

Match to Common Core					
	Assessment Feature	Overview of how it signifies that the assessment is matched to Common Core	Notes	Additional evidence needed	
	Six Steps for Evidence Centered Design	Shows the process flow of how developers moved from the Common Core Standards to developing specific items.			
	Content Specifications	Establishes claims, targets and sufficient relevant evidence needed to demonstrate knowledge and skills; maps targets to Common Core Standards.			
	Summative Assessment Blueprints	Reflects number and distribution of items by grade bands, establishing some prioritization of Common Core standards.			

	Assessment Feature	Overview of how it signifies that the assessment is matched to Common Core	Notes	Additional evidence needed	
	Item and Task Specifications	For each target at each grade level, guides item development by revealing allowable item types, models for each type, and the rubrics for consistently scoring responses.			
	Item Types	Differing item formats to assess the depth and breadth of the standards at differing depths of knowledge.			
	Performance Task	Assessment event where students create a product in response to a real-world scenario or problem; assesses multiple standards and many that are the most cognitively complex.
