

DID YOU KNOW?

Did 9G-OTG outcomes continue to rebound after the COVID-19 pandemic?

Post-COVID 9G-OTG Outcomes

- ✓ Descriptive 9th grade on track to graduation (9G-OTG) outcomes before and after the COVID-19 pandemic are presented in the figure to the left.
- ✓ In the year following the start of the COVID-19 pandemic (2020-21), the drop in 9G-OTG rates was consistent with the decline in many national and local educational indicators during that time period.
- ✓ While results show a 10% drop in 9G-OTG rates for the 2020-21 school year, 9G-OTG rates returned to pre-pandemic levels by 2021-22.
- ✓ **Notably, 9G-OTG rates continued to rebound in 2022-23, eclipsing pre-pandemic levels. The 2% increase in 9G-OTG between 2021-22 and 2022-23 equates to over 650 additional 9th grade students being on-track to graduate.**

Note. Data from the 2019-20 school year were not available due to pandemic era impacts on school operations.
