This document has been adapted for use by the Oregon Department of Education for Oregon educators. The following document contains information about essential English Language Arts and Literacy content for the 2020-2021 school year.
Introduction

What is the purpose of this guidance?

The intention of this guidance is to inform and influence the decisions of the following:

- Publishers of instructional materials: to design modifications to mathematics and ELA/literacy instructional materials for the 2020–21 school year.
- District mathematics and ELA/literacy leaders: to design modifications to scope and sequence documents, to design professional learning scope and sequence for teachers, to design modifications to district-created instructional materials where used, and to support administrators in implementing equitable instruction and equitable structures.
- State education agencies: to support districts in planning and decision-making for instruction.
- Providers of professional learning for teachers: to design modifications to professional learning curricula for the summer of 2020 and the 2020–21 school year.

This guidance has been developed in response to current conditions. These documents are not criteria, and they do not revise college- and career-ready state standards. This guidance does not stand alone but is to be used in conjunction with those standards. This guidance does not attempt to repeat what standards already say, nor does it mention every opportunity the standards afford to make coherent connections within a grade or between one grade and another. Further, leveraging the focus and coherence of high-quality instructional materials aligned to college- and career-ready state standards is more important than ever.

This guidance was developed with additional principles specific to current needs:

- Generlizability and usability. The recommendations should allow a variety of decision makers to implement valuable changes to instructional materials and instructional planning.
- Flexibility. The 2020–21 school year is uncertain in terms of what schooling looks like; therefore, guidance should not specify pedagogy or make assumptions that learning is happening in physical classrooms with a designated content teacher.
- Social, emotional, academic considerations. While this guidance does not address the many considerations of instruction in full, the grade-band and grade-level considerations include practical ideas for attending to students' social-emotional development in the context of teaching the academic content described. Emotional health and well-being of students is a central concern of educators, particularly given the pandemic, and these suggestions demonstrate ways in which social, emotional, and academic development can be fostered in the context of grade-level college- and career-ready content. These suggestions have been informed by Supporting Social, Emotional, & Academic Development: Research Implications for Educators from the University of Chicago Consortium on School Research.
This guide is intended to complement resources being released by the Oregon Department of Education to address the challenges of prioritizing instruction and addressing unfinished learning and the social-emotional and mental health needs of students. The common messages found across these materials illustrate a consensus in the field around the importance of safeguarding equity and access in the wake of the COVID-19 crisis.

**English Language Arts/Literacy Grade-Band Essential Instructional Content for the 2020–21 School Year**

**Focus on Standards That Represent the Major Work of ELA/Literacy Instruction: Learning to Read, Close Reading of Complex Texts, and Volume of Reading to Build Knowledge**

Not all content in a given grade should be emphasized equally. Some standards require greater emphasis than others based on the literacy research about what matters most and the time and practice that they take to develop. These two literacy components of a text-centered, rich ELA/literacy classroom experience lead the way to identifying the Major Work of ELA/literacy instruction across the grades:

- In grades K–12, these instructional practices are best exemplified by 14 CCR standards (and the research that supports them) – CCSS RF.4, L.4, L.5, L.6, RI.1, RI.4, RI.9, RI.10, RL.1, RL.4, RL.10, SL.1, W.8, and W.9. They cross the domains of reading, writing, speaking and listening, and language.

- In grades K–3, learning to read—the foundational standards, and the sequence of skills they point to—reign supreme (RF.1, RF.2, RF.3, and RF.4). In parallel, students should have a volume of reading that is topically connected to the anchor texts or topics under study to build knowledge and be exposed to academic language in the content areas. That volume of reading needs to be at a range of complexity levels so every student can read with minimal or no teacher support. Much of this volume should be with information-rich text, either full-length books or conceptually connected shorter texts (groups of texts that cohere together to create a picture of a topic).

By emphasizing these 14 standards, students can legitimately focus on the Major Work of ELA/literacy instruction for the grade. The standards get progressively more challenging and nuanced annually, but they all echo each other as students move through the grades.

**Use Remaining Standards to Support the Major Work of ELA/Literacy Instruction**

When confident that students are progressing in their ability to read with understanding, teachers can plan instruction that intentionally includes supporting standards—represented by the more than two dozen remaining standards in each grade level—to engage students more fully in the Major Work of the Grade. The supporting standards can be incorporated into instruction in service of the major 14
standards. For instance, in close reading lessons, supporting reading standards can help generate an effective sequence of text-specific questions that target central ideas, text structure, author’s purpose, and the like, to guide students in exploring and extracting the key ideas of texts. Likewise, when devising writing assignments, the supporting standards can help guide the qualities of explanations or arguments that students should be reaching for in one grade or another.

**Attend to Students’ Social, Emotional, and Academic Development**

Within classrooms, within schools, attention must be given to restoring relationships and a sense of community, so students feel safe, fully engage and work hard. We need to help students know that we believe they can succeed and that their ability and competence will grow with their effort. Efforts should be made to facilitate SEAD even in remote learning environments, using synchronous and asynchronous approaches and the capabilities afforded by remote learning technologies.

The tables that follow include a description of what to do, why to do it, and specific suggestions within each grade band for how to integrate social-emotional academic development into ELA/literacy instruction.

**How should literacy assessment be considered in light of this instructional guidance?**

Grasping where students are vis-à-vis accessing grade-level texts and content is of great importance both as students return to school and move through the school year.

- In grades K-2: ongoing measurement of foundational skills to support students’ decoding and fluency development.
- In grades 2-12: periodic measurement of fluency with grade-level text to monitor progress and provide additional supports.
- In grades K-12: pre-assessing knowledge of the topics of the complex texts under study to determine how to bring students into the unit of study, not whether to bring them into it.
Grades 9-12 ELA/Literacy Considerations for the 2020-21 School Year

At this level, students are expected to understand more from and make fuller use of written materials, including using a wider range of text evidence to support their inferences. As they address different aspects of the same topic, students make more connections about how complex ideas interact and develop within (and across) books, essays, articles, or other resources. Students learn to evaluate intricate arguments and surmount the challenges posed by complex written materials and other resources independently and confidently. Through wide and deep reading of literature and literary nonfiction of steadily increasing sophistication, they expand their literary and cultural knowledge and better understand references and images. They also work to develop the flexibility, concentration, and fluency to produce logical, well-reasoned writings and presentations that are supported by evidence. By writing and participating in a variety of conversations, they will practice asserting and defending claims and showing what they know about a subject using appropriate examples and evidence. These literacy practices that allow students to gain knowledge and skills through the careful study of texts and topics are not only left to ELA, but should also find their rightful place as practices required by the disciplines in science, technical subjects, history, and social studies.

Keep Grade-Level Complex Text at the Center of Reading, Writing, Speaking and Listening, and Language Instruction

Regular Close Reading of Grade-Level Complex, Anchor Texts
See RL.10 and RI.10 for specific guidance from each of grades 9-12.

Considerations for Instructional Content and Practices

- Focus all students on the same rich, grade-level anchor texts as defined by the quantitative chart below and the qualitative features of texts (such as meaning, structure, language, and knowledge demands). Focus on these anchor texts multiple times a week35, as school disruptions allow.
- Organize units around conceptually-related topics (and content-rich themes for literary texts) that build knowledge through anchor texts and volume of reading. Set aside skills-paced calendars.

35 Suggestions included throughout on the regularity with which practices should be undertaken reflect in school times and patterns. These should be moderated as school disruptions require.
• Provide and adjust instructional scaffolds so every student can engage with grade-level texts, rather than restrict students to texts at their prescribed independent reading level. Scaffolds could include building knowledge about the topic of the text under study, providing access to texts read aloud, etc. *36

<td>1185–1385</td>
</tr>
</tbody>
</table>

When selecting anchor texts, also consider qualitative features of texts (such as meaning, structure, language, and knowledge demands).

**Sequences of Text-Specific Questions and Tasks to Support Close Reading**
See RL.1 and RI.1 for specific guidance from each of grades 9–12 – Text Evidence.

**Considerations for Instructional Content and Practices**

• Provide sequences of questions that engage students deeply with the text and build understanding.
• Design instruction to cultivate every student’s ability to read carefully and grasp information—both what the text says explicitly and when drawing inferences from texts.
• Encourage students to cite specific text evidence (quotes and examples) when supporting their own points in writing and speaking, making their reasoning clear to the reader or listener and constructively evaluating others’ use of evidence.*
• Provide time for students to engage meaningfully with the anchor text by reading or rereading portions.

**Systematic Work with Text-Based Vocabulary and Syntax**
See RL.4, RI.4, L.4, L.5 and L.6. for specific guidance from each of grades 9–12 – Vocabulary and Syntax Important to Comprehension or Expression.

**Considerations for Instructional Content and Practices**

36 Asterisks (*) are placed by instructional content and practice that contribute to students’ sense of belonging, efficacy, effort and growth, as well as a sense of engagement in work that is relevant and culturally responsive. These reflect the samples included in “Facilitate SEAD Through Close Reading of Complex Texts.”
- Use text-based questions and tasks to focus on academic and domain-specific words that merit more attention (e.g., critical for understanding the text, part of large word families). Do this rather than memorizing text-agnostic word lists.
- Provide supplemental practice on text-based vocabulary through games, exercises, and focus on word parts and their morphology.
- Encourage the use of the targeted words from the anchor text throughout discussions and writing assignments.
- Regularly—daily if possible—choose one complex and compelling sentence from the anchor text to deconstruct and reconstruct with students.

**Frequent Evidence-Based Discussions About Grade-Level Anchor Texts**
See SL.1 for specific guidance from each of grades 9–12 – Conversations and Collaborations Centered on Evidence.

**Considerations for Instructional Content and Practices**

- Design daily opportunities for students to process and extend their learning through collaborative, small-group, or partner text-based discussions.*
  - Make strategic use of peer partnerships to promote as much productive talk as possible.*
  - Have students reflect on each other’s thinking using evidence, as well as considering and challenging others’ perspectives.*
  - Teach the language of argumentation to facilitate students taking positions on what they’re reading and hearing from others.

**Regular Evidence-Based Writing About Grade-Level Anchor Texts**
See W.9 for specific guidance from each of grades 9–12 – Writing to Evidence.

**Considerations for Instructional Content and Practices**

- Connect writing to what students are reading to deepen comprehension, check for understanding, and ensure all students have equal access to the topic on which they’re writing.*
- Include writing assignments connected to the literary texts students are reading that target perspective-taking and exploring the emotions and motivations of characters as an on-ramp to self-exploration and reflection.*
- Reserve non-text-based writing tasks to advance specific goals rooted in social-emotional learning (reflect on feelings, foster artistic expression, writing personal stories).*
- Vary writing assignments (short on-demand pieces or longer multi-day pieces) throughout the week, if possible.
**Fluency Practice With Grade-Level Anchor Texts**
Extend RF.4 through grades 9-12 - Fluency of Grade Level Text.

**Considerations for Instructional Content and Practices**
- Engage in fluency exercises—daily if possible—through regular and repeated readings of texts. (This includes all students except those who demonstrate oral fluency with grade-level texts.)
- Attend to prosody (pitch, stress, and timing) as students read aloud.
- Fulfill public speaking demands by having students select grade-level seminal texts and speeches to practice and perform with peers.*
- Ensure students have time to discuss the meaning of the text and address text-based vocabulary as needed, even when improving fluency is the focus.

**Facilitate SEAD Through Close Reading of Complex Texts**
Sample actions for how SEAD can be effectively integrated in ELA/literacy instruction:
- Ensure anchor texts throughout the curriculum reflect and reveal accurately a multicultural world and resonance with learners.
- Include perspective-taking in the study of literary texts by attending to how characters might think and feel to support understanding emotions and thoughts. Perspective-taking can also be included with informational text to similarly highlight multiple perspectives, or investigate claims, purpose, and reasoning of an author or topic.
- Empower students to monitor their own comprehension and fluency through cycles of action and reflection.
- Provide a variety of text-dependent writing, speaking, performance, or multimedia task options for students to express their comprehension, knowledge and skills.
- Establish student discussion protocols to facilitate evidence-based discourse about text that supports active listening, values diverse perspectives and insights, and ensures there is equity of voice and responsibility.
- Include collaborative conversations that require students to integrate the perspective of their peers into their own critical thinking.
- Encourage students to draw on their emotional and empathetic skills as they orally express their thoughts, feelings, ideas, and arguments.

**Rationale and Research**

**Regular Close Reading of Grade-Level Complex, Anchor Texts**
- The complexity of the text is the element that most differentiates performance, not the skills supposedly captured in the verbs used to describe the skills (ACT, 2006).
Providing readers not yet reading at grade level with complex texts improves their achievement. Leveled reading approaches are not based on evidence; those approaches stunt the growth of students’ reading comprehension and create inequitable outcomes (Brown et al., 2018; Morgan et al., 2000).

Students cannot learn how to comprehend complex text independently unless they are given complex text to read (Shanahan et al., 2012).

Sequences of Text-Specific Questions and Tasks to Support Close Reading

- Students (all people) understand and remember what they pay attention to and think about. Attending to evidence in text leads to understanding and retaining text content (Willingham, 2010).
- Text-dependent questions and tasks can also serve as a scaffold to ensure that students are fully understanding the text under study, keeping the text at the center of instruction (McKeown et al., 2009).

Systematic Work with Text-Based Vocabulary and Syntax

- Robust academic language gives students access to complex texts and allows them to write and communicate with precision. The things we know have to be named and described by words when encountered in print (Adams, 2011).

Frequent Evidence-Based Discussions About Grade-Level Anchor Texts

- Evidence-based discourse with text-dependent questions is both a scaffold to and a goal of literacy development. Processing evidence found in text through oral discourse results in deeper comprehension of text than strategies-based approaches (McKeown et al., 2009).

Regular Evidence-Based Writing About Grade-Level Anchor Texts

- Writing about what students have read, educators ensure that all students have the knowledge needed to focus on writing craft. (Hawkins et al., 2008).
- Writing about texts is one of the most effective things that students can do to improve their reading comprehension and knowledge (Burke & Gilmore, 2015; Willingham, 2010).

Fluency Practice With Grade-Level Anchor Texts

- Reading fluency has a direct correlation with reading comprehension. Dysfluency causes as much as 40% of the variance in student performance (Pinnell et al., 1995).
- Reading prosody and word identification accuracy predicts more than half of the variance in a standardized test of reading comprehension administered to struggling ninth-grade readers. Many students can experience reading improvement in minutes (Paige & Magpuri-Lavell, 2014).
Build Knowledge Through Reading, Writing, and Speaking about Topics Under Study in ELA, History, Science, and Technical Subjects

Regular Reading of Multiple Texts and Media on a Range of Conceptually Related Topics
See W.8 for specific guidance from each of grades 9–12 – Research and Wide Reading on Topics; CCSS-Distribution of Literary and Informational Passages.

Considerations for Instructional Content and Practices

- Choose content-rich informational texts that are topically connected to the anchor texts or topic under study to build students’ knowledge about the topic and maximize their breadth of exposure to academic vocabulary.
- Offer students texts that span a range of complexity levels so they can read the texts independently, with peers, or with modest support.*37 This should include a balance of literature and informational texts across content areas of ELA, science, history, the arts, and technical subjects.

Regular Research, Discussion, and Writing About Topics
See W.8 for specific guidance from each grade level – Research and Wide Reading on Topics. See SL.1 for specific guidance from each of grades 9–12 – Conversations and Collaborations Centered on Evidence and Research. See also RI.9 from each of grades 9–12 – Integrating Information and Knowledge From Texts on the Same Topic.

Considerations for Instructional Content and Practices

---

37 Asterisks (*) are placed by instructional content and practice that contribute to students' sense of belonging and safety, efficacy, value for effort and growth, as well as a sense of engagement in work that is relevant and culturally responsive. These reflect and bolster the samples included below in the section titled “Facilitate SEAD Through Close Reading of Complex Texts.”
● Ask students regularly to research, then express—orally and in writing—information gained from multiple texts and auxiliary resources (e.g., illustrations, video clips, maps) to build knowledge on a topic.*

● Promote independent reading by providing options for students to choose topically connected texts. (These can be driven by student interest, topic of anchor text, and course content.)*

● Integrate what students have just read (and learned) with what they have previously read (and learned) to build a more coherent understanding of a topic. Design collaborative, small-group, or partner discussions on topics for students to process and extend their learning.*

● Add lightweight student accountability for regularly engaging in a volume of reading both assigned (related to the topics and themes being studied) and chosen by students.

**Facilitate SEAD Through Research, Writing, and Speaking About a Volume of Topically Connected Texts**

Sample actions for how SEAD can be effectively integrated in ELA/literacy instruction:

● Ensure instruction and materials are responsive to students’ existing funds of knowledge as well as connecting students to a shared knowledge of the world through the study of conceptually coherent topics.

● Anchor topical knowledge building in collaborative opportunities for students to conduct research while practicing cooperation, communication, innovation, reflection, self-regulation, and empathy.

● Create space and opportunity for students to identify and explore their own interests and fascinations.

● Develop and strengthen writing in response to feedback from others or after recognizing independently that another approach is indicated in light of audience and purpose.

**Rationale and Research**

**Regular Reading of Multiple Texts and Media on a Range of Conceptually Related Topics**

● Knowledge of a subject aids thinking, memory, and learning of new information (Willingham, 2006).

● Reading ability and knowledge about the world are tightly connected (Kintsch, 1998).

● Students’ knowledge of the topic has been shown to have a greater impact on reading comprehension than generalized reading ability (Recht & Leslie, 1988).

● Informational texts are excellent sources from which students can learn about the world and how things work; they can be used to systematically build students’ cumulative knowledge over time (Hirsch, 2006).
Regular Research, Discussion, and Writing About Topics

- Building knowledge and domain-specific vocabulary play an essential role in the literacy development of students. To build this essential knowledge and vocabulary, students must read, analyze, discuss, and write about a range of conceptually coherent topics (Cervetti et al., 2016; Landauer & Dumais, 1997).
- It is through volume and range of writing that students gain mastery of a variety of writing skills and applications. (Burke & Gilmore, 2015; Willingham, 2010). When students do the grappling and the heavy-lifting, new skills and content stick.
- Students learn significantly more vocabulary when they read texts about conceptually coherent topics for a period of time (Cervetti et al., 2016; Landauer & Dumais, 1997).
