, budget transparency, data governance, staff resource availability, and other critical aspects of project management.

The time on hold strengthened the relationship between EIS and the HECC, improved the overall quality of the agency's written Modernization Plan, and completed the hiring of the needed project team. The Modernization project has six Business Analysts (BA) and a Project Coordinator (PM1). Five of those employees were hired during the hold period. Since their hiring or appointment (those on the project prior to the Hold were appointed), the BAs have done significant planning work, taken ownership of specific functional process areas, built relationships with HECC program areas, developed as-is and to-be business processes, and coordinated between HECC and the SI vendor during Phase 1.

The hold period also allowed HECC to put together and execute a plan to address the project's organization change management (OCM) needs. HECC contracted with an OCM vendor and hired a limited duration employee to lead the OCM work for the agency. The OCM vendor helped HECC define the OCM needs and developed an OCM Master Adoption Plan for use throughout the project to guide OCM efforts. The OCM vendor is also mentoring the HECC employee as she builds her OCM skills. HECC sent three employees through Prosci training that resulted in them becoming Prosci certified. As the HECC employee builds her skills and confidence, she is starting to take the lead on more and more OCM activities and will continue to do so through the end of the OCM vendor's contract. The plan has the lead for OCM activities transitioning fully to HECC in October.

While there were some positive impacts from the delay, the delay also had some negative impacts. The delay caused by the hold resulted in increased project costs as HECC has extended temporary project staffing (most of the project team are LD positions) and extended the contractual investments for quality assurance and project management over a longer period which increased the cost of those contracts. The delay caused by the hold also reduced the amount of time available to complete the development work. The compression of the schedule increased the SI vendor cost as they must now increase the size of their team to complete the work in a shorter time. This increased their staffing costs which has resulted in a smaller amount of scope that can be accomplished in Phase 2 and pushed more scope to the deferred list. HECC staff also will feel the result of the compressed schedule. HECC has hired some additional staff to help backfill behind program staff that will be dedicating significant time to project work.

During this process and Phase 1, HECC and the SI Vendor have established ways of working that are collaborative and have proven successful. This relationship has built trust which will be needed headed into an agile development process. Both sides are committed to the process and adjusting as the project proceeds to ensure the greatest level of success. Areas where the HECC is paying close attention to ensure that no issues arise include:

- Resource availability, especially of the HECC staff as development starts
- Any slippage of the compressed, fixed schedule
- Adequate training of the HECC developers to seamlessly transition into O&M support of the LEARN system upon the completion of the warranty period
- Any further reduction in scope
- Data governance

HECC has a culture that is steeped in DEIA work. Even prior to Phase 1, HECC partnered with our external impacted parties to find current pain points, examined ways to alleviate those with the new system, and began discussions about how to make the system more accessible to historically underserved populations. HECC's Equity Lens is very much in the forefront of the minds of HECC staff as they are designing the new system. The project has involved the HECC Diversity, Equity, Inclusion, and Accessibility team through the project planning and in Phase 1. The DEIA team has given the project team training on multiple occasions at the request of the Project Director. Each HECC Office has annual Equity Goals and HECC has an Equity Plan that ties to the State's equity work and the Racial Justice Council work. HECC has a Diversity, Equity, and Inclusion Counsel. The Modernization Project has a team member on the Counsel. In addition, the project has Project Success Metrics related to DEIA to measure how the project is improving HECC's work in the areas of DEIA.

Scope

Phase 1

The HECC Modernization Project completed Phase 1 Mobilization, which consisted of requirement refinement and solution design. Phase 1 was also used to determine what the SI vendor could do for the budgeted amount and in the reduced timeline. The SI vendor and HECC spent Phase 1 digging into the requested requirements to explain current state and envisioned future state. A Data Dictionary of the three legacy systems was also created during this time. As part of Phase 1, HECC prioritized all the requirements/features. The SI vendor confirmed that it would not be able to complete the full scope set out in the RFP for the $8M budget that HECC had available. Based on the prioritization, HECC selected the items to include in Phase 2 and items to defer to a later phase. This defined the scope for Phase 2 (details below).

In addition to the requirement and design work, HECC worked with Slalom to gather information from external impacted parties to determine level of impact and areas that would need additional support. Those areas include OCM, targeted communications, and training. HECC has engaged with external impacted parties in the Advisory Committees of the Offices involved in the project. These include PCS Advisory Committee, ODA Advisory Committee, multiple financial aid advisory committees, and meetings with the local Workforce Boards. The work also engaged the Oregon Student Association to get feedback and build engagement with students who are a key external impacted party, especially related to HECC's financial aid work.

Phase 2

As noted above, the project will begin Phase 2 Implementation with a scope smaller than desired when the project began. Following prioritization, HECC re-evaluated what to include in Phase 2 looking at it as a whole with dual goals of ensuring that core functionality for each Office was included and the ability to decommission the three legacy systems at the end of Phase 2. The core functionality includes financial aid management for schools and students, an ETPL that meets some of the standards for the federal government and allows HECC to show movement towards compliance with a federal audit finding, and a private career school portal that allows schools and instructors to apply and renew their licensing online. At the end of Phase 2, HECC will sunset multiple legacy systems including the three core legacy systems. Periphrial systems that currently do work outside of the three core legacy systems will remain in place until Phase 3 can be completed.

Phase 2 will see HECC increase outreach to external impacted parties. The OCM Master Adoption Plan and the Communication Plan both plan a ramp up of engagement with impacted parties. The project has established a project Change Network with representatives from all impacted HECC Offices. One of the initial tasks of that group was to create a list of impacted parties and communication channels that can be

used to engage with those groups. The project continues to refine that list and will add groups as the project progresses. This list will be used by multiple areas of the project including OCM, communications, training, testing (identifying external testers to assist with UAT), and design review.

Phase 1 & 2 Budget

The HECC Modernization project budget started at $12.9M focused solely on additional costs to the agency specific to the project. In June 2023, EIS clarified how staffing costs are to be accounted for in project budgets. As a result, HECC rebaselined the Modernization Budget to align with the clarified understanding of how to account for project expenses. This resulted in a budget of $20.15M. Following Phase 1 Mobilization, HECC decided to add additional money to the project budget to increase the scope that the SI vendor could include in Phase 2 Implementation. In May 2024, the ESC approved the addition of $750,000 to allow for including scope such that three core legacy systems could be decommissioned at the end of Phase 2. The budget was rebaselined to $20.855M at that time. Of that amount, $8.95M is covered by HECC's operational budget (this number covers multiple biennia).

Phase 1 and 2 Funding

The funding for Phase 1 & 2 of the HECC Modernization Project comes from the following sources:

• Q-Bonds sold in the 21-23 biennium (FAMIS replacement)	$5,000,000
• Expected Q-Bond sales in the 23-25 biennium (HECC Modernization)	$5,000,000
• Other Funds (APA PCSVets replacement)	$1,200,000
• Federal Funds (OWI for a system for ETPL)	$700,000
• HECC operational budget over multiple biennia	$8,955,000
• $955,000 is for project specific costs	
• $750,000 for additional scope	
• $250,000 for consulting costs	
• $7M is for staff costs associated with work on the project	
Total funding	$20,855,000

Phase 1 & 2 Schedule

The HECC rebaselined the project schedule in April 2024 to align with findings from Phase 1. The project received Stage Gate 3 approval for Phase 2 on June 26, 2024. Phase 2 will begin on July 1 with development beginning on August 8 following onboarding of the SI vendor's full project team, configuration of environments, setting up ADO, development and acceptance of user stories to be used to refine scope/features to a level that developers can use for development. The first Release/Cutover is planned for March 2025. The second and final Release/Cutover of Phase 2 is planned for September 2025. See Attachment A: Schedule.

Accomplished to date in the 2023-2025 biennium

As of July 1, 2024 the following have been accomplished in the 2-23-2025 biennium:

- Resolved all items addressed in the Hold Memo
- Completed hiring of the final Business Analysts for the project
- Hired a Project Coordinator

- Obtained Stage Gate 3 endorsement for Phase 1
- Negotiated a contract for Phase 1 with the SI vendor
- Completed Phase 1 of the project, including creation of a legacy data dictionary for all three legacy systems and work arounds in place (i.e., spreadsheets, Access databases outside core systems)
- Negotiated a contract for OCM vendor
- Onboarded OCM vendor, completed initial OCM Readiness Survey, developed an OCM Master Adoption Plan, stood up a Change Network with representatives from each impacted Office, identified communication channels, and began identification of external impacted parties and how to most effectively reach out to and communicate with those parties
- Hired a OCM Lead
- Completed business process maps versions 2, and 3
- Completed planning for Phase 2
- Obtained Stage Gate 3 endorsement for Phase 2
- Negotiated a contract amendment for Phase 2 with the SI vendor
- Identified, at a feature level, scope for Phase 2 based on prioritization of all initially identified requirements
- Begun user story creation for features

Planned accomplishments for the 2023-2025 biennium

A single platform will be built that serves as the foundation of all future system replacement projects with the ultimate goal of reducing the number of systems in HECC to the greatest extent possible and gaining efficiencies in workloads and better serving partners and customers. Further, it will move the agency's work forward ensuring that historically underserved populations have the most access possible to systems that will enhance their access to training and higher education.

By combining the core of these three systems into a single system, we gained the following:

1. Established a common core infrastructure that forms the foundation for the future envisioned in the IT Strategic Plan, and
2. Began the seamless sharing of data between HECC offices for the programs that went live in 2023-2025.

Proposed Phase 3 Scope – 2025-2027 POP Request

Based on the prioritization work done in Phase 1, the HECC had to defer a significant amount of scope and focus in Phase 2 only on the core functionality of the systems. When Phase 2 scope is complete, HECC will continue to have work being done using existing system work arounds and/or in very outdated, unsupported Access databases. The features that are deferred include college access and outreach programs, required data reporting and a federal reporting mechanisms for WIOA grants, and consumer protection and monitoring functionality for private career schools. This POP is requesting funds to complete a Phase 3 which would complete the scope not able to be included in Phase 2.

Phase 3 Schedule

The HECC would like to start Phase 3 immediately after the end of Phase 2, prior to starting the warranty period. The SI Vendor made a rough estimate that the work would take about 12 months to complete when asked to review the deferred scope and provide a general, rough time estimate. The start would be September 2025 and run through approximately September 2026 with dates to be finalized once we receive

approval to proceed with this work and engage the SI vendor for specifics. The benefits of this approach include a continuity of project teams for both HECC and the SI vendor, capitalizing on the momentum and partnerships established as part of Phases 1 and 2, and increased acceptance of the system by HECC staff and external impacted parties.

Reason to extend/expand funds into 2025-2027

Funds are needed to complete the scope that had to be deferred. That scope includes the implementation of the remaining scope-deferred elements of the three systems identified in the original scope of this project, namely: FAMIS, ETPL, and PCSVets.

After completion of Phase 3, HECC will have migrated all functionality from those three systems and replaced all external work arounds over to the LEARN system. This will allow us to retire Access databases that are no longer supported, have a single place for HECC external users to engage with HECC for the included programs, and increase access for historically underserved populations.

What will be accomplished with the additional funds in 2025-2027

The completion of the proposed third phase of the HECC Modernization project which would complete the full scope of the HECC Modernization Project as originally defined. This work includes completing the replacement of HECC's Financial Aid Management Information System (FAMIS); the outdated legacy system operated by the HECC's Office of Academic Policy and Authorization; and the agency's federally required Eligible Training Provider List (ETPL).

Completing the intended scope of the project will enable the HECC to use one IT platform, the Lifelong Educational Advancement Resource Network (LEARN), to store its data and meet the agency's needs for these three Offices. In addition, HECC intends to plan the incorporation of an agency-wide full cycle grant management system into the LEARN System that will greatly increase our efficiency and customer service across all offices and all customers. See below for information related to the grant management system.

Alignment

HECC engaged a consulting firm and developed an information technology strategic plan in 2019. The IT Strategic Plan outlines how technology can be used to remove systemic barriers and reduce the digital divide that limits access and success for many underserved and marginalized populations in Oregon. It also addresses how the agency investment and modernization effort will align with the Governor's Modernization Plan and the State Enterprise Information Services (EIS) Strategic Framework.

The proposed Phase 3 aligns with the HECC IT Strategic Plan, EIS's Strategy including moving towards cloud based technology, and the Governor's stated priorities. One of the Governor's priorities is modernization of aging and unsustainable state infrastructure systems. Continuing to do the deferred scope with current work arounds and outdated systems is unsustainable and leaves the agency open to errors which can have significant impact to citizens of Oregon and the State, especially historically underserved populations.

New work – Grant Management System

Problem/Opportunity

The HECC currently does not have a grant management system despite giving out billions in state and federal funds each year/biennium from Offices across the agency. An earlier effort to acquire a grant

management system was not successful due to time and capacity challenges. HECC staff are using workarounds that are very inefficient, not sustainable, and not scalable. Currently, staff utilizes Survey Monkey Apply, Excel, email exchanges, and very manual processes. Data is being collected in spreadsheets and there is no mechanism to aggregate data to satisfy the federal and state reporting requirements. The amount of time it takes to do this manually and the risk of human error are both high. Manual tools have created bottlenecks and poor user experience for the external users and HECC staff impacting data reporting, delays to real-time reporting and financial reimbursement, and accuracy.

This funding will allow the HECC to begin the planning and design work for a full-cycle grants management system within LEARN which impacts the work of all the HECC's Offices and will lead to increased efficiency across the board by HECC staff and by grantees.

Benefits of a Grant Management System

Implementing a grant management system will benefit HECC and grantees in a number of ways. Benefits of implementing a grant management system include:

- Lowering the administrative burden partners experience engaging with the HECC. The envisioned single online portal for Grant Recipients will allow streamlined grant management and reporting as many grantees receive awards across multiple HECC Programs. The single sign on would also integrate with the other programs administered using LEARN so if the grantee had other business with HECC, they would only have to sign into a single portal to conduct all of their business.
- Reducing grantees' level of effort by being able to complete a grant application online with a system that can ensure completeness of their application and send proactive notifications through their chosen channel, e.g., mobile text, email.
- A dashboard showing where all activities are in the grant lifecycle. For example, a grantee could track a financial reimbursement request or HECC staff could track completion of required documentation in real time.
- An online portal that would provide partners with an online channel to engage with the HECC staff thus eliminating the need to have processes conducted through email or other communications channels outside the grant management system. The system will also allow for grantee self service options and access to relevant grant data 24x7.
- Improving on the implementation of new grants or new cycles of existing grants with a system that is scalable.
- Reducing friction in internal processes by providing a single system where the various HECC Offices involved in the life cycle of a grant have visibility across Offices and a work flow process that seamlessly moves the work from one area of the HECC to the next across the life cycle of the grant from notice of grantmaking to grant closeout. An integrated system with information passing seamlessly from one process to another (e.g., grant application and budget to grant claim processing) will reduce data entry errors.

Benefits/Reasons to Include in LEARN

The benefits of a full-cycle grant management system within LEARN include better data analytics, ability to see multiple grants by the same organization within a single view, increased transparency, and a move towards a single way for organizations to interact with HECC Offices. The LEARN system is where HECC is migrating data systems with the goal of getting as close to a single system as possible. Building a grant management system outside of the LEARN system is contrary to a stated goal in the HECC IT Strategic Plan.

Alternatives

The following alternative options were considered that are identified as meeting HECC's needs:

Option	Solution Alternative	Alternative Description
1	Solution based on using D365	• Solution based on the agency's Microsoft Dynamics 365 environment • Aligns with the agency's IT strategic plan and technical architecture
2	Procure a COTS or SaaS Solution	• Procure a GMS solution with a COTS or SaaS solution • Customize COTS solution to address functionality gaps as needed
3	Enhance and Extend Existing Solutions	• Continue with Survey Monkey Apply and Excel (Existing Processes) • Develop Customer and Case Management solution and continue making improvements to the reporting

A grant management system based on the Microsoft Dynamics platform, Option 1, was selected as it leverages HECC's existing investment and work with the current SI Vendor for the HECC Modernization Project/LEARN system.

Scope

The needed functionality will be built in the LEARN system following Phase 3 (completed implementation of the remaining items for FAMIS, ETPL, and PCSVets). The planning, requirement clarification, and design work would include building process flows for the pass-through grants that HECC administers on behalf of the federal government and the State of Oregon.

Rough timeline

HECC desires to start grant management work immediately after Phase 3 completes in late August/early September 2025. HECC believes it will take up to 3 months to do planning and design for the grant management system. If Phase 3 development were to end in October 2025, the grant management system planning and design should be complete around January 2027.

Governance Approval

The HECC's IT Governance Committee approved the grant management system project on June 26, 2024.

Alignment

HECC engaged a consulting firm and developed an information technology strategic plan in 2019. The IT Strategic Plan outlines how technology can be used to remove systemic barriers and reduce the digital divide that limits access and success for many underserved and marginalized populations in Oregon. It also addresses how the agency investment and modernization effort will align with the Governor's Modernization Plan and the State Enterprise Information Services (EIS) Strategic Framework.

Guiding principles for this effort, including end-user self-help for customer experience improvement, bias towards automation, shared capabilities, Cloud forward, as well as HECC's Mission, Vision, and Values, are all aligned with elements of Governor's Strategic Plan, EIS Strategic Framework and HECC IT Strategic Plan.

Annual Performance Progress Report

Higher Education Coordinating Commission

Annual Performance Progress Report

Reporting Year 2023

Published: 1/4/2024 5:14:20 PM

KPM #	Approved Key Performance Measures (KPMs)
1	Oregon High School Graduates Attending College - Percentage of Oregon students enrolled in college within 16 months of their 4-year high school cohort graduation date.
2	Racial/Ethnic Differences Among Oregon High School Graduates Attending College - Percentage of Oregon students enrolled in college within 16 months of their 4-year high school cohort graduation date, disaggregated by race/ethnicity
3	College Credits Earned by K-12 Students - Amount of postsecondary credit per graduate awarded to K-12 students.
4	Oregon Educational Attainment - Percent of young Oregon adults with post secondary degree or certificate
5	Community College Completion and Transfer Rate - Percentage of community college students who complete an associate degree or certificate or who transfer to the university system within three years.
6	Racial/Ethnic Differences for Community College Completion and Transfer Rate - Percentage of community college students who complete an associate degree or certificate or who transfer to university system within three years by race/ethnicity.
7	Public University Graduation Rate - Percentage of public university college students who complete a bachelor's degree within 6 years.
8	Racial/Ethnic Differences for Public University Graduation Rate - Percentage of public university students who complete a bachelor's degree within 6 years, by race/ethnicity.
9	Percentage of resident enrolled students who are incurring unaffordable costs - Percentage of resident enrolled students who are incurring unaffordable costs adjusted with institutional aid.
10	Racial/Ethnic Differences in Percentage of Resident Students incurring Unaffordable Costs - Percentage of resident enrolled students who are incurring unaffordable costs adjusted with institutional aid, by race/ethnicity.
11	Earnings of Community College Completers - Median earnings of community college completers five years after completion.
12	Racial/Ethnic Differences in Earnings of Community College Completers - Median earnings of community college completers, five years after completion, by race/ethnicity.
13	Earnings of bachelor's degree completers - Median earnings of graduates with bachelor's degrees five years after completion
14	Racial/Ethnic Differences in Earnings of Bachelor's Degree Completers - Median earnings of graduates with bachelor's degrees, five years after completion, by race/ethnicity.
15	Customer Service - Percent of customers rating their satisfaction with the agency's customer service as "good" or "excellent": overall, timeliness, accuracy, helpfulness, expertise, availability of information.
16	Commission Best Practices - Percent of total best practices met by the Commission.
17	Employment Rate - Employment rate of participants completing workforce training programs, overall and by race/ethnicity

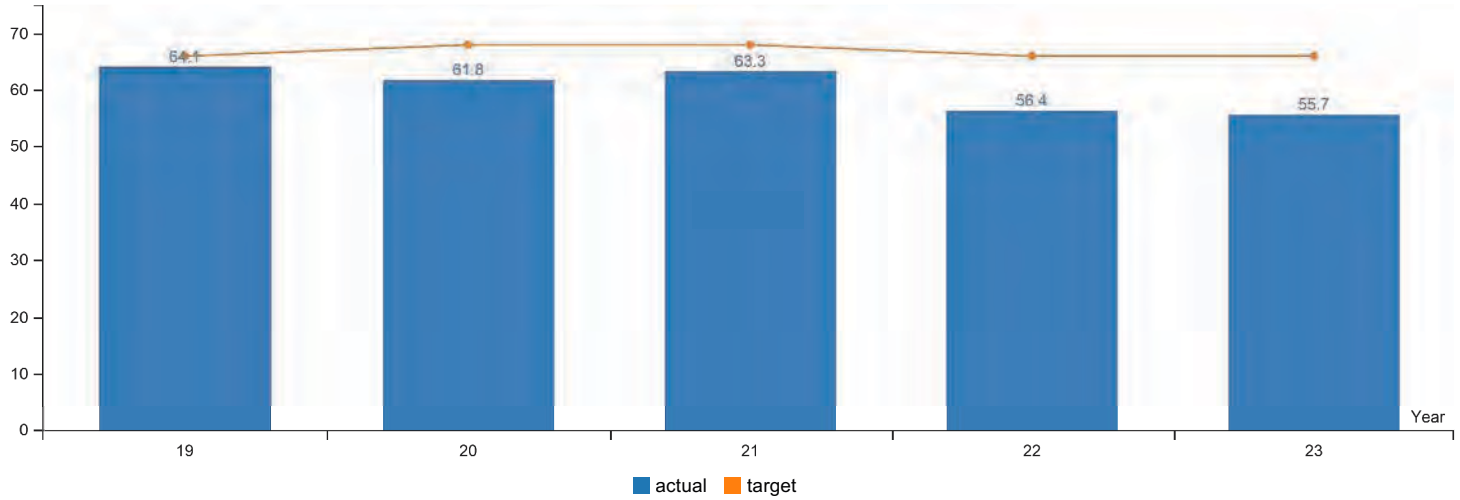
KPM #1	Oregon High School Graduates Attending College - Percentage of Oregon students enrolled in college within 16 months of their 4-year high school cohort graduation date.
	Data Collection Period: Jan 01 - Oct 31

** Upward Trend = positive result*



Report Year	2019	2020	2021	2022	2023
Oregon High School Graduates Attending College					
Actual	64.10%	61.80%	63.30%	56.40%	55.70%
Target	66%	68%	68%	66%	66%

How Are We Doing

After three years of relative stability prior to the pandemic, the percentage of Oregon high school graduating seniors who enroll in college within 16 months of graduation declined last year—the first year during the pandemic, and it remained at about the same rate in the most recent year. For the high school graduating class of 2020-21, 55.7 percent of students enrolled in college within 16 months, similar to the 56.4 percent rate for the class of 2019-20. This is lower than the college-going rate before the pandemic, which was about 63 percent.

We acknowledge the work and generosity of staff at the Oregon Department of Education, who calculate this measure and share it with the HECC.

Factors Affecting Results

College costs, the availability of need-based financial aid, geographic proximity of postsecondary institutions, state and regional economic outlooks and job markets, and the aspirations of high school graduates and Oregon's young adults affect college enrollment rates. In particular, the sustained strong economy prior to the pandemic likely drew more graduating seniors into the workforce with relatively easy-to-find jobs, and the economic and educational downturns during the pandemic likely kept students postponing college.

Oregon remains below the national rate of high school seniors attending college after graduation. Nationally, 61.8 percent of seniors who graduated from high school between January and October of 2021 were enrolled in college by October 2021. Though the national rate also fell during the pandemic, it remains higher than the rate in Oregon. Further, the gap between the national and Oregon rates is likely slightly wider than represented here because of differences between the measures. The national rate uses a narrower window for college enrollment (within ten months after high school graduation) than the Oregon measure (within 16 months). If Oregon’s measure used the same zero to ten-month window to measure college enrollment after high school, Oregon’s rate would likely be slightly lower.

Other Comments:

This measure presents an estimate of how many high school graduates continue their education in a postsecondary institution immediately or soon after high school.

We define this concept in the following terms:

(Number of high school graduates enrolled in college within 16 months of graduation)

divided by

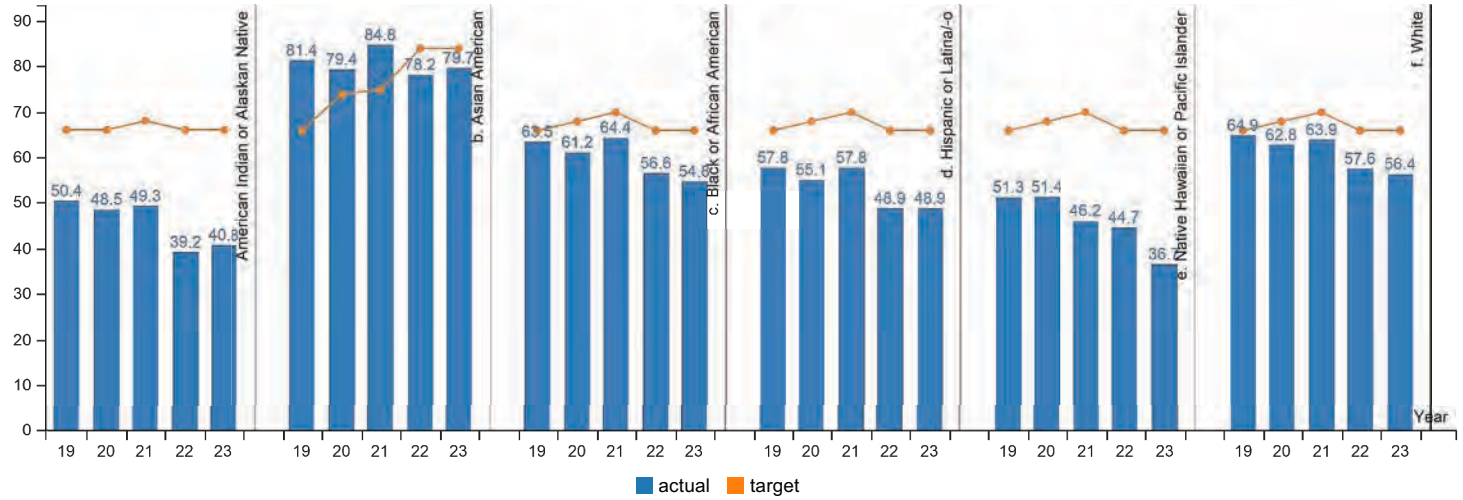
(Number of students in high school 4-year graduating class)

NOTE: “High school graduates” includes all students who received a regular four-year diploma, a modified four-year diploma, or a GED within four years of high school.

Limitations of this definition/data limitations are:

The measure uses a 16-month window after high school graduation during which graduating seniors can enroll in college to be included in the measure. This contrasts with the federal definition, which uses a zero- to ten-month window (enrollment in October for those graduating from high school between January and October of the same year). This makes national comparisons less precise than if the measures were the same. The measure uses a slightly different definition of high school graduates than the federal definition. The federal definition is a self-reported measure based on self-reported answers to a question asking whether respondents graduated from high school. It is not clear how respondents who received a modified four-year diploma or a GED within that zero-to-ten-month window answered this question.

KPM #2	Racial/Ethnic Differences Among Oregon High School Graduates Attending College - Percentage of Oregon students enrolled in college within 16 months of their 4-year high school cohort graduation date, disaggregated by race/ethnicity
	Data Collection Period: Jan 01 - Jan 01



Report Year	2019	2020	2021	2022	2023

f. White					
Actual	64.90%	62.80%	63.90%	57.60%	56.40%
Target	66%	68%	70%	66%	66%

How Are We Doing

The percentage of Oregon high school graduating seniors who enroll in college within 16 months of graduation varies substantially by race/ethnicity. For the graduation class of 2020-21, the college-going rate ranges from a high of 79.7 percent for Asian American students to a low of 36.7 percent for Native Hawaiian/Pacific Islander and 40.8 percent for Native American/Alaska Native students. Multi-racial students have the second highest college-going rate (59.24 percent), followed by White students (56.4 percent), Black/African American students (54.8 percent) and Hispanic or Latina/o students (48.9 percent).

As shown below, Oregon is below the national average in college-going rates of Asian American, African American, Latino/a/x/Hispanic, and White students in this most recent year. This is a shift from prior to the pandemic, when the college-going rate in Oregon was above the national average for Asian American students and close to the national average for African American/Black students.

	Asian American	Black/African American	Hispanic	Anglo White
Oregon, 16 months	79.7	54.8	48.9	56.4
National, 10 months	85.2	59.2	58.6	62.3

Source for national data: National Center for Education Statistics, https://nces.ed.gov/programs/digest/d22/tables/dt22_302.20.asp

Factors Affecting Results

College costs, the availability of need-based financial aid, geographic proximity of postsecondary institutions, state and regional economic outlooks and job markets, the aspirations of high school graduates and Oregon's young adults, and racial/ethnic disparities in any of these categories affect college enrollment rates.

Other Comments:

This measure presents an estimate of how many high school graduates continue their education in a postsecondary institution immediately or soon after high school.

We define this concept in the following terms:

(Number of high school graduates enrolled in college within 16 months of graduation)

divided by

(Number of students in high school 4-year graduating class)

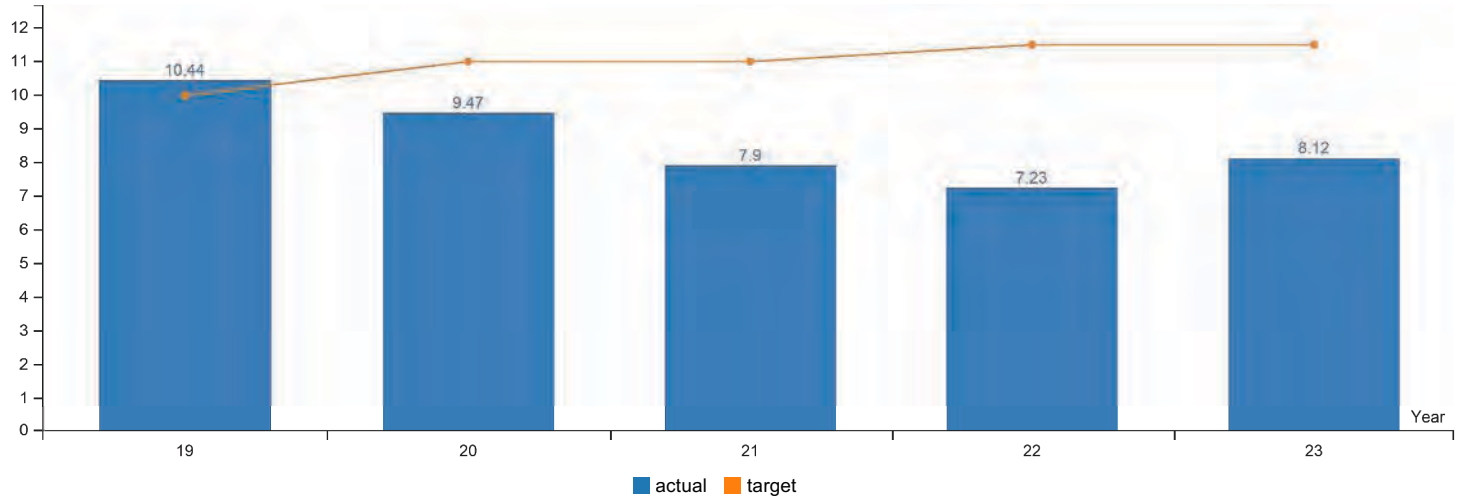
NOTE: “High school graduates” includes all students who received a regular four-year diploma, a modified four-year diploma, or a GED within four years of high school.

Limitations of this definition/data limitations are:

The measure uses a 16-month window after high school graduation during which graduating seniors can enroll in college to be included in the measure. This contrasts with the federal definition, which uses a zero- to ten-month window (enrollment in October for those graduating from high school between January and October of the same year). This makes national comparisons less precise than if the measures were the same. The measure uses a slightly different definition of high school graduates than the federal definition. The federal definition is a self-reported measure based on self-reported answers to a question asking whether respondents graduated from high school. It is not clear how respondents who received a modified four-year diploma or a GED within that zero-to-ten-month window answered this question.

KPM #3	College Credits Earned by K-12 Students - Amount of postsecondary credit per graduate awarded to K-12 students.
	Data Collection Period: Sep 01 - Aug 31

** Upward Trend = positive result*



Report Year	2019	2020	2021	2022	2023
College Credits Earned by K-12 Students					
Actual	10.44	9.47	7.90	7.23	8.12
Target	10	11	11	11.50	11.50

How Are We Doing

In 2021-22, K-12 students earned an estimated average of 8.12 college credits per high school graduate. After the decline in the number of K-12 students enrolling and passing college classes during the COVID-19 pandemic, students earned more college credits on average in 2021-22 than in the previous year.

Factors Affecting Results

Data availability, availability of, access to, and financing of programs allowing high school students to earn college credits at a minimal or no cost, academic preparation, Internet access during the pandemic, availability of support for remote learning.

Other Comments:

This measure identifies the college credit earned by students in kindergarten through twelfth grade. It is an indicator of the “leg up” that students have entering postsecondary education. Students who have completed six to nine credits have an advantage in completing postsecondary education and training. This measure is a calculation that represents the number of college credits awarded to K-12 students, per high school graduate, in one academic year.

We define this concept in the following terms:

(Sum of credits earned by K-12 students in community colleges and universities)

divided by

(Number of students in high school 4-year graduating class)

- Credits included in the calculation of the numerator include credits earned by:
  - Students reported by community colleges as participating in the Dual Credit Program
  - Students reported by community colleges as participating in the Expanded Options Program
  - Students reported by universities as enrolled in Dual Credit courses.

- "Dual Credit" is defined as awarding secondary and postsecondary credit for a course offered in a high school during regular school hours, as determined by local school board and community college board policy. Dual Credit courses include both lower division collegiate courses and career/technical preparation courses. Dual Credit courses are designed to help high school students' progress through postsecondary education by eliminating duplication of course work.

- "Expanded Options Program" allows high school students to take courses at Oregon community colleges and universities to earn concurrent high school and college credits. If accepted into the program, the student's sponsoring high school covers the cost of tuition and fees.

- Postsecondary credits earned by students described above were totaled for the academic year. In community colleges, all credits earned by these students were included in the calculation, including credits in courses open to general student population and not exclusively to students participating in Accelerated Learning programs.

- Only credits from courses that were completed successfully were included in the calculation. Successful completion is defined as a course completion with a grade 'C- 'or better, or with a grade 'Pass' in Pass/No Pass courses.

- The denominator is the number of students in high school 4-year graduating class as reported by the Oregon Department of Education. In addition to students receiving a regular high school diploma, the graduating class includes those who received a modified diploma and those who earned their diplomas but had not yet received them.

Limitations of this definition/data limitations are:

- The numerator and denominator in this calculation do not represent the same student cohort. The numerator includes credits earned by high school seniors, juniors, sophomores, freshmen, and possibly younger students in a single academic year. The denominator includes the count of graduating high school seniors.

- The calculation does not include high school students who took college classes and earned college credits independently, without being formally enrolled in Accelerated Learning programs due to difficulties in identifying such students in the available data sets.

- Credits earned by 'fifth year seniors' (high school students enrolled in high school for the fifth year after completing HS graduation requirements to earn college credits at no charge) are not included in the calculation of the numerator. This is because the denominator includes students graduating after 4 years.

- The calculation does not include potential credits that can be awarded by postsecondary institutions to students for successful completion of AP and IB courses.

Given these limitations, results suggest:

The number of college credits earned by K-12 students, per high school graduate, increased during 2010-11 through 2015-16 academic years from 6.80 credits in 2010-11 to 10.56 credits in 2015-16. The number of average college credits declined slightly in 2016-17 through 2018-19. The decline in the average number of college credits is accompanied and possibly explained by the decline in the number of high school student enrolled in college credit in community colleges. These students comprise the majority of high school students enrolled in college courses. As the same time, the number of high school students enrolling in college credits in universities was on the rise.

In 2019-20 and 2020-21, the average number of credits, as well as the number of students taking college classes declined sharply both in universities and community colleges due to the COVID-19 pandemic. During the pandemic students, instructors, and postsecondary and K-12 leaders faced new challenges. They included navigating remote learning modalities of instruction, securing technology resources, following school closure and re-opening policies, facing physical and mental health challenges, and other factors.

In 2021-22, public universities and community colleges started to recover after deep enrollment declines. More K-12 students enrolled in college classes than the previous year. They also earned more colleges credits on average. The modest comeback may represent a turning point after the disruption of the pandemic, although the enrollment and the average number of college credits are still well below pre-pandemic levels.

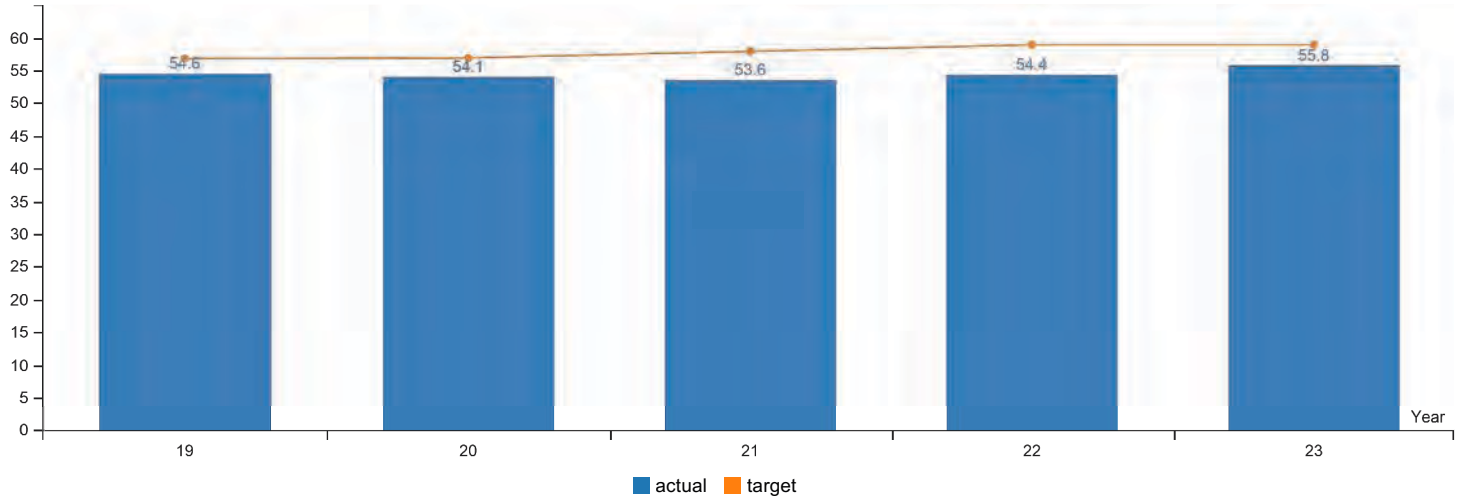
Report Year	**2019**	**2020**	**2021**	**2022**	**2023**
Data Year	**2017-18**	**2018-19**	**2019-20**	**2020-21**	**2021-22**
Count of K-12 students who earned credit (with a C- or better) at community colleges	33,820	31,356	27,370	20,725	25,113
Count of K-12 students who earned credit (with a C- or better) at universities	9,518	9,558	8,068	7,801	8,751

Improvements to this measure would come from:

The current calculation provides an approximation of the number of credits earned by each high school graduating cohort over their K-12 career. A better measure would result from calculating the number of credits earned by students in a high school graduating cohort. Such measure would require collaboration and data sharing between the Higher Education Coordinating Commission and the Oregon Department of Education.

KPM #4	Oregon Educational Attainment - Percent of young Oregon adults with post secondary degree or certificate
	Data Collection Period: Jan 01 - Jan 01

** Upward Trend = positive result*



Report Year	2019	2020	2021	2022	2023
Oregon Educational Attainment					
Actual	54.60%	54.10%	53.60%	54.40%	55.80%
Target	56.90%	57%	58%	59%	59%

How Are We Doing

We estimate that the percentage of Oregon adults age 25 to 34 in 2021 who have a postsecondary degree or certificate is 55.8 percent. The attainment rate rose very slightly in the most recent year, by less than a percentage point but has remained generally flat for the last five years.

Attainment by level of education is shown below for the most recent year and for previous years. The percentage of young adults with a degree or certificate beyond high school was 50 percent in 2012 and rose for the next few years before remaining at about 54 percent from 2016 forward until rising in the most recent year. In particular, the percentage of the population with a bachelor's degree rose slightly from 36.0 percent in 2020 to 38.0 percent in 2021, while the percentage estimated to have an associate degree or career certificate fell from 18.4 percent in 2020 to 17.8 percent in 2021. We note that the percentage of the young adult population with some college and no credential remained relatively stable, at 18.4 percent in 2021, compared to 18.8 percent the year before. The percentage with a high school diploma or equivalent was also stable, at 19.0 percent (19.1 percent in 2020). Notably, the data for this measure come from the American Community Survey, fielded every year in all states by the U.S. Census Bureau. Though a reliable survey, some fluctuation from year to year may be attributable to sampling.

Regardless, continued progress—and progress at a faster rate—will be necessary to meet the state's goal of 80 percent of the young adult population with a postsecondary degree or certificate.

	2017	2018	2019	2020	2021
Bachelor's degree or more	36.7%	35.3%	35.1%	36.0%	38.0%

Associate degree or certificate	17.9%	18.9%	18.5%	18.4%	17.8%
Some college	18.5%	19.7%	18.8%	18.8%	18.4%
High school diploma or equivalent	18.7%	17.9%	20.4%	19.1%	19.0%
Less than high school	8.2%	8.2%	7.2%	6.8%	6.8%

Factors Affecting Results

The amount of educational attainment among Oregon young adults reflects both the attainment of Oregon youth moving into adulthood and the migration of young adults into the state. These data do not allow for disaggregating how much of the increase in attainment is the result of in-migration.

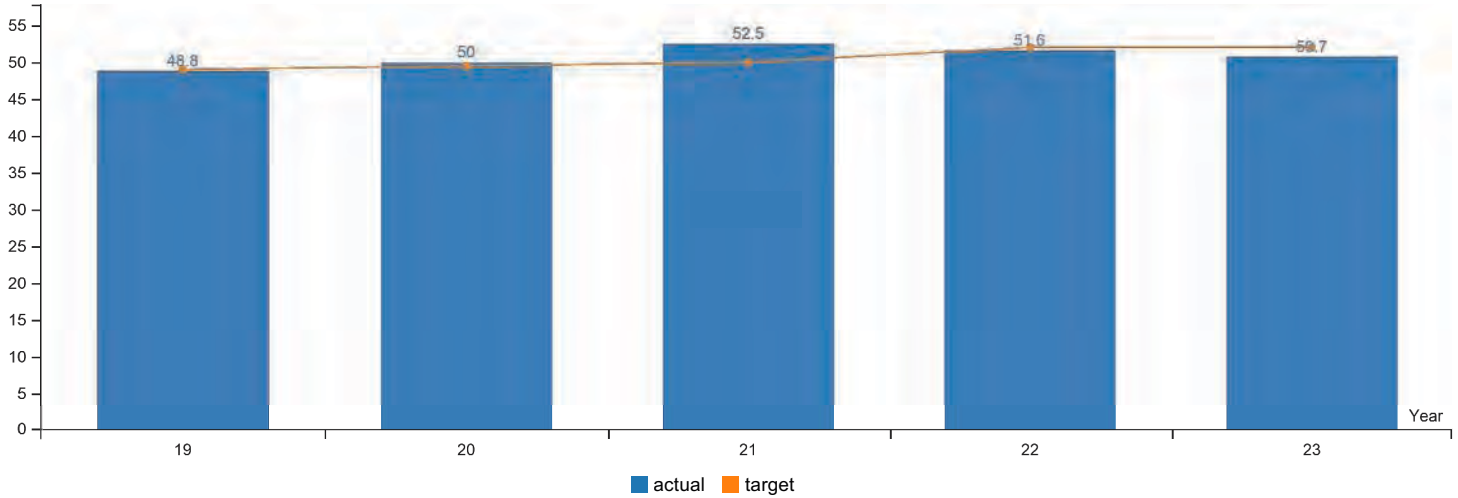
Other Comments:

This estimate comes from U.S. Census Bureau data drawn from the annual American Community Survey (ACS), one-year estimates. Year-to-year variation in the survey sample can affect the results. For the 2020 year, data come from the ACS five-year estimates, as the Census Bureau does not release one-year estimates.

The data presented here are further calculated to incorporate an estimate of certificate attainment, based on estimates of certificate rates put forth by the Census Bureau using Survey of Income and Program Participation data (https://www.census.gov/prod/2014pubs/p70-138.pdf) and a Lumina Foundation survey from the University of Chicago's NORC survey group (http://strongernation.luminafoundation.org/report/2017/#page/narrative).

KPM #5	Community College Completion and Transfer Rate - Percentage of community college students who complete an associate degree or certificate or who transfer to the university system within three years.
	Data Collection Period: Jan 01 - Jan 01

** Upward Trend = positive result*



Report Year	2019	2020	2021	2022	2023
Community College Completion and Transfer Rate					
Actual	48.80%	50%	52.50%	51.60%	50.70%
Target	49%	49.50%	50%	52%	52%

How Are We Doing

Out of all credential-seeking students who were new to Oregon community colleges in the fall of 2018, 50.7 percent either earned an associate degree or certificate, or enrolled at a 4-year institution (nationwide) within four years. After steadily rising for years prior to the pandemic, the rate has fallen slightly during the last two years, but remains around 51 percent.

Factors Affecting Results

Tuition and fees, availability of financial aid, academic preparation, non-academic circumstances (work, family, health), student services, academic guidance and understanding of pathways to completion, personal goals, data availability and calculation methodology.

Other Comments:

This measure enables the HECC and its partner community colleges to assess whether the likelihood of completing community college is improving over time. The measure is similar to outcome measures in the national community college Voluntary Framework of Accountability (VFA) that Oregon community colleges have begun to adopt. Unlike the measure in VFA, this metric only includes transfer to a 4-year institution when examining transfer rates.

We define this concept in the following terms:

(Number of community college students identified as completers within four years)

divided by

(Number of students in the entering credential-seeking cohort of fall 2016)

- For the purposes of the KPM, completers include students who earned an associate degree or certificate and students who did not earned an award, but enrolled in a 4-year institution within four years.
- For the purposes of the KPM, the Credential-Seeking cohort is defined similarly to the Credential-Seeking Cohort of the Volunteer Framework of Accountability (VFA).

  It includes students who were new to the institution (community college) in the fall of 2016 or preceding summer term; AND were not enrolled in dual credit courses or reported as an accelerated learning student; AND attempted a credit course in the fall of 2016; AND earned a minimum of 18 quarter credits in the first two years or earned an award requiring less than 18 quarter credits.

- Students may be enrolled full-time or part-time.
- Students in the cohort are new to the institution in the fall of 2016, but not necessarily new to postsecondary education.
- The completed 18 quarter credits are inclusive of all college-level coursework AND developmental coursework.
- The completed 18 quarter credits must be earned at a community college between the fall of 2016 and summer of 2020; they do not include credits for prior learning or college credits earned before graduating from high school.
- A student is considered to have transferred if there is any evidence of enrollment at a 4-year institution after the last enrollment of the community college and before the end of the four-year tracking period. For this KPM, enrollment records were obtained through a data match with the National Student Clearinghouse (public and private 4-year institutions) and the Oregon Public University database.

Limitations of this definition are:

- This KPM uses student behavior (credit accrual) to define “credential-seeking” due to inconsistency and unreliability of a student’s self-report of their intentions to complete a credential. While this method captures more students who eventually earned an award, it may also exclude some students who planned to earn a credential but were unsuccessful in earning 18 quarter credits in 2 years, thus potentially inflating the completion rate.
- Records of enrollment at 4-year institutions obtained through the National Student Clearinghouse (NSC) may include non-credit enrollment.

Given these limitations, results suggest:

Out of all students in the fall of 2018 credential-seeking cohort, 35.2% earned an associate degree or certificate within four years. For another 15.6% of the students in the cohort there is evidence of enrollment at a 4-year institution. In total, 50.7% of the cohort either earned an award or enrolled at a 4-year institution. The overall completion rate has been declining for the last 2 years. The decline is likely connected to the COVID-19 pandemic. During the pandemic many college campuses shut down, and students adopted to virtual learning with various degrees of success. Availability of guidance, internet connection and technology, financial resources, and physical and mental health were factors affecting students’ persistence during the pandemic. The remaining 49.3% of students in the 2018 cohort were either still enrolled at the community college at the end of the four-year tracking period or left the community college with or without college credits.

Report Year	**2019**	**2020**	**2021**	**2022**	**2023**
Cohort Year	**Fall 2014**	**Fall 2015**	**Fall 2016**	**Fall 2017**	**Fall 2018**
Associate degree	27.3%	28.6%	29.8%	30.2%	29.4%
Certificate	6.2%	6.1%	6.2%	5.7%	5.8%

Total awards	33.5%	34.7%	36.0%	35.9%	35.2%
No award, transfer	15.2%	15.3%	16.5%	15.7%	15.6%
Total award or transfer*	48.8%	50.0%	52.5%	51.6%	50.7%

e. Native Hawaiian or Pacific Islander					
Actual	36.10%	40.60%	39.40%	43.90%	43.10%
Target	49%	49.50%	50%	50%	50%
f. White					
Actual	51%	52.20%	54%	53.20%	53.30%
Target	51%	50.30%	50.50%	54%	54%

How Are We Doing

There are significant differences in the completion and transfer rates of the six racial/ethnic groups examined in this measure. Total award and transfer rates range from 40.5% for Black or African American students to 60.4% for Asian students in the fall 2018 credential-seeking cohort. The overall completion and transfer rate for the fall 2018 credential-seeking cohort is 50.7% within four years.

Factors Affecting Results

Cultural sensitivity of programs, availability of student services and guidance, availability of bilingual services, tuition and fees, availability of financial aid, academic preparation, non-academic circumstances (work, family, health), personal goals and cultural influences, data availability and calculation methodology.

Other Comments:

This measure enables the HECC and its partner community colleges to assess whether the likelihood of completing community college is improving over time. KPM 6 tracks these completion rates by race/ethnicity to evaluate progress in equity in postsecondary education.

We define this concept in the following terms:

(Number of community college students identified as completers within four years)

divided by

(Number of students in the entering credential-seeking cohort of fall 2016)

- For the purposes of the KPM, completers include students who earned an associate degree or certificate and students who did not earned an award, but enrolled in a 4-year institution within four years.
- For the purposes of the KPM, the Credential-Seeking cohort is defined similarly to the Credential-Seeking Cohort of the Volunteer Framework of Accountability (VFA).

  It includes students who were new to the institution (community college) in the fall of 2016 or preceding summer term; AND were not enrolled in dual credit courses or reported as an accelerated learning student; AND attempted a credit course in the fall of 2016; AND earned a minimum of 18 quarter credits in the first two years or earned an award requiring less than 18 quarter credits.

- Students may be enrolled full-time or part-time.
- Students in the cohort are new to the institution in the fall of 2016, but not necessarily new to postsecondary education.
- The completed 18 quarter credits are inclusive of all college-level coursework AND developmental coursework.
- The completed 18 quarter credits must be earned at a community college between fall of 2016 and summer of 2020; they do not include credits for prior learning or college credits earned before graduating from high school.
- A student is considered to have transferred if there is any evidence of enrollment at a 4-year institution after the last enrollment of the community college and before the end of the four-year tracking period. For this KPM, enrollment records were obtained through a data match with the National Student Clearinghouse (public and private 4-year institutions) and the Oregon Public University database.

Limitations of this definition are:

- This KPM uses student behavior (credit accrual) to define “credential-seeking” due to inconsistency and unreliability of a student’s self-report of their intentions to complete a credential. While this method captures more students who eventually earned an award, it may also exclude some students who planned to earn a credential but were unsuccessful in earning 18 quarter credits in 2 years, thus potentially inflating the completion rate.
- Records of enrollment at 4-year institutions obtained through the National Student Clearinghouse (NSC) may include non-credit enrollment.

Given these limitations, results suggest:

The completion and transfer rates of Asian American and White students exceed the overall statewide completion and transfer rate of the fall 2018 cohort. The completion and transfer rates of Native

American or Alaska Native, Black/African American students, Native Hawaiian/Pacific Islander students, as well as Hispanic students are below the state average of 50.7%. All racial/ethnic groups except for the Asian and White groups have experienced a decline in the completion and transfer rates in comparison with the prior year cohort. All groups except for the Asian group earned awards and transferred at a lower rate than before the COVID-19 pandemic.

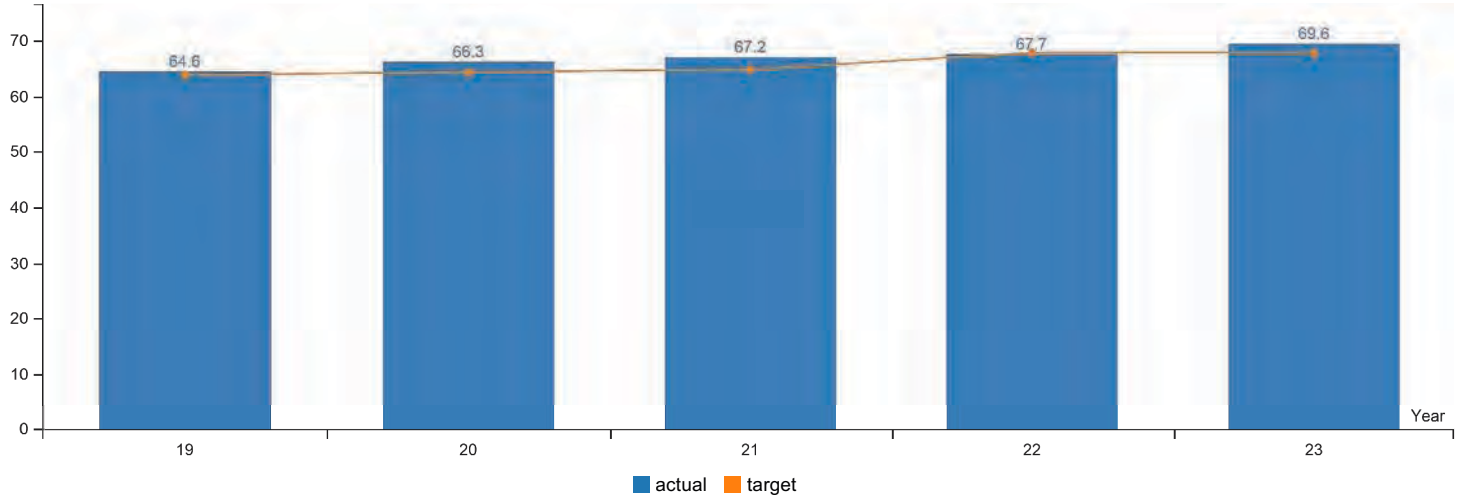
Community college award rates (without transfer rates) follow the same pattern. White and Asian racial groups' award rates exceed the state average of 35.2%, while other racial/ethnic groups' award rates are below the state average. Native Hawaiian/Pacific Islander and Black/African American students' award rates are the lowest attainment rates of associate degrees and certificates among the six racial/ethnic groups at 26.5% and 26.4% respectively.

An examination of transfer rates (without an award at a community college) shows that Asian American students have the highest transfer rate to 4-year institutions at 22.8% within 4 years. Native Hawaiian/Pacific Islander students have the second highest transfer rate at 16.7% within 4 years. For this KPM a student is considered to have transferred if there is any evidence of enrollment at a 4-year institution without consideration of the type, length, or outcome of enrollment at the 4-year institution, or possible "reverse transfer" later. Thus, these rates may also be an indicator of the degree of "swirling", or non-linear student pathway, which may or may not lead to a credential.

	Fall 2018 Cohort				
	Associate degree	**Certificate only**	**Total awards**	**No award, transfer**	**Total awards and transfer**
Native American or Alaska Native	24.6%	6.4%	31.0%	12.9%	43.9%
Asian American	31.6%	5.9%	37.6%	22.8%	60.4%
Black or African American	21.5%	4.9%	26.4%	14.1%	40.5%
Hispanic or Latina/o	27.4%	5.3%	32.7%	12.4%	45.1%
Native Hawaiian or Pacific Islander	19.6%	6.9%	26.5%	16.7%	43.1%
White	31.6%	5.5%	37.1%	16.2%	53.3%
Multi-racial	30.0%	3.2%	33.2%	15.5%	48.7%

KPM #7	Public University Graduation Rate - Percentage of public university college students who complete a bachelor's degree within 6 years.
	Data Collection Period: Sep 01 - Aug 31

** Upward Trend = positive result*



Report Year	2019	2020	2021	2022	2023
Public University Graduation Rate					
Actual	64.60%	66.30%	67.20%	67.70%	69.60%
Target	64%	64.50%	65%	68%	68%

How Are We Doing

University graduation rates have increased every year for the last six years and have consistently met or exceeded our targets. The overall public university graduation rate topped 67% for the first time with the 2014 cohort of entering students and nearly met the aggressive target of 68% with the 2015 cohort. In the most recent year, with the 2016 cohort, graduation rates have continued to rise, despite the pandemic, reaching a new high of 69.6%.

Historically, Oregon resident students tended to have slightly higher 6-year graduation rates than their nonresident counterparts by about 3-4 percentage points. That gap had narrowed somewhat, but in the most recent year, with the nonresident rate dipping a bit and the resident rate continuting it's growth, Oregon residents now complete at a rate that is nearly 6 percentage points higher than that of their nonresident counterparts.

Cohort Year	Fall 2012	Fall 2013	Fall 2014	Fall 2015	Fall 2016
Actual	64.5%	64.7%	65.4%	63.6%	63.7%

Factors Affecting Results

A number of factors influence student retention and completion, including adequate academic preparation for college, essential support services (e.g., freshmen orientation and engagement programs, tutoring, academic advising, early warning programs, faculty and peer mentors), financial issues, and personal and family events.

Other Comments:

This measure presents the percentage of first-time, full-time resident Oregon public university students starting in a given Fall term and graduating from an Oregon public university within six years.

We define this concept in the following terms:

(Number of students in the cohort who graduate within six years)

divided by

(Total number of students enrolled in the Fall entering freshman cohort)

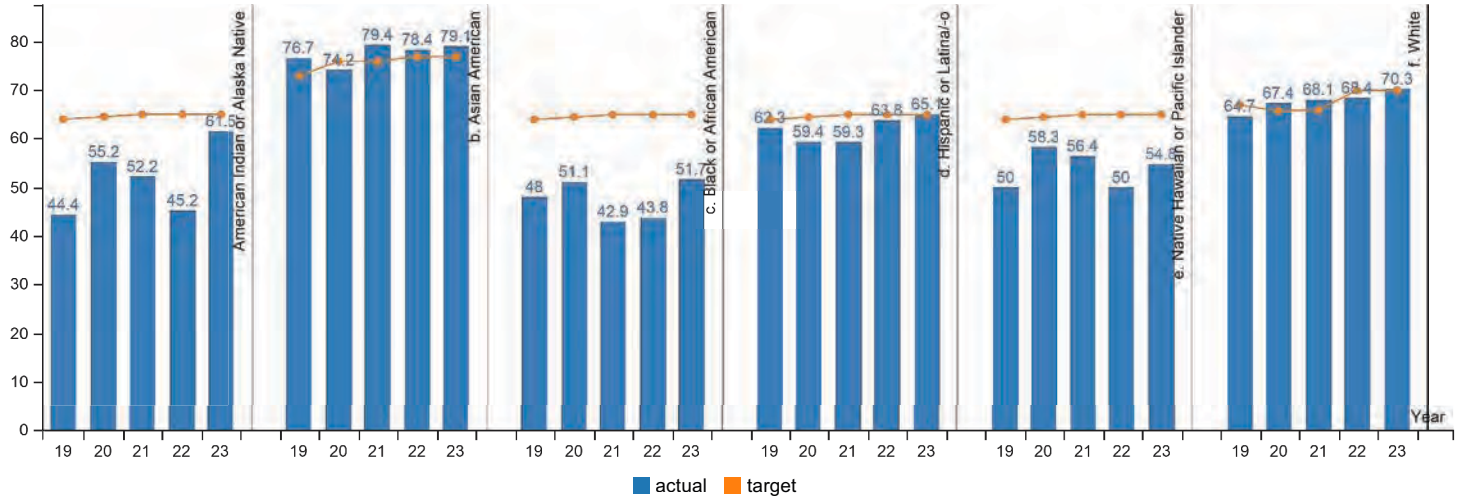
- This metric is based on the IPEDS definition for the Fall entering freshman cohort. This restricts the cohort to first-time, full-time freshmen.
- This is a rate that counts inter-institutional transfers as graduating. In other words, the student does not need to graduate at the same university that they entered as a freshman. If they transfer to and graduate from any one of the Oregon public universities they are included in the count of graduates.
- Although this metric is framed as a six-year graduation rate. It could more accurately be described as the percentage of students graduating within 150% of normal time. For those pursuing a bachelor's degree this is, indeed, six years. However, Oregon public universities do award a small number of associate degrees as well. For students receiving an associate degree, they are included in the numerator only if they graduate within 3 years (150% of normal time for an associate degree).

Limitations of this definition/data limitations are:

Given these limitations, results suggest:

Improvements to this measure would come from:

KPM #8	Racial/Ethnic Differences for Public University Graduation Rate - Percentage of public university students who complete a bachelor’s degree within 6 years, by race/ethnicity.
	Data Collection Period: Jan 01 - Jan 01



Report Year	2019	2020	2021	2022	2023
American Indian or Alaska Native					
Actual	44.40%	55.20%	52.20%	45.20%	61.50%
Target	64%	64.50%	65%	65%	65%
b. Asian American					
Actual	76.70%	74.20%	79.40%	78.40%	79.10%
Target	73%	76%	76%	77%	77%
c. Black or African American

Target	64%	64.50%	65%	65%	65%
d. Hispanic or Latina/-o					
Actual	62.30%	59.40%	59.30%	63.80%	65.10%
Target	64%	64.50%	65%	65%	65%
e. Native Hawaiian or Pacific Islander					
Actual	50%	58.30%	56.40%	50%	54.80%
Target	64%	64.50%	65%	65%	65%
f. White					
Actual	64.70%	67.40%	68.10%	68.40%	70.30%
Target	67%	65.80%	66%	70%	70%

How Are We Doing

There are significant differences in graduation rates between the various racial/ethnic subcategories ranging from a high of 79.1% to a low of 51.7%. Asian American and White students consistently graduate at the highest rates, with Asian Americans topping 70% for many years now, and the White demographic eclipsing this mark for the first time with the Fall 2016 cohort. For the first time in at least a decade, every group showed an increase over the previous year. And, although, some groups may have been rebounding a bit from lower-than-normal rates in the most recent years, it is still notable that the average across all groups reached an all-time high of 63.8%.

As with the overall graduation rate, even when broken down by racial/ethnic categories, Oregon resident students have tended to have slightly higher 6-year graduation rates than their nonresident counterparts. There is much more variance among these numbers, but in general, this seems to hold true, and even moreso in the most recent year. See the table below for detail.

Racial/Ethnic Group	Fall 2012	Fall 2013	Fall 2014	Fall 2015	Fall 2016
Native American or Alaska Native	40.0%	50.0%	44.0%	60.0%	40.9%
Asian American	65.9%	70.7%	64.5%	73.0%	68.0%
Black or African American	52.1%	50.0%	51.2%	50.4%	46.5%
Hispanic or Latina/o	61.4%	60.7%	63.5%	62.0%	56.5%
Native Hawaiian or Pacific Islander	32.8%	43.2%	40.7%	56.1%	37.3%
White	67.4%	66.3%	66.7%	65.4%	66.1%
Multi-racial	61.2%	63.8%	63.8%	63.5%	60.1%

Factors Affecting Results

A number of factors influence student retention and completion, including adequate academic preparation for college, essential support services (e.g., freshmen orientation and engagement programs, tutoring, academic advising, early warning programs, faculty and peer mentors), financial issues, and personal and family events.

Other Comments:

This measure presents the percentage of first-time, full-time resident Oregon public university students starting in a given Fall term and graduating from an Oregon public university within six years.

We define this concept in the following terms:

(Number of students in the cohort who graduate within six years)

divided by

(Total number of students enrolled in the Fall entering freshman cohort)

- This metric is based on the IPEDS definition for the Fall entering freshman cohort. This restricts the cohort to first-time, full-time freshmen.
- This is a rate that counts inter-institutional transfers as graduating. In other words, the student does not need to graduate at the same university that they entered as a freshman. Given these limitations, results suggest:

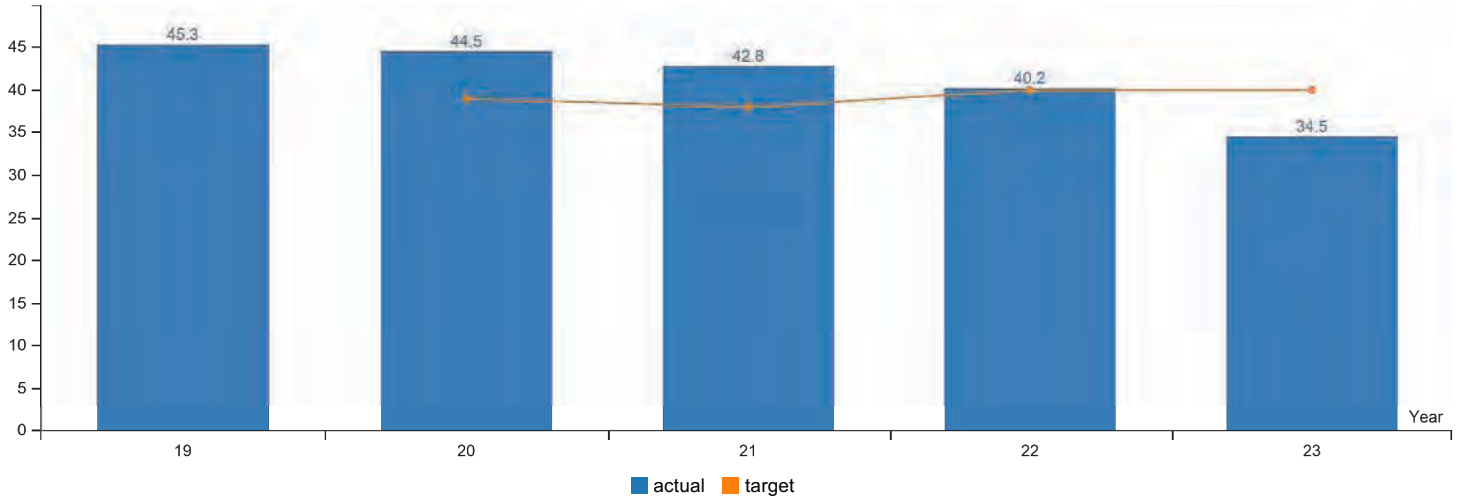
Improvements to this measure would come from:

KPM #9	Percentage of resident enrolled students who are incurring unaffordable costs - Percentage of resident enrolled students who are incurring unaffordable costs adjusted with institutional aid.
	Data Collection Period: Jan 01 - Jan 01

** Upward Trend = negative result*



Report Year	2019	2020	2021	2022	2023
Percentage of resident enrolled students who are incurring unaffordable costs adjusted with institutional aid.					
Actual	45.30%	44.50%	42.80%	40.20%	34.50%
Target		39%	38%	40%	40%

How Are We Doing

The percentage of students incurring unaffordable costs continues to decrease for the third year in a row. After 5 years in the range of 44% - 45%, in 2019-20, the percentage started to drop and has now nearly reached our target of 40%. In the most recent year, 2021-22, the rate fell further, to 34.5%, more than five percentage points beyond the target.

This fairly dramatic improvement in Affordability deserved a more in-depth analysis and the HECC's Office of Researcha and Data produced a research brief, "Recent Improvements in College and University Affordability", exploring this. A summary of the findings follows:

"Through a combination of expanded financial aid, reduced enrollment, and stable tuition, more Oregon students at public colleges and universities had resources to cover the cost of attendance in the last two years than at any time in recent history. Though some of the reasons were related to the pandemic, affordability is likely to keep improvingin the coming yearsbecause of significant increases in Oregonfinancial aidprograms, including a historic increase in the Oregon Opportunity Grant, the new Oregon Tribal Student Grant, and more."

For more detail, see the full research brief expalining the decline here:

https://www.oregon.gov/highered/research/Documents/Reports/Affordability%20Brief%202023.pdf

Factors Affecting Results

General factors affecting this metric include state support and expanded costs of providing education.

Other Comments:

This measure presents a calculation of the percentage of resident undergraduates enrolled at public higher education institutions (excluding OHSU) who incurred unaffordable total cost of attendance during the academic year while accounting for any grant aid that they received.

We define this concept in the following terms:

- "Unaffordable Costs Adjusted with Institutional Aid" – A total cost of attendance that exceeds the student's expected family contribution (EFC) plus their grant aid plus their earnings from a reasonable amount of work (the student's share). We used OSAC's method of estimating a student's share which is calculated as 90% of the minimum wage times 15 hours per week times 48 weeks. For 2020-21 this figure was $7,800.
- "Resident Undergraduate" is restricted to resident admitted undergraduates at the universities and is restricted to students who attempted at least one credit at the community colleges. The entire population is restricted to only those students who filled out a Free Application for Federal Student Aid (FAFSA).

Limitations of this definition/data limitations are:

Due to data limitations, this definition ignores scholarship awards and excludes all students who did not fill out a FAFSA. In addition, calculating total cost of attendance for each student requires some broad assumptions to be made, given the data sources that are available.

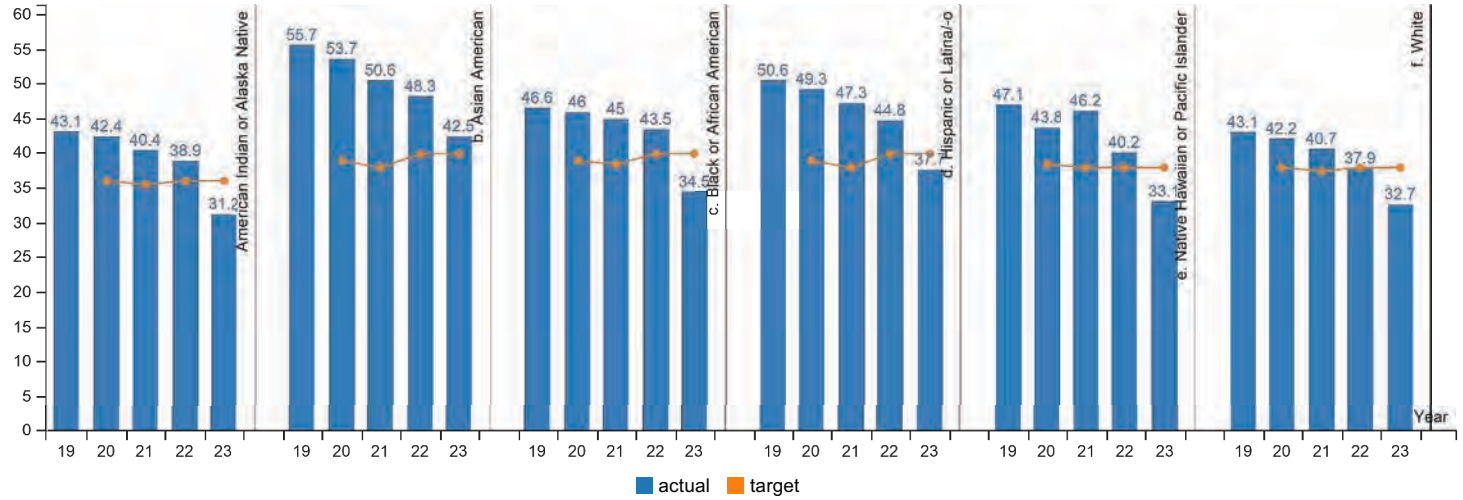
Given these limitations, results suggest:

Even given these limitations, the results suggest that a significant percentage of Oregon students will need to take on debt to go to college.

Improvements to this measure would come from:

There could be some benefit in breaking this measure out by university and community college students.

KPM #10	Racial/Ethnic Differences in Percentage of Resident Students incurring Unaffordable Costs - Percentage of resident enrolled students who are incurring unaffordable costs adjusted with institutional aid, by race/ethnicity.
	Data Collection Period: Jan 01 - Jan 01



Report Year	2019	2020	2021	2022	2023
American Indian or Alaska Native

Actual	43.10%	42.20%	40.70%	37.90%	32.70%
Target		38%	37.50%	38%	38%

How Are We Doing

In 2021-22, for the third time since we started tracking affordability (and the second year in a row), every one of the six racial/ethnic groups saw decreases in the percentage of students facing unaffordable costs. Even more impressively, five out of the six groups have now surpassed our affordability targets, many by a significant margin.

This fairly dramatic improvement in Affordability deserved a more in-depth analysis and the HECC's Office of Researcha and Data produced a research brief, "Recent Improvements in College and University Affordability", exploring this. A summary of the findings follows:

"Through a combination of expanded financial aid, reduced enrollment, and stable tuition, more Oregon students at public colleges and universities had resources to cover the cost of attendance in the last two years than at any time in recent history. Though some of the reasons were related to the pandemic, affordability is likely to keep improvingin the coming yearsbecause of significant increases in Oregonfinancial aidprograms, including a historic increase in the Oregon Opportunity Grant, the new Oregon Tribal Student Grant, and more."

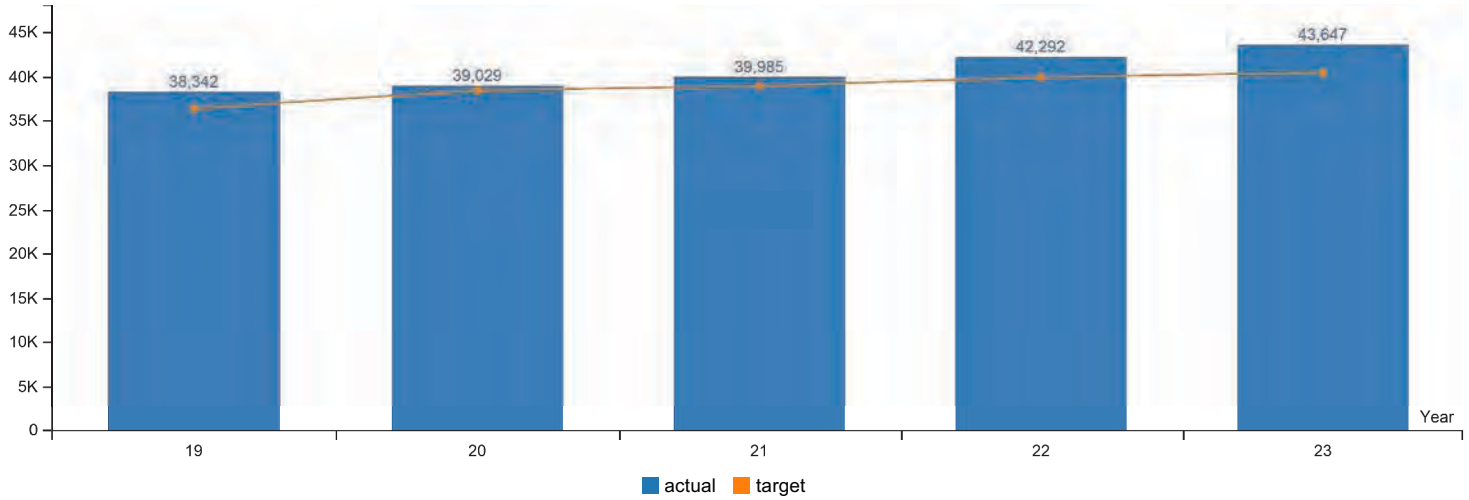
Improvements to this measure would come from:

There could be some benefit in breaking this measure out by university and community college students.

KPM #11	Earnings of Community College Completers - Median earnings of community college completers five years after completion.
	Data Collection Period: Jan 01 - Jan 01

** Upward Trend = positive result*



Report Year	2019	2020	2021	2022	2023
Five years after completion					
Actual	$38,342.00	$39,029.00	$39,985.00	$42,292.00	$43,647.00
Target	$36,460.00	$38,500.00	$39,000.00	$40,000.00	$40,500.00

How Are We Doing

The data show that the median wage of the 2015-16 community college award recipients was $43,647 five years after the year of the award. This continues an upward trend over the last several years and exceeds this year's target for this measure.

Factors Affecting Results

Labor market, inflation, career advising, wage data availability all affect the earnings of completers.

Other Comments:

This measure is a calculation of the median annual wage of community college completers (certificate or associate degree holders) 5 years after completion.

We define this concept in the following terms:

- "Community college completers" are defined as individuals who were awarded a career/technical certificate, Oregon Transfer Module (OTM) certificate or an associate degree in 2013-14.

- The information on community college completers was matched with Unemployment Insurance wage data provided by the Oregon Employment Department. The metric includes annualized wages from July 2019-June 2020.

Limitations of this definition/data limitations are:

- A wage match was possible if:

a. A valid social security number was available for the community college award recipient. Valid social security numbers were available for 97% of the 2013-14 Oregon community college completers; AND
b. A wage record for the social security number was found in the Unemployment Insurance database of the Oregon Employment Department for quarter 3 of 2019, quarter 4 of 2019, quarter 1 of 2020, or quarter 2 of 2020. Wage data are not available for graduates who are working in other states or countries, who are self-employed, employed by the federal government or unemployed. A wage match was found for 70% of community college completers with a valid social security number (67% of all completers).

- The measure does not claim that the 2013-14 certificates and associate degrees represent the highest education attainment of these individuals. It is possible that some of the award recipients received other educational awards prior to 2013-14, and some continued their education in the years following the 2013-14 award and received additional awards prior to the wage match year.

Given these limitations, results suggest:

The limitations described above suggest that the group may include individuals who attained bachelor's and graduate degrees prior to the wage match year. However, the overall wage change over time, as well as a comparison with the wage data for Oregon public universities' graduates remain valuable tools in identifying how educational attainment influences individual economic outcomes.

The median earnings of community college award recipients increased in comparison with the last year's data. The earnings of associate degree holders surpassed the earning of certificate/OTM holders 5 years after graduation ($44,545 vs $41,425, median annual).

A comparison of data from KPM 11 (earnings of community college completers) and KPM 13 (earnings of bachelor's degree completers) shows that more advanced credential holders earned higher wages 5 years after the award:

Wage year	**2021**	**July 2021 - June 2022**	**July 2021 - June 2022**
KPM	**n/a**	**KPM 11**	**KPM 13**
Credential attained	**High school diploma or equivalent***	**Community college certificates/OTM and associate degrees**	**Bachelor's degree**
Median earnings	$33,545	$43,647	$53,440

*Data source: 2017-2021 American Community Survey 5-year Estimates, 2021

e. Native Hawaiian or Pacific Islander					
Actual	$33,345.00	$38,360.00	$42,291.00	$40,733.00	$49,127.00
Target	$36,460.00	$38,500.00	$39,000.00	$39,000.00	$39,500.00
f. White					
Actual	$38,703.00	$39,337.00	$40,073.00	$42,309.00	$43,727.00
Target	$36,460.00	$38,500.00	$39,000.00	$39,000.00	$39,500.00

How Are We Doing

There are differences between the median earnings of the six racial/ethnic groups of community college award recipients. Native Hawaiian/Pacific Islander and Asian American graduates had the highest median earnings 5 years after the award at $49,127 and $45,259 respectively. Black or African American graduates had the lowest median earnings at $39,570.

Factors Affecting Results

Academic preparation; availability of culturally sensitive career advising and education guidance; occupation or industry; other societal and socio-economic factors.

Other Comments:

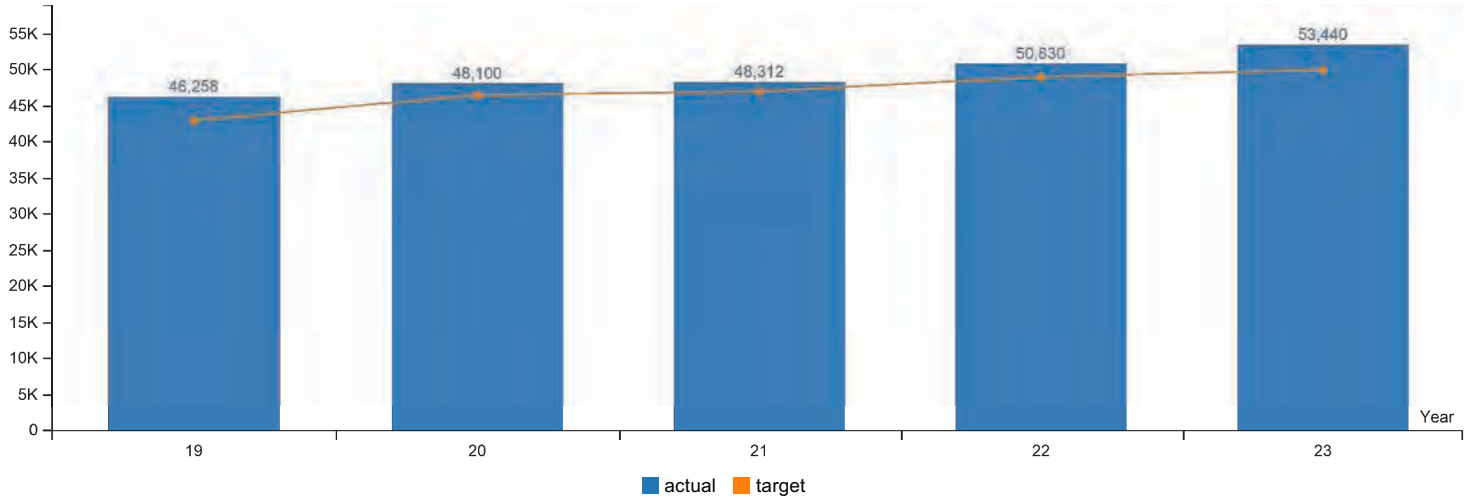
This measure expands the KPM 11 by calculating it for separate racial/ethnic groups. It thus provides information about both the value of a community college degree or certificate and about how that value might vary for different racial/ethnic groups. It is an indicator of both return on investment and equity.

A comparison with the earnings of bachelor's degree recipients at Oregon public universities (KPM 14) demonstrates that education is key to upward mobility and higher earnings for all racial/ethnic groups. Earnings of university graduates are typically higher than earnings of community college graduates five years after the award. One exception to this rule are the earning of Native Hawaiian or Pacific Islander students in the 2015-16 graduation cohort. However, the earnings of 2015-16 community college graduates of this racial/ethnic group are significantly higher than those of previous cohorts and may be an outlier caused by the small number of students in this group. The data show that there are significant differences between the median earnings among the six racial/ethnic group examined in this measure.

Award year	**2015-16**	**2015-16**
KPM	**KPM 12**	**KPM 14**
Credentials attained	**All community college awards (associate degrees and certificates)**	**Bachelor's degree**
Native American or Alaska Native	$42,252	$51,758
Asian American	$45,259	$56,762
Black or African American	$39,570	$51,407
Hispanic or Latina/o	$44,409	$52,790
Native Hawaiian or Pacific Islander	$49,127	$48,083
White	$43,727	$53,237
Multi-racial	$40,361	$52,911

KPM #13	Earnings of bachelor's degree completers - Median earnings of graduates with bachelor's degrees five years after completion
	Data Collection Period: Jan 01 - Jan 01

** Upward Trend = positive result*



Report Year	2019	2020	2021	2022	2023
Earnings of bachelor degree completers					
Actual	$46,258.00	$48,100.00	$48,312.00	$50,830.00	$53,440.00
Target	$42,997.00	$46,500.00	$47,000.00	$49,000.00	$50,000.00

How Are We Doing

The data show that the median wage of the 2015-16 bachelor's degree recipients was $53,440 five years after the year of the award. This amount exceeds this year's target for this measure.

Factors Affecting Results

Labor market, inflation, career advising, wage data availability all affect the earnings of completers.

Other Comments:

This measure is a calculation of the median annual wage of bachelor's degree recipients at Oregon public universities 5 years after the award.

We define this concept in the following terms:

- "Bachelor's degree completers" are defined as individuals who were awarded a baccalaureate degree by an Oregon public university during the 2014-15 academic year.
- The information on university completers was matched with Unemployment Insurance wage data provided by the Oregon Employment Department. The metric includes annualized wages from July 2020-June 2021.

Limitations of this definition/data limitations are:

- A wage match was possible if:

a. A valid social security number was available for the bachelor's degree recipient. Valid social security numbers were available for 95% of 2014-15 Oregon public university graduates; AND
b. A wage record for the social security number was found in the Unemployment Insurance database of the Oregon Employment Department for quarter 3 of 2020, quarter 4 of 2020, quarter 1 of 2021, or quarter 2 of 2021. Wage data are not available for graduates who are working in other states or countries, who are self-employed, employed by the federal government or unemployed. A wage match was found for 54% of bachelor's degree completers with a valid social security number (51% of all graduates).

- The measure does not claim that the 2014-15 bachelor's degrees represent the highest education attainment of these individuals. It is possible that some of the bachelor's degree completers received other educational awards prior to 2014-15, and some continued their education in the years following the 2014-15 award and received additional awards prior to the wage match year.

Given these limitations, results suggest:

The median earnings of bachelor's degree recipients increased in comparison with the last year's data. A comparison of data from KPM 11 (earnings of community college completers) and KPM 13 (earnings of bachelor's degree completers) shows that more advanced credential holders earned higher wages 5 years after the award:

Wage year	**2021**	**July 2021 - June 2022**	**July 2021 - June 2022**
KPM	**n/a**	**KPM 11**	**KPM 13**
Credential attained	**High school diploma or equivalent***	**Community college certificates/OTM and associate degrees**	**Bachelor's degree**
Median earnings	$33,545	$43,647	$53,440

*Data source: 2017-2021 American Community Survey 5-year Estimates, 2021

Target	$42,997.00	$46,500.00	$47,000.00	$47,000.00	$48,000.00
f. White					
Actual	$46,271.00	$48,141.00	$48,281.00	$51,074.00	$53,237.00
Target	$42,997.00	$46,500.00	$47,000.00	$50,000.00	$51,000.00

How Are We Doing

As with the overall median wage for 2015-16 bachelor's degree recipients, the median wages for each ethnic group have also exceeded the year's targets. Although five of the six racial/ethnic groups experienced an increase in median earnings, there are still significant differences between the groups.

However, the most recent year's data suggest some closing of the gap. The difference between the highest median wage ($56,762 for the Asian American group) and the lowest ($48,083 for the Native Hawaiian/Pacific Islander group) was $8,679, a 16.6% difference over the average median wage across all groups. This is the second lowest percentage difference of the last six years.

Factors Affecting Results

Academic preparation; availability of culturally sensitive career advising and education guidance; occupation or industry; other societal and socio-economic factors.

Other Comments:

This measure expands the KPM 13 by calculating it for separate racial/ethnic groups. It thus provides information about both the value of a community college degree or certificate and about how that value might vary for different racial/ethnic groups. It is an indicator of both return on investment and equity.

A comparison with the earnings of Oregon community college award recipients (KPM 12) demonstrates that education is key to upward mobility and higher earnings for all racial/ethnic groups. However, the data show that there are significant differences in between the median earnings among the six racial/ethnic group examined in this measure.

Award year	**2015-16**	**2015-16**
KPM	**KPM 12**	**KPM 14**
Credentials attained	**All community college awards (associate degrees and certificates)**	**Bachelor's degree**

How Are We Doing

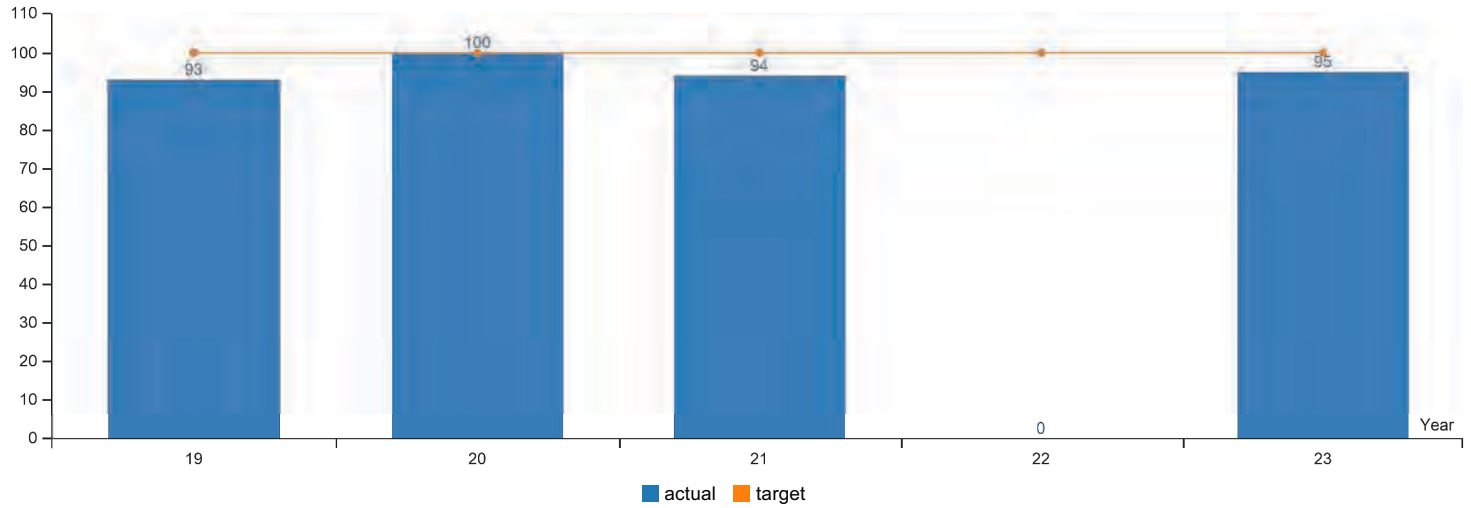
The Oregon Department of Administrative Services defines the measures of customer service with the six questions below. We defined and surveyed a list of stakeholders on these questions from a wide range of external stakeholders, including postsecondary institutions, other government agencies, and non-governmental organizations. The stakeholder list was defined as those groups or organizations to which the HECC provides some level of technical or customer support. At least three representatives of each group were sent the survey. Selections were reviewed and replaced if necessary to ensure a mix of institutional partners (i.e., to avoid over-representation of particular universities or community colleges). In particular, the list included: public university and community college financial/budgetary staff, public university and community college faculty and program staff, public university and community college institutional research staff, local workforce investment board partners, private postsecondary schools, private degree-granting institutions, staff at related government agencies, and external non-governmental organization staff.

Factors Affecting Results

In addition to the work of agency staff, the sample of individuals surveyed, the sample of individuals responding, and the timing of the survey all may affect the results.

KPM #16	Commission Best Practices - Percent of total best practices met by the Commission.
	Data Collection Period: Sep 01 - Sep 30

** Upward Trend = positive result*



Report Year	2019	2020	2021	2022	2023
BEST PRACTICES					
Actual	93%	100%	94%		95%
Target	100%	100%	100%	100%	100%

How Are We Doing

This KPM examines the percentage of commission best practices met by the HECC Commission. DAS defines this as the percentage of Board members or Commissioners who agreed or strongly agreed that they and the Commission followed best practices. As in prior years, we defined these best practices with 24 rated questions and an open-ended question for additional comments.

Across all questions, 95% of responding Commissioners agreed or strongly agreed that they followed the 24 best practices identified here. This is consistent with earlier results.

The rated questions had possible answers of:

- strongly agree (5 points)
- agree (4 points)
- neutral (3 points)
- disagree (2 points)
- strongly disagree (1 point)

The mean response across all questions was 4.5 out of 5, or midway between “strongly agree” and “agree.”

The questions are:

As an Individual Commissioner:

Q1: I am able to devote the time and energy necessary to actively participate in Commission meetings.

100% agreed or strongly agreed; mean response 4.5

Q2: The amount of time expected of commissioners to prepare and participate in Commission meetings is reasonable.

80% agreed or strongly agreed; mean response 4.25

Q3: The amount of time expected of commissioners outside of Commission meetings is reasonable.

100% agreed or strongly agreed; mean response 4.5

Q4: The Commission is effectively utilizing my skills and expertise.

80% agreed or strongly agreed; mean response 4.25

Q5: I can speak candidly at Commission meetings.

100% agreed or strongly agreed; mean response 4.75

Q6: I can participate in subcommittee meetings in which I am not a subcommittee member.

100% agreed or strongly agreed; mean response 4.75

Q7: Serving on this Commission is satisfying.

100% agreed or strongly agreed; mean response 4.75

As a Commission:

Q8: The Commission as a whole has a clear understanding of its role and responsibilities.

100% agreed or strongly agreed; mean response 4.5

Q9: The Commission understands and respects the distinction between its responsibilities and those of management.

100% agreed or strongly agreed; mean response 4.5

Q10: Commissioners actively participate in discussions

100% agreed or strongly agreed; mean response 4.5

Q11: The Commission has diversity of representation (e.g., gender, ethnicity, age, vocation, etc.).

80% agreed or strongly agreed; mean response 4.0

Q12: Commissioners listen to and value each other's comments.

100% agreed or strongly agreed; mean response 4.75

Q13: The leadership of the Commission is effective.

100% agreed or strongly agreed; mean response 4.75

Q14: Public comment during the public comment section of the meeting and during action items is a valuable opportunity to gather input.

100% agreed or strongly agreed; mean response 4.5

Q15: The Commission ... Provides insight and guidance to the HECC's strategic direction.

100% agreed or strongly agreed; mean response 4.5

Q16: The Commission ... Ensures the agency's fiscal integrity by monitoring the agency's financial policies and operating performance and by submitting the agency's biennial budgets.

100% agreed or strongly agreed; mean response 4.25

Q17: The Commission ... Assesses the performance of the Executive Director on an annual basis

100% agreed or strongly agreed; mean response 4.75

Q18: The Commission ... Follows the highest standards of fiduciary duty and avoids conflict of interest in decision-making

100% agreed or strongly agreed; mean response 4.5

Q19: The Commission ... Operates in a transparent and open fashion.

100% agreed or strongly agreed; mean response 4.5

Q20: Commission meetings... Have agendas and materials that are distributed far enough in advance to give them adequate consideration.

80% agreed or strongly agreed; mean response 4.25

Q21: Commission meetings... Rely on written and presentation materials that provide the right type and amount of information and are clearly written.

100% agreed or strongly agreed; mean response 4.75

Q22: Commission meetings... Cover the right combination of information-sharing, discussion, decision-making, and board education.

100% agreed or strongly agreed; mean response 4.5

Q23: Commission meetings... Allow enough time for the exchange of ideas and thoughtful deliberation.

80% agreed or strongly agreed; mean response 4.5

Q24: Commission meetings... Strike the right balance between long-range, strategic matters and routine matters of oversight.

80% agreed or strongly agreed; mean response 4.5

How Are We Doing

Factors Affecting Results

Other Comments:

Limitations of this definition/data limitations are:

- A wage match was possible if:

a. A valid social security number was available for the workforce training recipient; AND
b. A wage record for the social security number was found in the Unemployment Insurance database of the Oregon Employment Department. Wage data are not available for graduates who are working in other states or countries, who are self-employed, employed by the federal government or unemployed.

Given these limitations, results suggest:

Trainees are benefitting from a recovering economy after high unemployment during COVID.

Improvements to this measure would come from:

Additional efforts to gather SSNs from alternative databases.

Audit Response Report

AUDIT RESPONSE REPORT

The following information is provided on the status of implementation of action plans in response to Secretary of State Audits Division audit findings and recommendations for reports issued since February 2022. In addition, the Audits Division is currently performing audit work for their annual audit of the State of Oregon's financial statements with the objective/scope to express an opinion on whether the financial statements contained in the ACFR are fairly presented, in all material respects, in conformity with generally accepted accounting principles. Audit work being performed at the agency for the year ending June 30, 2024, will, in part, allow the auditor to achieve this objective.

Audit Report	Date Issued	Finding/Recommendation	Agency Response/Corrective Actions	Status
FY21 Statewide Single Audit Report 2022-18 **Schedule of Prior Year Findings**	July 2022	Finding 2019-006: Improve Year-End Closing Process. Recommendation: Management develop and implement procedures to prevent, detect, and correct errors in the year-end accrual processes.	HECC has hired a new lead accountant with significant SARS and SFMA knowledge and experience. Since her hire, HECC has begun to perform monthly reviews of all transactions so that we may detect and correct errors as they occur. This biennium, all prior months have been reviewed prior to accounting month close and issues that have been detected have been researched, corrected, and documented. The Lead Accountant has also created a desk manual that is substantially complete and is guiding the work of all HECC accountants. HECC will continue to update the manual as new policies and procedures are approved and implemented. As of January 30, 2020, all actions have been completed. Update: The desk manual is substantially complete and is guiding the work of all HECC accountants. HECC will continue to update the manual as new policies and procedures are approved and implemented. Anticipated completion date: June 30, 2021.	Corrective Action Taken

AUDIT RESPONSE REPORT

Audit Report	Date Issued	Finding/Recommendation	Agency Response/Corrective Actions	Status
FY22 Statewide Single Audit Report 2023-21	July 2023	Finding 2022-060: Strengthen controls to ensure expenditures are not obligated beyond the period of performance. Recommendation: Management review and revise controls to ensure expenditures are only obligated during the period of performance federally mandated dates.	Management agrees with this recommendation. The three errors pertaining to those expenditures that were outside the period of performance, were due to a change in personnel and trying to balance out the 2018 grant, after the fact. The HECC have addressed these issues by ensuring that all new accountants are fully trained in a timely manner. Also, HECC has implemented training for all current accounting staff in identifying what is an allowable cost within the period of performance. This training also included a review of proper close-out procedures for all grants.	Anticipated Completion Date: June 30, 2023

AUDIT RESPONSE REPORT

Audit Report	Date Issued	Finding/Recommendation	Agency Response/Corrective Actions	Status
FY22 Statewide Single Audit Report 2023-21	July 2023	Finding 2022-061: FFATA reports were not prepared or submitted. Recommendation: Management implement controls to timely prepare and submit the monthly FFATA reports as required by federal regulations. The department should also work with the federal awarding agency to determine what actions it should take for older reports not submitted.	Management agrees with this recommendation. According to the findings, the HECC didn't submit any subaward information to the FSRS during fiscal year 2022. Furthermore, the agency had not submitted any subaward information to FSRS since 2017. The HECC acknowledges these findings are correct. Due to these findings, HECC has implemented procedures to ensure timely entry into the FFATA Subaward Reporting System (FSRS) of all awards that equal or exceed $30,000. In addition, HECC has granted FSRS access to several high-level accountants to ensure that there is always staff on hand to make these entries. The procedures include a checkbox on the cover page of every agreement that delineates when a FSRS entry is required.	Anticipated Completion Date: May 31, 2023

AUDIT RESPONSE REPORT

Audit Report	Date Issued	Finding/Recommendation	Agency Response/Corrective Actions	Status
FY22 Statewide Single Audit Report 2023-21	July 2023	Finding 2022-062: Improve controls over payroll. Recommendation: Management ensure timesheets are timely reviewed and positions descriptions are completed and retained.	Management agrees with this recommendation. To improve controls over payroll, the HECC and the State of Oregon switched its payroll system from the old Legacy Oregon State Payroll Application (OSPA – Epay) to the new Workday Payroll as of December 1, 2022. The HECC has since created reminder emails to all Management Staff to submit their respective employees' timesheets in a timely manner. In addition, the new Workday Payroll does not have a feature that automatically locks an employee's timesheet and auto-approves a timesheet. Each Manager must now manually approve a timesheet for any employee that enters specific time codes for particular grants or use of funds. To address the finding regarding unsigned position descriptions (PDs), the HECC has since ensured that all of the identified PDs have been signed. HECC's Human Resources Unit (HR) has created a new process going forward requiring all managers to sign the PD at the time of the offer letter and HECC HR to collect the signature from the employee on their first day when HR meets with them. HECC HR (continued on next page)	Anticipated Completion Date: August 31, 2023

			also has reviewed all of its existing employees' position description in this process to ensure all positions descriptions are signed.

FY23 Statewide Single Audit Report 2024-14 **Schedule of Prior Year Findings**	April 2024	Finding 2022-060: Strengthen controls to ensure expenditures are not obligated beyond the period of performance. Recommendation: Management review and revise controls to ensure expenditures are only obligated during the period of performance federally mandated dates.	Management agrees with this recommendation. The three errors pertaining to those expenditures that were outside the period of performance, were due to a change in personnel and trying to balance out the 2018 grant, after the fact. The HECC have addressed these issues by ensuring that all new accountants are fully trained in a timely manner. Also, HECC has implemented training for all current accounting staff in identifying what is an allowable cost within the period of performance. This training also included a review of proper close-out procedures for all grants.	Corrective Action Taken

AUDIT RESPONSE REPORT

Audit Report	Date Issued	Finding/Recommendation	Agency Response/Corrective Actions	Status
FY23 Statewide Single Audit Report 2024-14 **Schedule of Prior Year Findings**	April 2024	Finding 2022-061: FFATA reports were not prepared or submitted. Recommendation: Management implement controls to timely prepare and submit the monthly FFATA reports as required by federal regulations. The department should also work with the federal awarding agency to determine what actions it should take for older reports not submitted.	The HECC has implemented procedures to ensure timely entry into the FFATA Subaward Reporting System (FSRS) of all awards that equal or exceed $30,000. HECC completed these procedures as of May 2023, but hadn't started the new process of submitting subaward to FSRS until February 2024. Because the HECC didn't get its FFATA submitted until February 2024, they need to change our "completed action" to "partial corrective action" for this finding. There were no reports to submit, nevertheless, the HECC had documented zero subawards. The HECC going forward, has in its procedures to record in an activity log to document in the event when there are zero subawards to submit to FSRS.	Partial Corrective Action Taken

AUDIT RESPONSE REPORT

Audit Report	Date Issued	Finding/Recommendation	Agency Response/Corrective Actions	Status
FY23 Statewide Single Audit Report 2024-14 **Schedule of Prior Year Findings**	April 2024	Finding 2022-062: Improve controls over payroll. Recommendation: Management ensure timesheets are timely reviewed and positions descriptions are completed and retained.	The HECC didn't anticipate the new Workday Payroll System has features that allowed automatic authorization. There were two HECC employees' timesheets that had mass authorization from January 2023-June 2023. Therefore, need to change its "completed action" to partial corrective action' for unapproved payroll timesheets. HECC acknowledges this and will be working with Management staff to ensure timesheets are reviewed and approved by management staff and not let it process by the workday payroll system automatically.	Partial Corrective Action Taken

Audit Report	Date Issued	Finding/Recommendation	Agency Response/Corrective Actions	Status
Oregon Must Improve Community College Performance, Student Support, and Sustainability Amid Persistent Enrollment Declines Report 2022-35	December 2022	Recommendation 1: To increase community college accountability and student and college success, we recommend the Governor's Office and the Legislature: Help HECC and the colleges make the improvements noted below. Provide clear support, statutory language when needed, and necessary staff and funding at HECC and the colleges to help drive system improvement.	HECC Management Agrees. Unusually for Oregon state agencies, HECC is restricted to exercising only the powers, duties, and functions that have explicitly been granted to it by law. HECC's authorities may be found throughout ORS 350.075, the final section of which reads: *(8) (a) The Higher Education Coordinating Commission may exercise only powers, duties and functions expressly granted by the Legislative Assembly. Except as otherwise expressly provided by law, all other authorities reside at the institutional level with the respective boards of the post-secondary institutions.* *(b) The commission has implied and direct authority to implement the powers, duties and functions expressly granted to the commission by the Legislative Assembly.* *(c) Notwithstanding paragraph (b) of this subsection, the commission may not exercise any authority, express or implied, statutorily provided to a governing board of a public university listed in ORS 352.002 or a community college operated under ORS chapter 341.* (continued on next page)	Ongoing

			This statute has been interpreted by both the Oregon Department of Justice and Oregon's seventeen community colleges to limit our agency's primary role to that of a coordinating commission. As such, no matter how much the HECC supports the Secretary of State's recommendations to improve community college outcomes and sustainability, implementing the recommendations is at present a shared responsibility of the HECC, local community college boards, community college staff, accrediting institutions, and the Oregon Student Success Center. In addition, the HECC possesses neither the dedicated staff nor the financial resources to implement the recommendations alone. To implement the more robust system of supports recommended in this audit would likely require expanding the HECC's authority, either by adding to its enumerated authorities, amending or repealing the limiting language in ORS 350.075 (8), or both. Additionally, implementing this more robust system would likely require expanding HECC's capacity. As the audit notes, for example, the State of Washington's governing board for community colleges employs 239 staff, whereas Oregon employs just 20 staff focused (continued on next page)	

			on community college programs. Washington has five policy research analysts and a 13-member data services team, whereas Oregon has approximately 1.25 FTE dedicated to community college data and reporting.	
Audit Report	**Date Issued**	**Finding/Recommendation**	**Agency Response/Corrective Actions**	**Status**
Oregon Must Improve Community College Performance, Student Support, and Sustainability Amid Persistent Enrollment Declines Report 2022-35	December 2022	Recommendation 2a: To increase student success, student support and college sustainability, we recommend HECC work with state leaders and stakeholders to substantially upgrade the community college system's transparency and use of data for improvement: Publish student success metrics by college and statewide in an easily analyzable form, such as downloadable spreadsheets or online dashboards. Starting with metrics currently collected, include completion and transfer rates and rates for early student progress indicators. Report results by race/ethnicity and other available demographics.	HECC management agrees with this recommendation. We note that HECC already provides much of this information through its annual Statewide Higher Education Snapshot reports. Raw data is also available in an online, searchable format through the HECC Datamart if researchers wish to explore different research questions. In 2023, HECC will explore the potential for reporting additional early indicators of student success. We will also post the data online in spreadsheet form.	Recommendation Implemented

AUDIT RESPONSE REPORT

Audit Report	Date Issued	Finding/Recommendation	Agency Response/Corrective Actions	Status
Oregon Must Improve Community College Performance, Student Support, and Sustainability Amid Persistent Enrollment Declines Report 2022-35	December 2022	Recommendation 2b: To increase student success, student support and college sustainability, we recommend HECC work with state leaders and stakeholders to substantially upgrade the community college system's transparency and use of data for improvement: Work with the colleges to establish agreed-upon core student success metrics, both early indicators and outcomes, and a consistent method for calculating them. Use them to report to the public and Legislature on college and statewide performance, identify successful programs, and evaluate strategic initiatives, including initiatives led by the Oregon Student Success Center.	HECC management partially agrees with this recommendation. With respect to outcomes metrics, the HECC already publishes and provides to the colleges agreed-upon measures. These both include and build on measures of the Voluntary Framework of Accountability (VFA) that the colleges and HECC to use starting in 2015. As a result of that collaboration, HECC compiles and submits VFA data on the colleges' behalf. While the VFA website publishes those results already, the HECC could likewise publish college-by-college reports that would perhaps provide a more useful illustration of the data for the Oregon public and decision-makers. With respect to early indicator metrics, HECC regularly reports retention rates based on the VFA cohort, and VFA reports early indicators for each college. HECC agrees that additional reporting on additional early indicators could be useful for colleges and the State. (continued on next page)	Recommendation Implemented

			While the HECC could evaluate Oregon Student Success Center (OSSC) initiatives, we lack the authority to compel OSSC to provide HECC its data or respond to HECC findings. OSSC itself evaluates programmatic outcomes at colleges; it would be important to distinguish HECC's evaluation of OSSC efforts from OSSC's own evaluations of the institutions.	
Audit Report	**Date Issued**	**Finding/Recommendation**	**Agency Response/Corrective Actions**	**Status**
Oregon Must Improve Community College Performance, Student Support, and Sustainability Amid Persistent Enrollment Declines Report 2022-35	December 2022	Recommendation 2c: To increase student success, student support and college sustainability, we recommend HECC work with state leaders and stakeholders to substantially upgrade the community college system's transparency and use of data for improvement: Benchmark statewide outcomes and early indicators against national results on HECC's website and in reports to the Legislature. Develop Key Performance Measures for early indicators.	HECC management partially agrees with this recommendation. We agree that early indicators of student success are useful, and we report retention rates for credential-seeking students annually. We also agree that expanded benchmarking and reporting on early indicators of student success would provide colleges with information they could use to support student success further. HECC Management disagrees with the recommendation to incorporate these measures into the agency's legislatively adopted Key Performance Measures (KPMs). HECC already has 45% more KPMs than the Oregon Department of Education (ODE), a much larger organization running more (continued on next page)	Recommendation Implemented

			statewide programs. Moreover, early and intermediate indicators are less appropriate for KPMs than measures of completion. We also note there is no nationally accepted standard for early indicators of student success in community colleges. The Legislative Fiscal Office and the Budget and Management Division of the Department of Administrative Services recommend KPMs be few in number, identify performance targets to be achieved during a two-year budget cycle, address comparable information, and use standard terminology and definitions.	
Audit Report	**Date Issued**	**Finding/Recommendation**	**Agency Response/Corrective Actions**	**Status**
Oregon Must Improve Community College Performance, Student Support, and Sustainability Amid Persistent Enrollment Declines **Report 2022-35**	December 2022	Recommendation 2d: To increase student success, student support and college sustainability, we recommend HECC work with state leaders and stakeholders to substantially upgrade the community college system's transparency and use of data for improvement: Consolidate statewide data collection. Reduce duplicative requests and collection of unused data. Clarify data definitions. Assist the Legislature with matching data requests to existing data (continued on next page)	HECC management partially agrees with this recommendation. While we understand community colleges have limited staff and they often feel like they receive duplicative requests, we believe this is largely from requests originating from multiple sources outside of HECC, such as the Oregon Student Success Center, accreditation agencies, and other researchers. We have no control over other organizations and cannot impact or consolidate requests they choose to (continued on next page)	Recommendation Implemented

		whenever possible. Align efforts with college accreditation requirements.	make. HECC can commit to streamlining our data collection requests and already limit the data we collect by performing periodic data maintenance. Without additional staff, however, current reporting will need to be paused to complete this work. Though not the main source of data submissions for the colleges, we do expect to begin significant work on data definitions as we begin to implement HECC's new IT Modernization Project. We will solicit input from the colleges on these definitions as we determine what data we need to continue to collect from community colleges related to financial aid and the Eligible Training Provider List. And, we will continue to make the Legislature, as well as other partners, aware of available data whenever we have the opportunity to do so.	
Audit Report	**Date Issued**	**Finding/Recommendation**	**Agency Response/Corrective Actions**	**Status**
Oregon Must Improve Community College Performance, Student Support, and Sustainability Amid Persistent Enrollment Declines Report 2022-35	December 2022	Recommendation 2e: To increase student success, student support and college sustainability, we recommend HECC work with state leaders and stakeholders to substantially upgrade the community college system's transparency and use of data for improvement: (continued on next page)	HECC management agrees. HECC has submitted a 2023-25 Policy Option Package entitled Comprehensive Data and Reporting to build research and data capacity for the HECC. This package was scoped to provide state-level staff to perform ongoing reporting needs. (continued on next page)	Recommendation Implemented

		Analyze staffing needs at HECC and community colleges and request staff needed to support in-depth research, analysis, and public reporting.	The investment is not dedicated to community colleges, but would have a positive impact on measuring affordability, equity goals, and increasing access to interactive data. While we support the recommendation for the Legislature to make additional investment in the staffing levels at community colleges, HECC does not have the authority to dedicate where additional investment should or will be spent. HECC allocates state funding to the community colleges, but colleges have the sole authority to determine the number and types of staff they employ with those funds.	
Audit Report	**Date Issued**	**Finding/Recommendation**	**Agency Response/Corrective Actions**	**Status**
Oregon Must Improve Community College Performance, Student Support, and Sustainability Amid Persistent Enrollment Declines Report 2022-35	December 2022	Recommendation 3: If performance-based funding is adopted, develop a detailed plan to maximize and track systemic benefits and minimize and track potential negative results. If performance funding is not pursued, substantially increase strategic funds to improve student success and equity and publicly track results of those efforts.	HECC management partially agrees. If the HECC decides to include outcome (or performance) metrics within its formula for allocating state funding to community colleges, it will make every effort to maximize benefits and minimize negative results. We will track the results and report to the Commission on both intended and unintended consequences of the decision. If there are any unintended consequences, we will bring those back to the Commission for discussion (continued on next page)	Recommendation Implemented

			and potential corrective action. We do not anticipate increasing the size of the strategic fund without consultation with the colleges. Allocating a larger share of the Community College Support Fund to the strategic fund would not increase overall funding; instead, it could have a hydraulic effect by reducing funding for basic operational needs, thus potentially affecting sustainability goals for both the system and for individual colleges alike.	
Audit Report	**Date Issued**	**Finding/Recommendation**	**Agency Response/Corrective Actions**	**Status**
Oregon Must Improve Community College Performance, Student Support, and Sustainability Amid Persistent Enrollment Declines **Report 2022-35**	December 2022	Recommendation 4: Evaluate the sufficiency and effectiveness of statewide and college-specific student support programs and academic advising. Include metrics such as funding, academic advisor caseloads, students served by program, estimates of eligible students not served, and individual program impacts on student success. Report results biennially to the Legislature and public, identifying programs that work, service gaps, and sustainable options for closing them. Pursue legislative support or statutory language as needed. Align efforts with college accreditation requirements.	HECC management partially agrees with this recommendation. HECC does not currently possess information about community college staffing decisions or models, the authority to evaluate wraparound support services for programs that we do not fund directly, or data on student support services. These responsibilities fall to the boards and staff of locally governed community colleges. However, HECC does provide a limited amount of direct funding and have proposed several Policy Option Packages that support these types of services and commits to evaluating how well these student support programs achieve their stated goals.	Recommendation Partially Implemented

AUDIT RESPONSE REPORT

Audit Report	Date Issued	Finding/Recommendation	Agency Response/Corrective Actions	Status
Oregon Must Improve Community College Performance, Student Support, and Sustainability Amid Persistent Enrollment Declines Report 2022-35	December 2022	Recommendation 5: Continue working with the Governor and Legislature to improve Oregon's financial aid efforts, including addressing inequitable distribution and gaps for part-time and older students.	HECC management agrees. HECC will continue to promote financial aid solutions that benefit students with the highest need. We will build on the positive changes we made to the Oregon Opportunity Grant last biennium and continue to advocate for permanent solutions that make education and training more affordable. Our Commission's two highest priorities when we submitted the HECC's Agency Request Budget were Policy Option Package 101, Oregon Tribal School Grant, and Policy Option Package 102, Oregon Opportunity Grant/Oregon Promise Grant Expansion Package. POP 101 seeks to continue a program that was established in 2022 that pays all college-related expenses—including tuition, housing, books, and other costs not covered by other grants—for eligible students who are enrolled members of Oregon's nine federally recognized tribes. This program will correct disparities caused by systemic barriers to access postsecondary education for Oregon's tribal students. POP 102 increases state financial aid Support to Oregon Opportunity Grant (continued on next page)	Recommendation Implemented

			and Oregon Promise students, provides tiered awards based on level of need, and removes barriers to nontraditional learners. This request would make significant gains in closing the affordability gap for most Oregonian and tiered awards would differentiate according to need for state assistance.	
Audit Report	**Date Issued**	**Finding/Recommendation**	**Agency Response/Corrective Actions**	**Status**
Oregon Must Improve Community College Performance, Student Support, and Sustainability Amid Persistent Enrollment Declines Report 2022-35	December 2022	Recommendation 6: Biennially analyze and report to the public and Legislature on community college sustainability systemwide and by college — including financial status, expense and tuition growth, enrollment trends and forecasts, and the status of shared services and other steps colleges are taking to improve sustainability. Identify best practices and funding needed to reach state goals. Pursue legislative support or statutory language as needed. Align efforts with college accreditation requirements.	HECC management partially agrees. Every two years, HECC's staff spends a large part of its Ways and Means presentation reporting trends in student tuition and fees, level of state investment, costs borne by students and their families, trends in operating costs, and describing various policies that could help to bridge the affordability gap. In addition, we make recommendations on the level of operating support funds required to maintain the current level of service at community colleges. We do not specifically address the fiscal health or financial sustainability of individual community colleges because under current law that is primarily the responsibility of the local boards. We provide this information for public universities, but only as a result of a budget note that directed us to report the information to the Legislature. (continued on next page)	Partially Implemented

			If the Legislature determines that HECC should undertake college-specific financial reporting and analysis, we would welcome this additional responsibility.	

Affirmative Action Report

AFFIRMATIVE ACTION PLAN (AAP) REPORT

Oregon Revised Statute 659A.012 – 659-015 requires agencies to carry out policy against discrimination in employment and agencies must budget resources to support agency affirmative action goals. As stated in our current plan, the HECC is committed to providing equal access to programs and services and fair and equal opportunities for employment. In administering its program, board and commission members and staff will not discriminate against any person who is a current or potential user of its services based on race, color, ancestry, gender, national origin, age, family or marital status, sexual orientation, political or religious affiliation, veteran status, physical or mental disability. Our agency statement below applies to all HECC staff and all matters relating to hiring, firing, promotion, benefits, compensation, and other terms and conditions of employment. The HECC strives to achieve equal employment opportunity and affirmative action objectives through the recruitment, employment, and advancement of a diverse workforce, including women, people of color, underrepresented, and the disabled. The agency's Succession Plan, DEIA Action Plan, Strategic Plan, and Wellness Plan are coordinated to support equity and the mission. The AAP report includes:

- An evaluation of all management personnel, and their effectiveness in achieving affirmative action objectives as a key consideration of their performance.
- Affirmative action objectives and agency performance of the current biennium and those for the following biennium.
- Information concerning its awards of construction, service and personal service contracts awarded to minority businesses.

Throughout our agency, we hold high expectations to contribute to the access, growth, and success of all individuals and those we are privileged to work alongside and serve. We seek out best practices in the support of equal opportunity employment and solicit the engagement of underutilized and historically underrepresented individuals and communities. Our goal for Diversity, Equity, Inclusion, and Accessibility is to operationalize it in our collective work together. These are not merely concepts visited periodically; it is forethought, not an afterthought. We have created tools and have set expectations on how to incorporate our equity considerations in our collective work. In addition, we are a learning organization that recognizes the importance of encouraging and supporting employees in learning related to their position, development, and state opportunities. We continually seek out learning opportunities to promote growth, development, knowledge, as well as employee engagement and health, safety, and wellness.

The current 23-25 HECC Affirmative Action (AA) and Equitable Workforce Agency Plan is posted on our website at: https://www.oregon.gov/highered/ -2023-2025 Affirmative Action and Equitable Workforce Plan PDF. The 2025-2027 draft AAP is due to the DAS Office of Cultural Change (OCC) on August 30, 2024. The DAS OCC reviews all executive branch state agencies draft plans from September 1st through October 31st, 2024, and provides feedback and comments. Agencies update the draft plan and submit the final 2025-2027 AAP in November 2024. The Governor's Recommended Budget is released on December 1, 2024. The final 25-27 approved plan will be posted to the agency's website and will be implemented by the agency for the biennium.

SUPERVISORY SPAN OF CONTROL REPORT

The Span of Control Report for 25-27 will be reported to Joint COmmittee on Ways and Means as required by ORS 291.227

In accordance with the requirements of ORS 291.227, Higher Education Coordinating Commission presents this report to the Joint Ways and Means Committee regarding the agency's Proposed Maximum Supervisory Ratio for the 2023-2025 biennium.

Supervisory Ratio for the last quarter of 2021-2023 biennium

The agency Span of Control reported through DAS as of 03-15-2023 @ 12:00 pm reports the current ratio as 1:10.
The current agency max supervisory ratio is 1:7.

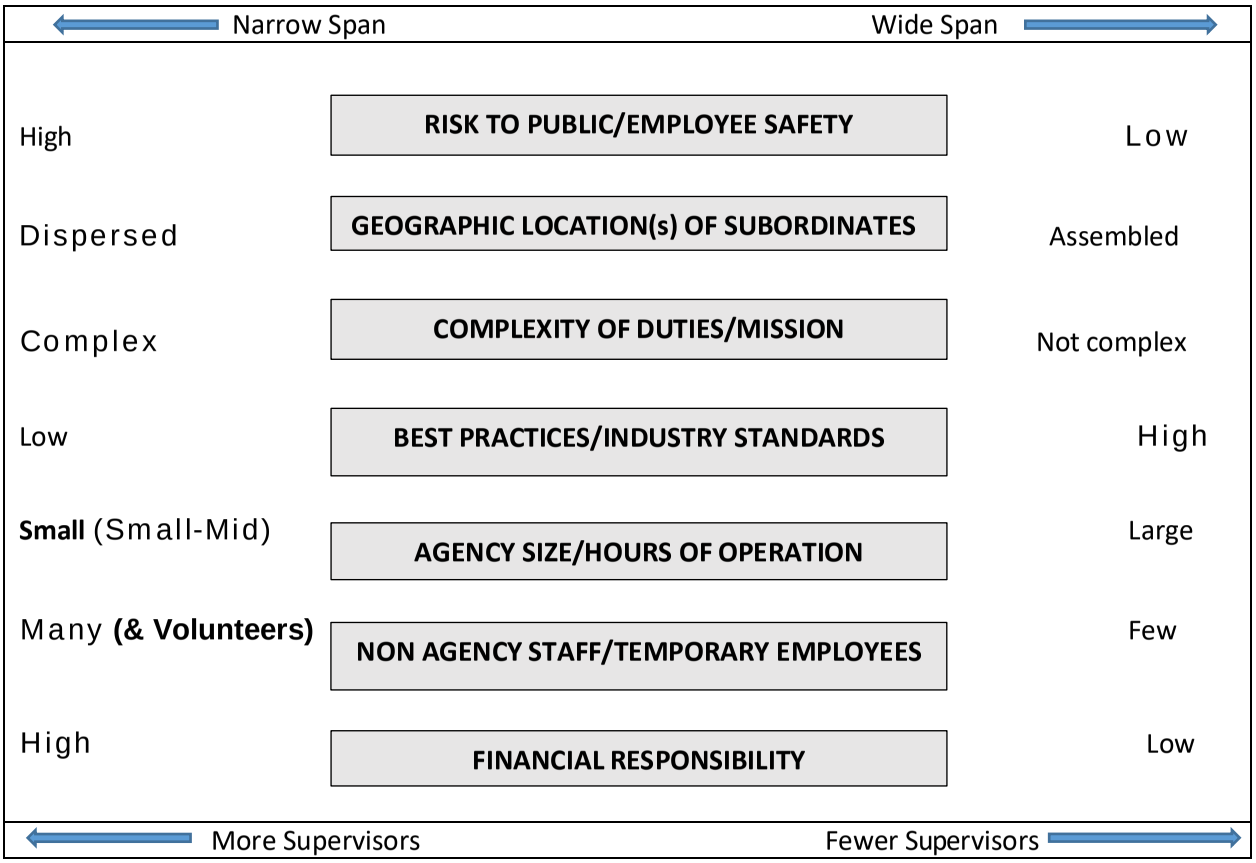
When determining an agency maximum supervisory ratio all agencies shall begin of a baseline supervisory ratio of 1:11, and b

The Agency actual supervisory ratio is calculated using the following calculation;

20	=	19	+	1	-	1
(Total supervisors)		(Employee in a supervisory role)		(Vacancies that if filled would perform a supervisory role)		(Agency head)
191	=	152	+	39		
(Total non-supervisors)		(Employee in a non-supervisory role)		(Vacancies that if filled would perform a non- supervisory role)		

The agency has a current actual supervisory ratio of-

1:10 (1:9.55)	=	191	/	20
(Actual span of control)		(Total non - Supervisors)		(Total Supervisors)



Is safety of the public or of State employees a factor to be considered in determining the agency maximum supervisory ratio? NO – Not applicable

Explain how and why this factor impacts the agency maximum supervisory ratio upwards or downward from 1:11-

(Per Span of Control, DAS Policy 30.000.20: (Safety of the public or of state employees - If the work of the agency presents a high risk to the safety of the public or of state employees the span of control may narrow and may require more supervisors. Conversely a low risk to the safety of the public or of state employees may widen the span of control and may require fewer supervisors.)

Is geographical location of the agency's employees a factor to be considered in determining the agency maximum supervisory ratio? YES

Explain how and why this factor impacts the agency maximum supervisory ratio upwards or downward from 1:11-

(Per Span of Control, DAS Policy 30.000.20: Geographical location of the agency's employees - A dispersed work force may narrow the span of control and may require more supervisors, while a geographically close workforce may widen the span of control and may require fewer supervisors.)

The HECC has two office locations, one in Salem and an office space in Portland. Also, the majority of staff work remote hybrid schedules from various locations on average of 3-4 days a week.

Is the complexity of the agency's duties a factor to be considered in determining the agency maximum supervisory ratio? YES

Explain how and why this factor impacts the agency maximum supervisory ratio upwards or downward from 1:11-

(Per Span of Control, DAS Policy 30.000.20: Complexity of the agency's duties - If the nature of the work is complex, the span of control may narrow and may require more supervisors. A less complex nature of work may widen the span of control and may require fewer supervisors.)

The HECC is responsible for a large and diverse set of post-secondary education and workforce activities in Oregon. The HECC is the primary state entity responsible for ensuring pathways to postsecondary education and workforce success for Oregonians statewide, and serves as a convener of the groups, partners, and institutions working across the public and private higher education arena.

The agency is comprised of eight (8) distinct offices led by Executive Director Ben Cannon and an executive team. The general management structure of each office is a Director and Deputy model, where the eight (8) offices have an Office Director and Office Deputy. To support the agency and staff needs in our eight (8) offices with staff majority working remotely as Hybrid staff, we need at least 20 supervisory managers. Since at least 2016, the base need was 17 supervisors for the agency. However, since this time permanent programs were added, such as DEI and additional workforce investment programs, the current base supervisor count is at least 20.

Are there industry best practices and standards that should be a factor when determining the agency maximum supervisory ratio? YES

Explain how and why this factor impacts the agency maximum supervisory ratio upwards or downward from 1:11-

(Per Span of Control, DAS Policy 30.000.20: Industry best practices and standards - An agency that can demonstrate there are industry best practices and standards that support a greater or lesser span of control may consider those industry best practices and standards when developing their maximum supervisory ratio.

Employees with repetitive job duties function well under a wide span of control. Employees with job duties that require high skill levels and complex functions are more suitable in a narrow span of control. Many of the HECC positions fall into the latter category with highly complex and sensitive education and workforce policy leadership roles. These positions are organized within the eight (8) offices of the agency with staff with the majority working remote hybrid schedules.

Is size and hours of operation of the agency a factor to be considered in determining the agency maximum supervisory ratio?

YES

Explain how and why this factor impacts the agency maximum supervisory ratio upwards or downward from 1:11-

(Per Span of Control, DAS Policy 30.000.20: A large agency or an agency with greater hours of operation may require a wider span of control and may require fewer supervisors while a smaller agency or an agency with fewer hours of operation may have a narrower the span of control and may require more supervisors)

Large agencies with many broad programs and multiple layers of supervisors, along with staff with repetitive job duties function well under a wide span of control. Smaller agencies with multiple small units, along with employees with job duties that require high skill levels and complex functions are more suitable in a narrow span of control. The HECC is a small-medium sized agency and many of the HECC positions fall into the latter category with highly complex and sensitive education and workforce policy leadership roles. These positions are organized within the eight (8) offices of the agency with staff with the majority working remotely and hybrid schedules.

Are there unique personnel needs of the agency, including the agency's use of volunteers or seasonal or temporary employees, or exercise of supervisory authority by agency supervisory employees over personnel who are not agency employees a factor to be considered in determining the agency maximum supervisory ratio?

YES

Explain how and why this factor impacts the agency maximum supervisory ratio upwards or downward from 1:11-

(Per Span of Control, DAS Policy 30.000.20: (A) An agency with unique personnel needs including the agency's use of volunteers or seasonal or temporary employees, or exercise of supervisory authority by agency supervisory employees over personnel who are not agency employees may consider those unique personnel needs when establishing the agency maximum supervisory ratio. (B) An agency with a greater number of unique personnel needs may require a narrower span of control with more supervisors while an agency with fewer unique personnel needs may have a wider the span of control and require fewer supervisors.)

Our agency supports over 100 multiple board and commission positions. Support is required for the board/commission positions and their meetings, including sub-committees and work groups. These are diverse policy making boards and commissions that require both high level policy analyst and program support, supervisor leadership and support, as well as office support.

Our current agency position count of 212 includes over 32 limited duration and temporary staff, we need to keep our base ratio at 1:7 to allow for fluctuations in the LD and temp positions and reductions. The 23-25 CSL agency position count is 157 (148.94 FTE) and the 23-25 GRB agency position count is 171 (163.33).

The agency supervisor count was initially 17 in 2016 to support the multiple small offices and teams to covering the core functions and programs. However, since this time permanent programs were added, such as DEI and additional workforce investment programs, the current base supervisor count is at least 20.

The current agency base supervisor count to support the 8 main offices will remain as 21 (20 not counting the agency head), **5+4+3+8+1=21**. We have **5** supervisors in the Executive Director's office (including the agency head and agency Deputy Director); **4** supervisors in the Office of Operations; **3** supervisors in the Office of Workforce Investments; **8** supervisors from 2 supervisors (one office director and one deputy) in four of our program offices – R&D, OSAC, CCWD, and APA; and **1** supervisor in the Post-secondary Finance & Capital.

Is the financial scope and responsibility of the agency a factor to be considered in determining the agency maximum supervisory ratio? YES

Explain how and why this factor impacts the agency maximum supervisory ratio upwards or downward from 1:11-

(Per Span of Control, DAS Policy 30.000.20: Financial scope and responsibility of the agency - An agency with a high financial scope and responsibility may require a narrower span of control and more supervisors while an agency with a lower financial scope and responsibility may require a wider span of control and fewer supervisors.)

The HECC is a small-mid sized agency with a large budget with a wide range of diverse programs and complex and sensitive education and workforce policy leadership roles, along with full-scope agency-wide support positions including IT, Budget, Procurement, Accounting, Payroll, HR, Communications, DEI, Legislative, Audit, and R&D. The agency consists of multiple small units with many staff requiring high skill levels and complex function, including diverse grant and contract administration, which are more suitable in a narrow span of control.

HECC Budget Description	2021-23 LAB	2023-25 CSL	2023-25 GRB
Includes all special payments, personal services, services and supplies, and debt service funds for all HECC programs.	**$3.92 Billion Total** $2.66B GF $139.8M LF $967.1M OF $155.6M FF	**$3.32 Billion Total** $2.74B GF $125.9M LF $297.0M OF $160.3M FF	**$3.76 Billion Total** $2.49B GF $486.2M LF $628.3M OF $160.3M FF
		Change from LAB and CSL	***-4.4% from LAB*** ***+13.2% from CSL***

Based upon the described factors above the agency proposes to continue a Maximum Supervisory Ratio of 1:7.
