## Mock-Up of Report Card

- This is just an example. We will need to develop a process of engaging stakeholders for determining the dashboard look and feel, including accessible access, readability, usability, and more.
- Additional data available on “details” reports and on the web
- Displays a more holistic picture of schools and districts – what’s working well and where there’s room for improvement
- Creates an opportunity for communities to have better, more transparent conversations about their data
- Considering adding a “well-rounded” education section for local data

## Accountability Indicators
