

Oregon State Board of Agriculture: Resolution Detail

Title

Buildable Lands Inside Urban Growth Boundaries

Background

Whereas Oregon agriculture produces a farm gate value in excess of 4.8 billion dollars annually.

Whereas the Willamette Valley produces approximately one-half of Oregon's 4.8 billion dollar farm gate production.

Whereas Oregon's population growth is projected to increase by 1.58 million people in the next 35 years, primarily in the Willamette Valley.

Be it resolved that the State Board of Agriculture finds that mandating a 20 year supply of buildable lands inside the urban growth boundaries is incompatible with the conservation of farmland for future generations.

Be it further resolved the Board of Agriculture supports the concept of cities and counties regaining local control by making the 20 year supply of buildable lands inside the urban growth boundary optional.

Resolution

Resolved that the State Board of Agriculture supports the above recommendation.

Summary

Supports local control (by cities and counties) to optional development on 20-year land supplies within urban growth boundaries.

Notes

Resolution was reviewed, updated, and re-adopted on 2/17/2017.

Resolution Number

162

Subject

Land Use

Resolution Date

12/11/98

Date of Last Review

2/17/17

Committee
