The initial Student Investment Account Community Engagement Toolkit was released by the Oregon Department of Education (ODE) on August 21, 2019. Since then, much has changed in the state, however the core promise of the SIA has not. Significant work done by districts and eligible charter schools to engage, listen, and plan with students, families, communities, and educators was and remains real and noteworthy. This is evidenced by the hundreds of engagement artifacts submitted in the first round of SIA applications that tell powerful and authentic engagement stories, and highlight lessons learned from across Oregon. The work of the SIA does not live in isolation of the economic, health, and community conditions across Oregon. The resilience and strength of communities and schools is something to notice and cheer on. And the opportunities to deepen partnerships while addressing the challenges brought on by systemic racism, poverty, COVID-19, wildfires, loss of power, and the hundreds of ways we struggle to respond to the wholeness of students, families, educators, and school leaders are clear, complex and daunting.

This revised community engagement resource is being offered at this critical time as districts and schools continue to engage with students, families, and communities in new ways and to support ongoing engagement as SIA grant recipients develop plan adjustments and amendments for the 2021-23 biennium. While this resource is primarily focused on community engagement, the larger framework and timelines of the SIA are available on ODE’s SIA webpage. This resource is aimed to honor the learning and work of the prior 18-months, provide information that deepens the community engagement work called forward by the SIA, and offer useful and compelling tools to integrate community engagement work across other kinds of programs and initiatives - embedding this work in the fabric of districts and schools. This new toolkit is intended to support community engagement in both SIA plan creation and implementation. We cheer on bold new strategies and approaches that weave community engagement into the everyday operations of districts and charters, not just plan development and approval. And as we navigate unprecedented systemic challenges, we wish to emphasize that ongoing and robust community engagement is vital to supporting the mental and behavioral health of focal student groups struggling the most.

In Section 1, we re-ground the core intentions of the Student Success Act and how those intentions are fundamentally connected with meaningful and authentic community engagement. We share about the significance and requirements in honoring the sovereignty of Tribal Nations in the process. And we describe a picture of robust community engagement that builds on the successes of the first year of the SIA. In Section 2, we introduce a framework for deepening and expanding the thinking around community engagement. This spectrum is adapted from a powerful resource and tool developed by Facilitating Power and
the Movement Strategy Center\(^1\), and is a key framework for how ODE’s SIA team will think about and support community engagement moving forward. Section 3 builds on this framework by sharing key strategies and tools that districts could immediately consider to move ahead in family-district partnerships. Section 4 outlines the community engagement requirements for the 2021-23 biennium and beyond, including recommendations for navigating virtual forms of community engagement. Lastly, we include an Appendix with additional resources. The Student Investment Account operates through a network of brilliant and committed organizations, change-makers, and leaders who are all shaping the future of educational equity in Oregon. We wish to highlight the resources that have informed our thinking and can support districts to deepen community engagement in their part of Oregon.

As you review this work, we suggest the following steps to get started:

1. **Begin with your own Self-Reflection on Previous Engagement.** Prior to planning new engagement opportunities or implementing new engagement strategies this year, districts and eligible charter schools should take time to reflect on previous engagement efforts. This was an element of the SIA application and contains rich and candid assessments for improvement. ODE offers some ways SIA grant recipients could consider taking stock of their engagement efforts today to help inform their engagement moving forward.

2. **Get clear on your core engagement team.** If your district is small, your community engagement efforts might include a small number of individuals who plan for and lead the process. In larger districts, dedicated teams or positions may drive the planning for and implementation of engagement efforts. Either way, it’s important to set clear expectations for all staff, students, and families. This is especially true for groups who have historically had limited opportunity to engage. Create avenues for them to share their experiences, insights and ideas for improving your educational system. Viewing community engagement as an ongoing process as opposed to an event (or a state requirement) is essential. The time, energy, and effort that community members from focal groups dedicate is significant and generous, and provides valuable input to formulate the SIA plan.

3. **Establish or revise and affirm your approach.** Consider establishing your approach to community engagement from the outset, or if you already have robust processes in place, use this time and resource to undertake a comprehensive review. This includes creating clear expectations about the importance and goals of engagement, which include but are not limited to receiving input for the SIA plan. What follows in this document are resources and tools to contribute to and support your efforts.

---

\(^1\) Facilitating Power, “Spectrum of Family & Community Engagement for Educational Equity”
1.1 Community Engagement Requirements and Recommendations

The Student Success Act (SSA) requires districts and eligible charter schools receiving SIA funds to engage students of color; students with disabilities; emerging bilingual students; students navigating poverty, homelessness, and foster care; other students who have historically experienced academic disparities; the families of students in these focal groups; and staff.

While not statutorily required, ODE recommends a more robust list of people and organizations to engage with for a more rigorous and intentional process, which includes but is not limited to:

- Community-based organizations (CBOs)
- Community leaders
- Tribal members
- Faith-based organizations
- Licensed and classified staff
- Early learning advocates and providers
- School volunteers, including PTAs, PTOs, parent clubs, site councils, and boosters
- School board members
- Higher education institutions
- Before and after school child care providers
- Business community

1.2 The Intent of the Student Success Act

The Student Investment Account aims to meet students’ mental and behavioral health needs and increase the academic achievement for students who have historically experienced academic disparities, with plans that are created through robust community engagement and application of an equity lens. The SIA is part of the larger Student Success Act (SSA), along with the Statewide Education Initiatives Account (SEIA) and Early Learning Account (ELA), all of which are meant to improve access and opportunities for students who have been historically underserved in the education system. Within the SEIA, there are a number of programs that establish or expand support for the same focal groups named in the SIA, including the African American/Black Student Success Plan, the American Indian/Alaska Native Student Success Plan, and the Latino, Latina, Latinx Student Success Plan. Districts should consider ways these different programs are connected and how they may begin to align community engagement efforts and plans to better support their students, families, and communities.

1.3 Applying an Equity Lens

An equity lens is a tool that helps center core values, commitments, and questions throughout the process. Applying an equity lens helps create a systematic structure and process to ensure that no focal group or community is ignored in the process of community
engagement and plan development. The adoption and use of an equity lens is a requirement of the SIA application. You could begin by reviewing the Oregon Equity Lens and Decision Tools to help ground your team in the baseline assumptions, expectations, and aims of your own equity lens. You may also consider sharing your equity lens broadly with your community, so they are aware of how that tool will be used in your decision-making process. We would encourage you to expand on the Oregon Equity Lens so that it is attuned and situated to your own unique needs. In the sections below, we offer recommendations for reaching out and listening to your community and target focal student groups. However in your equity lens, you might consider specific values, objectives, and essential questions that you wish to guide your outreach. These questions might be:

- Who are the racial/ethnic and underserved groups affected? What is the potential impact of the resource allocation and strategic investment to these groups? How does belonging to more than one focal group affect their experience?
- Does the decision made ignore or worsen existing disparities or produce unintended consequences? What is the impact on eliminating the opportunity gap?
- How have you intentionally involved stakeholders who are also members of the communities affected by the strategic investment or resource allocation? How do you validate your assessment in the questions above?
- How will you modify or enhance your strategies to ensure each learner’s and community’s individual and cultural needs are met?
- How are you communicating with and addressing communities and groups that are not in the target focal group populations? If challenging or tense dynamics emerge, how will you navigate these?

Additionally, thinking about how to address potential challenges or tensions that exist in the larger community (beyond target focal groups) could be supportive in developing and applying your equity lens. If all community members understand the importance of equity, deeper and more courageous conversation could be made possible. Developing a strong and situated equity lens is a solid starting point to create conditions for meaningful and authentic community engagement.

1.4 Honoring Sovereignty, Tribal Engagement and Tribal Consultation

Sovereignty

Tribes are sovereign governments. Sovereignty describes the inherent right of Native American Nations to exercise self-governance. Tribes interact independently in Government-to-Government relationships with other tribes, the federal government, states, and counties. Tribes also interact with school districts, cities, municipalities, businesses, non-profits, higher education institutions, and other non-governmental organizations. While not all tribes choose to exercise all powers as a sovereign government, the right to self-govern is inherent to tribes.

Tribal Consultation

The Student Success Act - Student Investment Account requires districts and schools to engage with their American Indian/Alaska Native students and families, and tribal and community members. In addition to concerted efforts for authentic dialogue with individuals or groups representing the American Indian/Alaska Native community, we strongly encourage districts to utilize the formal tribal engagement process with the tribes located in the area to inform any Student Investment Account planning activities and priorities that would impact students of those tribes.

Tribal consultation is a formal process designed to ensure timely and meaningful consultation on issues affecting American Indian and Alaska Native students.
The consultation must be done in such a manner and in such a time that provides the opportunity for appropriate officials from Indian tribes or tribal governments to meaningfully and substantially contribute to plans served under covered programs. Under federal ESSA law, however, official tribal consultation is required in Oregon districts that receive greater than $40,000 in Title VI funding or have 50% or more American Indian/Alaska Native students. The mandatory programs include parts of Title I, Title II, Title IV, Title V and VI. The recently released Tribal Consultation Toolkit Guide 1.0 and webinar recording by the Office of Indian Education provides essential information.

1.5 Towards a Robust Community Engagement

While SIA plans were approved in year one that met the minimum requirements for community engagement as outlined in law, we support districts to increasingly see communities as fundamental actors and resources in schools and the education system. Deepening and sustaining a more robust community engagement beyond the minimum statutory requirements is necessary to fully realize the core goals and strategies in district SIA plans. Moving from a minimum requirement to a robust community engagement framework and way of doing business is a growth process that takes time, effort, intentionality, and commitment to learning and accountability. However, seeding and activating a more robust community engagement plan will also create the possibility for lasting change and resilience for all students, families, teachers and staff.

Above, we shared the list of groups that districts are required to engage with as part of the development of their SIA plans. Robust community engagement involves an even wider network of actors, participants, and partners, including (but not limited to) community-based organizations, faith-based institutions, grassroots networks, informal family networks and neighborhoods. Every district is required to use an equity lens to review their strategic SIA plan, which is required to be informed by the district’s community engagement. This is meant to help center core values, commitments, and questions throughout the process, as well as create a systematic structure to ensure that no focal group or community is ignored in the process of community engagement and plan development. Since no city, town, or region of Oregon is the same, we would recommend beginning with the Oregon Equity Lens and expanding on it so that it is situated to your unique leadership needs, district culture, and community make-up. What additional questions, needs, and considerations would help you learn more and grow into robust community engagement?

In this toolkit, we share a framework, example strategies, and helpful resources for expanding into a more robust and rigorous community engagement. As your district chooses to approach community engagement in deeper ways, you are inviting change to happen: focal groups will feel less like an audience for your decisions and more involved as key partners; structures of accountability and feedback will bring a sense of transparency and authenticity to district planning; and core assumptions that you hold about how your district/school should operate may be transformed. Furthermore, investing in robust community engagement may also shift the minds and hearts of all staff and community members, even those who hold dominant identities. This work is meant to bring about greater health across the whole district, community, and education system -- shifting dominant patterns and beliefs so all communities and families are in healthy relationship with each other.

Small and/or rural school districts may consider innovative ways to meet the call of robust engagement with their communities, especially if safety of students and families of focal groups is a concern. Some ideas for engagement include:

- Connecting with a leader who and/or community-based organization that is willing to speak with students they have a relationship with and share back what they learn with the school district
- Asking for input during other times when parents or families are at the school, such as during IEP meetings
- Conducting phone calls to students’ families, rather than having an in-person event
- Leveraging Comprehensive Distance Learning (CDL) as an opportunity to check in with families about what is working and what needs improvement (during these unprecedented times and beyond)
SECTION 2: EXPANDING THE THINKING AND PRACTICE OF COMMUNITY ENGAGEMENT

Community engagement is a broad term encompassing a number of approaches to authentically and meaningfully engage communities in district and school processes. To expand and deepen the nuance of this term, we have adapted work from Facilitating Power and the Movement Strategy Center to adapt a spectrum for thinking about different ways to engage communities. This spectrum describes six different levels of community engagement with key considerations and ways to move deeper along the spectrum. It is important to note, with the exception of Level 0 “Ignoring Community,” that each level may be appropriate for a particular situation. The spectrum is intended to share what some pitfalls of each level are and ways to address those. You may need to consult this spectrum with another resource (like the ODE Decision Tools for SY20-21) to decide which level of the community engagement spectrum is appropriate for each strategy, activity, and choice you make.

2.1 The SIA Community Engagement Spectrum

This framework serves as a tool to assess and deepen engagement in Oregon communities. It is organized on a spectrum of shallow to robust community engagement (Levels 1-5). District and school leaders are encouraged to use this framework to reflect on their stance and approach towards communities. It may be used to assess the overall level of engagement of a district/school, as well as be used to assess an individual strategy, activity, project, or initiative within a district/school. In most cases, a district/school will have multiple levels of this spectrum that exist simultaneously in the totality of community engagement-related activities. For example, you might as a district review your overall SIA strategies and consider yourself operating at Level 3 “Involve” -- but you might also catch that some of your engagement methods are Level 1 “Inform” while some of your teachers and staff are operating in Level 4 “Collaborate.” The framework is intended to illuminate and support this multiplicity while suggesting concrete ways to move further along the spectrum.

We recognize Facilitating Power and Movement Strategy Center for their work in building this framework and appreciate their support to adapt it to the Student Investment Account. Facilitating Power is dedicated to cultivating personal and collective power through innovative approaches to education and organizing that meet the demands of our shifting social climates. Movement Strategy Center works with grassroots organizations, alliances, and networks, as well as funders, to build powerful and transformative social justice movements.

## Stand Towards Community

- **Ignore**
  - Protecting School/District Interests
  - Unintended Impact to Consider: Marginalizing Communities

- **Inform**
  - Keeping Communities Updated
  - Unintended Impact to Consider: Placating & Underestimating Community Wisdom

- **Consult**
  - Receiving Community Input
  - Unintended Impact to Consider: Tokenizing & Gatekeeping Community Engagement

- **Involve**
  - Meaningfully Engaging Community Voice
  - Unintended Impact to Consider: Community Voice is Not Heard

- **Collaborate**
  - Collaborating and Sharing Power with Communities
  - Unintended Impact to Consider: Collaborative Process Derailed by Power Dynamics & Lack of Relational Trust

- **Defer**
  - Communities Drive and Own the Work
  - Unintended Impact to Consider: Sovereignty and Core Agreements are Not Honored

## Intention

- **Closed door meeting**
  - Fact sheets
  - Input sessions
  - Collaboration or engagement with community organizing and community voices

- **Missinformaton**
  - Open houses
  - Focus groups
  - MOUs with Community-based organizations

- **Systematic effort to avoid engagement**
  - Presentations
  - Empathy interviews
  - Leadership Development

- **Example Engagement Methods**
  - Billboards or school electronic boards
  - Surveys
  - Resources & funding allocated for community organizing
  - Videos
  - Interactive workshops & forums with accessibility and safety considerations
  - Collaborative design and facilitation of community forums to ensure voice, safety & accessibility
  - Social media posts
  - Student & Parent/Family Advisory Committees
  - Student or Parent/Family led community forums to assess challenges and develop solutions

## Key Example Strategy to Consider for Engagement Methods

- Establish who the community is composed of
- Language Accessibility
- Hospitality and reciprocity practices
- Staff training on anti-racist equity and culturally sustaining and responsive practice
- Deeper strategy and visioning work with local community-based organizations (e.g. non-profits, churches, etc)
- Allocating SIA strategies/activities for community-driven projects and use

## How Community Engagement Exists in SIA Plan

- **Focal student groups not acknowledged and/or subsumed in another category (e.g. students of color lumped into students experiencing poverty)**
  - Associated Challenge: Students of color continue to be invisibilized by a system of White Supremacy

- **Communities informed that SIA is occurring but not engaged for input**
  - Associated Challenge: Community needs continue to be invisible because they are merely informed of the SIA, not solicited for input

- **Data (including disaggregated data) are used as primary resource to inform SIA strategies/activities**
  - Associated Challenge: Communities are only engaged once in the process of SIA plan creation and follow-through is limited

- **Tribal consultation and engagement is central to the development of SIA plans**
  - Associated Challenge: Community (and Tribal) voice is taken but not actually incorporated

- **Partnerships with community-based organizations, organizers, and other agencies**
  - Associated Challenge: Partnerships are created but not honored through continual reciprocity and shared work

- **Task forces and committees with decision-making power composed of community members, target focal groups, and staff**
  - Associated Challenge: Decision-making is rhetorically granted but in practice not deferred and shared with community
In the sections below, we will walk through the seven rows of the spectrum and explain what they mean.

**Stance Towards Community:** This row indicates a spectrum of orientations towards family and community engagement. Level 0 ignores and marginalizes the students, community, and staff the SIA was designed to focus on and will not meet requirements in ODE’s review of district SIA plans. Levels 1-5 demonstrate the wide range of approaches that districts may take to engage communities. It is important to note that your district may exist in multiple places on the spectrum at the same time, and there are times where it is appropriate to engage communities at level 1 and 2 (for example -- providing students and families with information about an upcoming engagement session). In most cases, however, deepening your engagement approach across the spectrum will present the most robust community engagement opportunities and possibilities.

**Intention & Unintended Impact to Consider:** This row names the core intention that is often expressed when justifying each type of engagement. This intention may be completely appropriate for the nature of the task or project, but it could also create unintended impact or represent underlying beliefs about community that need to be addressed, including whether or not another level of the spectrum should be aimed for.

**Community Engagement Goals:** This row points to the main goal that each level of community engagement is seeking to accomplish.

2.2 Deepening into the Spectrum

The SIA Community Engagement Spectrum above described six levels of community engagement. Below, we offer suggestions for moving along the continuum, including reflection questions, resources and actions towards growth that can help unlock deeper community engagement. Finally, it offers a key SIA example that is meant to highlight how each level has occurred in the development of SIA plans.

<table>

| | Phrases and statements like this one erase and invisibilize focal student groups and families. Acknowledgement of these groups is glanced over.
## INFORM

### Reflection Questions
Questions meant to help move deeper along the spectrum and foster meaningful community engagement

- If there are certain groups or communities who aren’t engaging in your school, ask yourself why? Why are they not participating and how can the school do better about reaching out and making them feel welcome? (Focus on the system keeping them out, not blame the communities for not showing up).
- What communication and engagement outlets best fit the unique strengths/assets and needs of the families and communities you serve? What conditions support this?
- What pathways to deeper collaboration and involvement are you planning and can be communicated?
- How are you providing families and the community with relevant information regarding current inequities and plans to address them?

### Resources and Actions Towards Growth
Resources and key actions that could deepen intentionality at each level or spark movement along the spectrum.

#### Key Resources
- ODE Decision Tools
- Spectrum of Family & Community Engagement for Educational Equity
- Reframing Family, School, and Community Engagement
  - When You Say...They Think
  - Dos and Don’ts

#### Key Actions
- Ensure all communication materials are accessible and in the languages of the target focal groups, families and communities
- Ensure language interpretation and translators are available in the most common language groupings in school/district
- Consider which communication outlets (formal and informal) are most readily accessed by the community

### Key SIA Example
Key example from SIA applications and consideration to push thinking further

Districts are required to disseminate information about their SIA plans by posting board minutes indicating approval of the SIA plan and the final approved SIA plan on their website. Additionally, districts shared information about engagement opportunities through their website, school newsletters, the board, and parent meetings. After a reduction in funding, one district shared how they prioritized community inputs from the original plan and their process for creating the reduced funding plan. It was posted on their website, shared at a board meeting, and available for public comment. These communication and dissemination strategies assume communities and families understand system and educational intricacies. What other context/stories/training needs to be shared to build overall awareness so they can fully engage/understand?

## CONSULT

### Reflection Questions
Questions meant to help move deeper along the spectrum and foster meaningful community engagement

- How are you seeking input from students, parents, families, and the community to inform solutions to address educational inequities? How clear and transparent is the information you are providing to inform their input?
- What conditions are you creating in your input/engagement sessions to ensure that community members feel safe, heard, and powerful?

### Resources and Actions Towards Growth
Resources and key actions that could deepen intentionality at each level or spark movement along the spectrum.

#### Key Resources
- School Reform Initiative protocols
- Powerful Partnerships: A Teacher’s Guide to Engaging Families for Student Success

#### Key Actions
- Conduct a landscape analysis of CBOs, community partners, faith-based organizations, culturally specific organizations, Tribes within district, and other county services
- Consultancy protocol or another SRI protocol with community members, partners, and stakeholders

### Key SIA Example
Key example from SIA applications and consideration to push thinking further

Districts created opportunities to seek input from the community to establish priorities for the SIA dollars. Common strategies included public meetings, online surveys (in English and Spanish), and focus groups. One district reached out to families of focal groups through mailings and follow-up phone calls made by staff and community partners who speak their preferred language, inviting them to attend focal sessions at which food and child-care were provided. District translators also attended to help facilitate small groups. If you create opportunities for families to be consulted, but some focal groups do not attend, do you proceed with SIA plan creation/implementation anyway? Consider slowing down to re-assess how you have created conditions to bring everyone to the table.
### 3. INVOLVE

#### Voice & Power Shift

**Reflection Questions**
Questions meant to help move deeper along the spectrum and foster meaningful community engagement

- How are you creating expectations about participation and decision-making for clarity on role/involvement for students, families, and community?
- How are you creating opportunities in existing structures (e.g. school site councils) for traditionally marginalized groups to participate?
- How are you learning to listen deeply to different voices, perspectives, and ways of knowing (e.g. culturally responsive trainings for participating staff)?
- How are you creating space/opportunity to name, address, and heal from historical harm inflicted by the district/school system?
- How are you demonstrating a commitment to change historical practice and policy?

**Resources and Actions Towards Growth**
Resources and key actions that could deepen intentionality at each level or spark movement along the spectrum.

**Key Resources**

- A Match on Dry Grass: Community Organizing as a Catalyst for School Reform

**Key Actions**
- Partner with local CBOs, faith-based organizations, or other local partners who already engage these communities through their leadership programs.
- When engaging parent leadership groups, make sure they reflect the student population.
- Before you make a decision or take an action, consider using a tool like the ODE decision tools to ensure you have engaged the right partners and voices.

**Key SIA Example**
Key example from SIA applications and consideration to push thinking further

In one district, the SIA team worked directly with the Tribal Education Agency as well as the Tribal Cultural and Heritage Program as part of their community engagement process to get input from tribal members. Another district worked with tribal leaders to hold SIA community engagement opportunities at tribal facilities.

*Just because target focal groups are at the table doesn’t mean that the table is set evenly. Consider how the backdrop of colonization and settler colonialism creates uneven dynamics for engagement and what forms of acknowledgment, accountability, and follow-through are needed.*

### 4. COLLABORATE

#### Delegated Power

**Reflection Questions**
Questions meant to help move deeper along the spectrum and foster meaningful community engagement

- What are the formal (e.g. faith-based institutions; community-based organizations) and informal (e.g. family/community networks and coalitions) that can be collaborated with? How do they wish to be involved?
- How have you ensured that the projects/dilemmas/tasks at hand are made culturally relevant and accessible?
- How are roles on decision-making and involvement co-constructed with these groups?

**Resources and Actions Towards Growth**
Resources and key actions that could deepen intentionality at each level or spark movement along the spectrum.

**Key Resources**
- Meaningful Student Involvement Guide to Students as Partners in School Change
- Vehicle of Change: The PS 2013 Campaign

**Key Actions**
- Consider how the school leadership and board play an important role in value-setting and modelling how communities are engaged, parent leaders are heard, and follow-through on needs are met.
- Utilize active structures like Parent Advisory Councils to create space for ongoing reflection, strategizing and goal-setting.

**Key SIA Example**
Key example from SIA applications and consideration to push thinking further

One district created a task-force representative of the community including district staff (classified, specialists, licensed), community organizations, leaders and union representatives, parents and students. Together, they analyzed disaggregated data, elevating bright spots and areas of opportunity. Additionally, the group planned, attended, and supported community engagement events, consistently processed community input after events and ultimately prioritized how to use SIA funds. The group met frequently in the evenings during the formation of the SIA plan.

*Collaborative and two-way partnerships require clear agreements, shared understandings, and processes for learning, feedback, and accountability.*
### Reflection Questions
Questions meant to help move deeper along the spectrum and foster meaningful community engagement

- How have you created a larger vision for what community ownership and honoring sovereignty means for your district/school in relation to the larger community? How has the community been involved in this?
- What beliefs, structures, and processes need to be shifted within your school/district to support deeper community ownership?

### Resources and Actions Towards Growth
Resources and key actions that could deepen intentionality at each level or spark movement along the spectrum.

**Key Resources**

### Key SIA Example
Key example from SIA applications and consideration to push thinking further

This level of community engagement is a growth area for districts. We recognize a handful of districts that with continued and sustained effort could reach this level of deferring to community ownership. Some examples of this could look like:

- Hiring strategies that structurally prioritize community representation in district staff and leadership positions
- Participatory budgeting processes where communities are involved in the shaping and maintenance of district budgets
- Curriculum that is co-designed and deferred to CBOs
- Community-driven audits of district spending (both SIA and other funds)
SECTION 3: STRATEGIES FOR MOVING ALONG THE SPECTRUM

The spectrum and this toolkit are not exhaustive. The aim is to provide a few high leverage strategies to think about moving more deeply towards more robust community engagement and ownership.

3.1 Growing Community Awareness and Knowledge

All Oregon districts feature communities, families and students from target SIA focal groups that have historically experienced being underserved, underrepresented, excluded, and/or marginalized from the educational system. As districts are required to engage communities meaningfully and authentically to inform their SIA plan, it is vital to know and understand the communities and focal groups that this plan is intended to serve. Specifically, districts and schools need to know which focal groups are represented within their community. Depending on the size of the district or school, this may mean that there are just one or two students in a particular focal group; however, regardless of the number of students in a focal area, they still need to be engaged to ensure districts are not continuing patterns of erasure or defaulting to claims that “we don’t have those students here.”

There is one area of community awareness that needs further attention while holding significant tension - and that is students and families in poverty. Poverty is an experience that crosses through other focal student groups. There is room for significant improvement in recognition and outreach strategies that honor the strengths and meet the needs of students and families with the least financial resources right now. Any racial tension created around focusing on students in poverty is a false divide. The areas of tension arise, as they should, when a focus on white students in poverty is rhetorically or practically set in opposition or prioritization of other focal student groups. The SIA does not and should not contribute to that trap. We can listen, engage, and strengthen educational systems attending to each and every student with a clear racial equity lens and stance without erasing or minimizing poverty.

To grow the awareness of your community, consider completing a community asset inventory or mapping of your community. This would include identifying all of the community-based organizations (CBOs), faith-based organizations, tribal nations, culturally specific organizations, community leaders, and business leaders in your community. Deepening your knowledge of the community will support your district or school as you develop a more robust plan for community engagement.

As you continue to engage with your community and develop future SIA plans, you can also begin to use this inventory to substantiate your community engagement practices. Are you going beyond the minimum requirements to engage with the organizations and leaders identified in your inventory? Are you doing what you said you would do in terms of engaging and incorporating inputs from the organizations and leaders in your community?
The Importance of Intersectionality

While many students may belong to more than one target focal group (e.g. both a student navigating poverty and a student of color), applying an intersectional lens to community engagement means not focusing on one issue that a student group is experiencing. Disaggregating data and developing a nuanced understanding of the school community is vital to ensure that some issues (e.g. race) are not ignored simply because those students also belong to another group (e.g. students with special needs/disabilities or students navigating poverty). Looking at one’s community intersectionality allows one to understand how belonging to multiple focal groups can actually compound and exacerbate issues and challenges faced in any one focal group. It is important to distinguish and differentiate these groups (even if there is also overlap) so that each student can be met with the unique care that is needed for their particular challenges and needs.

3.2 Building Relationships Rooted in Care and Reciprocity

Robust community engagement rests on a foundation of relationships from which deeper transformational work is made possible. Relationship-building in ways that attend to deep care, equity and reciprocity is critical to deepening meaningful and authentic community engagement. Families and communities should be treated as equal and powerful partners with deep educational wisdom. Conditions should be created and attended to so that families feel supported and able to comfortably express their perspectives and participate in design processes. Below are some key considerations as districts seek to build relationships rooted in care and reciprocity.

Deep Hospitality

Deep hospitality is a rich cross-cultural and equity-centered practice that creates foundational conditions for trust and relationship-building. To extend deep hospitality means to host well and to have guests feel like trusted community members and partners. Districts are encouraged to think about how families and communities wish to be treated and what would allow them to feel their most comfortable to participate. The physical (or virtual) space should reflect values of care and intention, including culturally responsive and specific considerations such as: What forms of organizing, communicating, and participating are unique to a cultural community and how are we allowing for those to occur in the space? Some other considerations include:

- **Access**: How have you incorporated different abled bodied access and needs? Are the physical or virtual spaces you use comfortable for community members?
- **Basic Needs**: Have all basic needs been accounted for through engagement (bio-breaks, food, etc)?
- **Cultural space**: There are many different ways that communities are accustomed to gathering. Have you considered how one formation (e.g. a circle or smaller groups) might be more culturally responsive than others (e.g. desks in rows)? To create the conditions for meaningful two-way dialogue, you may consider less formal or small group structures.
- **Location**: Consider where you are holding your
gatherings, given different ways people have previously experienced school. Are you only hosting meetings at the school buildings? Are there spaces in the community where you consider holding gatherings?

- **Intentionality:** Community members are often juggling multiple responsibilities, which does not mean that they do not wish to provide input on the SIA. Consider how you have incorporated their life and work rhythms into your planning. What time of the day/week is best to engage them? How long is necessary?

- **Promptness:** Honoring community members time is vital, so ensure that you are beginning and ending on time so they can attend to other needs. However, notice when there is energy and momentum, which could mean you make additional times to engage or stay for longer than you initially anticipated.

- **Flexibility:** Many community members are busy and taking precious time that they hope will effect school change. Consider how different modes of engagement can be flexible with time, including if community members have to show up late or leave early and how to create ample opportunity to provide input.

- **Inclusion:** Throughout any engagement method, from an informal Zoom call to structured focus groups, consider how you will create space for community voice to be welcomed, invited, and included. Whose voice is taking the most time/space during these engagements? What structure/facilitation method are you using to create proportionate representation from the community and target focal groups?

### Communication and Language

Creating conditions for clear and equitable communication requires intentional planning and process. Language accessibility is critical, ensuring that proper staff and measures are incorporated so that the languages that communities are most comfortable speaking are adequately met. Additionally, while emphasis is often placed on meeting the needs of various spoken languages, communities and families from different cultures often express themselves through nonverbal, emotional, energetic, and other forms of communication. It is important for district and school staff to pay close attention to the subtler patterns in a room, particularly if those come from identities that are not their own. Lastly, consider and embrace the value of tension and disagreement in holding space with families and communities. When inconvenient voice arises, that is, perspectives and comments that may at first glance seem to derail, muddy, or confuse the conversation, we suggest digging into it further to learn more about where it is coming from and the value that its ‘inconvenience’ may offer for unlocking key barriers to deeper understanding and work.

### District Follow-Through

For families and communities to feel valued, districts should continually follow-up and follow-through on the input that community members have generously offered. As a starting point, you might think about gifts or other tokens of appreciation you can offer that indicate to community members that you appreciate them. In some districts, we have learned that raffles, giveaways, and offering transportation, childcare and/or communal meals have been supportive in honoring the time and input community members are sharing. In virtual engagements, you could consider online gift certificates or other remote gift ideas. Acknowledging and validating community perspectives is another key practice to ensuring they know that you have listened to their stories and needs. Consider how you consistently express gratitude and appreciation for the input you are receiving. Finally, a significant part of the trust- and relationship-building process is following through on key promises and commitments including: information you said you would share following an engagement event; plans you stated would reflect community input; actions that are being taken as a result of community input; ongoing engagement opportunities you were committed to doing to keep the conversation going; etc. These forms of district follow-through and accountability help create longer-term trust for deeper community partnerships.
Create an accountability mechanism - the kind of accountability that generates trust.

This can start from answering an essential question: Who does the community go to when they don’t feel they’ve been authentically engaged in the development of SIA work?

There isn’t a single right answer. But it builds trust to have a real and meaningful one. Would they go to a known staff member, an administrative leader, a liaison to a board or advisory group? Creating a clear channel to hear the most vital feedback is pivotal to creating real, ongoing, authentic community engagement.

### 3.3 Equity, Anti-racist, and Culturally Sustaining and Responsive Training

Engaging in equity, anti-racist, and/or culturally sustaining and responsive training is a powerful way for districts and eligible charter schools to learn about and address unconscious biases, unexamined assumptions, and internalized and externalized patterns of racism and oppression. ODE will be offering support -- including webinars, trainings, and toolkits (such as the ODE Decision Tools) -- that are rooted in and builds on the SIA Community Engagement Toolkit 2.0 and the framework of robust community engagement. In addition to these supports, consider how to balance the development of in-district/school equity capacity and bringing in external supports. Developing internal capacities (for example, staff who are skilled at holding courageous conversations about race or interrupting patterns of white fragility) allows for long-term change and baseline culture-building. Contracting with external services (for example, equity consultants that can hold retreats and trainings) allows for all staff, including administrators, to participate together. These settings with an outside facilitator can allow for staff to feel safer to take risks and engage vulnerability. Care should be taken to consider what staff should be present: for example, is the space designed for White staff to learn more about White fragility (in which case staff of color could have their own separate space)?

Powerful case studies and recent research suggest that investing in the capacity of the whole system, including families and communities, is needed to support robust family-school partnerships. The Dual Capacity-Building Framework for Family-School Partnerships is one framework and tool that leverages districts and schools to create conditions for both staff and families to deepen their systemic and organizational capabilities (skills + knowledge), connections (networks), cognition (shifts in beliefs and values), and confidence (self efficacy). The main takeaway from this framework: don’t just invest in school, educator and staff capacity; also see the families and communities you serve as powerful collaborators that can be supported. Consider:

- Deepening partnerships with local community-based organizations to leverage the powerful and unique organizing, leadership, and educational strategies from grassroots communities and families.
- Creating regular ways of gathering (e.g., restorative circles) with families and community members to reflect on core and differentiated values (using a tool like The Cultural Iceberg) and share key insights, concerns, and perspectives about educational change.
3.4 Community-Driven Planning

Community-driven planning can take many forms. In a consortium of small districts this might be a small group of volunteers working across many miles. In a larger school district this could be powered by groups that were previously advisory.

A key initial task is to get very clear on what is being invited by whom and how decisions are made and recommendations or plans treated.

Here’s a few potential questions and resources that can support creating the conditions for community-driven planning:

- Work with groups like Oregon Solutions and community-based organizations to facilitate and reach a declaration of cooperation - a foundational agreement on the scope and decision-making of a group of powerful partners. You may have STEM-hubs or EL-hubs who have skill and experience at this kind of process.
- Always design and ask about the “after-action” of any meeting. Ensure that a key person or group is responsible for follow-through with keeping the core promises you’ve made as a partner with the community. That doesn’t mean you make all the decisions - it means you accept a stewardship responsibility to keep the work moving while creating the conditions for the community to lead.
- Integrate ongoing community engagement into budget planning and staffing cycles. Aim for the goal where the community is so well-informed and co-planning that they are anticipating and driving key directions that anticipate school district planning needs.
- Determine what must or could yield to community planning. Name what’s clear in the scope of the group or body.
- Facilitate conditions where different voices, even representing demographically similar communities, can hold and support tension and disagreement with each other.
- Determine a clear resourcing plan that supports the sustainable participation of key community leaders in a way that builds relationships and strengthens effectiveness. This could range from child care to small leadership stipends that honor the level of time, service, and value the community members offer.

ODE is happy to support or consult districts looking to advance strategies that reach this level of community partnership.

During the first SIA application cycle, some districts contracted with community-based organizations to run their community engagement efforts. While this can be one avenue for receiving inputs to support SIA plan development, especially in communities where trust has been previously broken, there is also a tension if this is the only mechanism for seeking input. While a community-based organization may represent a subset of students and families from a particular focal group, it may not represent all of the students and families from that focal group, which may lead to an unanticipated exclusion of some students and families. Districts and eligible charter schools considering contracting with community-based organizations to support engagement should be aware of this tension and consider ways to ensure they are not inadvertently excluding voices from their communities.
SECTION 4: CONNECTING COMMUNITY ENGAGEMENT TO SIA PLANNING AND OVERALL ALIGNMENT

4.1 Community Engagement for 2021-23 SIA Plan Update

As shared in the Supporting Quality Implementation Guidance released in December 2020, building meaningful, authentic, and reciprocal relationships with students, families, and communities is a priority and foundational to the SIA. The SIA requirements for community engagement to inform and support plan updates are not released or waived. This is true in the immediate, as well as for future full strategic planning for SIA plans and budget development. Districts and schools should keep in mind that robust engagement requires application of an intersectional equity lens; following through on deliverables and promises; adapting to current circumstances (like COVID pressures and needs for virtual engagement); and clear awareness of what the current level of trust and relationship is with the community.

For the 2021-23 biennium, grant recipients will need to submit a SIA plan update that details how they plan to adjust or amend their initial three-year plan submitted in the spring of 2019. Recipients are expected to engage with their students, families, staff, and community, with specific attention to their focal group students, as they work on updating their plan and prioritizing which strategies and activities will be implemented in year 2 and 3 based on the preliminary allocations released by ODE.

As part of the 2021-23 SIA plan update submission, which will be submitted between May 1 - June 30, 2021, grant recipients will be required to provide narrative responses to the following questions:

- Describe how you engaged your focal student groups, their families, your staff, and your broader community to inform the SIA plan update for this cycle. How did you build or adjust on your community engagement efforts from last year? Did you engage anyone this year that you didn’t engage with last year?
- Did you use the same equity lens/tool as last year (yes/no)? If no, please upload your new equity lens/tool.
- Summarize how the equity lens/tool was used, by whom, and when it informed the SIA plan adjustment or amendment

Grant recipients will also have the option to submit additional information or artifacts that supported the development of their adjusted or amended SIA plan. This could include input gathered from needs assessments or community engagement completed for High School Success, School Safety and Prevention Services, and/or CTE.

---

3 Preliminary allocation estimates are calculated based on the Governor’s Recommended Budget for the 2021-23 biennium, which projects $778.8M over those two years. The final SIA allocation estimates for each district and eligible charter school will be released in May 2021 in alignment with the May ADM collection and following any adjustments during the current legislative session.
4.2 Navigating Virtual Community Engagement

We recognize that for many schools and districts across the state, community engagement will look different than it did leading up to the initial SIA plan development - and in many cases this will include navigating the virtual space. As your district considers the SIA Community Engagement Spectrum and strategies offered in Section 3 for more robustly engaging with your community, you’ll also need to think about adjustments or pivots you may need to make to accommodate for the virtual setting.

We offer the following examples as ways you may consider engaging in a virtual setting, with the recognition this is not an exhaustive list:

- Set up a regular time to offer informal virtual community hours for families and community members to connect with district or school staff. Ensure that the offered hours are responsive to various work schedules. Select a few questions you plan to ask anyone who comes to the community hours.
- Develop a plan for hosting virtual family-teacher conferences or IEP meetings. Use a portion of the time to ask parents and families a few specific questions about their students' needs and how the district or school should use or prioritize the SIA funds.
- Host a virtual focus group meeting with students and family members from the named focal groups to learn about their experience, the needs they identify, and how they would recommend using the SIA funds. Consider using a platform that allows for small breakout rooms to allow for smaller group conversations and an ability for all attendees to share their experience and ideas. Select a few open-ended questions you’d like to ask attendees, which may include:
  - What is working well in our district for your student(s) and/or family?
  - What is not working in our district for your student(s) and/or family?
  - What changes and/or investments should we make to better support your student(s) and/or family?
- Facilitate a world cafe virtual workshop, where participants rotate through small group discussions in breakout rooms. Ask for the community’s input for topic areas in advance of the workshop.
- Establish a standing advisory group representative of your community that will regularly meet virtually over the course of the school year to provide input., make recommendations, and share decision-making responsibility.
4.3 Community Engagement Beyond 2021-23

Robust engagement with your community requires a deep focus and commitment to applying an equity lens or tool to inform planning engagement and developing the SIA plan and budget. Districts and schools may find through their community engagement that students and families from different focal groups and/or community-based organizations may raise different, and potentially even competing, priorities for spending SIA funds. Further, there is a possibility given the SIA allocation amount, districts and schools will not be able to implement all of the activities offered by the community.

As districts and schools move through the various SIA processes and application cycles, there are several times prescribed in the statute when they are required to post items to the website, present them at an open meeting with the opportunity for public comment, and have them approved by the governing board. In a robust engagement process, these shouldn’t be the only times when you connect with your students, families, staff, and community.

To support a robust engagement process and good stewardship of the SIA funding in the process of updating plans over the bienniums, districts should ensure they are sharing the following with their communities:

- An update on what has happened since the last time they connected (i.e. implementation progress, unanticipated adjustments such as funding changes)
- An update on new learnings and priorities raised from community engagement
- Any complexities in adjusting and developing new plans (i.e. tensions in priorities, reduction in funding streams outside of SIA)
- Next steps or processes to continue to receive SIA funding
Here to Support

Your questions are welcome and ODE staff will be as responsive as possible to further support SSA and SIA implementation. If you have a question, email SIAdvice@state.or.us. Please make use of the resources provided here, your ESD SSA liaisons, peer districts, and the culturally specific and/or school supporting organizations based in your community along with your own judgment and skill-building.
