Good Morning,

I hope this finds you all well. I just wanted to follow up on a request from the last rules advisory committee meeting for more information about carbofuran.

In the mid-2000's, the U.S. Environmental Protection Agency (US EPA) determined that "Based on the assessment of ecological and human health risks associated with carbofuran uses, the Agency has determined that all uses of carbofuran are ineligible for reregistration".[1] In 2009, the US EPA revoked all tolerances for carbofuran on food crops, and some carbofuran products and uses were voluntarily cancelled by the registrant.[2] The last end-use carbofuran product registrations were cancelled by the US EPA in 2013.[4]
