This data shall be used for the sole purpose of estimating farm income based upon crop or animal production codes under the ODAP program. The Total Acres and Market Value Total are reported in Table 75. Summary by North American Industry Classification System: 2017, from the 2017 Census of Agriculture for the state of Oregon. The table can be found at the link below. The Per Acre Value is determined by dividing the Market Value Total by the Total Acres. The values for Farm Size is determined by multiplying the Per Acre Value by the highest number of acres in each category. If you have any questions related to this information in the table, please contact ODA.
