

Public Transparency

ODE is working to provide timely, transparent, and accessible financial and academic data so that communities, districts, and state leaders have clear sightlines into funding and outcomes.

ODE will move from a static, inefficient data system to one where:

- **Data is updated quickly**, so people can see the most recent information without delay.
- **Data is organized over time**, helping users spot patterns and see long-term trends.
- **Customized views are offered** for different people, whether you're a parent looking at your child's school, a neighbor checking on your community, or a lawmaker comparing schools across the state.

Key Milestones

Summer 2025 - Winter 2026

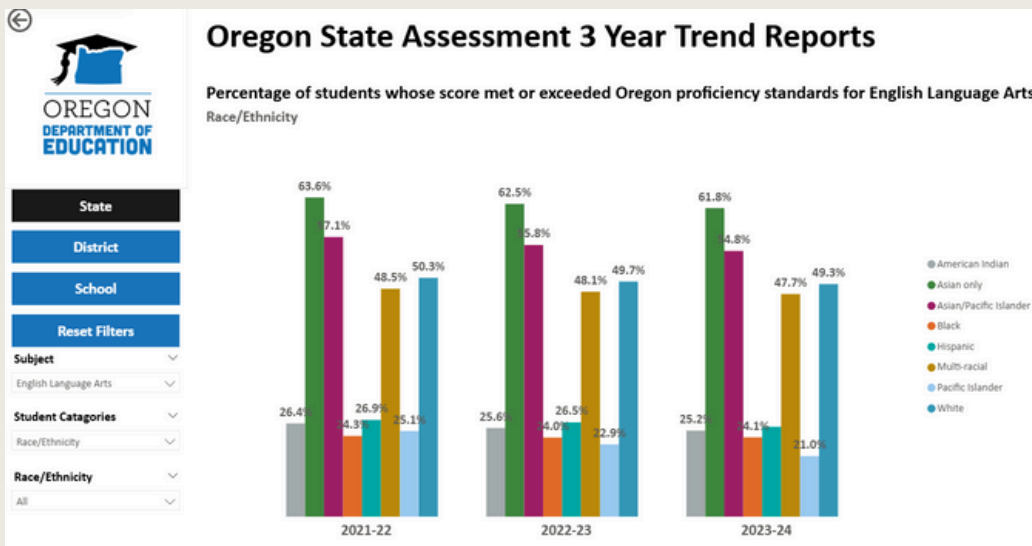

- Centralize and consolidate existing ODE reports and data to make them easier to locate and access.

Summer 2025 - Fall 2027

- Design and implement internal policies that guide the development, publication, and use of transparent, accessible data tools and that ensure consistent, equitable communication of education data.

Summer 2025 - Fall 2027

- Develop and maintain an academic and financial data dashboard that integrates key educational performance metrics and financial data.
- Develop and launch a dynamic public dashboard with state and local metrics and visual indicators for progress across metrics, including disaggregated student group performance, and the status of supports provided through the Continuum of Supports.

An example of an ODE future state data visualization that is interactive and intuitive.
