

2026 CROP ORGANIC SYSTEM PLAN UPDATE

This form is for current, certified organic customers with Oregon Department of Agriculture. It is a shortened version of the Organic System Plan that must be submitted annually. All renewing operations are required to submit a full Organic System Plan every three years. We may ask for further documentation to support your answers below.

1. Certification

205.100; 205.201(a)(3); 205.400

Date:

Customer ID:

Legal Business Name

DBA:

Primary Contact Name:

Phone:

Email:

Main Site Address:

Provide a detailed description of your operation including any updates to your operation in the past year.

List the crops intended for certification in 2026.

What are the crop changes from your 2025 certificate?

Do you have any new or updated labels? *All labels must be submitted to ODA for approval prior to use.*

Yes. – Submit these with your 2026 application

No.

List the person(s) responsible for creating, maintaining, implementing, and monitoring your operation's Fraud Prevention Plan:

Name	Operation Role

Describe updates to your current Fraud Prevention Plan in the past year including your supply chain, vulnerabilities, monitoring, incident response, or other elements of fraud prevention.

Sites Intended for Certification in 2026

Field Name	Acres	Site Registration	Previous Land Use	Map Provided	Crop

Attach additional sheets as needed.

Describe updates to the sites intended for certification, contracted services or activities, and general operation structure:

4. Seeds, Seedlings, and Transplants

205.204

Provide updates to your seed, seedling, and transplants sources, varieties, and seed search documentation.

5. Soil Fertility and crop Nutrient Management

205.203; 205.205

Provide updates to your soil fertility management, deficiencies, practices, products, etc.

6. Natural Resources, Biodiversity, Conservation & Water

205.200;205.303(a)

Provide updates to your conservation and preservation practices including practices, challenges, monitoring, water use, irrigation, and wildlife habitat.

7. Weeds, Disease, and Pest Management

205.205; 205.206

Provide updates to your management of weeds, disease, or pests including products, practices, monitoring, challenges, and strategies.

8. Maintenance of Organic Integrity

205.201(a)(5); 205.202(c)

Provide updates to your adjoining land, buffer zones, and prevention practices of contamination from non-organic agricultural practices.

If you grow crops organically and conventionally, describe any updates to which crops are grown organically and conventionally, how they are distinguished, and any mitigating steps taken to prevent commingling of equipment or produce.

9. Harvest

205.201(a); 205.307

Provide updates to your harvest practices including equipment, workers, and commingling prevention strategies.

10. Post Harvest Handling

205.201(a); 205.307

Provide updates to your post-harvest handling practices including equipment, water use and source, labelling, packaging, and commingling prevention strategies.

11. Storage

205.201(a); 205.307

Provide updates to your storage of crops including labeling, facilities, inputs, or commingling prevention strategies.

12. Shipping/Transportation

205.201(a); 205.307

Provide updates to your transportation of fresh crops, including transportation services, cleaning, equipment, documentation, or commingling prevention strategies.

Provide updates to your import/export activity, including import of any seeds, planting stock, or seedlings, products, or inputs.

Provide updates made to your standard operating procedures, quality assurance programs, documentation or record systems.

Name	Title	Date
<p><i>I affirm that I have reviewed each section of my current Organic System Plan as of this date; and any updates and changes in the past year are reflected in this update form.</i></p>		

For your 2026 application, this form is required in addition to:

- Application Form
- Input Inventory
- Crops Requested for Certification
- Any new labels or labels that were submitted three years ago. Reminder, all labels must be submitted every three years (even if there are no changes).
