Discontinuance/Cancellation of Pesticide Registrations in Oregon

There is no mandatory "discontinuance period" requirement for maintaining pesticide registrations in Oregon. Some states require registrations to be maintained for one or two years beyond the time a registrant is no longer marketing the product in the state, but Oregon does not.

Instead, registrants simply must ensure a product has cleared the channels of trade in Oregon before its registration is cancelled. If the product is still in the channels of trade in Oregon, its registration must be maintained. When the product is no longer available for sale/distribution in Oregon, the registration may be immediately cancelled.
