

# DID YOU KNOW?

## Success Team Implementation

As districts had flexibility in the use of Measure 98 funding for student success programming, the implementation of success teams varied:

### **Full implementation:**

- Ninth grade academic coaches were hired and trained with Measure 98 funds
- Data system investments and usage plan were approved and implemented
- Awareness of the importance of graduation readiness was raised with teachers, students, and parents

### **Partial implementation:**

- Measure 98 funds were allocated to data systems for tracking student metrics and raising awareness
- Funding was reserved for other innovations at later high school grades

### **No implementation:**

- Measure 98 funds were not used for any 9<sup>th</sup> grade student success team programming

### **Why might schools not utilize Measure 98 funds for student success teams?**

- Districts invested in other student success initiatives such as career and technical education (CTE) or college level educational opportunities that better served the district's needs
