

Transportation & Growth Management Program

Eligible Grant Projects

Category 1- Transportation System Planning

Purpose

To help local governments develop and update transportation system plans (TSPs) and implementing measures that implement the Transportation Planning Rule (OAR 660-012-0045); implement the Oregon Transportation Plan and other statewide modal and topic plans; increase opportunities for walking, biking, and transit; or reduce reliance on the state highway for local travel needs.

Eligible Uses

Projects in this category will result in a transportation decision. Projects will plan for transportation facilities inside Urban Growth Boundaries (UGB's), in urban unincorporated communities, and along rural highway corridors. Projects proposed for areas being considered in a UGB amendment process may be eligible, but must demonstrate they are timely and reasonably achievable. Category 1 projects typically include preparation and adoption of:

- TSPs, including analysis to determine transportation needs, and planning for such elements as local street networks, bicyclists and pedestrians, safety including safe routes to school, transit, and freight.
- TSP updates, in whole or part, to address new needs, comply with new state or federal regulations, maintain consistency with a regional transportation plan, plan for areas newly brought into the UGB, reduce greenhouse gas emissions, or make the transportation system more resilient to the impacts of natural hazards.
- TSP implementation, such as streetscape plans, cost estimate refinement, capital improvement and other funding plans, and land use regulations required by the Transportation Planning Rule.
- TSP refinement, such as corridor plans, multimodal safety plans, interchange area management plans, or other planning to implement Oregon statewide modal and topic plans.
- Transit Development Plans that provide long term vision and policy for existing and future transit service.
- Other innovative transportation-related planning projects that are consistent with TGM objectives.

Category 2- Integrated Land Use and Transportation Planning

Purpose

To help local governments develop integrated land use and transportation plans and implementing measures that encourage livable, affordable, and accessible communities for all ages and incomes; promote compact, mixed-use, walkable development to increase walking, biking, and transit; or support physical, social, and economic needs.

Eligible Uses

Projects in this category will result in a land use decision. Projects will combine land use planning with supportive transportation facility planning inside UGBs, urban unincorporated communities, and urban reserve areas. Category 2 projects typically include preparation and adoption of:

- Specific area plans for land uses in a downtown, main street, commercial or employment area, neighborhood, corridor, or interchange.
- Land use and transportation concept plans for areas brought into a UGB.
- Transportation-efficient land use plans for an entire urban area, such as location efficiency of housing and employment or reducing greenhouse gas emissions from transportation.
- Implementing measures, such as code amendments, infill and redevelopment strategies, and intergovernmental agreements.
- Other innovative land use and transportation-related planning projects that are consistent with TGM objectives.
