

My name is Russell Jones and I'm going to tell you why a field trip can be important to today young community. A field trip can be fun, educational, and a good experience, and you could meet new people. I will tell you why high school, middle school, and elementary schools need field trips. If you were to ask any student in any grade they would say that they don't go on enough field trip and that they get to much work.

I will first tell you about the field trips that my high school is doing. Every year the German class send german students to germany for a couple of weeks to experience a new language, new cultrue, and make new friends. And several german students from Germany will come to your schools. Another Fied trip is to go to the U.O. collage campus and we stay their all day and have lunch and see dorms, classes, and monuments. The reason why we went is so teaches could show us were we could be in a couple of years.

Now the middle schools Field trips are to got the Portland Zoo which you could learn about animals and were they come from in the world. Another Field trip that I liked was the trip to OMIS were you could learn and it was fun and the thing that you would learn were science, math, space travel, and odd animals. In both of thes Field trip kids learn, have a good time, and have a good time.

When I was in elementary school I went on many field trips but the two I liked the most was when are class when to the "lord of the Rings" play. I liked it because they had cool customs and I thought it was a good experience. another trip I went on was to to to a park, now that was fun because they usually had lakes at parks so when we got their we could go swimming, play football, soccer, tag, and play in the sand/beach.

Now that I told you these cool places to go to you should sent your kids or students to these places. Some reasons are they will have fun, a good experience, and it will also be educational for them. And that is the hol point in having a Field trip. So the places I htink are cool are going to a different country, to collages, the Zoo, OMS.I, Plays, and mabye even parks.
