August 14, 2020

The Honorable Sonny Perdue
Secretary, United States Department of Agriculture
1400 Independence Ave, SW
Washington, DC 20250

Dear Secretary Perdue,

The Oregon Department of Agriculture (ODA) is excited by the opportunities provided by the Agriculture Improvement Act of 2018 (2018 Farm Bill). ODA appreciates the hard work that the U.S. Department of Agriculture (USDA) has done to engage with the industry, states, Tribes, and other partners to create the interim final rules (IFR) to implement the 2018 Farm Bill.

Multiple issues have delayed Oregon’s submission of a state plan - including a delay in receiving full state statutory authority and the unprecedented times that COVID-19 has brought to our work, structure and focus.

As required by the 2018 Farm Bill and the IFR, ODA is formally submitting an Oregon state plan for your review. Please see attachments. In Oregon, registrations (licenses) are good for the calendar year, as such it is difficult for Oregon, which has a fully operational hemp industry and state laws, to require the growers to switch which regulations they are operating under during the license year. Attached are proposed rules which, upon USDA approval, Oregon will implement on January 1, 2021. In addition, Oregon will no longer accept applications for the 2020 calendar year starting November 1, 2020. We believe that the attached proposed rules meet the requirements set out in the IFR.

While ODA is submitting our plan, existing concerns with the IFR remain. ODA would prefer that USDA allow states and hemp growers to continue to operate under the 2014 Farm Bill until January 2022. Oregon is a leader within the U.S. hemp industry; however, there are a number of requirements within the IFR which compliance will be difficult, if not impossible, for Oregon’s hemp industry. The requirement for DEA-registered labs to conduct pre-harvest sampling and testing remains one of the largest issues and hurdles for Oregon’s compliance if the IFR as written becomes final. ODA’s own regulatory compliance laboratory cannot receive DEA-registration because of our work with Oregon’s state-legal adult use marijuana program. Beyond that, there is currently no DEA-registered lab in Oregon. The closest lab would be a crime lab in Washington State without the ability or interest to conduct the type of work required for the hemp industry.
Thank you for your time and consideration to Oregon's state hemp plan per the 2018 Farm Bill. I look forward to continuing to work together for the betterment of Oregon agriculture, our hemp industry and rural and urban communities across the state. Please feel free to have your staff reach out to Sunny Summers, ODA Cannabis Policy Coordinator, at ssummers@oda.state.or.us or 503.986.4565, to discuss our plan at any time.

Sincerely,

Alexis M. Taylor
Director, Oregon Department of Agriculture

NEED FOR THE RULE(S):
The 2016 Farm Bill (Farm Bill) created a federal framework for regulating hemp through the US Department of Agriculture (USDA). The Farm Bill requires states that want to have the delegated authority to regulate hemp in their state to submit a state plan to USDA for review and approval within a year of the USDA publishing their rules. The USDA published Interim Final Rules (IFR) on October 31, 2019. ODA is updating their rules to meet the Farm Bill and IFR requirements in order to submit a state plan for review to the USDA. The primary changes being made are background check requirements, changes to pre-harvest sampling requirements, transportation requirements for intermediate hemp commodities, and updates to enforcement. There is a possibility that the US Congress may pass a bill extending the time states can continue to operate under the 2014 Farm Bill. These rules include a new rule that limits these changes if that were to happen.

(2) Required Sampling and Testing:
(a) A grower must ensure that the grower's entire crop is timely sampled and tested according to these rules until it has been sampled in accordance with these rules.
(b) Harvest lots must be sampled and tested separately and may not be combined. At the discretion of the grower, industrial hemp grown in a contiguous field or growing area may be subdivided into separate harvest lots for sampling and testing consistent with these rules. Sampling must be conducted and testing must be reported using the harvest lot identifier described in OAR 603-048-0500(2).

(f) Prior to January 1, 2020, tests for and reports the THC content of the harvest lot.

(f) On and after January 1, 2020, tests for and reports the total THC content of the harvest lot calculated in accordance with OAR 333-064-0100(4).

(7) To request sampling and testing, prior to sampling a grower must submit to the laboratory, or the Department, a completed sampling request form provided by the Department that includes:
(a) A written sampling request for THC analysis for each harvest lot, as identified by the harvest lot identifier, for which the grower is requesting sampling and testing and the total number of harvest lots to be sampled and
(b) A description of the location of the production area of each harvest lot, as identified by the harvest lot identifier, including the GPS coordinates or address of the harvest lot; and

(c) A written description and visual depiction of each harvest lot to be sampled and tested such that the production area for each harvest lot is apparent from a visual inspection of the premises and easily discernible from other harvest lots.

Exhibit A: Sampling Protocol
Hemp Pre-Harvest Testing

To be valid pre-harvest THC sampling and testing required under OAR Chapter 603, Division 48, all sampling must be conducted as described in this Protocol.

A. General Sampling Requirements

1. Sampling may only be performed by the Department or a laboratory licensed by the Oregon Liquor Control Commission (OLCC) under ORS 475B.560 and accredited by the Oregon Health Authority (OHA) pursuant to ORS 475B.565 [hereinafter, “Laboratory”].

2. All sampling must be performed by personnel employed by a Laboratory [hereinafter, “sampler”] and in accordance with OAR 603-048-0600 and this Protocol. Samplers must complete annual sampling training with the Department before sampling.

3. The Laboratory must follow chain of custody procedures consistent with OAR 333-064-0100(2) and be documented to record the collection, transport, and receipt of samples by the Department or Laboratory. Laboratory must maintain records for each harvest lot as identified by harvest lot identifier.

4. Sampling must produce a representative sample of the harvest lot.

5. The Laboratory must avoid contamination of the non-sampled material with sample containers that are free of analytes of interest and appropriate for the analyses requested.

6. The Laboratory shall only sample plants with flowers when a purpose of the harvest lot is to produce flower. If no flowering plants are present, the Laboratory shall reschedule the sampling for a later date when flowering plants are present.

7. The Laboratory must obtain a sufficient sample size to provide sufficient material to conduct all requested tests, any requested retest, and any quality control performed by the testing laboratory.

B. Initiating a Sampling Request

1. The Laboratory must receive a complete Hemp Sampling and Testing Request Form prior to sampling. The Laboratory must receive a new and separate “Harvest Lot Sampling Request Description” for each “Harvest Lot” to be sampled.

2. The Laboratory must complete the Hemp On-Site Sampling Form. The Laboratory must complete a new and separate “Harvest Lot On-Site Sampling Description” for each Harvest Lot to be sampled.

3. A “Harvest Lot” means:
   a. Means a quantity of Cannabis of the same variety or strain harvested within a distinct timeframe that is:
      A. Grown in one contiguous production area within a grow site; or
      B. Grown in a portion or portions of one contiguous production area within a grow site.
   b. Does not include cannabis grown in noncontiguous fields or noncontiguous growing areas.

4. Prior to beginning the sampling procedure, the sampler shall:

---

1 The definitions in OAR 603-048-0010 unless the context indicates otherwise.
2 Note that the sampling of hemp for pre-harvest THC concentration itself is not accredited by OHA.
a. Survey the site to identify the conditions to determine the appropriate sampling procedure as described in this Protocol.

b. Visually establish the homogeneity of the harvest lot to establish the plants growing are of a like variety.

c. Verify the description of the location of the production area of each harvest lot in the Hemp Sampling and Testing Request Form matches the location of the harvest lot to be sampled (including the GPS coordinates or the address of the harvest lot, and the written description and visual depiction of the harvest lot).

C. Survey and sample collection

1. The sample pattern must ensure that all parts of the harvest lot are adequately and proportionately represented in the plants inspected and sampled.

2. The sampler must use a sawtooth pattern when sampling the harvest lot. Two (2) sawtooth patterns are provided below. The approved sampler must choose one of the patterns most suitable for the field to be sampled. (Figure 1 and 2). The sampler must walk at right angles to the row of plants. The sampler must sample according to the pattern to the extent possible but may deviate from the pattern as necessary to account for particular physical growing conditions and to ensure that all parts of the harvest lot are adequately and proportionately sampled to produce a representative sample.
   a. A sample shall be obtained from flowering tops when flowering tops are present. The cut shall be made just underneath the flowering material, meaning inflorescence (the flower or bud of a plant), located at the top one-third (1/3) of the plant.3 Samplers should avoid sampling dead, diseased, or mechanically injured plants.
   b. A sample shall consist of no more than one sample per plant, randomly chosen from the harvest lot. Place each sample in a paper bag.
   c. Since they are a measure of the entire harvest lot, all samples from the harvest lot may be collected into a single bag.
   d. Samplers should avoid collecting too many samples from the borders of the harvest lot.

3. Sample Size:
   a. The sample size must be at least 4 ounces wet weight, which is the minimum amount necessary for laboratory tests and file samples.
   b. When sampling from a smaller production area, select a minimum of one (1) plant. For production areas of two (2) to ten (10) acres, select a minimum of one plant per acre.
   c. For production areas larger than ten (10) acres, the number of plants to be selected is based on the Codex Alimentarius Recommended Methods of Sampling for the Determination of Pesticide Residues for Compliance with MRLS CAC/GL 33-1999. Table 1 provides the number of plants to be selected for 0-173 acres production areas.

Exhibit B: Testing Protocol Hemp Pre-Harvest Testing

To be valid pre-harvest THC sampling and testing under OAR Chapter 603, Division 48, testing must be conducted as described in this Protocol.1

A. Testing Requirements

1. Testing may only be performed by a laboratory licensed by the Oregon Liquor Control Commission (OLCC) under ORS 475B.560 and accredited by the Oregon Health Authority (OHA) pursuant to ORS 475B.565 to sample and test for tetrahydrocannabinol (THC) content (hereinafter, Laboratory)2 or the Oregon Department of Agriculture (ODA).

2. All testing must be performed by personnel employed by a Laboratory and in accordance with OAR 603-048-0600 and this Protocol.

3. The Laboratory must follow chain of custody procedures consistent with OAR 333-064-0100(2) and be documented to record the collection, transport, and receipt of samples by the Laboratory.

4. Testing must be conducted in compliance with OAR 333-064-0100(3) – (7) except that the Laboratory need not test or report CBD values.

5. Until the Laboratory develops its own criteria, sample or matrix spike recovery must fall between 70–130 percent. The Laboratory must develop its own criteria after obtaining 30 data points and the sample or matrix spike recovery must fall between 70–130 percent or within more restrictive acceptance limits. Until the Laboratory develops its own criteria, the Relative Percent Difference (RPD) between duplicates must be less than or equal to 20 percent. The Laboratory must develop its own criteria after obtaining 30 data points and the sample/sample duplicate RPD must less than or equal to 20 percent or fall within more restrictive acceptance limits. The Laboratory shall include at least one sample or matrix spike and one set of duplicates to assess accuracy and precision for each extraction batch.

6. The Laboratory must perform testing under their Quality Management system as defined by their ORELAP accreditation.

7. The Laboratory must perform testing in a manner that avoids contamination of the non-sampled material with sample containers that are free of analytes of interest and appropriate for the analyses requested.

8. The Laboratory shall calculate total THC (meaning the molar sum of THC and THCA) percentage on a dry weight basis calculated in accordance with OAR 333-064-0100(4).

1 The definitions in OAR 603-048-0010 unless the context indicates otherwise.

2 Note that the sampling of hemp for pre-harvest THC concentration itself is not accredited by OHA.
B. Initiating a Testing Request

1. The Laboratory must receive a complete Industrial Hemp Sampling and Testing Request Form prior to testing. The Laboratory must receive a new and separate “Harvest Lot Sampling Request Description” for each Harvest Lot to be tested.

2. The Laboratory must receive a complete Industrial Hemp On-Site Sampling Form prior to testing. The Laboratory must receive a new and separate “Harvest Lot On-Site Sampling Description” for each Harvest Lot to be tested.

3. A “Harvest Lot” means:
   a. Means Cannabis of the same variety or strain harvested in a distinct timeframe that is:
      i. Grown in one contiguous production area within a grow site; or
      ii. Grown in a portion or portions of one contiguous production area within a grow site.
   b. Does not include Cannabis grown in noncontiguous fields or noncontiguous growing areas.

C. Sample Preparation Requirements

1. The Laboratory shall dry all of the leaf and flower of the sample (not obvious stem and seeds).

2. After drying, the Laboratory shall pulverize and sieve the sample using mesh size 1 mm as described in United Nations Office on Drugs and Crime: Recommended Methods for the Identification and Analysis of Cannabis and Cannabis Products. 3. The Laboratory shall determine the dry weight of the sieved material.

4. The Laboratory shall divide the sieved, blended and homogenized sample into two portions: the test portion and the retained file sample. The Laboratory shall store the retained file sample in a freezer until needed. The retained file sample must be of sufficient material to conduct any requested retest and any quality control performed by the testing Laboratory.

D. Retesting Requirements

1. The Laboratory shall retest a Harvest Lot upon receipt of a completed Request for Retest from a grower. “Retest” or “Retesting” means the laboratory process of retesting a retained file sample for THC content after the sample failed initial testing for THC content. A retest does not include or permit taking a new sample from the harvest lot.

2. The Laboratory shall forward the retained file sample to another Laboratory or to the ODA upon receipt of a completed Request for Retest from the grower requesting that the sample be forwarded. The Laboratory shall:
   a. Use packaging appropriate for secure transport.
   b. Protect the sample from moisture and temperature extremes.
   c. Include all documentation with the sample.
d. Forward the sample by the most expedient, secure, and legal means to ensure
that the sample continues to be representative of the harvest lot sampled and
the chain of custody is accounted for to protect its integrity.

E. Testing After Resampling
1. The Laboratory may test a Harvest Lot after a valid resampling in accordance
   with OAR 603-048-0630.
2. The Laboratory shall conduct testing after a resampling like any other testing in
   accordance with this protocol.
3. The Laboratory shall report the test results as described in Part F of the Protocol,
   but shall indicate that the result is pursuant to resampling.
