Tillamook	1	1	Poultry	NA																																																							
Umatilla	2	2	Poultry	D1.1																																																							
Wallowa	3	0	Poultry	D1.1																																																							
Washington	1	0	Poultry	Minor125																																																							
<b>Total</b>	<b>14</b>	<b>5</b>																																																									

#### \*PREMISES QUARANTINES

Confirmed HPAI-positive poultry premises are typically quarantined for a minimum of 120 days. In some cases, the quarantine may be shorter depending on the Cleaning and Disinfection (C&D) methods applicable to the premises. Premises quarantines for feline cases of HPAI are released once the animal tests negative or if the animal dies. Feline premises are not quarantined if the HPAI-positive animal was deceased before testing was completed.
