

Teacher Uses

❖ **Teacher effectiveness**

Ignite teacher collaboration and improve coaching efficiency with video. Swivl can help you flip your professional development, accelerate video coaching through mentor networks and coaches and introduce reflective teaching practices.

❖ **Teachers in training**

In a growing number of states, teachers in training are now mandated to capture video of their student teaching. However, rarely are they given the tools or skill set required to manage this process. To automate lesson capture and simplify the production of videos, schools like Daemen College and Texas Tech have turned to Swivl.

❖ **Self-reflection**

Advance training and development, instructional techniques and effectiveness through teacher self-reflection.

❖ **Teaching Video**

Reclaim valuable class time for discussion and practical activities by using video to replace direct instruction. Teachers are able to create differentiated learning experiences through video and students are able to progress at their own pace.

❖ **Flip and blend instruction**

Create personalized learning environments by flipping and blending instruction. Swivl makes it easy for teachers to create and share content with students, moving the teacher from the "sage on the stage" to the "guide on the side."

❖ **Spotlight content**

Every school and district has pockets of excellence—educational leaders regularly demonstrating instructional best practices—that need to be captured and shared with others. Swivl makes it easy for anyone to start capturing these moments on video, build video libraries of best practices and ultimately enrich learning.

Students Uses

❖ **Project Based Learning**

Capture student success and achievement in project-based learning environments. Place Swivl in the hands of students to increase ownership and engage them in creative and meaningful learning experiences.

❖ **Absenteeism**

You can never predict when a student will miss class, but you know it will happen and happen regularly. Be prepared. Effortlessly record lessons, share them with absentees, cut your workload in half and put parents at ease.

❖ **Anytime, anywhere learning**

Connect with today's digital learners by providing them with multimodal learning experiences available anytime, anywhere. Swivl makes it easy for teachers to create engaging, video-based content for their students.

"Blend Learning Environments for Improved Engagement." *Uses*. N.p., n.d. Web. 13 Apr. 2015.
