Avoid removing ash, olive and white fringe trees, including branches, and stumps.

A temporary quarantine is now in effect. Tree materials of ash, olive, and white fringe tree, must remain within Washington County. Wood waste must be processed accordingly and disposed of to slow the spread of emerald ash borer (EAB) in Oregon.

EMERALD ASH BORER TEMPORARY QUARANTINE
WASHINGTON COUNTY, OREGON

Quarantined ash, olive, & white fringe tree Materials
• Logs
• Stumps
• Green lumber
• Nursery stock
• Scion wood
• Bud wood
• Chips and mulch

December 2022
EMERALD ASH BORER (EAB) TEMPORARY QUARANTINE

EAB Quarantine Frequently Asked Questions.

Provided by Oregon Department of Agriculture (ODA), Insect Pest Prevention & Management program.

• What tree materials are restricted from leaving Washington county?
  Any material that could transfer a beetle egg, larva, or adult. The temporary EAB quarantine includes but is not limited to logs, green lumber, nursery stock, scion wood, and bud wood; chips and mulch, either composted or not; stumps, roots, branches, and firewood from trees other than conifers.

• Why are we concerned with the movement of yard debris out of Washington county?
  ODA has only detected EAB in Washington County. To slow the spread of EAB, ODA is placing a temporary quarantine on Washington County to restrict the movement of tree materials that may spread EAB to new areas in the state.

• What is a quarantine? What are the consequences for not adhering to the quarantine?
  Quarantine is the legal enforcement of actions that help slow the spread of pests to new areas or that prevent them from multiplying where they have already gained entry. For this reason, ODA is implementing a temporary EAB quarantine as per Oregon Administrative Rule (OAR 603-052-0135). Non-compliance will result in the spread of EAB and civil penalties of up to $10,000 as provided by ORS 570.995.

• I live just outside of the quarantine area, should I take my tree materials to a special place?
  No. If trees on or around your property are showing symptoms or signs of EAB infestation please call 1-866-INVADER or contact ODA at: EAB@oda.oregon.gov

Signs & Symptoms of EAB

• Crown dieback in heavily infested trees
• D-shaped emergence holes in bark about 0.118 inch (3mm) in size.
• Sucker shoots emerging from trunk
• S-shaped galleries underneath the bark
• Bark splitting found on trunk or branches
• Woodpecker activity
• The tree is dying from top down

Ash Tree ID

• Compound leaves with 5-11 leaflets
• Unstaggered opposite branching
• Diamond shape bark pattern
• Seeds are oar-shaped samaras

Processing and Disposal Resources

For a list of businesses that can aid in removing, processing, and disposing of quarantined wood materials, please visit: ODA.direct/EAB
