

DID YOU KNOW?

Was student success team implementation associated with 9G-OTG rates?

Pre-COVID Analyses

- ✓ We tracked 9G-OTG rates prior to passage of Measure 98 (2013-14 to 2016-17) and after funds were allocated for student success programming (2017-18 to 2018-19) as a function of success team implementation.

Pre-COVID Results

- ✓ In the figure to the left, no-, partial-, and full-implementation schools are shown to differ in 9G-OTG rates before passage of Measure 98.
- ✓ After Measure 98, 9G-OTG rates held steady in full and partial implementation schools, but they began to drop in schools that did not implement student success teams.
- ✓ By the end of the 2018-19 academic year, the differences in 9G-OTG rates between school types were no longer statistically significant.
