

IMAGING NEWS

KNOW YOUR SCOPE!

Every modality has requirements and restrictions. It is your responsibility to know about those. A person who is in violation of OBMI Statutes and Rules may face an OBMI investigation and may be disciplined by the Board.

While the scope of practice is determined by your credentialing agency, there are details on your licensure that affect your practice in Oregon.

For Example:

Operating Fluoroscopy may be performed ONLY by Licensees that hold an OBMI Radiography License or a PA with an OBMI Fluoroscopy Permit.

Operating MRI may be performed ONLY by Licensees that hold an OBMI License that designates MRI.
