

Veterinary Product Registration Application

Application Type: New Renewal Additional Products Expires June 30, _____

Company Name _____ Phone # _____

Contact Name _____ Email _____

Mailing Address _____

City, State & Zip _____

Existing License # (if any):	
AG-R _____	VET _____

- Registration is required for each product readily distinguishable from any other by its content, brand name, trade name, manufacturer, use as specified in labeling, formulation, concentration, dosage form, or other distinction, but not including packaging size or quantity.
- List products on the attached page(s). Copy as needed. **All fields are required.**

Registration fee: Number of products _____ x \$100 = Total Due \$ _____

PAYMENT METHOD

<u>For Check or Money Order</u> payable to:	<u>For Credit Card payment</u> , mail or secure fax to:
Oregon Department of Agriculture	Oregon Department of Agriculture
PO Box 4395, Unit 17	635 Capitol St NE Secure fax:
Portland, OR 97208-4395	Salem, OR 97301-2532 503-986-4746

All dishonored payments will incur a \$35 administrative fee (ORS 30.701).

For Visa, MasterCard, American Express, or Discover charges, complete the following:

Cardholder Name _____ Phone _____

Billing Address _____ City/State _____ Zip _____

Email or fax receipt available for credit card payments *only*. Email address or Fax# _____

Signature _____ Total Charges \$ _____

Card Number _____ / _____ / _____ / _____ Exp. Date ____/____

Veterinary Product Registration Information

What is a Veterinary Product? A Veterinary Product is defined as an animal remedy, pharmaceutical, or veterinary biologic.

What is an Animal Remedy? Any product used to prevent, inhibit, cure, enhance, or protect the health or well-being of animals, but does not include food (complete diets), surgical instruments, or accessories. A product will be deemed to be used as an animal remedy if it contains labeling indicating that it is intended for such use.

What is food (a complete diet)? A nutritionally adequate feed for animals other than humans; by specific formula is compounded to be fed as the sole ration and is capable of maintaining life and/or promoting production without any additional substance being consumed except water or forage.

Brand and Product Name requirements: Record the complete brand and product names as they appear on the label. Abbreviations used during registration that are not used on the product itself may cause registration status to be missed during inspection.

Formulation and Concentration: These also help ensure that the correct products are identified during inspections. Formulation examples include tablet, chew, liquid, gel, pellet, etc. The concentration or strength of the product must be indicated when present. This could be a specific drug concentration or a general statement such as “extra strength”.

UPC lists (NEW): As of January 2026, ODA requires UPCs displayed on product labels to be kept on file for all products, to assist the department in identifying registered products. Multiple UPCs can be listed under the same registration only when identical products are offered in multiple package sizes or types and must include distinguishing factors (such as the package size, etc). UPCs can be updated online during renewal or at any other time by email.

What are “distinguishing factors”? Distinguishing factors are used to indicate how multiple UPCs apply to the same product. Most often, they describe package count or size when an identical formula is offered in multiple package sizes, or when the packaging style is updated and a new UPC is assigned.

What items can be registered together? Items that are offered in multiple package types or sizes where the formula and all other labeling is identical only need one registration. An example would be a 5 mg tablet sold in 30-count and 100-count bottles, or a medication sold in a single-pack and a 6-pack.

How do I tell when products require multiple registrations? Individual registrations are required for any product readily distinguishable from another by content, brand name, trade name, manufacturer, use as specified in labeling, formulation, concentration, dosage form, or other distinction.

Name changes and discontinued items: All products offered or exposed for sale in Oregon must be registered, even if they have been discontinued or the brand or product name is changing. Older products will require separate registrations until the old stock has been sold or removed from distribution entirely. If a discontinued product or old product name can be found in distribution in Oregon, it must be registered.

If a product is already registered with ODA as a Commercial Feed or Pesticide, does it need to be registered as an Animal Remedy? Possibly. If your product meets definitions in multiple programs, it will require multiple registrations.

What products are exempt from registration? Complete diets (see above), products compounded by or for Oregon-licensed veterinarians for use in the course of their practice under a Veterinary Client Patient Relationship, and pesticide products regulated under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA).

Are “25b” pesticides exempt from Animal Remedy registration because they’re exempt from FIFRA? No. Only products that are *regulated* (registered) under the Federal Insecticide, Fungicide, and Rodenticide Act are exempt.

Veterinary Product Registrations

Each unique brand, formulation, and concentration of a product must be registered individually. Provide the complete brand and product name as it appears on the product labeling, including (if applicable) the formulation and/or concentration of the product. Each UPC an identical product is sold/distributed under must be recorded, along with any distinguishing factors such as package size, distributor, etc. **All fields are required.**
