Centralized Reporting System Webinars
Q&A

Mar 12, 2024

Q1. Can you review how you navigate to the Writing Dimensions scores?

A: The Writing Dimensions can be accessed by expanding the Writing Dimensions colored vertical bar (aka the accordion, in the far-right column) in the aggregate ELA reports.

Q2. Do ISRs and Student Data Files print immediately?

A: No, ISRs and Student Data File requests are sent to your Secure File Center. From there you may download and print them. Reports from CRS often contain Personally Identifiable Information (names and SSIDs) that need to be stored securely if printed, then shredded when discarded. Please note that Individual Student Reports (ISRs) from CRS are Unofficial. Official ISRs can be accessed in ODE's Secure Assessment Reports.

Q3. How am I notified about receiving a Crisis Alert?

A: You will receive an auto-generated email into your email inbox notifying you when any file is posted to your Secure File Center, including Crisis Alerts.

Q4. I don't see the Cross-Sectional Reports option in my Features & Tools Menu.

A: You will need to be on the aggregate reports page for a specific grade level for a specific test to see the Cross-Sectional Reports option. Cross-Sectional Reports are what ODE has historically called "Target Reports." These reports are valuable for understanding how your system is serving students because you can see trends in target data.

Q5. Where can I create Rosters?

A: Users may create Rosters in CRS or in TIDE.

Q6. When creating Rosters, is there a filter by teacher option, or do I have to click on the students one-by-one?

A: There is not a filter by teacher option, however, if a user has a list of SSIDs for a given teacher, the roster can be created via a quick upload. The process for uploading Rosters is documented in the [TIDE User Guide](#).
