

## DTC Webinar: Q&A Session – February 12, 2020

Q: Have any other districts had an issue with TAs accidentally giving the ELPA Screener instead of the Summative?

- There have been improprieties for the ELPA Screener where a student was given a Temp ID and tested when they had an SSID already and should have taken the ELPA Summative. We've also had occurrences where students are misidentified and are given the screener when English is their preferred language.
- One district has recently reported unexpected behavior in which a TA mistakenly enables both the ELPA Screener and Summative, and students are presented with both tests regardless of their EL flag setting. We are investigating.

Q: Are the items today going to be in the AA update as well? I am out on leave, but want to make sure I update staff.

- The PowerPoint and a Q&A document will be posted to ODE's [Test Administration Resources](#) webpage. A DTC listserv communication will also be sent out once this information has been posted and is available for anyone to review.
