

School Safety and Emergency Management

SSEM Recommended Training Calendar:

Before the school year:

- EOP/SRP Review for all staff. What are the drills and how do they work?
- First Aid training covered for required staff members.
- Training specific to support staff—roles and responsibilities during emergency drills.
- TTX for leadership—before in-service.
- Review and update MOU/MOAs.
- Review and update COOP.
- Update PEEPs and drill special procedures for access and functional needs students.

August/September; beginning of year: Safety Drills

- Conduct an Evacuation Drill and a Lockdown Drill.
 - Coordinate with local emergency responders to review and participate.
- SRP training and review of all protocols: Lockdown, Secure, Hold, Evacuate, Shelter-in-place.
- Place posters in classrooms and in high-traffic areas.

October: Earthquake Awareness Month*

- Conduct an Earthquake Drill. Recommend following up with an Evacuation Drill.
- Review ICS for leadership:
 - How will the district handle a catastrophic earthquake event?
 - How will the district coordinate response and recovery efforts?
- ICS for planned events:
 - Use an ICS structure for homecoming or other planned events.
 - Coordinate with local first responders to provide support.

November: Cold Weather Preparedness Month

- Conduct a Shelter-in-place Drill.
- Review hazardous material storage and handling.
- Review communications plans and identify contingencies for holding students due to an extreme weather event.

December: Slips, Trips and Falls Prevention Month

- Conduct a Secure Drill.
- Review best practices for walking and travelling in icy conditions (walk like a penguin).
- Conduct table top exercise on transition from Secure Drill to controlled release or remote site reunification.

School Safety and Emergency Management

January: Cascadia Awareness Month*

- Conduct an Earthquake or Tsunami drill.
- Review local and regional risks and hazards associated with a Cascadia event.
- Review or update Reunification or Emergency Shelter plans:
 - Coordinate with local emergency responders on shelter and reunification plans.

February: Threat and Hazard Awareness Month

- Conduct a Secure or Hold Drill.
- Review external threats and hazards.
- Conduct a staff site safety assessment to identify hazards—have students and staff practice looking for environmental hazards that can be corrected.

March: Transportation Safety Month

- Conduct an Evacuation Drill.
- Review transportation safety procedures and consider conducting bus evacuation drills.
- Review bus routes

April: Violence Prevention Month

- Conduct a Lockdown Drill.
- Review or conduct first aid training.
 - Coordinate with local health authority or Red Cross to conduct training or provide informational material.
- Notice something, notify someone: promote a culture of positive intervention .

May: Water Safety Month*

- Conduct a Shelter-in-Place Drill or other emergency drill.
- Review recreational water safety practices. Consider flash floods and identify areas in the community that are vulnerable to flooding.
- Review first aid for drowning or hypothermic person.

June: Wildfire Awareness Month

- Conduct an Evacuation Drill.
- Review hazards associated with wildfire smoke.
- Plan for graduation or end of year events with ICS fundamentals.
 - Coordinate with local first responders to plan and provide assistance for events.

***For schools in tsunami hazard zones:** expand instruction on the listed topics to include response to a tsunami during the months of October, January and May. Get to high ground and evacuate. Reunification procedures at an inland location should be reviewed and exercised if possible.
