OAR 660-012-0900(6)(a)

(a) A narrative summary of the state of coordinated land use and transportation planning in the planning area over the reporting year, including any relevant activities or projects undertaken or planned by the city or county;

The state of coordinated land use and transportation planning involves outdated information, could benefit from updated analyses and may be hindered by lacking a state acknowledged TSP. The TSP was not acknowledged by the state because it was tied up in a LUBA remand of an UGB expansion. It has been a challenge to update the TSP. Coburg is also eager to update the BLI. A current understanding of land supply would allow us to improve the state of coordinated land use and transportation. Several transportation projects happened in 2025 including maintenance, preservation and bike/ped facilities. Coburg went through a TSP assessment in 2025 and plans to apply to the TGM program for a major TSP update. To update the BLI, an application for the TA grant will likely be submitted as well. Coburg also anticipates a code amendment process this year to implement CFEC parking reform, design standards, other mandates and general housekeeping. Funding is limited as is staff capacity.
