

Commodity Movement Guidance

DAIRY CATTLE, SEMEN, OR EMBRYOS

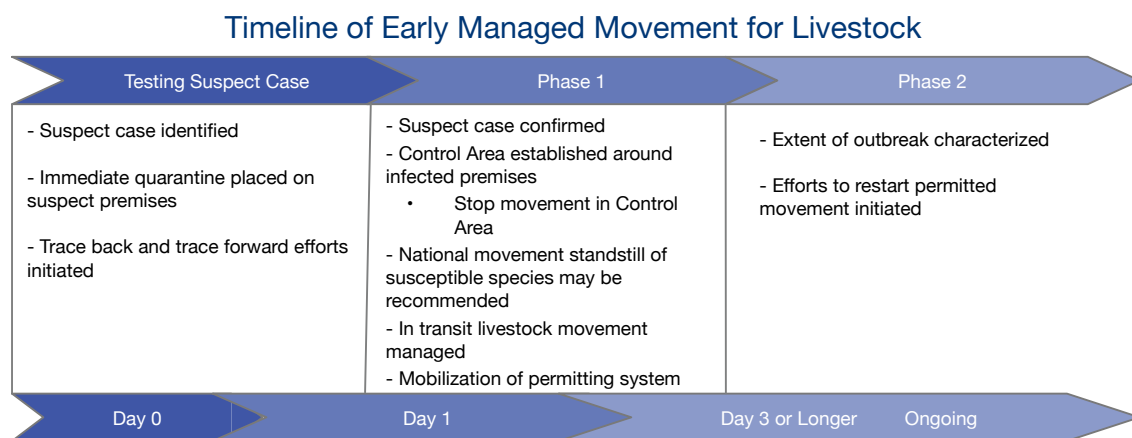

Product Description

Cattle, and semen or embryos from cattle, that are raised for milk production.

Requirements to be Met Prior to Movement

- Traceability information is available (national premises identification number [PIN], GPS Coordinates, and information on type and number of animals/quantity of semen/embryos to be moved).
- Biosecurity measures listed in the appropriate biosecurity checklist (see sub-bullet) are in place and acceptable to Responsible Regulatory Officials.
 - o [Self-assessment checklist for enhanced biosecurity for FMD prevention: dairy¹](#)
- Trace-back/forward information is acceptable (premises is not Infected, Suspect, or Contact).
 - o Producers can provide trace-back and trace-forward information by maintaining accurate records of movement of animals, feed, supplies, equipment, personnel, and visitors. Producers can use the Secure Milk Supply (SMS) Plan [Practice Questionnaire for FMD Exposure²](#) to get a feel for the information they may need to provide in an outbreak.
- Destination premises and State are willing to accept the cattle/semen/embryos.
- No evidence of infection based on disease monitoring (surveillance).

Commodity Requirements Flowchart

Adapted from the Secure Food Supply Plans *Managed Movement of Susceptible Livestock Species during a U.S. Foot and Mouth Disease (FMD) Outbreak: Overview* (Nov 2019)
