Reminder: The OBCE board voted on May 23, 2022, to include Basic Life Support (BLS)/Cardiopulmonary Resuscitation (CPR)/Automated External Defibrillator (AED) certification as a part of each licensee/certificate holder's annual renewal requirement, effective immediately. This means that licensees must hold an active certificate of completion when renewing each year. If licensees/certificate holders do not currently hold this certification, they must obtain one as soon as possible. Like other annual CE, unless audited, licensees/certificate holders will not currently be required to submit proof of certification. You can count up to 6 hours for this CE. See attached document for course resources.
