Introduction to the User Guide

This user guide supports Test Administrators (TAs) who manage testing for students participating in the Oregon Statewide Assessment System sample tests and operational tests.

Organization of the User Guide

The guide includes the following sections:

- How TAs Proctor Test Sessions in the TA Site
- How Students Sign in to the Student Testing Site and Complete Tests

There is also an alphabetized Appendix with additional information and instructions about the TA Site, the Secure Browser, and more.

Key Changes

The list below describes key changes to the document for the 2020-2021 school year:

- The TA Test Selection window is redesigned. Selected tests are now displayed on the right side of the window, and users can filter tests by grade or subject and search by test names. For more information, see the section How to Select Tests and Start a Test Session.

- The TA Site has a new in-built screensaver to hide sensitive student information from view during test sessions. For more information, see the section How to Enable Screensaver Mode.

- Dictation, or Speech-to-Text, is now available as an embedded accommodation for students who need it based on their IEP or 504 plan. For more information, see the section How to Use the Dictation Tool.

- The following tools are enhanced:
  - Text-to-Speech: Text-to-Speech now allows students to listen to their written responses to constructed-response items.
  - Global Notes and Item Notepad: Advanced editing features are available. The text entered in this tool can be copied and pasted into text response areas.
  - Line Reader: All content except for the line in focus is grayed out for greater emphasis.
  - Strikethrough: You can strikethrough multiple lines of text, such as an answer option spanning more than a line, as well as graphics.

- Smarter Balanced ELA & Math Interim Assessments are available statewide for the 2020-2021 school year.
Understanding the Online Testing System’s Sites

The Online Testing System delivers Oregon’s online tests and consists of sample sites and operational testing sites. The sample sites function identically to the operational testing sites. However, the tests that are available in the sample and operational sites are different. Tests administered in the TA Interface Training Site are for practice whereas the tests provided in the TA Interface are operational and students’ scores will be official.

- **Sample Test Sites**
  - **TA Interface Training Site:** Allows TAs to practice administering tests.
  - **Student Interface Training Site:** Allows students to practice taking tests online and using test tools. Students can log in to the testing site with their name and ID or as guests. They can either take proctored tests in sessions created by TAs in the TA Interface Training Site or they can take non-proctored tests.

- **Operational Testing Sites**
  - **TA Interface:** Allows TAs to administer operational tests.
  - **Student Testing Site:** Allows students to take operational tests.

Throughout the rest of this user guide, “TA Site” refers to both the TA Interface and TA Interface Training Site.
How TAs Proctor Test Sessions in the TA Site

Administering tests in the Online Testing System is a straightforward process and the basic workflow is as follows:

1. The TA selects tests and starts a test session in the TA Site.
2. Students sign in to the Student Testing Site and request approval for tests.
3. The TA reviews students’ requests and approves them for testing.
4. Students complete and submit their tests.
5. The TA stops the test session and logs out.

This section describes how TAs perform the following tasks within the TA Site (see Figure 1) to successfully administer online tests:

- How to Select Tests and Start a Test Session
- How to Approve Students for Testing
- How to Monitor an Ongoing Test Session

Figure 1. TA Site During an Ongoing Test Session

For information about the testing process from a student’s perspective, see the section How Students Sign in to the Student Testing Site and Complete Tests.
How to Select Tests and Start a Test Session

The first step in administering online tests is to select the tests that you wish to administer and start a test session.

Please note that only the tests that you select will be available to students who join your session. You may have only one session open at a time. You cannot reopen closed sessions, but students can resume a test in a new session.

How to Create a New Test Session

1. Log in to the TA Site. The Test Selection window (see Figure 2) opens automatically. If the Test Selection window is not open, select Select Tests in the upper-right corner of the TA Site.

   Figure 2. Test Selection Window: Test Categories

2. From the list of color-coded test categories, select the test category from which you wish to include tests. This will display the tests or test groups available for that test category (see Figure 3).

   Figure 3. Test Selection Window: Test Categories
3. **Optional**: Expand a test subgroup to view the constituent tests. All test groups and sub-groups appear collapsed by default and you may have to expand the test group to view individual tests.

   - To expand a test group, select + (or Expand All).
   
   - To collapse an expanded test group, select - (or Collapse All).
   
   - To expand or collapse all the groups within a test category simultaneously, select .

4. To select the tests you wish to administer, do one of the following:

   - To select individual tests, mark the checkbox for each test you want to include.
   
   - To select all the tests in a test group, mark the checkbox for that group.

Once selected, tests are displayed under their respective test categories in the right-hand side panel of the **Test Selection** window (see Figure 3). If viewing on a smaller screen, the test selection count is displayed at the bottom of the **Test Selection** window (see Figure 4). To expand the selected tests section, select .
5. If a test alert message appears when selecting a test, review the message. Then, select **OK** to close the pop-up window and proceed as necessary. Alert messages may appear when

- Adding summative or high-stakes tests in a session.

6. **Optional:** If you need to remove selected tests, do one of the following:

- To remove an individual test, select \( \times \) for each test you want to remove.
- To remove all the selected tests, select **Clear All.**

7. To add tests from a different test category, do the following:

   a. Select **Back** at the bottom of the **Test Selection** window to return to the test categories view (see Figure 2).

   b. Repeat steps 2–6 to select the necessary tests.

8. **Optional:** When adding tests to your session, you may filter available tests based on the grade level and subject associated with the tests. To filter tests:

   a. Select **Add Filter**. The filter panel appears.
b. Expand the available filter categories and check the necessary grades and subjects that you wish to filter by. The selected filters are listed on top (see Figure 6).

![Figure 6. Filter Selections](image)

- You can remove a selected filter by selecting ✗ for the applicable filter.

c. Select **Apply Filter(s)** to apply your selected filters. The test list updates to display the tests that match your filter criteria.

9. **Optional:** You can also search for specific tests by their labels. To search for a test:

   a. Select 🔍 in the upper-right corner to bring up the search panel (see Figure 7).

![Figure 7. Test Selection Window: Search Panel](image)

   b. In the **Search Term** field, enter the full or partial test label and select **Go**. The tests matching the entered label will be displayed. Note, the search term must be at least three characters long.
c. To close the search panel, select **Close** at the bottom of the panel.

10. Once the required tests have been selected, select **Start Session**. The exact label for this button may vary depending on whether you are starting a sample or operational session. The button becomes active after you have selected a test.

11. If the **Session Attributes** window (see Figure 8) appears, select attributes for the session from the available drop-down lists and select **OK**. This window only appears after selecting Interim tests.

   – The **Test Reason** attribute categorizes the test opportunities in your session for reporting purposes.

![Figure 8. Session Attributes Window](image)

12. The Session ID appears on the TA Site (see Figure 9). Provide the Session ID to your students. Please remember to write down the Session ID in case you accidentally close the browser window and need to return to the active test session.

![Figure 9. Test Session ID](image)
How to Add Tests to an Active Test Session

If necessary, you can add additional tests to an ongoing test session. While you can add tests to an active test session, you cannot remove tests from an active test session.

1. In the upper-right corner of the TA Site (see Figure 1), select Select Tests. The Test Selection window (see Figure 10) opens to the page that you last viewed and shows the tests that are currently active in the session.

2. Mark the checkboxes of the tests that you wish to add to the session following the instructions in the How to Create a New Test Session section. Tests that are already active in the session or that cannot be added to the session are grayed out. If the active session includes a stand-alone test, the test categories themselves are disabled.

3. Optional: To remove a selected test:
   
   – To remove an individual test, select for each test you want to remove. The button is only displayed for tests that are not yet active in the session.

   – To remove all the selected tests, select Clear All. All selected tests that are not yet active will be removed.
4. Select **Add to Session**. The exact label for this button may vary depending on whether you are starting a sample or operational session. The button becomes active after you have selected at least one new test.

5. In the confirmation message that appears, click **Yes**.

6. **Optional**: If the **Session Attributes** window appears, it displays the test reason or other attributes you selected when you started the session. This window only appears after adding Interim tests.

   - To select a new test reason, select the test reason and click **OK**. The test reason changes for every test opportunity in the session. However, any test opportunities that were completed before you changed the test reason will be submitted with the original test reason selected for the session.

**How to Approve Students for Testing**

After students sign in to the Student Testing Site and select tests, you must verify that their settings and accommodations are correct before approving them for testing. If a test contains segments requiring TA approval, you must also follow the same procedure when approving students’ entry to test segments.

1. Select **Approvals** next to the Session ID (see **Figure 1**). The **Approvals and Student Test Settings** window (see **Figure 11**) appears displaying a list of students grouped by test (and test segment, if applicable). Note, the ** Approvals** button becomes active when students are awaiting approval and shows you how many students are awaiting approval. The ** Approvals** notification updates regularly, but you can also select **Refresh** in the upper-right corner to update it manually.

**Figure 11. Approvals and Student Test Settings Window**
1. To check a student’s test settings and accommodations, select 📈 for that student. The Test Settings window appears (see Figure 12) displaying the student’s test settings grouped by their area of need.

![Figure 12. Test Settings Window for a Selected Student](image)

a. If any settings are incorrect, update them as required. Students should not begin testing until their settings are correct.

- Editable settings must be updated in this window, while read-only settings must be updated in TIDE.

**Alert:** When approving students for testing, you must update the editable settings in this window, rather than in TIDE. You must update the read-only settings in TIDE. Please note that the American Sign Language, Closed Captioning, Text-to-Speech, Dictation, Permissive Mode, ELPA Domain Exemptions, and Glossary must be set in TIDE and may not be edited via the TA Interface. Domain Exemptions can be set by district level users (DTCs and DLUs) only.

You can modify most test settings after a student pauses the test. However, you cannot modify the following settings once a student begins a given test opportunity:

- Presentation (including Spanish and Braille)
- Foreign language/illustration glossaries
- ELPA Domain Exemptions

If any of these test settings are incorrect when a student first selects a test, you must deny the student form testing and submit a Test Impropriety Initial Report Form to ODE.
b. Do one of the following:
   - To confirm the settings, select Set. You must still approve the student for testing (see step 4).
   - To confirm the settings and approve the student, select Set & Approve.
   - To return to the Approvals and Student Test Settings window without confirming settings, select Cancel.

2. Repeat step 1 for each student in the Approvals and Student Test Settings list. Since the Approvals and Student Test Settings window does not automatically refresh, select Refresh at the top of the window to update the list of students awaiting approval.

3. If you need to deny a student access to testing, do the following (otherwise skip to step 4):
   a. Select X for that student.
   b. Optional: In the window that appears, enter a brief reason for denying the student.
   c. Select Deny. The student receives a message explaining the reason for the denial and is logged out. The student can still request access to the test again.

4. If you wish to approve students directly from the Approvals and Student Test Settings window, do the following:
   - To approve individual students, select ✔️ for each student.
   - To approve all students for a given test or segment, select Approve All Students for that test or segment.

How to Monitor an Ongoing Test Session

After you approve students for testing, you can monitor the testing progress for each student logged in to your session, approve a student’s print request, and pause a student’s test if necessary.

How to Monitor Students’ Test Progress

You can monitor the testing progress for each student logged in to your session from the table(s) displayed on the TA Site.

At the start of the test, all the students in the session are listed in the Tests without issues table. If the Online Testing System detects that a student requires assistance, such as a student has a pending print request, or a student’s test has been paused due to an environment security breach or due to the launch of a forbidden application, the Tests with potential issues table appears at the top listing the students who need intervention.
The table(s) refresh at regular intervals, but you can also refresh the table(s) manually by selecting in the upper-right corner of the TA Site. You can also sort the tables by a given column by selecting in that column’s header.

**Figure 13. Table(s) for Monitoring Students’ Test Progress**

![Sample Test Session](image)

Table(s) for Monitoring Students’ Test Progress

<table>
<thead>
<tr>
<th>Column</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Student Information</td>
<td>The name and SSID of the student in the session.</td>
</tr>
<tr>
<td>Opp #</td>
<td>Opportunity number for the student’s selected test.</td>
</tr>
<tr>
<td>Test</td>
<td>Name of the test the student selected. For segmented tests, this column also displays the name of the test segment that the student is currently testing.</td>
</tr>
<tr>
<td>Progress</td>
<td>Indicates the student’s test progress. It may display how many questions the student has answered out of the total number of test questions.</td>
</tr>
<tr>
<td>Test Status</td>
<td>Current status for each student in the session. For more information about the statuses in this column, see Table 2. If the Online Testing System detects that a student may be experiencing technical difficulties or requires assistance, such as the student may be experiencing connection issues, has a pending print request, or has paused their test, a more info icon is displayed in this column for the student. When you hover over the icon, a message is displayed providing details about the issue.</td>
</tr>
<tr>
<td>Test Settings</td>
<td>Displays one of the following:</td>
</tr>
<tr>
<td></td>
<td>- <strong>Standard</strong>: Default test settings are applied for this test opportunity.</td>
</tr>
<tr>
<td></td>
<td>- <strong>Custom</strong>: One or more of the student’s test settings or accommodations differ from the default settings.</td>
</tr>
</tbody>
</table>
How TAs Proctor Test Sessions in the TA Site

To view the student’s settings for the current test opportunity, select 🕵️‍♂️.

<table>
<thead>
<tr>
<th>Column</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Actions</td>
<td>Allows you to perform any available actions for an individual student’s test. The ⏳️ button in this column allows you to pause the student’s test. If a student pauses their test, a more info icon (<em>more info</em>) is displayed in the Test Status column that provides information about how the test became paused. However, the more info icon is not displayed when the TA pauses a student’s test. A 📐 button appears in this column when the student requests a printout of test material. For information on how to approve students’ print requests, see the section How to Approve a Student’s Print Request.</td>
</tr>
</tbody>
</table>

Table 2 describes the codes in the Test Status column of the table(s) for monitoring students’ test progress.

### Table 2. Student Testing Statuses

<table>
<thead>
<tr>
<th>Column</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Approved</td>
<td>You approved the student, but the student did not yet start or resume the test.</td>
</tr>
<tr>
<td>Started</td>
<td>Student started the test and is actively testing.</td>
</tr>
<tr>
<td>Review</td>
<td>Student visited all questions and is currently reviewing answers before completing the test.</td>
</tr>
<tr>
<td>Completed</td>
<td>Student submitted the test. The student can take no additional action at this point.</td>
</tr>
<tr>
<td>Submitted</td>
<td>Test was submitted for quality assurance review and validation.</td>
</tr>
<tr>
<td>Reported</td>
<td>Test passed quality assurance and is undergoing further processing.</td>
</tr>
<tr>
<td>Paused*</td>
<td>Student’s test is paused. The time listed indicates how long the test has been paused.</td>
</tr>
<tr>
<td>Expired*</td>
<td>Test was not completed by the end of the testing window and the opportunity expired.</td>
</tr>
<tr>
<td>Pending*</td>
<td>Student is awaiting approval for a new test opportunity.</td>
</tr>
<tr>
<td>Suspended*</td>
<td>Student is awaiting approval to resume a test opportunity.</td>
</tr>
</tbody>
</table>

*Appears when the student is not actively testing. The student’s row grays out in such cases.
How to Approve a Student’s Print Request

Students using the print-on-request tool can request printouts of test passages and questions. You must view and approve these print requests. When students send print requests, the request notification appears in the Tests with potential issues table.

You can also view a list of every print request you approved during the current session. For more information, see Print Approved Requests Information.

1. Select 🗄️ (see Figure 14) in the Actions column of the Tests with potential issues table for a student. The request notification appears for students who have sent print requests.

   ![Figure 14. Print Request Notification](image)

2. Review the request in the Student Print Request window and do one of the following:

   – To approve the request, select ✔️. A cover sheet appears in a new browser window.

   ![Figure 15. Student Print Request Window](image)

   – To deny the request, select ✗. In the window that appears, enter a brief reason for denying the request and select Deny. Do not proceed to step 3.

3. In the window displaying the cover sheet, select Print to open the printer dialog box.

4. Select OK to print the requested test elements.
How to Pause a Student’s Test

You can pause a student’s test if necessary.

1. In the Actions column of the table(s) for monitoring students’ test progress, select ⬕ for the student whose test you wish to pause.

2. Select Yes to confirm. The Online Testing System logs the student out.

How to Enable Screensaver Mode

Since the student test progress tables in the TA Site often contain sensitive student information, such as student IDs, the TA Site consists of an in-built screensaver to hide the data from view. The screensaver will automatically turn on if you are not active in the TA Site for 3 minutes. You may also manually turn on the screensaver.

1. To turn on screensaver mode manually, select ⬕ in the upper-right corner of the Session ID (see Figure 1). A masking screen appears over the TA Site (see Figure 16). The screensaver displays the Session ID. It also displays notifications if students are awaiting approval, there are pending print requests, or if students require other interventions.

   Figure 16. Screensaver Mode Enabled

2. To turn off the screensaver mode, select ⬕ in the upper-right corner of the Session ID on the screensaver window. The button is only displayed if the screensaver mode is not set to auto-disable upon activity. If the screensaver mode is set to auto-disable upon activity, the screensaver will automatically turn off if any mouse or keyboard activity is detected. It will also turn off automatically if the test session times out due to TA or student inactivity.

How to Stop a Test Session

When students finish testing, you should stop the test session. Stopping a session automatically logs out all the students in the session and pauses their tests.

Once you stop a test session, you cannot resume it. To resume testing students, you must start a new session. Please note, the Online Testing System automatically logs you out after 20 minutes of both user and student inactivity in the session. This action automatically stops the test session.
1. To stop a test session, select \( \text{STOP} \) next to the Session ID (see Figure 1).

2. Next, select OK in the confirmation message that appears. The test session stops.

**How to Log Out of the TA Site**

You should log out of the TA Site only after stopping a test session to prevent stopping a test session that is in progress. Please note that navigating away from the TA Site also logs you out. If you need to access another application while administering tests, open it in a separate browser window.

1. Select \( \text{Log Out} \) in the upper-right corner of the TA Site (see Figure 1). A warning message appears.

2. In the warning message, select Log Out. The OSAS Portal appears.
How Students Sign in to the Student Testing Site and Complete Tests

This section describes the student sign-in process for the Student Testing Site that students follow when starting a new test or resuming a paused test. It also describes how students can view stimuli, respond to questions, pause a test, review previously answered questions, and submit a test.

How Students Sign in and Select Tests

When testing, students must sign in to the appropriate testing site. For sessions created in the TA Interface, students sign in to the Student Testing Site on the Secure Browser or Take a Test app.

Students may also take sample tests in the Student Interface Training Site to familiarize themselves with the online testing process. Aside from the sign-in process, the Student Interface Training Site has the same appearance and functionality as the Student Testing Site. For information on how students sign in to the Student Interface Training Site, see Sample Test Site Student Sign-in Process.

How to Sign in to the Secure Browser or Take a Test App

1. Launch the Secure Browser or Take a Test app on the student’s testing device. The Student Sign-In page appears.

2. Next, students enter the following information:

   a. In the First Name and SSID fields, students enter their first name and SSID as they appear in TIDE.

   b. In the Session ID field, students enter the Session ID as it appears on the TA Site. The first part of the three-part session ID that indicates whether a student is on the Student Testing Site or the Student Interface Training Site is pre-filled.

Figure 17. Student Testing Site Student Sign-In Page
3. *Optional:* Students can modify test settings (such as background and text color) for the sign-in process, which persist until you set the actual test settings during the TA approval process:

   a. Students select the cog wheel \(\text{}\) in the upper-right corner of the *Student Sign-In* page to open the *Settings* page.

   b. Next, they select their preferred options from the available drop-down lists and select **OK**.

   ![Figure 18. Settings Page](img)

4. *Optional:* Students can read or listen to page directions, such as how to sign in to the Student Testing Site, if available:

   a. Students select \(+\) to expand the Text-To-Speech card (see Figure 19), which appears on the *Student Sign-In* page and all consecutive pages prior to the test item pages. The Text-To-Speech card expands to display instructions pertaining to the page (see Figure 20).

   ![Figure 19. Text-to-Speech Card](img)

   b. Students can read the text or select \(\text{}\) to hear the instructions.
5. Students select **Sign In**. The *Is This You?* page appears.

### How to Verify Student Information

After signing in to the Student Testing Site, students must verify their personal information on the *Is This You?* page.

- If all the information on the *Is This You?* page is correct, the student selects **Yes** to proceed.
- If any of the information is incorrect, the student must select **No**.

You must notify the appropriate school personnel that the student’s information is incorrect. Incorrect student demographic information must be updated before the student begins testing.

### How to Select a Test

Students can select their tests from the *Your Tests* page that appears after students verify their personal information. The *Your Tests* page displays all the tests that a student is eligible to take. Students can only select tests that are included in the session and still need to be completed.

1. From the *Your Tests Page* that lists a student’s eligible tests in color-coded categories, the student selects the name of the test.

   - If a student’s required test is inactive or not displayed, the student should log out. You should verify the test session includes the correct tests and add additional tests, if necessary.
2. The student’s request is sent to the TA for approval and the student is taken to the **Waiting for Approval** page. After you approve the student for testing, the student can proceed to the next step:

- If starting a new test, a student must complete the login process before beginning testing.
- If resuming a paused test, the student will be directly taken to the test page where the student stopped the test based on the applicable pause rules.

Please note that once the TA approves the test, the test content will be displayed to the student in the language specified for the student’s test. This includes the instructions on the remaining login pages, the button names, tool names, context menu options, tutorials and even the item/stimuli content where applicable. For example, if the language for a student’s Grade 5 mathematics test is set to Spanish, the test content will be displayed in Spanish.

**How to Verify Test Setting Information**

Once students have been approved for testing, they can verify their test settings from the **Your Test Settings** page. At this point, the student’s actual test settings override any settings selected earlier in the sign-in process.
How Students Sign in to the Student Testing Site and Complete Tests

- If the settings are correct, the student selects **Looks Good** to continue.
- If the settings are incorrect, the student should select **Back to Login** to log out of the Student Testing Site.

After you correct the student’s test settings, the student must sign in and request approval again.

![Figure 24. Your Test Settings Page](image)

**How to Check Student Device Functionality**

Depending on the test content and the specified test settings, students may need to verify that their testing device is functioning properly from the **Audio/Video Checks** page. If a test does not require functionality checks, this page is skipped.

1. From the **Audio/Video Checks** page that displays each required functionality check in its own panel, the student verifies each functionality as explained below.

2. Once all functionality checks have been verified, the student selects **Continue** at the bottom of the page to proceed to the **Instructions and Help** page.
How to Check Text-To-Speech Functionality

The *Text-to-Speech Sound Check* panel appears if a student has the text-to-speech (TTS) setting. Students can only use TTS within the Secure Browser, a supported Chrome or Firefox browser, or the Take a Test app.

If TTS does not work, students should log out. You can work with students to adjust their audio or headset settings or move them to another device.

- From the *Text-to-Speech Sound Check* panel, students select [ ] and listen to the audio.
  - If the voice is clearly audible, students select *I heard the voice*. A green check appears at the upper-right corner of the panel and students can proceed to the next functionality check.

  - If the voice is not clearly audible, students adjust the settings using the sliders and select [ ] to listen to the audio again.
If students still cannot hear the voice clearly, they select **I did not hear the voice** to open the **Audio Check** panel.

- Students can select **Try Again** to return to the **Text-to-Speech Sound Check** panel and retry.

Figure 27. Audio Check Panel

- Students can select **Continue** to skip verifying the text-to-speech functionality. Students can also do this from the **Text-to-Speech Sound Check** panel by selecting **Skip TTS Check**.

### How to Check Audio Playback Functionality

The **Audio Playback Check** panel appears for tests with listening questions and allows students to verify that they can hear the sample audio.

If the audio does not work, students should log out. You should troubleshoot the device and headphones or move the student to another device with working audio.

- From the **Audio Playback Check** panel, students select **Play** and listen to the audio.
  - If the sound is clearly audible, students select **I heard the sound**. A green check appears at the upper-right corner of the panel and students can proceed to the next functionality check.

Figure 28. Audio Playback Check Panel

- If the sound is not clearly audible, students select **I did not hear the sound** to open the **Sound Check: Audio Problem** panel.

- Students can select **Try Again** to return to the **Audio Playback Check** panel and retry.
How Students Sign in to the Student Testing Site and Complete Tests

How to Check Recording Device Functionality

The *Recording Device Check* panel appears for tests with questions that require students to record audio responses. On this panel, students record their voice and verify that they can hear the recorded audio.

If the recording device does not work, students should log out. You should troubleshoot the recording device or set up a new recording device.

1. From the *Recording Device Check* panel, students select 🎤 to begin recording their voice.
2. Students speak into their recording device, and then select 🎤 to stop recording.
3. Next, students select 🎧 to listen to their recorded audio:

   ![Figure 29. Recording Device Check Panel](image)

   – If the recorded audio is clearly audible, students select *I heard my recording*. A green check appears at the upper-right corner of the panel and students can proceed to the next functionality check.

   – If the recorded audio is not clearly audible, they select *I did not hear my recording* to open the *Problem Recording Audio* panel.

   - Students can select *Try Again* to return to the *Recording Device Check* panel and retry.

   - Students can select *Select New Recording Device* (which only appears for students testing on computers or tablets with multiple recording devices) to open the *Recording Input Device Selection* panel and select a different recording device.
How to Check Sound and Video Playback Functionality

The Sound and Video Playback Check panel appears for tests with video content and allows students to verify that they can view the sample video and hear its associated sound.

If the video or audio does not work, students should log out. You should troubleshoot the device and headphones or move the student to another device with working audio and video.

- From the Sound and Video Playback Check panel, students select \( \text{Play} \) to play the video and sound.
  - If the video can be played and the sound is clearly audible, students select \( I \text{ could play the video and sound} \). A green check appears at the upper-right corner of the panel and students can proceed to the next functionality check.

Figure 30. Sound and Video Playback Check Panel

- If students are not able to play the video or hear the sound, students select \( I \text{ could not play the video or sound} \) to open the Video Playback Problem panel.
  - Students can select Try Again to return to the Sound and Video Playback Check panel.

How to Check Video Playback Functionality

The Video Playback Check panel appears for tests with video content and allows students to verify that they can view the sample video.

If the video does not work, students should log out. You should troubleshoot the device or move the student to another device with working video.

- From the Video Playback Check panel, students select \( \text{Play} \) to play the video.
  - If the video can be played, students select \( I \text{ could play the video} \). A green check appears at the upper-right corner of the panel and students can proceed to the next functionality check.

How to View Instructions and Begin Testing

The Instructions and Help page is the last step of the sign-in process. Students may review this page to understand how to navigate the test and use test tools as well as review their test settings. This page may also contain additional test instructions or acknowledgements that a student needs to review in order to proceed.

1. Optional: To review their test settings, students select View Test Settings. To close the window, students select OK.

2. To review additional test information or acknowledgements, if available, students review the information on the page and proceed as instructed.

3. Optional: To view the help guide, students select View Help Guide. To close the window, students select Back.

4. To start the test, students select Begin Test Now.

How Students Navigate the Student Testing Site

A test page can include the following sections:

- The Global Menu section displays the global navigation and tool buttons. It also includes the Items menu, test information, help button, pause button, and system settings button.
- The Stimulus section, which appears only for questions associated with a stimulus, contains the stimulus content, context menu, and the expand passage and item buttons.
- The Question section contains one or more test questions (also known as “items”). Each question includes a number, context menu, stem, and response area.

Figure 33: Sample Test Layout

The following sections provide details about how to navigate the Student Testing Site.

How to Navigate between Items

- Some test pages may have only one question and others may have more or may consist of multiple parts that students must answer.
  - After students respond to all the questions on a page, they select Next in the upper-left corner to proceed to the next page.
  - To navigate to a previous question in a test, students select Back.

Figure 34. Navigation Buttons
How Students Sign in to the Student Testing Site and Complete Tests

- When multiple items are grouped with a stimulus, the items are tabbed for individual viewing. Students select the tabs in the upper-right corner to proceed to the corresponding question.

  Figure 35. Paginated Items

  - The navigation tabs may also include a stimulus icon that students can select to view the stimulus associated with the grouped questions.

- To jump directly to an item, students can select an item number from the items drop-down that appears when students select the Items menu.
  - If an item has been marked for review, is displayed next to the item.
  - If an item has been skipped or not answered, is displayed next to the item.
  - Items that students cannot navigate to are grayed out.

  Figure 36. Items Drop-Down

How to View Stimuli

When a test question is associated with a stimulus, students should review that stimulus before responding to the question. A stimulus is a reading passage or other testing material (such as a video or graphic) that students review in order to answer associated questions.

- Videos: When the stimulus is a video, students can use standard video features to control the playback.
  - To play a video, select in the lower-left corner.
  - To jump to a different point in the video, drag the slider to the required location.
  - To adjust the speed at which the video plays, select and then select the required speed from the menu that appears.
How Students Sign in to the Student Testing Site and Complete Tests

Figure 37. Video Playback Features

- To mute or unmute the video, select in the lower-right corner.

- To expand the video to full screen mode, select in the lower-right corner. To exit full screen mode, select again.

- Slideshows: When the stimulus is a slideshow, students can navigate between the slides and play associated audio, if available.
  - To move between the slides of a slideshow, select  and .

  - To play the audio for the current slide, select . To pause the audio, select .

Figure 38. Sample Slideshow
How to Respond to Test Questions

The items presented in TDS are of various types and students may need to respond to them differently. Students can use the Student Interface Training Site to familiarize themselves with the question types that may appear on tests.

All responses are saved automatically. Students can also manually save their responses to questions by selecting Save in the upper-left corner.

Test questions may require students to do any of the following tasks:

- Select one or more choices from a list of answer options.
- Use an on-screen keypad to generate an answer. Students can select \[\text{or}\] in the answer space to open the keypad.
- Select graphic objects or text excerpts.
- Place points, lines, or bars on a graph.
- Drag and drop text or graphic objects.
- Enter text in a text box or table.
- Match answer options together.
- Modify a highlighted word or phrase in a reading selection.
- Enter input parameters to run an on-screen simulation.
- Expand categories and select options within them.

How to Pause Tests

Students can pause the test at any time. Pausing a test logs the student out. To resume testing, students must repeat the sign-in process.

- To pause a test, students select Pause in the global menu and then select Yes in the confirmation message that appears.

If students are testing on Chromebooks, please ensure that they pause the test before closing the lid of the Chromebook. If the lid is closed before the test pauses, whoever opens the Chromebook next will be able to see the last question that the student was viewing (and any response they entered).

How Students Use Test Tools

A number of testing tools are available for students in TDS. Some tools are available for all tests, while others are only available for a particular subject, accommodation, or type of question. There are primarily two types of test tools available:
How Students Sign in to the Student Testing Site and Complete Tests

• Global Tools: These tools appear in the global menu at the top of the test page and are available for all items in a test.

• Context Menu Tools: These tools are specific to the passage or question being viewed.

Students can access tools using a mouse or keyboard commands. For information about keyboard commands, please see Keyboard Commands in the Student Testing Site.

How to Use Global Tools

The global menu consists of navigation buttons on the left and tool buttons on the right (see Figure 39).

• To use a global test tool, select the button for the tool. The selected test tool activates.

Table 3 lists the tools available in the global menu.

<td>To adjust audio volume during the test, select ☀ in the upper-right corner. Students testing with TTS can also use this tool to adjust TTS settings. Students testing on mobile devices cannot use this tool to adjust volume. To adjust audio volume on mobile devices, students must use the device's built-in volume control.</td>
</tr>
<tr>
<td>Zoom buttons</td>
<td>To enlarge the text and images on a test page, select <strong>Zoom In</strong>. Multiple zoom levels are available. To undo zooming, select <strong>Zoom Out</strong>.</td>
</tr>
</tbody>
</table>

**How to Use the Language Toggle Tool**

The Language Toggle tool allows students to switch between the two languages in which test content is available. When switching languages, the test content and all the elements on the screen, such as button labels and dialogs, switch to the selected language. Students can view the content in the chosen language and even respond to items in that language, if applicable.

Some important things to keep in mind when using the Language Toggle tool are:

- To be able to use the Language Toggle tool, item content must be available in two languages. Furthermore, the default presentation/language must be set to Spanish and the tool must be enabled in the test settings.
- By default, items are presented in the default language specified in the test settings. If a student toggles the language for an item and then proceeds to the next item, the next item will be displayed in the default language. If the student returns to the previous item, the previous item will continue...
How Students Sign in to the Student Testing Site and Complete Tests

to be displayed in the language to which the student had toggled until the student switches the language again.

- If a student highlights or masks text in one language and then switches to a different language, the corresponding sections will not be highlighted or masked. If the student switches back to the first language, the original highlighting or masking will be displayed provided the student has not highlighted or masked sections in the alternate language.

**How to Use the Masking Tool**

The Masking tool allows students to hide distracting areas of the test page.

- To mask an area of a test page:
  a. Select **Masking** in the global menu. The button becomes orange.
  b. Click and drag across the distracting area of the test page. The selected area becomes dark gray. The tool remains active until you deactivate it.

- To deactivate the masking tool, select **Masking** in the global menu again. The button becomes green. Please note that masked areas will remain on the screen until you remove them.

  
  **Figure 40. Test Page with Masked Area**

- To remove a masked area from a test page, select  in the upper-right corner of a masked area.

**How to Use Context Menu Tools**

A test page may include several elements, such as the question, answer options, and stimulus. The context menu for each element contains tools that are applicable to that element (see **Figure 41** and **Figure 42**). **Table 4** lists the available context menu tools.
If a question has multiple parts, a context menu may be available for each part of the question. In such cases, the active context menu (that is, the context menu for the item or stimulus currently in focus) appears enabled while the other context menus look grayed out. Furthermore, the item number and context menu of the item a student is attempting remains visible on the screen even when scrolling through the item’s content to allow easy access to an item’s context menu.

To use the context menu, do one of the following:

- To use a context menu tool for a stimulus or question, open the context menu by clicking the context menu or by right-clicking the required elements, and then select the tool.

- To use a context menu tool for answer options, open the context menu for answer options and select the required tool. To open the context menu for answer options, do one of the following:
  - If you are using a **two-button mouse**, right-click an answer option.
  - If you are using a **single-button mouse**, click an answer option while pressing **Ctrl**.
  - If you are using a **Chromebook**, click an answer option while pressing **Alt**.
  - If you are using a **tablet**, tap the answer option and then tap the context menu button.

<table>
<thead>
<tr>
<th>Tool Name</th>
<th>Instructions</th>
</tr>
</thead>
</table>
| Strikethrough      | For selected-response questions, you can cross out an answer option to focus on the options you think might be correct. You can strikethrough multiple lines of text, such as an answer option spanning more than a line, as well as graphics. There are two options for using this tool:  
  - Option A:  
    a. To activate Strikethrough mode, open the context menu and select **Strikethrough**.  
    b. Select each answer option you wish to strike out.  
    c. To deactivate Strikethrough mode, press **Esc** or click outside the question’s response area.  
  - Option B: Right-click an answer option and select **Strikethrough**. |
| Text-to-Speech     | To listen to passages and questions, select a **Speak** option from the context menu.  
To listen to your responses to constructed-response items, use the TTS button in the item response area. For more information, see **How to Use the Text-To-Speech Tool**. |
| Text-to-Speech Tracking | When this tool is enabled, words become highlighted as TTS reads them aloud. |
| Tutorial           | To view a short video demonstrating how to respond to a particular question type, select **Tutorial** from the context menu. |

How to Use the Select Previous Version Tool

The Select Previous Version tool allows students to view and restore responses they previously entered for a text response question. For example, if students type a response, select **Save**, delete the text, and enter new text, they can use this tool to recover the original response. Please note that if the student’s test pauses, any responses entered prior to pausing will no longer appear in the **Select Previous Version** window.

1. To recover a previously entered response, select the **Select Previous Version** option from the context menu. The **Select Previous Version** window appears, listing all the saved responses for the question in the left panel.

2. Select a response version from the left panel. The text associated with that response appears in the right panel.

3. Select **Select**. The selected response appears in the text box for the question.
How to Use the Text-To-Speech Tool

Students testing with TTS can listen to passages, questions, and answer options using the TTS options available in the selected element’s context menu. A test may include text that is not permissible to be read aloud. This text will be skipped when using TTS. Students may also listen to their responses to constructed-response items.

If a student is using Text-to-Speech Tracking, the words become highlighted as they are read aloud. TTS is only available when using the Secure Browser or a supported Chrome or Firefox browser.
How Students Sign in to the Student Testing Site and Complete Tests

- To listen to a passage, students open the passage context menu and select a **Speak** option. Students can also select a portion of text to listen to, such as a word or phrase. To do this, students select the text, open the passage context menu, and select **Speak Selection**.
  - Please note that when listening to passages, students can pause TTS and then resume it at the point where it was paused. While this functionality is available on Windows, Mac, and iOS, it is not available on Chrome OS. Students testing on a Chrome OS can resume a paused TTS passage by selecting the remaining text to be read aloud and selecting **Speak Selection** from the context menu.

- To listen to a question or answer options, students open the question context menu and select one of the following **Speak** options:
  - To listen only to the question, students select **Speak Question**.
  - To listen to a multiple-choice question and all answer options, students select **Speak Question and Options**.
  - To listen only to an answer option, select **Speak Option** from the context menu and then select the answer option. Students could also right-click the answer option and select **Speak Option**.

- Depending on their accommodations, students may also be able to use TTS to listen to their responses to constructed-response items. Students can select 🎧 at the bottom of the text-response area to listen to the text as entered.

  ![Figure 45. Constructed-Response Item with TTS Tool](image)

How to Use Other Tools

In addition to the global tools and context menu tools, there are some additional tools that may be available to students based on their accommodations or the test page layout. **Table 5** lists the additional tools available in the Student Testing Site.

**Table 5. Other Tools**

| Expand buttons                   | You can expand the passage section or the question section for easier readability.  

- To expand the passage section, select the right arrow icon below the global menu. To collapse the expanded passage section, select the left arrow icon in the upper-right corner.  

To expand the question section, select the left arrow icon below the global menu. To collapse the expanded question section, select the right arrow icon in the upper-left corner.                                                                                                                                                                                                                     |
| Permissive Mode                  | Allows certified accessibility software to be used with the secure browser.                                                                                                                                                                                                                                                                                                                                                  |

---

**How to Use the Dictation Tool**

Students with the appropriate accommodations may use the Dictation tool when responding to text response items. The Dictation tool allows a student to dictate responses to items that support the use of Dictation and the student’s spoken words are then transcribed as text in the item response areas.

To begin dictating, the student selects the microphone button that’s displayed in the item’s text response area. The button scrolls along with the page and remains visible while the item is in focus.

Figure 46. Text-Response Area with Dictation Tool
As the student speaks, the words are transcribed into the text response area. There may be a slight delay while the text is being transcribed and dots appear in the text response area to indicate that the transcription is in process.

The student can stop the dictation by selecting the stop button that appears when the student selects the microphone button. Note that the button automatically reverts to the microphone button if no sound is detected for a specified period. If the student selects the microphone button again and starts dictating, the new text is appended to the previously transcribed text.

Students can dictate for five minutes at a time. The entered text will be auto-punctuated. The student can also control the punctuation and grammar of the text through speech commands to some extent. For example, the student can say, “New Paragraph” to create a new paragraph. It is ultimately the student’s responsibility to ensure the accuracy of the transcription as well as grammar and punctuation.

The buttons in the formatting toolbar are disabled while dictation is on. The buttons are enabled once you stop the recording. You also cannot navigate away from the test page while dictation is on.

**How Students Complete a Test**

After students have completed their test, they need to submit their test.

**How to Complete a Test Segment**

In segmented tests, the *End Segment* page appears after students finish the last question in a segment where students can review questions from the current segment (and earlier segments, if allowed) or proceed to the next segment.

- To review questions, students select a question number.
  - A flag icon appears for any questions marked for review. A warning icon appears for any unanswered questions.

- To move to the next segment, students select *Next* in the global menu.

![Figure 47. End Segment Page](image)

Please note that if the test blocks access to completed segments, students cannot return to the segment after selecting *Next*. Furthermore, some tests force students to log out before proceeding to the next segment to prevent students from accessing a segment before they are supposed to. In order to access the next segment, students must sign in and request approval from the TA again.
How to Submit a Test

To complete the testing process, students must submit their tests when they are done answering questions.

Please note that once students submit their tests, they cannot return to the test or modify answers.

1. Students select End Test in the upper-left corner, which appears after students respond to the last test question. A confirmation message appears.

   Figure 48. Global Menu with End Test Button

2. Students select Yes. The End Test page appears, allowing students to review answers and submit the test for scoring.

   - A flag flag icon appears for any questions marked for review. A warning triangle icon appears for any unanswered questions.

   Figure 49. End Test Page

3. Optional: To review previous answers, students select a question number. Students can also select a cover page icon to navigate to a specific cover page. When done reviewing, they can return to the End Test page by selecting End Test again.

4. To submit the tests, students select Submit Test, then select Yes in the confirmation message that appears. The Your Results page appears displaying the student's name, the test name, and the completion date.
5. To exit the Student Testing Site, students select **Log Out**, and then close the Secure Browser.
Appendix

A

Alert Messages

The Oregon Department of Education can send statewide alerts that appear as pop-up messages on the TA Site.

1. In the banner, select Alerts. The Alerts window appears listing all the active alert messages.

2. Click Close to close the window and return to the TA Site.

E

Expiration Rules for Test Opportunities

Opportunities refer to the number of times a student can take a test within a range of dates. Tests may have one opportunity or multiple opportunities. A student’s test opportunity remains active until the student submits the test or until the opportunity expires. Once a test opportunity expires, the student cannot complete or review the test.

K

Keyboard Commands in the Student Testing Site

Students can use keyboard commands to navigate between test elements, features, and tools. Some important things to note about keyboard commands are:
Keyboard commands require the use of the primary keyboard, so please do not use keys in a numeric keypad.

Some keyboard commands (such as the commands for using the Line Reader) may not work when testing on iOS devices connected to an external keyboard.

When Permissive Mode is enabled for a test, keyboard commands are blocked and will not work.

**Keyboard Commands for Sign-In Pages and In-Test Pop-ups**

Table 6 lists keyboard commands for selecting options on the sign-in pages or pop-up windows that appear during a test.

<table>
<thead>
<tr>
<th>Function</th>
<th>Keyboard Commands</th>
</tr>
</thead>
<tbody>
<tr>
<td>Move to the next option</td>

</tr>
</tbody>
</table>
Keyboard Commands for Global and Context Menus

Students can use keyboard commands to access tools in the global and context menus. For more information about tools in these menus, see the section How Students Use Test Tools.

Global Menu
1. To access the global menu tools using keyboard commands, press Ctrl + G. The global menu list opens.
2. To move between options in the global menu, use the Up or Down arrow key.
3. To select an option, press Enter.
4. To close the global menu without selecting an option, press Esc.

Context Menus
1. To open the context menu for an element (question, answer options, or stimulus), navigate to the element using the Tab or Shift + Tab command.
3. To move between options in the context menu, use the Up or Down arrow keys.
4. To select an option, press Enter.
5. To close the context menu without selecting an option, press Esc.

Keyboard Commands for Highlighting Selected Regions of Text

This section explains how to use keyboard commands to select a text excerpt (such as a word in a passage) and highlight it. These instructions only apply to students using the Secure Browser.

1. To select text and highlight it, navigate to the element containing the text you want to select.
2. Press Ctrl + M to open the context menu and navigate to Enable Text Selection.
3. Press Enter. A flashing cursor appears at the upper-left corner of the active element.
4. To move the cursor to the beginning of the text you want to select, use the arrow keys.
5. Press Shift and an arrow key to select your text. The text you select appears shaded.

Keyboard Commands for Grid Questions

Questions with the grid response area may have up to three main sections – an answer space, which is the grid area where students enter the response; an object bank, which is a panel containing objects you can move to the answer space; and a button row, which appears above the answer space and may
include **Delete, Add Point, Add Arrow, Add Line, Add Circle, Add Dashed Line, and Connect Line buttons.**

**Figure 53. Grid Question**

- To move between the main sections, do the following:
  - To move clockwise, press Tab. To move counterclockwise, press Shift + Tab.

- To add an object to the answer space, do the following:
  a. With the object bank active, use the arrow keys to move between objects. The active object has a blue background.
  b. To add the active object to the answer space, press **Space**.

- To use the action buttons, do the following:
  a. With the button row active, use the left and right arrow keys to move between the buttons. The active button is white.
  b. To select a button, press **Enter**, and then press **Space** to apply the point, arrow, or line to the answer space.

- To move objects and graph elements in the answer space, do the following:
  a. With the answer space active, press **Enter** to move between the objects, and then press **Space**. The active object displays a blue border.
  b. Press an arrow key to move the object. To move the object in smaller increments, hold **Shift** while pressing an arrow key.
Keyboard Commands for Equation Questions

Equation questions allow students to use keyboard commands to open a menu listing the special characters they can insert into the response area.

1. To insert special characters in the response area, with the focus in the text field of the response area, press \texttt{Alt} + 7. The \textit{Special Characters} window opens.
2. To move between options in the context menu, use the \textit{Up} or \textit{Down} arrow keys.
3. To add the selected option to the response area, press \texttt{Enter}.

Login Information for the TA Site

To be able to access the TA Sites, your TIDE administrator must first create your account in TIDE. Once your account is created, you receive an account activation email. You can log in to the TA Sites after activating your account.

1. Navigate to the OSAS Portal (www.osasportal.org).
2. Select your user role.
3. Select the appropriate TA Site:
   a. To access the TA Interface, select \textbf{TA Interface}.
   b. To access the TA Interface Training Site, select \textbf{Training Site}, then select \textbf{TA Training Site}. 

Figure 54. Portal User Cards

![Portal User Cards]

Figure 55. Card for TA Interface

![Card for TA Interface]
4. The **Login** page appears. Enter your email address and password.

![Login Page](image)

5. Select **Secure Login**. The selected TA Site appears.
   
   a. If you have not logged in using this browser before, or if you have cleared your browser cache, the **Enter Code** page appears and an email containing an authentication code is sent to your address.

   ![Enter Code Page](image)

   - In the **Enter Emailed Code** field, enter the emailed code.
   - Select **Submit** to view the TA Site.

   **Note:** You must use the authentication code within 15 minutes of the email being sent. If the code has expired, click **Resend Code** to request a new code.
6. If you are associated with multiple institutions that have test windows set, a pop-up message prompts you to select a testing institution. Select your institution from the drop-down list and select Go. To change the institution, you must log out and then log back in.

Pause and Test Timeout Rules

Pause Rules

TAs and students can pause a test in order to temporarily log the student out of the test session. Students cannot review or modify answered questions after their test pauses for more than 20 minutes, even if they marked questions for review, on the Science, ELA CAT, and Mathematics CAT tests. The only exceptions to this rule are if a student pauses the test before answering all the questions on the current page or if you submit an impropriety request.

Students can review or modify answered questions after their test pauses for more than 20 minutes on the ELPA Screener, ELPA Summative, ELA PT, and Mathematics PT tests.

These pause rules apply regardless of whether the student or the TA pauses the test or a technical issue logs the student out.

Test Timeout Rules

A warning message displays after 20 minutes of test inactivity. Students who do not click OK within 30 seconds after this message appears are logged out. This timeout automatically pauses the test.

Sample Test Site Student Sign-in Process

The Student Interface Training Site allows students to take sample tests. Aside from the sign-in process, the Sample Test Site has the same appearance and functionality as the Student Testing Site. For information on how to sign in to the Student Testing Site, see How Students Sign in and Select Tests.

Students can take sample tests in proctored sessions created in the TA Interface Training Site or in non-proctored/guest sessions. Students also have the option to sign in to the test sessions with their real identities to take tests specific to their grades or sign in as guests to take tests for any grade-level.

1. To access the Student Interface Training Site, do one of the following:
   - From the OSAS portal (www.osasportal.org), select the Sample & Training Test card.

   Figure 59. Sample & Training Test Card
Online Testing System Test Administrator User Guide

- In the Secure Browser, select the **Go to the Sample Test Site** button.

2. To sign in, students do the following:

- To sign in as a guest, students set the Guest User toggle to **On**. Otherwise, to use their real credentials, students set the Guest User toggle to **Off** and then enter their first name and SSID.

- To join a guest session, students set the Guest Session toggle to **On**. Or else, to join a proctored session, students set the Guest Session toggle to **Off** and enter the Session ID from the TA Interface Training Site.

- Students select **Sign In**.
  
  - If signed in with their real identities, the **Is This You** page appears. Students verify their information and click **Yes** to proceed to the **Your Tests** page.
  
  - If signed in as guest users, students are directly taken to the **Your Tests** page.

![Figure 60. Student Interface Training Site Login Page](image)

3. On the **Your Tests** page, students do one of the following:

- If signed in with their real identities, students select a test from the ones available for their grade.

- Students signed in as guests select their grade level from the drop-down list to view the tests available for that grade and then select a test.
4. If the students signed in to a guest session, they must select the test settings they wish to use from the **Choose Settings** page and then select the **Select** button. When selecting the color of the text and background, mouse-pointer, and print size settings, students can see a live preview of their selected settings.

5. If the test includes audio content or text-to-speech settings, the **Audio/Video Checks** page appears displaying the functionality checks that need to be performed. Students must follow the instructions on this page to ensure their device is working properly.

6. On the final sign-in page, students may review the help guide, their test settings, and the additional test information, then select **Begin Test Now** to start or resume their test opportunity.
Print Session Information

You can print a snapshot of the TA Site as it currently appears if you wish to keep a hard-copy record of the Session ID or list of approved students. Please note that Federal law prohibits the release of students' personally identifiable information. All printouts must be securely stored and then destroyed when no longer needed.

1. In the banner, select Print Session. The computer’s print dialog window appears.

2. Select OK.

Print Approved Requests Information

You can view and print a list of every print request you approved for students during the current session. For information on how to approve a print request, see How to Approve a Student’s Print Request.

1. In the banner, select Approved Requests. The Print Requests window appears listing all the approved print requests.

   Figure 63. Print Requests Window

<table>
<thead>
<tr>
<th>GUEST Student ID</th>
<th>Request</th>
<th>Question #</th>
<th>Approved On</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
<tr>
<td>GUEST</td>
<td>Passage for item 7</td>
<td></td>
<td>03/11/2015 9:27:38 PM</td>
</tr>
</tbody>
</table>

2. Select Print to print the list.

S

Session Attributes

When starting a session, you may need to select certain attributes for that session. To review the selected attributes for a session, select Session Attributes in the banner. Session attributes only appear after selecting Interim tests and determine how the Interim test results are organized in the Centralized Reporting System.

Please note that if you modify a session’s attributes after the session begins, the new attributes are applied to every test opportunity in the session. However, if a student completed a test before you changed the session attributes, that test is submitted with the original session attributes. You may change the test reason for an active session.
Secure Browser

The Secure Browser ensures test security by prohibiting access to external applications and navigation away from the test. When the Secure Browser launches, it checks for other applications running on the device. If it detects a forbidden application, it displays a message listing the offending application and prevents the student from testing. This also occurs if a forbidden application launches while the student is already in a test.

In most cases, a detected forbidden application is a scheduled or background job, such as anti-virus scans or software updates. The best way to prevent forbidden applications from running during a test is to schedule such jobs outside of planned testing hours.

Some additional measures you can implement to ensure the test environment is secure are:

- **Close External User Applications**
  Before launching the Secure Browser, or prior to administering the online tests, close all non-required applications on testing devices, such as word processors and web browsers.

- **Avoid Testing with Dual Monitors**
  Students should not take online tests on computers connected to more than one monitor. Systems that use a dual-monitor setup typically display an application on one screen while another application is accessible on the other screen.

- **Disable Screen Savers and Timeout Features**
  On all testing devices, be sure to disable any features that display a screensaver or log users out after a period of inactivity. If such features activate while a student is testing, the Secure Browser logs the student out of the test.

Using the Secure Browser with Accessibility Software

For students with special needs or administrators seeking to accommodate students using accessibility features, the Secure Browser provides the option for assessments to be taken in less restrictive environments. This feature is known as Permissive Mode.

Permissive Mode is an accommodation option that allows students to use accessibility software in addition to the Secure Browser. Offered on MacOS and Windows, students testing in Permissive Mode can have moderated access to the system outside of the Secure Browser. This allows students who need accessibility tools to seamlessly navigate between the Secure Browser and approved applications that suit their test taking needs.

Please note that accessibility software must be certified for use with the Online Testing System and forbidden applications will still not be allowed to run. For information about supported operating systems, see the *Quick Guide for Setting Up Your Online Testing Technology* on the OSAS Portal.
Permissive Mode activates when the student is approved for testing. Students who have the Permissive Mode setting enabled should not continue with the sign-in process until their accessibility software is correctly configured.

*To use accessibility software with the Secure Browser:*

1. Open the required accessibility software.
2. Open the Secure Browser. Begin the normal sign-in process up to the TA approval step.
3. When a student is approved for testing, the Secure Browser allows the operating system’s menu and task bar to appear.
   - **Windows:** On Windows, the Secure Browser resizes, and the taskbar remains visible inside the test in its usual position. Students can execute the keyboard shortcut ALT+TAB to switch between the Secure Browser and accessibility applications, such as JAWS and NVDA, that they are permitted to use in their test session. Please note that when using Windows 8 and above, the task bar remains on-screen throughout the test after enabling accessibility software. However, forbidden applications are still prohibited.
   - **Mac:** On MacOS, the Secure Browser resizes, and students can view the dock in its usual position inside the test. If the dock is set to autohide, no resizing occurs, and the dock is only visible when the mouse is moved toward the bottom of screen. Students can execute the keyboard shortcut **CMD+TAB** to switch between the Secure Browser and permitted accessibility applications.
4. The student must immediately switch to the accessibility software that is already open on the computer so that it appears over the Secure Browser. The student cannot click within the Secure Browser until the accessibility software is configured.
   - **Windows:** To switch to the accessibility software application, click the application in the task bar.
   - **Mac:** To switch to the accessibility software application, click the application in the dock.
5. The student configures the accessibility software settings as needed.
6. After configuring the accessibility software settings, the student returns to the Secure Browser. At this point, the student can no longer switch back to the accessibility software. If changes need to be made, the student must sign out and then sign in again.
7. The student continues with the sign-in process.

As soon as Permissive Mode is turned off, the Secure Browser reoccupies the whole screen so that the taskbar or dock is no longer visible, and the student’s ability to switch between any applications and Secure Browser is suppressed.
Accessing the Secure Browser on Mobile Devices

Tablets and Chromebooks should be configured for testing before you provide them to students. For more information, see the OS and platform specific technical documents on the OSAS Portal.

To configure iOS devices:
• Tap the SecureTestBrowser (formerly AIRSecureTest) Secure Browser icon.

To configure Chromebooks:
• From the Apps link on the Chrome OS login screen, select SecureTestBrowser (formerly AIRSecureTest) Secure Browser.

Closing the Student Testing Site on Tablets

After a test session ends, close the SecureTestBrowser (formerly AIRSecureTest) application on student tablets.

To close the Student Testing Site on iOS devices:
1. Double-tap the Home button. The multitasking bar appears.
2. Locate the SecureTestBrowser (formerly AIRSecureTest) app preview and slide it upward.

To close the Student Testing Site on Chromebooks:
• Click Close Secure Browser in the upper-right corner.

Force-Quitting the Secure Browser

In the rare event that the Secure Browser or test becomes unresponsive, you can force-quit the Secure Browser. Please note that the Secure Browser hides features such as the Windows task bar or Mac OS X dock. If the Secure Browser is not closed correctly, then the task bar or dock may not reappear correctly, requiring you to reboot the device. Avoid using a force-quit command if possible.

To force the Secure Browser to close, use the keyboard command for your operating system as shown below. This action logs the student out of the test. When the Secure Browser is opened again, the student logs back in to resume testing.

<table>
<thead>
<tr>
<th>Operating System</th>
<th>Key Combination</th>
</tr>
</thead>
<tbody>
<tr>
<td>Windows*</td>
<td>• Ctrl + Alt + Shift + F10</td>
</tr>
<tr>
<td>Mac OS X*</td>
<td>• Ctrl + Alt + Shift + F10. The Ctrl key may appear as Control, Ctrl, or ^</td>
</tr>
</tbody>
</table>

* If you are using an Apple keyboard, you may need to press Ctrl + Shift + Option + F10. If you are using a laptop or notebook, you may also need to press Function before pressing F10.

Force-quit commands do not exist for the Secure Browser for iOS and Chrome OS.
iOS: Double-tap the Home button, then close the app as you would any other iOS app.

Chrome OS: To exit the Secure Browser from the sign-in screens, press Ctrl + Shift + S. You cannot force quit once the test begins.

Student Lookup Feature

You can use the student lookup feature in the TA Site to perform a quick or advanced search for student information. This is useful if students signing in to your test session cannot remember their login information.

1. To perform a quick search:
   a. In the banner, select **Student Lookup**.
   b. Enter a student’s full SSID and click **Submit SSID**. Search results appear below the search field.

   ![Figure 64. Student Lookup: Quick Search](image)

2. To perform an advanced search:
   a. In the banner, select **Student Lookup**, and then select **Advanced Search**.
   b. Select the appropriate district and school from the drop-down lists.
   c. Select the appropriate grade.
   d. *Optional:* Enter a student’s exact first or last name. Partial names are not allowed.
   e. Select **Search**. Search results appear below the search fields.
   f. To view a student’s information, click 🏌️ in the Details column.
Temporary ID Generation Feature

TAs can generate temporary IDs for students at the time of testing through the TA Site.

1. In the banner, select **Generate TempID**. The *Temp ID* window appears.

2. Fill out the form with the necessary information including school, first and last name, date of birth, and enrolled grade.

3. Select **Submit**. Once the temporary ID is successfully generated, the student’s first name and temporary ID will be displayed in the window.
4. Provide this information to the student for signing in to the Student Testing Site.

Text-Response Questions

For text-response item types in the Student Testing Site, students can use a formatting toolbar. This toolbar is available above the response field for text response questions (see Figure 67) and also appears whenever students right-click anywhere in the text area. The formatting toolbar allows students to apply styling to text and use standard word-processing features. The lower-right corner of the response field displays the word count and character count for the student’s response. Table 9 provides an overview of the formatting tools available.

![Figure 67. Text Response Question with Formatting Toolbar]

Table 9. Description of Formatting Tools

<table>
<thead>
<tr>
<th>Tool</th>
<th>Description of Function</th>
</tr>
</thead>
<tbody>
<tr>

<td>Use spell check to identify potentially misspelled words in the response field. The drop-down list allows you to set a language for this tool.</td>
</tr>
</tbody>
</table>
**Spell Check Feature**

The spell check tool identifies words in the response field that may be misspelled.

1. Select a language for the spell check tool from the Spell Check drop-down list, if necessary.

   ![Figure 68. Spell Check Drop-Down List](image)

2. In the toolbar, select ![Spell Check](image). Potentially incorrect words change color and become underlined.

3. Select a misspelled word.

   ![Figure 69. Spell Check Tool](image)

4. To exit spell check, select ![Spell Check](image) again.

**Special Characters Feature**

Students can add mathematical, accented, and other symbols.

1. To add a special character, in the toolbar, select ![Special Characters](image).

2. In the window that pops up, select the required character.

**Transfer a Test Session**

You can transfer an active test session from one device or browser to another without stopping the session or interrupting in-progress tests. This is useful in scenarios when your computer malfunctions or if you accidentally close the browser while a session is in progress.

Your session remains open until it times out. If you do not return to the active session within 20 minutes and there is no student activity during that time, the Online Testing System logs you out and pauses the students’ tests.

The Online Testing System ensures that you can only administer a test session from one browser at a time.

---

<table>
<thead>
<tr>

</tr>
</tbody>
</table>
time. If you move a test session to a new device, you cannot simultaneously administer the session from the original browser or device.

1. While the session is still active on the original device or browser, log in to the TA Site on the new device or browser. The Active Sessions page appears (see Figure 70) listing the active session.

2. If the pop-up window for selecting an institution appears, select an institution and select Go to proceed to the Active Sessions page.

   Figure 70. Active Sessions Page

3. Select Join. The test session page appears allowing you to continue monitoring your students’ progress. The test session on the previous computer or browser automatically closes.

User Support and Troubleshooting Information

User Support

For information and assistance in using the Online Testing System, contact the OSAS Helpdesk. The Helpdesk is open Monday–Friday 7:00 a.m. to 5:00 p.m. PT (except holidays or as otherwise indicated on the OSAS portal).

Oregon Statewide Assessment System Helpdesk

Toll-Free Phone Support: 1-866-509-6257
Email Support: osashelpdesk@cambiumassessment.com
Chat Support: https://osasportal.org/chat.stml

Please provide the Helpdesk with a detailed description of your problem, as well as the following:
• Test Administrator name.
• If the issue pertains to a student, provide the student’s SSID and associated district or school. Do not provide the student’s name.
• If the issue pertains to a TIDE user, provide the user’s full name and email address.
• Any error messages and codes that appeared, if applicable.
• Affected test ID and question number, if applicable.
• Operating system and browser version information, including version numbers (for example, Windows 10 and Firefox 60 or Mac OS 10.14 and Safari 11).
• Information about your network configuration, if known:
  – Secure Browser installation (to individual devices or network).
  – Wired or wireless internet network setup.

**Usernames and Password Issues**

Your username for logging in to the TA Site is the email address associated with your account in TIDE. When you are added to TIDE, you receive an activation email containing a temporary link to the *Reset Your Password* page. To activate your account, you must set up your password within 15 minutes of the email being sent.

• **If your first temporary link expired:**
  In the activation email you received, select the second link provided and proceed to request a new temporary link.

• **If you forgot your password:**
  On the *Login* page, select *Forgot Your Password?* and then enter your email address in the *Email Address* field. You will receive an email with a new temporary link to reset your password.

• **If you did not receive an email containing a temporary link or authentication code:**
  Check your spam folder to make sure your email program did not categorize it as junk mail. If you still do not have an email, contact your School or District Test Coordinator to make sure you are listed in TIDE.

• **Additional help:**
  If you are unable to log in, contact the OSAS Helpdesk for assistance. You must provide your name and email address. Contact information is available in the User Support section of this user guide.
Common Student Sign-in Errors

The Online Testing System generates an error message if a student cannot sign in. The following are the most common student sign-in issues:

- **Session does not exist:**
  The student entered the Session ID incorrectly or signed in to the wrong site. Verify that the student correctly entered the active Session ID. Also, verify that both you and the student are using the correct sites. For example, students signed in to the Student Interface Training Site cannot access sessions created in the TA Interface. A message displayed in the bottom-left corner of the Student Sign-In page indicates which site the student is on. If a student is on the wrong site, the student can select the button included in the message to proceed to the correct site.

  ![Figure 71. Student Interface Training Site Badge on the Login Page](image)

- **Student information is not entered correctly:**
  Verify that the student correctly entered the SSID. If this does not resolve the error, use the Student Lookup tool to verify the student’s information.

- **Session has expired:**
  The Session ID corresponds to a closed session. Ensure that the student enters the correct Session ID and verify that your session is open. For more information about test sessions, see the section [How to Select Tests and Start a Test Session](#).

- **Student is not associated with the school:**
  The student is not associated with your school, or you are not associated with the student’s school.

Resolving Secure Browser Error Messages

This section provides possible resolutions for the following messages that students may receive when signing in to tests using the Secure Browser.

- **You cannot login with this browser:**
  This message occurs when the student is not using the correct Secure Browser. To resolve this issue, ensure the latest version of the Secure Browser is installed, and that the student launched the Secure Browser instead of a standard web browser. If the latest version of the Secure Browser is already running, then log the student out, restart the device, and try again.
• **Looking for an internet connection...:**
  This message appears when the Secure Browser cannot connect with the Online Testing System. This can occur if there is a network-related problem. Make sure that either the network cable is plugged in (for wired connections) or the Wi-Fi connection is live (for wireless connections). Also check if the Secure Browser must use specific proxy settings; if so, those settings must be specified as options when configuring the Secure Browser. If connection issues persist, contact a network technician.

• **Test Environment Is Not Secure:**
  This message can occur when the Secure Browser detects a forbidden application running on the device. If this message appears on an iPad, ensure that either Autonomous Single App Mode or Automatic Assessment Configuration is enabled.
## Change Log
