

# Commodity Movement Guidance

## PIGS OR PIG SEMEN

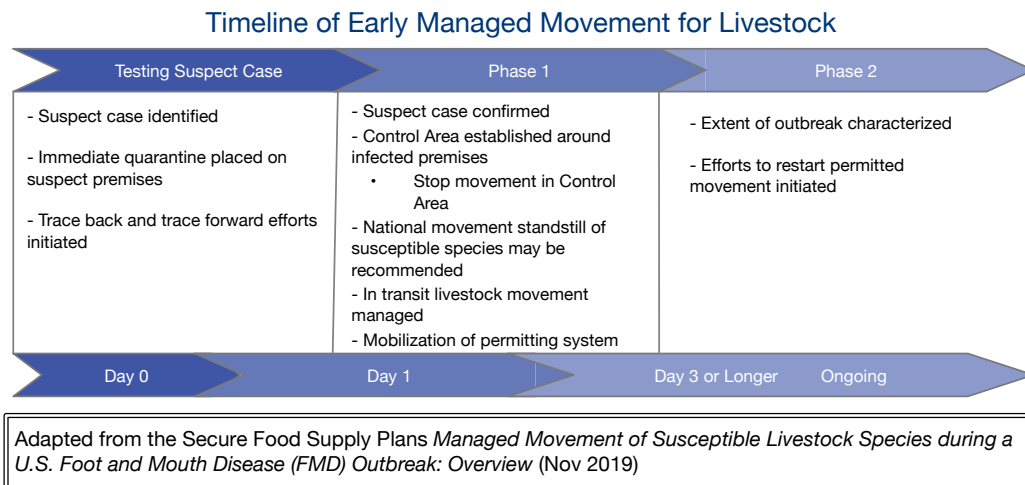

### Product Description

Pigs, or semen from pigs, that are raised for pork production.

### Requirements to be Met Prior to Movement

- Traceability information is available (national premises identification number [PIN], GPS Coordinates, and information on type and number of animals/quantity of semen to be moved).
- Biosecurity measures listed in the appropriate Biosecurity Checklist (see sub-bullets) are in place and acceptable to Responsible Regulatory Officials.
  - [Self-assessment checklist for enhanced pork production biosecurity: animals raised indoors<sup>1</sup>](#)
  - [Self-assessment checklist for enhanced pork production biosecurity: animals with outdoor access<sup>2</sup>](#)
- Epidemiological information is acceptable.
  - Producers can provide epidemiological information by maintaining accurate records of movement of animals, feed, supplies, equipment, personnel, and visitors. Producers can use the Secure Pork Supply Plan [Practice Questionnaire for Foreign Animal Disease Exposure<sup>3</sup>](#) to get a feel for the information they may need to provide in an outbreak.
- Destination premises and State are willing to accept the animals or semen.
- No evidence of infection based on disease monitoring (surveillance).
