RULE CAPTION

Limitations on Pesticide Products Containing Chlorpyrifos

Not more than 15 words that reasonably identifies the subject matter of the agency's intended action.

RULEMAKING ACTION

ADOPT: OAR 603-057-0545

Stat. Auth.: ORS 561.190, 634.306

Other Auth.:

Stats. Implemented: ORS 634.306, 634.316, 634.322

RULE SUMMARY

OAR-603-057-0545 places limitations on the insecticide chlorpyrifos. It classifies all products that contain chlorpyrifos as restricted-use and requires that only certified and licensed pesticide applicators, public applicators, and private applicators are able to purchase and apply such products. It prohibits and limits certain uses starting in 2021, and requires a minimum restricted entry interval of four days for all agricultural plants covered under the Worker Protection Standard. It increases respirator protection for applicators and requires records of chlorpyrifos applications. Buffers for permanent waterways and sensitive areas, which are considerably larger than those stated on the label, are required. After December 31, 2023, it is prohibited to use, deliver, distribute, sell, offer or expose for sale pesticide products containing chlorpyrifos, except under very limited conditions. Chlorpyrifos impregnated in ear tags for cattle is excluded from limitations in this rule.
