

## **TIDE Webinar: Q&A – November 10, 2020**

Q: Would creating a test window in TIDE keep them from taking all assessments, Summative or Interim?

- The DTC would need to set a test window for each test that they want to control with test windows. Test windows can be set for summative or interim tests.

Q: Can an STC override a test window set by the DTC?

- No, the STC is not able to override a test window set by the DTC. The DTC would need to modify the test window if changes needed to be made.

Q: When a district/school sets a local test window, does it apply to Interim tests as well?

- No, the interim tests are listed separately. You can set a test window for interims by selecting the interim test names, and a test window for summatives by selecting summative test names.
