

TRANSPORTATION AND GROWTH MANAGEMENT PROGRAM

BETTER WAYS TO BETTER PLACES

Oregon's Transportation and Growth Management Program supports community efforts to expand transportation choices for people. Linking land use and transportation planning, TGM works in partnership with local governments to create vibrant, livable places in which people can walk, bike, take transit or drive where they want to go.

TGM is a partnership between the Oregon Department of Transportation and the Oregon Department of Land Conservation and Development. The program receives support from the State of Oregon and the Federal Highway Administration of the U.S. Department of Transportation.

GROWING SMARTER

TGM promotes smart growth principles that enable communities to meet transportation needs while retaining their livability and economic vitality.

These principles include:

- Provide transportation choices
- Create communities
- Support economic vitality and growth
- Save public and private costs
- Promote environmental stewardship

TGM SERVICES

TGM provides:

Planning Grants to communities for Transportation System Planning and Integrated Land Use and Transportation Planning.

TGM awards grants on an annual basis with applications due in July and awards made in September. Awards are on a competitive basis within ODOT regions.

Direct Community Assistance on a first-come, first-served basis.

Since 1993, TGM has provided over 800 planning grants and 400 community assistance projects to Oregon communities.

TGM MISSION

Oregon's Transportation and Growth Management Program supports community efforts to expand transportation choices. By linking land use and transportation planning, TGM works in partnership with local governments to create vibrant, livable places in which people can walk, bike, take transit, or drive where they want to go.

TGM GRANTS

Local governments use TGM grants for planning work leading to policy decisions to support transportation and land use systems that enhance the livability of Oregon's communities and the mobility of their residents.

TGM CODE ASSISTANCE

Local governments use TGM Code Assistance to help identify and remove barriers to smart growth in their zoning and development codes. TGM staff or planning consultants hired by TGM work with communities to review and revise local planning policies and code standards and solve specific code problems identified by the community.

TGM QUICK RESPONSE

Quick Response focuses on bridging the gap between long range transportation planning and subsequent actions affecting specific properties. Design consultants hired by TGM identify ways to facilitate readiness for development and improve access to local destinations, while encouraging walking, biking and using transit.

TGM EDUCATION AND OUTREACH

Through workshops and presentations, TGM helps communities identify solutions to community design, land use, and transportation challenges. TGM workshops and presentations are generally tailored to meet the specific needs of a community

PARKING REFORM AND MANAGEMENT

TGM helps local governments address parking community-wide or in a specific area. Projects will result in regulatory changes or a parking management plan.

TSP ASSESSMENT

TSP Assessment helps local governments evaluate their existing transportation systems plans. TGM will identify the TSP's strengths and weaknesses, discuss the need for and timing of a potential update, and help develop a scope of work.
