Student (Targets	t Growth Goal s)	By the end of the semester, advanced band students will improve in their ability to recognize essential music vocabulary and symbols and describe their meaning as follows: 3 students who scored between 0-49 % will improve by 40 %. 9 students who scored between 50–60% will improve by 25%, 8 students who scored between 61 – 80% will improve by 15%, 1 student who scored between 81-90 % will improve a minimum of 5% and demonstrate understanding of a minimum of 5 advanced music vocabulary terms 1 student who scored 97.5% will improve to 100% and demonstrate understanding of a minimum of 10 advanced music vocabulary terms
Rationa	lle	Advanced band students should be able to correctly define and identify musical vocabulary and symbols. These symbols and terminology begin to be introduced at the fifth grade level, and each symbol/vocab word continues to be used on a daily basis. However, students have trouble describing or identifying much of this vocabulary when asked to find it in their music. In order for the student to be a better performer, they must be able to recognize and understand what these symbols and terminology mean and apply it to their music. It is important that the student become self-reliant and not depend on the conductor to show them what to do whenever they play. Rather, they should recognize these musical instructions and apply them as they play, relying on the conductor as a guide rather than a master puppeteer!
Strategi	ies	 Word or symbol of the week. Students will be given a word or symbol and definition at the beginning of the week. Throughout the week, attention will be called to the word or symbol. A quiz at the end of the week will demonstrate student understanding. Students will teach a word/symbol concept to the class and demonstrate how to perform it, if applicable. Students will choose two symbols/vocab from the word list, (one they know well and one that they do not know as well) and teach a lesson.
