# Executive Summary

Oregon school districts are required to report to the Department of Education students who are identified as dropouts, as defined in statute (ORS 339.505). Briefly, a dropout is a student who withdraws from school without receiving a high school diploma, GED Certificate, or alternative award. A variety of information is provided on each student; this makes it possible to describe dropouts with respect to several characteristics.

The Department of Education summarizes these reports on dropouts in grades 9 through 12 at the school, district, county and state levels. This is the ninth annual summary of dropout rates and characteristics.

In summary, the statewide annual dropout rate was 6.88 percent in the 1997-98 academic year. The four-year dropout rate for the class of 1998 is 25.56 percent. This is the second year under the new dropout definition enacted by the 1997 Legislative Assembly. Previously, dropouts included students who had obtained a GED certificate.

Additional findings include:

- A dropout rate for Hispanic students that is more than double the overall statewide rate.
- Asian Americans continued to have the lowest dropout rate.
- A significant deficiency in credits toward a high school diploma.
- One third of dropouts were enrolled in the school district one year or less.
- Eight percent of the dropouts attended four years of high school but did not meet graduation requirements and did not return in the fall.
- Reasons for leaving most often cited by school personnel include: working more than 15 hours a week, frequent discipline referrals, substance abuse, pregnant or student parent, and conflicts with school staff.
- Reasons for leaving most often expressed by students include: irrelevant coursework, peer pressure to not achieve, different learning styles, and lack of personal attention in class.
- The historical relationship between the statewide unemployment rate and the percent of juniors and seniors who withdraw from school suggests that the availability of jobs has a strong influence on the dropout rate.

# Dropout Rates in Oregon High Schools 1997 - 1998

## Introduction

Since 1987, the State Board of Education has required that school districts report information about students who are identified as dropouts (OAR 581-23-006). The rule specified a standard reporting schedule, with a provision to amend a previous dropout report when a student re-enters school. The Student Accounting System became effective on July 1, 1988.

The 1991 Legislative Assembly codified the Student Accounting System in statute (ORS 339.505 to 520). The goals of the system are as follows:

- Provide a timely accounting of students who withdraw from school before graduating or completing the normal course of study;
- Report reasons why students withdraw from school;
- Identify patterns in the information and factors that may assist the Department and the school district to develop programs addressing the problems of dropouts; and
- Provide school districts with management tools for assessing which students are dropouts and why they drop out. (ORS 339.510)

As defined in statute, “school dropout” means an individual who:

- Has enrolled for the current school year, or was enrolled in the previous school year and did not attend during the current school year;
- Is not a high school graduate;
- Has not received a General Education Development (GED) certificate<sup>1</sup>; and
- Has withdrawn from school.

“School dropout” does *not* include a student described by at least one of the following:

- Has transferred to another educational system or institution that leads to graduation and the school district has received a written request for the transfer of the student’s records or transcripts.

---

<sup>1</sup> Amendment enacted by the 69th Legislative Assembly, SB 217.

- Is participating in home instruction paid for by the district.
- Is being taught by a private teacher or parent pursuant to ORS 339.030 (3).
- Is participating in a Department of Education-approved public or private education program, including an alternative education program, a Department of Human Resources facility or a hospital education program.
- Is temporarily residing in a juvenile detention facility or a Children’s Services Division certified shelter care program.
- Is enrolled in a foreign exchange program.
- Is temporarily absent from school because of suspension, a family emergency, or severe health or medical problems which prohibit the student from attending school.
- Has received a General Educational Development (GED) certificate.<sup>2</sup>
- Is deceased.

## **Implementation of the Student Accounting System**

The Department of Education provides schools with reporting forms, along with a manual on the Student Accounting System. Department staff also conduct training workshops at locations around the state.

In November 1993, the Legislative Fiscal Office conducted a limited audit of the dropout data for 1991-92, published in February 1993. The audit evaluated the accuracy of reporting in six high schools and investigated whether dropout reporting had become standardized and accepted by Oregon schools. The report of the audit concluded that “the dropout report is reliable, and the statewide average computed by the Department of Education should be used as a benchmark for evaluating future changes in the Oregon dropout rate.”

The data reported here are derived from reports due on June 30, 1998. The reporting period covers students who withdrew from school between July 1, 1997 and June 30, 1998. During the fall of 1998, school administrators verified by name the students they had reported to the Department of Education and corrected any reporting errors.

---

<sup>2</sup> Amendment enacted by the 69th Legislative Assembly, SB 217.

## Findings for the 1997-98 School Year

By June 30, 1998, a total of 10,947 high school students had dropped out of school in the preceding twelve months.

### Annual High School Dropout Rate

As of October 1, 1997, a total of 159,121 students were enrolled in Oregon's public schools, grades 9 through 12. These students constitute the base population used to calculate the annual dropout rate. The number of dropouts (10,947) divided by the base population (159,121) yields a statewide dropout rate of 6.88 percent for the 1997-98 reporting period. The number of dropouts and dropout rates, by school, are shown in Table 1. The number of students dropping out of grade 7 and 8 is shown by school in Table 6 along with corresponding dropout rates.

Some students left the K-12 system without graduating, but are not dropouts. These are students released to a child-caring facility, students who are deceased, registered home schoolers, and students who received an adult high school diploma or a GED certificate. There were 2,296 students in this category, and their numbers are listed, by school, in Table 1.

### Synthetic Four-Year Dropout Rate

Using a method developed by the National Center for Education Statistics, it is possible to compute a "synthetic" four-year dropout rate, using data from a single year. The four-year dropout rate for the class of 1998 is 25.56 percent. Synthetic four-year dropout rates are shown by school in Table 1.

## Dropout Rate by Racial/Ethnic Group

School officials classified dropouts according to five racial/ethnic categories, allowing the calculation of dropout rates for each group. In the above chart, the years 1991-92 through 1995-96 use the old definition, while 1996-97 and 1997-98 reflect the new definition (excluding GED recipients from the count of dropouts). Nevertheless, a similar pattern of differences among the groups is repeated, with Hispanic students having the highest dropout rate. Dropout rates by race/ethnicity are not calculated below the state level, because the smaller numbers involved could lead to misleading percentages. The number of dropouts by sex, race/ethnicity, and grade are shown in Table 2. Data for certain schools is suppressed in this table to maintain student confidentiality.

## Gender Differences

Males had a somewhat higher dropout rate (7.4 percent) than females (6.3 percent). This finding is consistent with reports from prior years.

## Number of Dropouts Grouped by Class Standing and Credits Earned

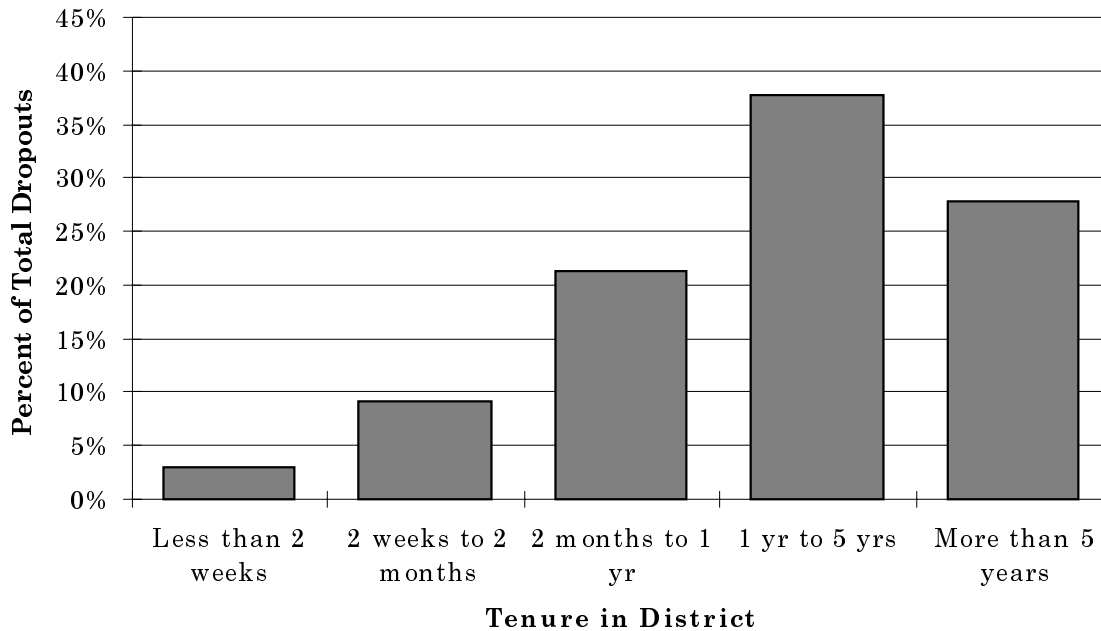

Class standing was assigned to dropouts in two ways: (1) the grade attained by the student according to his or her age, assuming a normal school entry age and annual grade promotions, and (2) grade placement as a percent of the required credits earned at the time the student withdrew from school (e.g., dropouts with less than 25 percent of the required credits would be classified as 9th graders, those with more than 25 percent but less than 50 percent would be classified as 10th graders, and so on).

Students were classified according to whether their class standing by credits earned was consistent with their class standing by age. If so, they are termed “on track.” Students could also be classified as one to four years behind in credits required for graduation.

Fifty-nine percent of those who dropped out were classified as seniors (or older) according to their age, but only five percent of this group had enough credits to be regarded as seniors. Among all dropouts, only 13 percent were classified “on track.” Thirty-four percent were one year behind, 29 percent were two years behind, 15 percent were three years behind, and nine percent were four years behind.

Other studies have pointed out that dropouts often cite being behind in credits or failing classes as the primary reason for leaving.

## Percentage of High School Dropouts by Tenure in District

Students who dropped out of high school tended to be a mobile group. Of those who dropped out, 34 percent were enrolled in the reporting school district for a year or less. About 28 percent of the dropouts had been in the same district for more than five years, and about 38 percent had been in the same district one to five years.

High mobility may contribute to the lower than normal accumulation of credits needed for graduation by reducing the opportunity to complete classes on a regular schedule. Social integration and involvement in extracurricular activities may also be more difficult for students who move from school to school.

Tenure of dropouts by school is shown in Table 3, along with circumstance surrounding their withdrawal - where dropouts were at the time they withdrew.

## Percentage of High School Dropouts Classified by Month Withdrawn from School

The high withdrawal rate in September is due to the number of students who did not return to school after the summer. A total of 2,082 students (19 percent of dropouts) were reported as “no shows.” An additional 866 (8 percent) were non-graduates who attended four years of high school, but did not return during the summer or fall term to finish their diploma requirements.

## Reasons for Dropping Out

School personnel were asked to indicate the reasons contributing to the student's withdrawal from high school. The table below lists the factors and the number of students for whom the factor was cited as affecting the decision to drop out.

<u>Factor</u>	<u>Total Number of Students</u>
<b>Staff Determined:</b>	
Working more than 15 hours a week	1,357
Frequent discipline referrals	991
Substance abuse	820
Pregnant or student parent	726
Obligations to support family	384
Health problems caused frequent absences	363
Did not get along with school staff	350
Attended 3 or more high schools	289
Does not speak English well or at all	256
Homeless	244
Expelled and did not enroll in alternative ed	95
<b>The Student Felt:</b>	
Course work was not relevant	1,234
Peer pressure to not achieve	530
Teaching techniques did not match learning style	392
Lack of personal attention in class	273
Threatened by other students	62
Lack of support for cultural identity	36

The above table reflects the relative prevalence of the factors listed, but does not indicate the incidence of these factors among the total population of dropouts. This is because school staff could not determine a reason for leaving in all instances.

Table 4 lists the factors reported, by school. Not every dropout had factors indicated, and more than one factor could be indicated for any dropout. Factors were reported for 6,541 dropouts, or 59%. For this reason, data in this table cannot be used to compare one school with another. Data for certain schools is suppressed in this table to maintain student confidentiality. Table 5 lists factors at the state total level by sex, by race/ethnicity, and by grade.

## Relationship Between Unemployment Rate and Withdrawal During Junior and Senior Years

Working more than 15 hours a week was the most frequently cited reason for leaving (see page 8 of this report). This suggests that the availability of jobs might be a contributing factor in Oregon's dropout rate. The above chart displays the relationship between Oregon's unemployment rate and the percentage of students who withdraw during their junior or senior years.

The withdrawal percentage is the difference between the number of 11th graders on October 1 and the number of graduates of that class two years later, divided by the October 1 count. Oregon unemployment rates are averaged over the corresponding two years.

The chart suggests that in years when the statewide unemployment rate declines, the junior/senior year withdrawal rate increases, and conversely, when unemployment increases, a smaller percentage leave school without graduating. The high percentage of students who are September "no shows" (see page 7) may indicate a connection between employment opportunities and dropping out.

In November 1991 the Oregon Bureau of Labor and Industries issued a Report of the Child Labor Task Force. The report studied the impact of work on students. Students who worked 15 hours or more per week in jobs not connected to their course of study had lower school performance, attendance and completion rates.

## Number of Dropouts by Age and Sex

The above chart shows the number of dropouts by age and sex. Forty-four percent of all dropouts were 16 or younger. Through age 15, more girls than boys dropped out, but at age 16 and above, boys outnumber girls by a ratio of 1.37 to 1.

The number of boys and girls dropping out at age 15 is almost the same. At age eighteen, the number of boys dropping out is much higher, while the number of girls dropping out is almost unchanged.

By age 19, the number of dropouts is much smaller. By that age, most students have already graduated or dropped out.

Note: Not every dropout had factors indicated, and more than one factor could be indicated for any dropout. For this reason, this data should not be used to compare schools.

Data for some schools has been suppressed to protect student confidentiality.

## Appendix A

### The Synthetic Four-Year Dropout Rate

The dropout reporting system collects data on students dropping out in one school year. The data for one year can be displayed as a four-year rate by using the following formula:

$$R = 1 - (1 - R_9)(1 - R_{10})(1 - R_{11})(1 - R_{12}), \text{ where}$$

$R$  = four-year synthetic dropout rate,

$R_9$  = dropout rate for grade 9,

$R_{10}$  = dropout rate for grade 10,

$R_{11}$  = dropout rate for grade 11,

$R_{12}$  = dropout rate for grade 12.

The measure provides a synthetic cumulative dropout rate for grades 9 through 12. It represents the proportion of the ninth-grade class that would drop out prior to graduation if that year's grade-specific rates were to remain constant in subsequent years.

Example:

Grade	Students	Dropouts	Dropout Rate
9	89	3	3.4%
10	82	4	4.9%
11	80	6	7.5%
12	75	9	12.0%

$$R = 1 - (1 - .034)(1 - .049)(1 - .075)(1 - .12)$$

$$R = 1 - (.966)(.951)(.925)(.880)$$

$$R = 1 - .748$$

$$R = .252 \quad (25.2\%)$$

## We would like to hear from you!

We would like to know how your organization uses the dropout data collected on the Individual Early Leaver Report form.

Please take a few moments to fill out and return this survey. We value your response.

A. School district: \_\_\_\_\_  
(name)

- |  | Yes                      | No                       |
|--|--------------------------|--------------------------|
| Is the data discussed with your Board at a regular meeting?  | <input type="checkbox"/> | <input type="checkbox"/> |
| Is the data used in writing your district's Consolidated District Improvement Plan?                  | <input type="checkbox"/> | <input type="checkbox"/> |
| Is the data used in writing grant applications?  | <input type="checkbox"/> | <input type="checkbox"/> |
| Is the data used to help create dropout prevention programs in your district?                        | <input type="checkbox"/> | <input type="checkbox"/> |
| Is the data used to help decide which alternative education programs to create in your own district? | <input type="checkbox"/> | <input type="checkbox"/> |

What would make the data more useful to you? (Comment)

B. School: \_\_\_\_\_  
(name)

- |   |                          |                          |
|---|--------------------------|--------------------------|
| Is this data presented to school staff at a formal meeting?   | <input type="checkbox"/> | <input type="checkbox"/> |
| Is this data used to help create dropout prevention programs in your school?  | <input type="checkbox"/> | <input type="checkbox"/> |
| Is the data used to assist in making alternative education placements for individual students?                          | <input type="checkbox"/> | <input type="checkbox"/> |
| Is the data used in writing grant applications?   | <input type="checkbox"/> | <input type="checkbox"/> |
| Is the data shared with the school site council?  | <input type="checkbox"/> | <input type="checkbox"/> |
| Is the data shared with parents?  | <input type="checkbox"/> | <input type="checkbox"/> |
| Is the data shared with other community agencies or with groups such as Youth Services Teams, Advisory Committees, etc. | <input type="checkbox"/> | <input type="checkbox"/> |

What would make the data more useful to you? (Comment)
