Using the Reading Scoring Guide –
An Introduction for High School Teachers

This packet contains the following:
- Reading Essential Skills Training Design
- Powerpoint Slides with note space
- Scoring Guide for Reading – Informational and Literary
- 3 Sample Student Reading Work Samples
- Classroom Handouts
The workshops described below are designed to be delivered by school district personnel who have received training and materials from ODE through “Training of Trainer” WebEx sessions.

<table>

*Estimated time needed for trainer to deliver the workshop to district/school participants

**Training of Trainer WebEx Sessions**

**Level 1** training for presenters is provided in a one hour WebEx session which includes reading, writing and mathematics. It is designed to be delivered to general audiences by anyone with a basic understanding of the Essential Skills. No content expertise is required. Level 1 workshop materials are also available on the ODE website at [http://www.ode.state.or.us/search/page/?id=219](http://www.ode.state.or.us/search/page/?id=219). Select the desired Essential Skill and go to Resources and Promising Practices.

**Levels 2 – 4** provides training for presenters with expertise in high school reading or English Language Arts. Levels 2 & 3 Training of Trainers workshops are delivered in one 2-hour WebEx session. Level 4 is delivered in a separate 2-hour WebEx training session. All workshop materials, including ready-to-print handouts, are provided to attendees following each WebEx Training of Trainers session.

Assessing the Essential Skill of Reading
Level 2 -- Introduction

Goals
Participants will know:

- Requirements for demonstrating proficiency in the Essential Skill of Reading
- Official State Scoring Guide traits
- Various assessments & data uses
- Resources & further professional development available

State Education Law
For students first enrolled in grade 9 during the 2008-2009 school year [and all subsequent years], school districts and public charter schools shall require students to demonstrate proficiency in the Essential Skills listed:

(A) Read and comprehend a variety of text;
Demonstrating Proficiency in Reading

1. OAKS Reading/Literature Assessment
   Score of 236

2. Other Options
   - ACT or PLAN 18
   - WorkKeys 5
   - Compass 81
   - Asset 42
   - Accuplacer 86
   - SAT/PSAT 440/44
   - AP & IB various

3. Local Work Samples
   - Reading Work Sample scored using Official State Scoring Guide
   - Two Reading Work Samples Required
   - Students must earn a score of 12 or higher on each work sample

Level of Rigor

- Work samples must meet the level of rigor required on the OAKS assessment.
- Work samples provide an optional means to demonstrate proficiency not an easier means.
What are the skills of a proficient reader?

Official Scoring Guide Traits

- Demonstrate understanding
- Develop an interpretation
- Analyze text

OAKS Score Reporting Categories

- SRC 1 – Vocabulary
- SRC 2 – Read to perform a task
- SRC 3 – Demonstrate General Understanding
- SRC 4 – Develop an Interpretation
- SRC 5 – Examine Content & Structure (Informational)
- SRC 6 – Examine Content & Structure (Literary)

Reading Work Sample Traits Scored

- Not assessed
- Not assessed
- Demonstrate General Understanding
- Develop an Interpretation
- Analyze Text (Informational)
- Analyze Text (Literary)
Demonstrate Understanding

“Getting the gist”

- Main ideas, relevant details, sequence of events, relationship among ideas, facts/opinions
- Literal Comprehension

Develop an Interpretation

“Reading between the lines”

- Unstated main ideas/themes
- Inferences, interpretations, conclusions, generalizations, and predictions
- Inferential Comprehension

Analyze Text - Informational

“Looking at the author’s craft”

- Author’s purpose, ideas and reasoning
- Writer’s Strategies
- Textual evidence
Analyze Text - Literary

“Applying Knowledge of Literature”

- Author’s stylistic decisions
- Literary elements
- Literary devices
- Textual evidence

Simplified Reading Scoring Guide

Important Issues in Scoring

- Seeking evidence of accomplishment
- Evidence may be found throughout the response
Important Issues in Proficiency

• Demonstrate proficiency on two tasks - at least one must be informative.
• Achieve a score of “12” or higher on each task (4,4,4, or combination of 3,4,5)

Important Issues in Proficiency

• Students may revise worksamples for rescoring.
• Feedback is allowed using only the Scoring Guide and/or the Official Scoring Form

Scoring the First Anchor Paper

This anchor paper met the achievement standard in each trait.

Why did this paper earn these scores?
Scoring the 2nd Anchor Paper

This anchor paper did not meet the achievement standard.

What scores did this paper earn?

Scoring

Within the Traits . . .

What differentiates a 3 from a 4?

Scoring the 3rd Anchor Paper

Use the scoring guide to rate this paper.

What scores did this paper earn?
Building Consensus on Definitions of Assessments

<table>
<thead>
<tr>
<th>Assessment</th>
<th>Purpose</th>
<th>When Administered?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Screening</td>
<td>Identify students at risk of reading difficulties &amp; provides info to target instruction for all students</td>
<td>Beginning of year or semester; when new students arrive</td>
</tr>
<tr>
<td>Formative</td>
<td>Supports learning and informs instruction</td>
<td>Embedded directly in instruction to inform teacher decisions</td>
</tr>
</tbody>
</table>

Multiple Uses for the Scoring Guide

- **Instructional Tool**
  - Makes targets explicit to students
  - Opportunities to show students models from website or other examples

- **Screening Tool**
  - Help determine likelihood of reaching proficiency – on target, need assistance, at risk
  - Help determine which students need additional instruction and coaching
Building Consensus on Definitions of Assessments

<table>
<thead>
<tr>
<th>Assessment</th>
<th>Purpose</th>
<th>When Administered?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Interim and Predicive</td>
<td>Determine the progress of individuals or groups of students based on focused elements of content</td>
<td>Occasional, based on curriculum &amp; other instructional milestones</td>
</tr>
<tr>
<td>Summative</td>
<td>Determine how much knowledge and skills individuals or groups of students (e.g. programs, schools, districts and states) have acquired.</td>
<td>Periodically after a substantial period of time (e.g. end of the year and end of course).</td>
</tr>
</tbody>
</table>

Multiple Uses for the Scoring Guide

- **Formative & Interim Assessments**
  - Inform instructional strategies
  - Provide data on student progress
- **Classroom/Summative Assessment**
  - End of unit, course, etc. or Essential Skills

Formative Assessment and the Scoring Guide

- The Scoring Guide can help to identify reading strengths and weaknesses.
- Students learn where to focus to improve reading skills.
- Teachers learn where additional instruction is needed.
Summative Assessment

Classroom Assignment
Grade on one or all traits

Essential Skills Work Sample
Meet requirements for Oregon diploma

Assessment

Teachers at Oregon City High School use Reading Work Samples for instruction because the RWSs are so closely aligned to the standards & the OAKS test. Particularly in the reading intervention classes, the teacher focuses instruction on the RWSs and finds that students who do well on the RWSs are more likely to pass the OAKS class at the end of the course. Last year, 93% of juniors passed the OAKS Reading/Literature test.

Kathy Haynie, Literacy Coach, Oregon City HS
McMinnville High School Reading Lab teachers worked with juniors who had not yet met the OAKS standard using think-aloud strategies and engaging reading practice tasks. Then, students analyzed their responses using the Reading Scoring Guide. Finally, they completed two Reading Work Samples. Most students met the standard on both work samples, and some even passed the OAKS test as a result of these learning strategies!

Pam Prosise, ELL/Literacy Specialist, McMinnville SD

Using discussion and practice with the Reading Work Samples and the scoring guide were the only direct instructional practices I used between my students' first and second attempts on the OAKS Reading Assessment. I am convinced that the scoring guide and Reading Work Samples call on students to demonstrate what good readers do to comprehend, make supported inferences, and analyze the text and author’s craft. Many of my students were able to transfer this understanding to higher scores on the OAKS test and meeting the standard.

Teri Houghton, English Dept. Chair, Grants Pass HS

Research shows ...

“Students who receive intensive focused literacy instruction and tutoring will graduate from high school and attend college in significantly greater numbers than those not receiving such attention. . . .
Despite these findings, few middle or high schools have a comprehensive approach to teaching literacy across the curriculum.”

"Literacy is inseparable from opportunity, and opportunity is inseparable from freedom. The freedom promised by literacy is both freedom from - from ignorance, oppression, poverty - and freedom to - to do new things, to make choices, to learn."

Koichiro Matsuura
Options for Demonstrating Proficiency in the Essential Skill of Reading

Flow Chart

To meet the graduation requirement for the essential skill of "read and comprehend a variety of text" follow these steps.

1. Student takes the OAKS Reading Assessment.

2a. If the student receives a score of 236, he/she has met the graduation requirement standard for reading.

2b. If the student receives a score lower than 236, he/she can meet the grad requirement standard in one of three ways:

3a. The student studies and retakes the OAKS Reading Assessment and receives a score of 236.

3b. Take one of a number of approved standardized tests and receive the following scores:
   - ACT: 18
   - PLAN: 18
   - SAT: 440
   - PSAT: 44
   - Accuplacer: 86
   - ASSET: 42
   - Compass: 81
   - Work Keys: 5
   - AP or IB: varies

3c. Complete 2 reading work samples that are:
   - scored using the Official State Reading Scoring Guide;
   - receive a score of 12 across the three required traits for each work sample (each trait must receive an individual score of at least 3).
   - In addition the work samples will be drawn from:
     - at least one informational reading selection;
     - the second reading selection may either be informational or literary.

4a. If the student attains a score of 12 or higher on both work samples, he/she has met the graduation requirement standard for reading.

4b. If the student attains a score of 11 or lower, he/she does not meet the graduation requirement standard for reading.

**Revision is Possible:** Work samples that nearly meet the standard (scoring a mix of 4s and 3s) may be returned to students for revision. Teachers may mark areas on the scoring guide or Official Scoring Form to show students in what areas they need to work (no other instructions are allowed). The work sample is then rescored.

*Writers sometimes use techniques known as literary devices in informational text. Common literary devices include irony, satire, foreshadowing, flashback, simile, metaphor, personification, symbolism, allusion, exaggeration, etc. Students are not required to identify the device by name, but may comment on the effect or notice the strategy.

Reading Performance Assessment  
Practice Task 
High School - 2009 - Are Americans Destined for a Diet of Bread and Water?

Read the following article carefully and make notes in the margin as you read. Your notes should include:

- Comments that show that you understand the article. (A summary or statement of the main idea of important sections may serve this purpose.)
- Questions you have that show what you are wondering about as you read.
- Notes that differentiate between fact and opinion.
- Observations about how the author's craft (organization, word choice, perspective, support) and choices affect the article.

Your margin notes are part of your score for this assessment.

NOTE: This Associated Press article appeared in the Grants Pass Daily Courier on Saturday, May 5, 2007. Almost two years after the article's publication, the mystery of the honeybee die-off continues today.

ARE AMERICANS DESTINED FOR A DIET OF BREAD AND WATER?

Some experts fear that may be the case, if the mysterious honeybee die-off isn't brought to a halt.

BELTSVILLE, Md.

Unless someone or something stops it soon, the mysterious killer that is wiping out many of the nation's honeybees could have a devastating effect on America's dinner plate, perhaps even reducing us to a glorified bread-and-water diet.

Honeybees don't just make honey -- they pollinate more than 90 of the tastiest flowering crops we have.

Among them: apples, nuts, avocados, soybeans, asparagus, broccoli, celery, squash and cucumbers. And lots of the really sweet and tart stuff, too, including citrus fruit, peaches, kiwi, cherries, blueberries, cranberries, strawberries, cantaloupe and other melons.

In fact, about one-third of the human diet comes from insect-pollinating plants, and the honeybee is responsible for 80 percent of that pollination, according to the U.S. Department of Agriculture.

Even cattle, which feed on alfalfa, depend on bees. So if the collapse worsens, we could end up being "stuck with grains and water," said Kevin Hackett, the national program leader for USDA's bee and pollination program. "This is the biggest general threat to our food supply," Hackett said.

While not all scientists foresee a food crisis, noting that large-scale bee die-offs have happened before, this one seems particularly baffling and alarming.
U.S. beekeepers in the past few months have lost one-quarter of their colonies—or about five times the normal winter losses—because of what scientists have dubbed Colony Collapse Disorder. The problem started in November and seemed to have spread to 27 states, with similar collapses reported in Brazil, Canada and parts of Europe.

Scientists are struggling to figure out what is killing the honeybees, and early results of a key study point to some kind of disease or parasite.

Even before this disorder struck, America’s honeybees were in trouble. Their numbers were steadily shrinking, because their genes do not equip them to fight poisons and disease very well, and because their gregarious nature exposes them to ailments that afflict thousands of their close cousins.

“Quite frankly, the question is whether the bees can weather this perfect storm,” Hackett said. “Do they have the resilience to bounce back? We’ll know probably by the end of the summer.”

Experts from Brazil and Europe have joined in the detective work at USDA’s bee lab in suburban Washington. In recent weeks, Hackett briefed Vice President Cheney’s office on the problem.

Congress has held hearings on the matter.

“This crisis threatens to wipe out production of crops dependent on bees for pollination,” Agriculture Secretary Mike Johanns said in a statement.

A congressional study said honeybees add about $15 billion a year in value to our food supply.

*Used by permission of the Associated Press.*

---

1. What was the general health of the honeybee population before the mystery die-off began? **Give an example** from the text.

   The honey bee’s health was still poor and most bees were ailing. “Even before the disorder struck, America’s honeybees were in trouble.” “…their genes do not equip them to fight poisons & disease.”
2. Draw and/or write a description of the relationship between the honeybee and the human food supply as explained in this article.

![Diagram]

3. Why is the article titled, “Are Americans destined for a diet of bread and water?” Use content and examples from the text to explain your answer.

Without the bees many foods would cease to exist and Americans would be reduced to eating bread and water. By the way things are going this could be our destiny.

“One-third of the American diets comes from insect-pollinating plants, and the honeybee is responsible for 80 percent of that pollination,”
4. What does Kevin Hacket, of the US Department of Agriculture, mean when he states "Quite frankly, the question is whether the bees can weather this perfect storm"? Use information from the article to support your answer.

He's referring to the circumstances we are going through that has the potential to wipe out all honeybees. "Do they have the resilience to bounce back? We will know by the end of this summer."

5. What is the author's purpose in writing this article? Support your answer with language from the text.

They are trying to raise awareness and inform the public of the bee crisis and to warn them of the potential side effects by being serious and adding facts and evidence.

"This crisis threatens to wipe out production of crops dependent on bees for pollination," Agriculture Secretary Mike Johanns said.

6. Use this T-Chart to identify three things that the author does or uses in the article to convince the reader that the information in the article is accurate and believable.

<table>
<thead>
<tr>
<th>What the Author Does/Uses</th>
<th>How is seems accurate/believable</th>
</tr>
</thead>
<tbody>
<tr>
<td>Supports everything with facts</td>
<td>he has direct statements from trained professionals</td>
</tr>
<tr>
<td>straight to the point, provokes emotion</td>
<td>he provokes emotion not by talking about how awful it is his own beliefs but by being very matter of fact in a serious way.</td>
</tr>
<tr>
<td>is very passionate</td>
<td>you can tell by his context that he takes this matter very seriously and is desperately trying to bring awareness about.</td>

ARE AMERICANS DESTINED FOR A DIET OF BREAD AND WATER?

Some experts fear that may be the case, if the mysterious honeybee die-off isn’t brought to a halt.

BELTSVILLE, Md.

Unless someone or something stops it soon, the mysterious killer that is wiping out many of the nation’s honeybees could have a devastating effect on America’s dinner plate, perhaps even reducing us to a glorified bread-and-water diet.

Honeybees don’t just make honey – they pollinate more than 90% of the tastiest flowering crops we have.

Among them: apples, nuts, avocados, soybeans, asparagus, broccoli, celery, squash and cucumbers. And lots of the really sweet and tart stuff, too, including citrus fruit, peaches, kiwi, cherries, blueberries, cranberries, strawberries, cantaloupe and other melons.

In fact, about one-third of the human diet comes from insect-pollinating plants, and the honeybee is responsible for 80% of that pollination, according to the U.S. Department of Agriculture.

Even cattle, which feed on alfalfa, depend on bees. So if the collapse worsens, we could end up being “stuck with grains and water,” said Kevin Hackett, the national program leader for USDA’s bee and pollination program.

“This is the biggest general threat to our food supply,” Hackett said.

While not all scientists foresee a food crisis, noting that large-scale bee die-offs have happened before, this one seems particularly baffling and alarming.
Reading Performance Assessment
High School – 2009 – Are Americans Destined for a Diet of Bread and Water?

U.S. beekeepers in the past few months have lost one-quarter of their colonies – or about five times the normal winter losses – because of what scientists have dubbed Colony Collapse Disorder. The problem started in November and seemed to have spread to 27 states, with similar collapses reported in Brazil, Canada and parts of Europe.

Scientists are struggling to figure out what is killing the honeybees, and early results of a key study point to some kind of disease or parasite.

Even before this disorder struck, America’s honeybees were in trouble. Their numbers were steadily shrinking, because their genes do not equip them to fight poisons and disease very well, and because their gregarious nature exposes them to ailments that afflict thousands of their close cousins.

“Quite frankly, the question is whether the bees can weather this perfect storm,” Hackett said. “Do they have the resilience to bounce back? We’ll know probably by the end of the summer.”

Experts from Brazil and Europe have joined in the detective work at USDA’s bee lab in suburban Washington. In recent weeks, Hackett briefed Vice President Cheney’s office on the problem.

Congress has held hearings on the matter.

“This crisis threatens to wipe out production of crops dependent on bees for pollination,” Agriculture Secretary Mike Johanns said in a statement.

A congressional study said honeybees add about $15 billion a year in value to our food supply.

Used by permission of the Associate Press.

1. What was the general health of the honeybee population before the mystery die-off began? Give an example from the text. There was about 50% of bee pollinating a lot of plants.
2. Draw and/or write a description of the relationship between the honeybee and the human food supply as explained in the article.

3. Why is the article titled, "Are Americans destined for a diet of bread and water?" Use content and examples from the text to explain your answer. Because honeybees don't just get honey, they pollinate the plants we eat, that's why we should eat bread and water every day.
4. What does Kevin Hacket, of the US Department of Agriculture, mean when he states, "Quite frankly, the question is whether the bees can weather this perfect storm"? Use information from the article to support your answer. The food crisis die-off.

5. What is the author's purpose in writing this article? Support your answer with language found in the text. The problem started in November states, which as similar collapses reported in Brazil, and other place.

6. Use this T-Chart to identify three things that the author does or uses in the article to convince the reader that the information in the article is accurate and believable.

<table>

</table>
NOTE: This Associated Press article appeared in the GRANTS PASS DAILY COURIER on Saturday, May 5, 2007. Almost two years after the article’s publication, the mystery of the honeybee die-off continues today.

ARE AMERICANS DESTINED FOR A DIET OF BREAD AND WATER?

Some experts fear that may be the case, if the mysterious honeybee die-off isn’t brought to a halt.

BELTSVILLE, Md.

Unless someone or something stops it soon, the mysterious killer that is wiping out many of the nation’s honeybees could have a devastating effect on America’s dinner plate, perhaps even reducing us to a glorified bread-and-water diet.

Honeybees don’t just make honey—they pollinate more than 90% of the tastiest flowering crops we have. Among them: apples, nuts, avocados, soybeans, asparagus, broccoli, celery, squash and cucumbers. And lots of the really sweet and tart stuff, too, including citrus fruit, peaches, kiwi, cherries, blueberries, cranberries, strawberries, cantaloupe and other melons.

In fact, about one-third of the human diet comes from insect-pollinating plants, and the honeybee is responsible for 80 percent of that pollination, according to the U.S. Department of Agriculture.

Even cattle, which feed on alfalfa, depend on bees. So if the collapse worsens, we could end up being “stuck with grains and water,” said Kevin Hackett, the national program leader for USDA’s bee and pollination program. “This is the biggest general threat to our food supply,” Hackett said.

While not all scientists foresee a food crisis, noting that large-scale bee die-offs have happened before, this one seems particularly baffling and alarming.

Reading and Literature
Oregon Department of Education – Office of Assessment and Information Services
U.S. beekeepers in the past few months have lost one-quarter of their colonies – or about five times the normal winter losses – because of what scientists have dubbed Colony Collapse Disorder. The problem started in November and seemed to have spread to 27 states, with similar collapses reported in Brazil, Canada and parts of Europe.

Scientists are struggling to figure out what is killing the honeybees, and early results of a key study point to some kind of disease or parasite.

Even before this disorder struck, America’s honeybees were in trouble. Their numbers were steadily shrinking, because their genes do not equip them to fight poisons and disease very well, and because their gregarious nature exposes them to ailments that afflict thousands of their close cousins.

“Quite frankly, the question is whether the bees can weather this perfect storm,” Hackett said. “Do they have the resilience to bounce back? We’ll know probably by the end of the summer.”

Experts from Brazil and Europe have joined in the detective work at USDA’s bee lab in suburban Washington. In recent weeks, Hackett briefed Vice President Cheney’s office on the problem.

Congress has held hearings on the matter.

“This crisis threatens to wipe out production of crops dependent on bees for pollination,” Agriculture Secretary Mike Johanns said in a statement.

A congressional study said honeybees add about $15 billion a year in value to our food supply.

Used by permission of the Associate Press.

1. What was the general health of the honeybee population before the mystery die-off began? Give an example from the text.

The honeybee population was already decreasing slowly because of how their genes are made up.

Ex: “Even before this disorder struck, America’s honeybees were in trouble. Their numbers were steadily shrinking, because their genes do not equip them to fight poisons and disease very well, and because their gregarious nature exposes them to ailments that afflict thousands of their close cousins.”
2. Draw and/or write a description of the relationship between the honeybee and the human food supply as explained in the article.

3. Why is the article titled, "Are Americans destined for a diet of bread and water?" Use content and examples from the text to explain your answer.

The title of the article gets the reader's attention because to survive, you have to eat. In the article, Kevin Hackett, the national program leader for the USDA's bee & pollination program, says that if the dying of the honeybee continues, we could end up being "stuck with grains and water." This is his opinion that he feels is possible based on the bee situation and I think a lot of it is dramatic affect.
4. What does Kevin Hackett, of the US Department of Agriculture, mean when he states, “Quite frankly, the question is whether the bees can weather this perfect storm”? Use information from the article to support your answer.

Kevin Hackett is basically asking if the bees will be able to overcome whatever it is that is killing them. He uses a metaphor of a storm to symbolize the wave of death and weather for the bees strength to ride it out. Also, his next quote, “Do they have the resilience to bounce back...”, sort of ties on to the end of his last and just refrases it.

5. What is the author’s purpose in writing this article? Support your answer with language from the text.

The purpose of writing this article was to inform the reader of the honeybees role in the U.S. The first sentence says, “... honeybees could have a devastating affect on America’s dinner plate...” I like that the author uses the word devastating because it shows the seriousness of the situation.

6. Use this T-Chart to identify three things that the author does or uses in the article to convince the reader that the information in the article is accurate and believable.

<table>
<thead>
<tr>
<th>What the Author Does/Uses</th>
<th>How it seems accurate/believable</th>
</tr>
</thead>
<tbody>
<tr>
<td>* Uses language that is persuasive</td>
<td>* The words in the article are descriptive and almost overly used. Like above I mentioned the word devastating.</td>
</tr>
<tr>
<td>* Uses facts &amp; statistics</td>
<td>* People believe facts and stats because they can be backed up with evidence. They’re called facts for a reason.</td>
</tr>
<tr>
<td>* Gives background information on the honeybee’s health</td>
<td>* Giving information on the bee’s health record was a good idea because it helps the reader to understand how fragile they are and how easy it is to kill them.</td>
</tr>
</tbody>
</table>

**Demonstrate Understanding**

1 2 3 4 5 6

The reader responses show:

- Accurate understanding of stated main ideas and supporting details
- Understanding of sequence of events / relationships among ideas
- Understanding of differences between facts and opinions (informational text)

**Develop an Interpretation**

1 2 3 4 5 6

The reader responses show:

- Understanding of unstated main ideas, conclusions, connections, predictions
- Reasonable interpretations, conclusions, generalizations, connections, predictions
- Some evidence from the text to support the above

**Analyze Text: Informational**

1 2 3 4 5 6

The reader responses show:

- Author’s purpose (identification)
- Reasoned judgments about author’s ideas, support, reasoning, use of sources
- How writing strategies (structure, devices, word choice) contribute to effectiveness
- Some evidence from the text to support the above

**Analyze Text: Literary**

1 2 3 4 5 6

The reader responses show:

- How literary elements contribute to effectiveness
- How literary devices contribute to effectiveness
- Some evidence from the text to support the above

Rater ID Number, Initials, or Name: __________________________________________

Traits Overview on the Reading Scoring Guide

When your work sample is scored, the scorer will be looking for the following items in your response. The more you include, the higher your score.

1. **DEMONSTRATE UNDERSTANDING**
   - The reader demonstrates that s/he “Gets the Gist” of the passage; that is, s/he:
     - gets main ideas
     - gets relevant details
     - distinguishes facts and opinions
     - understands the sequence of events
     - gets what’s right there in the text—the literal comprehension

2. **DEVELOP AN INTERPRETATION**
   - The reader demonstrates that s/he is “Reading between the Lines” of the passage; that is, s/he:
     - gets the unstated main ideas and themes
     - makes inferences
     - can make interpretations, conclusions, & generalizations
     - can predict future outcomes
     - reads under the surface of the text—the inferential comprehension

3. **ANALYZE TEXT—INFORMATIONAL**
   - If the text is informational, the reader is able to “Look at the Author’s Craft” in the passage; that is, s/he can identify the author’s:
     - purpose
     - ideas & reasoning
     - use of support and resources
     - writing strategies
     - organization, word choice, format, perspective
     - use of literary devices (if used) *
   - The reader can:
     - provide evidence of the above from the text.
   *
   - e.g. irony, satire, exaggeration, allusion, etc.

3. **ANALYZE TEXT—LITERARY**
   - If the text is literary, the reader can “Apply His/Her Knowledge of Literature” by identifying the author’s use of:
     - literary elements theme, character, setting, plot, narrator, voice, tone, mood, etc.
     - literary devices
     - figurative language, imagery, point of view, foreshadowing, flashbacks, symbolism, etc.
   - The reader can:
     - analyze the effectiveness of their use, and
     - provide evidence of their use from the text.

### Simplified Reading Scoring Guide

<table>
<thead>
<tr>
<th></th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>6.</td>
<td>The work is excellent. I gained insights from reading the student’s responses.</td>
</tr>
<tr>
<td>5.</td>
<td>The work shows the student nailed it; he/she provides strong evidence.</td>
</tr>
</tbody>
</table>
| 4. | The work shows that the student got it and he/she provides enough evidence.  
   (There are more strengths than weaknesses.) |
| 3. | The work shows that the student may have gotten it, but did not provide enough evidence.  
   (There are more weaknesses than strengths.) |
| 2. | This work is not close. The student made an effort but appears confused. |
| 1. | This work demonstrates that the student didn’t understand the reading. |

**Author’s purpose, ideas and reasoning, and writing strategies:**
- organization,
- word choice,
- point of view,
- formatting,
- literary devices* (if used)
- other style choices

**Reader responses**
- explain author’s purpose
- clearly give “deep-thinking statements” about author’s ideas, (e.g. support, reasoning, use of sources)
- explain (in detail) a deep analysis of the strategies the writer used
- give specific, strong, accurate examples from the text

**Reader responses**
- identify author’s purpose
- give solid opinions about author’s ideas (e.g. support, reasoning, use of sources) with strong evidence
- explain strategies the writer used in this text and how well they worked
- give some examples from the text

**Reader responses**
- might identify author’s purpose
- might give opinions about the writer’s ideas that are too simple or unsupported
- give opinions about writer’s strategies that are too simple or unsupported
- have hardly any examples from the text

**Reader responses**
- do not include author’s purpose
- might have unsupported opinions about author’s ideas
- show no evidence or thinking about writer’s strategies
- have no, or almost no, examples from the text

---

*Writers sometimes use techniques known as literary devices in informational text. Common literary devices include irony, satire, foreshadowing, flashback, simile, metaphor, personification, symbolism, allusion, exaggeration, etc. You are not required to identify the technique, but when you notice a strategy the author uses, explain how it helps the writing.*

**ANALYZE TEXT – INFORMATIONAL TEXT**  
"LOOKING AT THE AUTHOR’S CRAFT”

- **Literary Elements such as**
  - Theme
  - Character
  - Plot
  - Setting
  - Voice
  - Narrator
  - Characterization
  - Tone
  - Mood
  - And others

- **Literary Devices such as**
  - Figurative language like similes and metaphors
  - Personification
  - Alliteration or other sound devices
  - Imagery
  - point of view
  - Foreshadowing, and flashbacks
  - Symbolism
  - And others

**Reader responses**
- show deep thinking about literary elements and devices and careful explanation of how they add to the impact of the text
- give specific, strong, accurate examples from the text

**Reader responses**
- clearly show how literary elements and devices add to the impact of the text
- provide some examples from the text

**Reader responses**
- give an incomplete or token explanation for how literary elements and devices add to the impact of the text  
  OR
- identify literary elements and/or devices without any explanation
- have very few examples from the text

**Reader responses**
- show little or no awareness of literary elements or devices in the text
- give no examples from the text or very brief, possibly incorrect examples

Introduction to the Reading Scoring Guide Workshop – Level 2
Reading Work Samples and Instruction

Why would a teacher assign work samples?

1. Work samples increase reading comprehension.

2. Interacting with the text is a truly effective strategy that proficient readers use. Work samples encourage students to stay engaged with the text.

3. Completing work samples at earlier grades:
   a. builds a reader’s confidence that he/she can understand complex text, and
   b. builds the stamina needed to persevere when the text is difficult.

4. If a student is assigned a work sample at grade twelve without any previous experiences with work samples, they are less likely to succeed. Students need practice and experience.

5. Using work samples in the classroom allows for differentiation of instruction—they appeal to and stimulate all different types of learners and can be tailored to the student’s independent reading level.

What constitutes a reading work sample?

1. It includes a reading passage.
   a. The passage can be either an informational or literary passage
   b. Prose selections may be approximately 1000 to about 2000 words in length. Poetry and drama that reflect appropriate length and complexity may also be used.
   c. Grade level reading materials are used for practice.
   d. High School level materials (in the 950-1200 Lexile® range) are used for official reading work samples.

2. Space along the right margin for interacting with the text (a place to write notes, comments, and questions).

3. The text is followed by a series of prompts designed to help the student show evidence of Demonstrating Understanding, Developing an Interpretation, and Analyzing Text. These prompts may include:
   a. open-ended questions.
   b. graphic response items.
