

**Notice: New Pesticide Product Registration (PPR) Applications, including Disinfectants,  
will be Processed in Order Received  
Last Updated: October 4, 2021**

In May 2020, the Oregon Department of Agriculture (ODA) announced that it would prioritize applications to register new disinfectants on the Environmental Protection Agency's (EPA's) List N: Disinfectants for Use Against SARS-CoV-2. As of October 2021, there are almost 3,000 disinfectants registered in Oregon that are on EPA's List N. Given this, all applications to register new pesticide products, including disinfectants, will now be reviewed on a first-come, first-served basis. This change is effective immediately.

If your company has an active pesticide product registrations (PPR) license with ODA: Please continue to submit all new product applications through our online registrations system, <https://mylicense.oda.state.or.us/>

If your company does NOT have an active PPR license with ODA: Please submit via mail\*\* a paper new product application, completed according to the instructions on the application form. This form is available at <https://oda.direct/HowToRegister>.

\*\* New product applications may still be submitted via fax if the registration fees are being paid by credit card. However, effective immediately, this submission method will no longer afford priority handling for disinfectant registrations.

If you have any questions about this notice or the application process, please email [pesticide-expert@oda.oregon.gov](mailto:pesticide-expert@oda.oregon.gov) or call 503.986.4635.
