

# Oregon State Situation Report

## 2024 HPAI OUTBREAK

Current as of April 15, 2024

Since the last situation report on April 1, 2024, there have been **0 additional positive premises in Oregon.**

### PREMISES QUARANTINES

Confirmed positive premises are quarantined for a minimum of 120 days on average, although shorter quarantines may be utilized depending on the Cleaning and Disinfection (C&D) methods applicable to the premises.

### ACTIVE REGIONAL QUARANTINES (CONTROL ZONES)

Established for World Organization for Animal Health (WOAH) designated poultry premises. Regional quarantines extend a minimum 10 km around an infected premises with movement restrictions on poultry and poultry product. Regional quarantines involve permitted movements and active surveillance for the designated area.

### SURVEILLANCE ZONES

A 10km zone around an infected premises that collected data on nearby poultry premises and numbers. Surveillance zones are either active, where response staff reach out for information, for WOAH designated poultry premises, or passive, where information is self-reported by producers, for non-poultry WOAH designated premises.
