

## Estimated Sales of Aminocyclopyrachlor-containing (ACP) Herbicides in Oregon

### Bayer, Vegetation Management November 2018

Below is an estimate of ACP herbicide sales in the State of Oregon from 2015 to 2018 (year to date). ACP sales have declined from 2015, when Bayer first acquired the assets from Dupont through 2018. We believe the decline is due to the customers' awareness of the Sisters investigation beginning in 2015, plus our ongoing stewardship efforts to protect sensitive vegetation.

### Estimated acres of ACP treatments in Oregon

	2015	2016	2017	2018YTD
Acres	10808	8292	8413	5080

Note: Acreage is based on an assumed average use rate of 11 oz/ac for Method and 8 oz/ac for Perspective
