INTRODUCTION

The [Institute of Museum and Library Services \(IMLS\)](#) is the primary source of federal support for the nation’s libraries and museums. IMLS administers the [Grants to States program](#), which distributes federal funds to State Library Administrative Agencies. Funds are used to support the [purposes and priorities outlined in the Library Services and Technology Act \(LSTA\)](#).

In Oregon, the State Library Administrative Agency that administers the Grants to States program is the [State Library of Oregon](#). This 2023-2027 LSTA Five-Year Plan, developed by the Library Support & Development Services division of the State Library, addresses the state’s current and anticipated library needs and presents strategies for using LSTA funds.

MISSION STATEMENT

The State Library of Oregon cultivates, preserves, and delivers library and information services to foster lifelong learning and community engagement.

The [Library Support & Development Services division](#) of the State Library provides leadership, grants, and other assistance to improve library service for all Oregonians.

NEEDS ASSESSMENT

Process for Identifying Needs

The State Library contracted with the library consulting firm [Constructive Disruption](#) to evaluate the 2018-2022 LSTA Five-Year Plan and to assess how the State Library could most effectively spend LSTA funds to benefit the Oregon library community. The data gathering process was multi-faceted, including a survey, town halls, focus groups, and interviews with key groups and individuals. To ensure representation, the evaluators particularly focused on hearing from people in underserved and under-resourced communities. By actively seeking wider

representation, this evaluation process created room for new priorities and perspectives to emerge.

The Library Support & Development Services division then reviewed the evaluator's Evaluation Report and Future Focus Report, along with other relevant sources, including a 2021 continuing education needs assessment performed by independent library consultants; the Library Support & Development Services division's 2021 Customer Satisfaction Survey Report; and the State Library's Strategic Plan (2020-23).

Identified Needs

Five key needs were identified as most important to the State Library and the state's library community. These needs are consistent with the purposes of LSTA and serve as the basis for the goals outlined in this plan.

- **Improving access:** Members of the Oregon library community across library types, regions, and job classifications expressed the greatest need for strong and sustained support to increase access for and engage with their communities. Libraries need and expect the State Library to take a leadership role by supporting projects and initiatives, providing resources and training, advancing community engagement in grantmaking, advancing digital literacy, and focusing on libraries and communities with the greatest need.
- **Culture and heritage:** Libraries want support for their essential roles in preserving and promoting their communities' culture and heritage, while honoring the First Peoples who have been here since time immemorial. The State Library can advance libraries' efforts by assisting with digital collections, funding projects to highlight underheard voices, and working together with Tribal Nations in Oregon to advance their library and information goals.
- **Youth, schools, and lifelong learners:** Members of the Oregon library community want to see continued support for school libraries, community colleges, and other libraries facilitating youth development and education. There are opportunities for the State Library to support economic and workforce development, and to support human services through projects that include families in youth programming and outreach, serving students from underserved communities, and encouraging lifelong library use.
- **Connection and communication:** Members of the Oregon library community expect the State Library to act as a connector, bringing together libraries across geography, service population, library size, and library type, and investing in projects with impact across groups. In addition, libraries want help connecting with their communities and look to the State Library for needed support and tools.

- **Institutional capacity:** Members of the Oregon library community need support improving library operations, particularly in close pairing with standards or best practices. State Library-supported projects with statewide impact are seen as both beneficial and successful, providing resources to those who would otherwise not have access and freeing up libraries to refocus their resources.

Expected Process for Staying Up to Date on Needs

Throughout the lifespan of this plan, the State Library will monitor the needs of the state's libraries and communities to ensure that goals and projects remain relevant.

Continuing conversations with the [LSTA Advisory Council](#), colleagues from interested organizations, and the library community in general will inform the State Library about continuing and emerging library needs. Regular analysis of proposed and awarded subgrants will similarly inform the State Library about needs of libraries of all types as well as their community partners.

The State Library will also use customer satisfaction surveys and other relevant data sources to assess evolving needs and update projects accordingly.

GOALS AND PROJECTS

All projects below are intended to run throughout the length of this plan. Please note that these projects are more objective-oriented than activity-oriented, representing a shift from previous plans. Projects that were included in previous plans are now listed as activities.
